Investment Objective & Philosophy

The Sub-Fund seeks to maximize long-term total return by investing mainly in investment grade fixed income securities and/or unrated securities that are determined by the Investment Manager to be of similar quality, and in derivative instruments that provide investment exposure to such securities. It invests in various types of bonds and other securities, typically corporate bonds, notes, collateralized bond obligations, collateralized debt obligations, mortgage-related and asset-backed securities, bank loans, money market securities, swaps, futures, municipal securities, options, credit default swaps, private placements and restricted securities. These investments may have interest rates that are fixed, variable or floating. The Sub-Fund invests in the U.S. and abroad, including emerging market countries, and may purchase securities of varying maturities issued by domestic and foreign corporations and governments.

Portfolio characteristics and holdings are subject to change at any time.

[1] It should not be assumed that an investment in the securities listed was or will be profitable. Security percentages are calculated on the total net asset value, including cash and cash equivalents.

[2] Includes all securities backed by the full faith and credit of the U.S. Government.

[3] Other represents mark-to-market values of derivatives which can include Options or Swaps, as applicable.

RISKS

The Share Class is assigned to this risk category because of price variations resulting from its currency and the nature of the Sub-Fund's investments and strategy. The above rating is based on the historic volatility of the Share Class and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Fixed income investments entail interest rate risk, the risk of issuer default, issuer credit risk, and price volatility risk. Funds investing in bonds can lose their value as interest rates rise and an investor can lose principal. Mortgage-backed and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. MBS related to floating rate loans may exhibit greater price volatility than a fixed rate obligation of similar credit quality. With respect to non-agency MBS, there are no direct or indirect government or agency guarantees of payments in pools created by non-governmental issuers. Non-agency MBS are also not subject to the same underwriting requirements for the underlying mortgages that are applicable to those mortgage-related securities that have a government or government-sponsored entity guarantee.

GENERAL

This marketing document is issued by TCW Funds (the "Fund"). It is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation.
