FAST - Emerging Markets Fund

a sub-fund of Fidelity Active STrategy

FAST - Emerging Markets Fund E-ACC-Euro
(ISIN:LU0650958076)

This fund is managed by FIL Investment Management (Luxembourg) S.A.

Objectives and Investment Policy

Objective: The fund aims to achieve capital growth over the long term.
Investment Policy: The fund invests at least 70% of its assets, directly or indirectly, in equities of, and related instruments providing exposure to, companies that have their head office in, are listed in or exercise a predominant part of their activity in global emerging markets including, although not limited to, Latin America, Asia, Africa, Eastern Europe (including Russia) and the Middle East. The fund may also invest in Money Market Instruments on an ancillary basis. The fund invests at least 50% of its assets in securities of companies with favourable environmental, social and governance (ESG) characteristics.
The fund may invest less than 50% of its assets in China A and B shares (in aggregate).
The fund aims to outperform the benchmark.
Investment Process: In actively managing the fund, the investment manager considers valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other characteristics. The Investment Manager also considers ESG characteristics when assessing investment risks and opportunities. In determining favourable ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices. The fund adheres to the Fidelity Sustainable Family of Funds standards. For more information, see "Sustainable Investing Policy and ESG Integration" and the Sustainability Annex sections of the Prospectus.
Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund uses derivatives, including complex derivative instruments or strategies, to meet the investment objectives of the fund which may result in leverage. The fund may maintain long and short exposure to securities through derivatives.
Benchmark: MSCI Emerging Markets Index (the "Index")an index that does not take into account ESG characteristics. Used for: investment selection, risk monitoring, and performance comparison.
The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.
Risk Management Method: Relative VaR. Expected gross leverage: 300% (may be higher or lower but not expected to exceed 400%).
Base Currency: EUR
Distribution: As this is a non-distributing share class, dividends are re-invested.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.
The risk category shown is not guaranteed and may change over time.
The lowest category does not mean a "risk free" investment.
The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
The value of your investment may fall as well as rise and you may get back less than you originally invested.
The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
This Fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high. Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
Additional risks: liquidity.
