FRANKLIN
TEMPLETON

Legg Mason Brandywine Global Fixed Income Fund

Class X Euro Accumulating (Hedged) (IH)

ISIN: IE00B93N8153

A sub-fund of: Legg Mason Global Funds plc

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve income and growth of the fund's value.

Investment Policy

- The fund invests in bonds issued by various governments.
- The fund only buys bonds that are highly rated at the time of purchase.
- The fund may invest in bonds issued in various currencies.
- The fund may invest up to 20% in bonds that are not represented in the FTSE World Government Bond Index but are still highly rated at the time of purchase.
- The fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

Share Class Policy

- For this share class, the investment manager intends to index hedge "(IH)" the currency exposure, which means that the share class will retain a degree of exposure to the currencies that are significant to the fund's investment strategy in comparison to the currencies of the relevant index.

Benchmark: FTSE World Government Bond Index

Manager's Discretion: The fund is actively managed, and the investment manager has discretion in selecting investments within the fund's objective and investment policies. The investment manager seeks to provide an average annualised return for the fund, on a gross basis over rolling 5-year periods, equal to the return of the benchmark plus 2%. There is no guarantee that the investment manager will meet its target, and the targeted return does not take into account the fees charged, which will reduce the fund's return.

Fund's Base Currency: US Dollar

Share Class Currency: Euro

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is EUR 1,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in a diversified portfolio of bonds from various countries and sectors, along with exposure to various currencies, have historically been subject to moderate fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Concentrated fund: The fund invests in fewer bonds than other funds which invest in bonds usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual investment performs poorly.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

Index hedged class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the currencies that are significant to the fund. The investment manager will try to protect the value of your investment against such changes, but it may not succeed. Also, unlike other hedged share classes, the index hedged share classes retain a degree of exposure to the currencies that are significant to the Fund's investment strategy in comparison to the currencies of the relevant index.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	0.87%
Charges taken from the fund under certain specific conditions	
Performance fee:	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2021. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.

Past Performance

The fund was launched on 1 October 2003 and the share class began issuing shares on 19 August 2015.

Past performance has been calculated in EUR.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.
