Share Class: A US Dollar (acc) - ISIN:LU0866202517

Independent Management Company: FundRock Management Company S.A. (the "Management Company").

Objectives and Investment Policy

The Fund aims to achieve a high level of income by actively managing which means that is not managed in reference of a benchmark.

The Fund mainly invests in debt issued by or linked to (i) Latin American companies, (ii) companies which carry out most of their business in Latin America, (iii) companies controlled by Latin American entities and by (iv) Latin American governments and institutions.

The debts can be issued in the local Latin American currencies as well as other hard currencies (including but not limited to Euro, US dollar and the British pound).

The Fund may use foreign exchange hedging transactions to aim to reduce the effect of fluctuations in value of USD against non-USD currencies in which the Fund's assets are denominated.

On a secondary basis, the Fund may also invest in promissory notes, deposits, cash, and in investments which can be easily converted into cash, such as Treasury Bills, short term government debt and money market funds.

The Fund may use financial contracts (derivatives) only to minimize market and other risks (including but not limited to interest and credit risk).

Please note that transaction costs may have material impact on performance.

Fund income (dividends) will not be paid out, but instead will be reinvested.

You may buy and sell your shares in the Fund on any Luxembourg and New York business day.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator is based on historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may shift over time. A risk indicator of "1" does not mean a risk-free investment.

This Fund is in category 4 because of the high range and frequency of price movements (volatility) of the Fund's investments.

The following are additional risks which are not adequately covered by the risk-reward indicator:

- The Fund invests in debts the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss.
- The Fund may use derivative transactions to hedge (minimize) risks. This may not be effective and, depending on market movements, may reduce gains or accentuate losses in the Fund.
- Investments in emerging markets are potentially more illiquid (cannot quickly and easily be converted into cash) than those in established markets.

The Fund is not guaranteed and your investment is at risk.
