Important Information

As of 26.06.2015, the Fund made changes to its investment strategy. Such a change can impact performance.

As of 26.06.2015, Franklin Multi-Asset Income Fund was renamed Franklin Global Multi-Asset Income Fund.

Effective 26.06.2015, the performance benchmark changed to London Interbank Offered Rate (LIBOR). The risk benchmark continues to be a blended benchmark of 55% Barclays Multiverse, 40% MSCI World and 5% Bloomberg Commodity Index. Prior to 01.07.2014, the Bloomberg Commodity Index was known as the Dow Jones UBS Commodity Index. Such a change can impact performance.

This document is intended to be of general interest only and does not constitute legal or tax advice nor is it an offer for shares or invitation to apply for shares of the Franklin Templeton Investment Funds SICAV (the Fund). Nothing in this document should be construed as investment advice. Given the rapidly changing market environment, Franklin Templeton Investments disclaim responsibility for updating this material. Subscriptions to shares of the Fund can only be made on the basis of the current prospectus and where available, the relevant Key Investor Information Document, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. No shares of the Fund may be directly or indirectly offered or sold to nationals or residents of the United States of America. Shares of the Fund are not available for distribution in all jurisdictions and prospective investors should confirm availability with their local Franklin Templeton Investments representative before making any plans to invest. References to particular industries, sectors or companies are for general information and are not necessarily indicative of a Fund's holding at any one time. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. All or most of the protections provided by the UK Regulatory System will not apply to Franklin Templeton Investment Funds (SICAV) Investors. An investment in the Fund entails risks which are described in the Fund's prospectus and where available, the relevant Key Investor Information Document.

Source for data and information provided by Franklin Templeton Investments, as of the date of this document, unless otherwise noted. Benchmark related data provided by FactSet, as of the date of this document, unless otherwise noted. References to indices are made for comparative purposes only and are provided to represent the investment environment existing during the time periods shown. An index is unmanaged and one cannot invest directly in an index. The performance of the index does not include the deduction of expenses and does not represent the performance of any Franklin Templeton fund.

The fund charges all or part of its management fees to Capital. This could lead to a higher level of income but may constrain capital growth.

Prior to July 1, 2014 the Bloomberg Commodity Index was known as the Dow-Jones UBS Commodity Index.

Fund Overview: The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market unit price of the fund as at the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions.

Fund Management: CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

EUSD Status: Any tax information provided is intended to be a general guide and should not be relied upon as a basis for calculating individual liabilities. The information does not take into consideration your / your clients / or any personal circumstances and may be subject to change in the future. If you are in any doubt about the impact of tax on your investment you should consult a qualified tax adviser.

© Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Asset Allocation: Characteristics data includes characteristics of securities, currencies or other assets underlying derivative positions and is shown on a net notional exposure basis.

Top Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Characteristics data includes characteristics of securities underlying derivative positions and is shown on a net notional exposure basis. Note: quality allocation data excludes characteristics of securities underlying any derivative positions.

Calculations are based on market value.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions and unrated securities are not reflected in the ACQ.

Note on Derivatives and Net Notional Exposure: Allocation and characteristics data is provided to help illustrate the Fund's tactical adjustment of its exposure to certain asset classes, regions, currencies and sectors, incorporating the "net notional exposure" obtained through various derivative instruments, primarily stock index futures, government bond futures and currency and currency index forwards and futures contracts. Notional exposure is a term used to illustrate in general terms how much of the Fund's assets may be exposed to risk, as derivative contracts typically require an initial net investment that is smaller than would be required to gain similar market exposure through the purchase and sale of stocks, bonds and other more traditional investments. "Net notional exposure" is the sum of the total of each notional exposure within each category. For example, a 20% long notional position in the S&P 500 and a 10% short notional position in the MSCI EAFE would result in a 10% net notional exposure to equity. Notional exposure may differ significantly from the amounts included in the Fund's calculation of its net asset value and in shareholder reports.

The use of derivative instruments may allow tactical adjustments to be made quickly and efficiently, and the historical data provided may differ significantly from the Fund's current allocations. Derivative instruments involve costs, may be volatile and illiquid, may give rise to leverage and may involve a small initial investment relative to the risk assumed. With over-the-counter derivatives, there is the risk that the other party to the transaction will fail to perform.

Ongoing Charges: The Ongoing Charge Ratio (OCR) represents all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period.

For professional investors only. Not directed at retail investors.

Important Information (continued)

Composition of Fund: Geographic holdings data includes characteristics of securities, currencies or other assets underlying derivative positions and is shown on a net notional exposure basis. Sector characteristics data includes characteristics of securities underlying derivative positions and is shown on a net notional exposure basis; percentages reflect net notional exposure obtained through derivative instruments and therefore may from time to time exceed 100%. Note: quality allocation data excludes characteristics of securities underlying any derivative positions. Performance attribution is calculated in the base currency of the fund.
