

Franklin Global Sukuk Fund A (acc) EUR

Sukuk LU0923115892 Factsheet as of 30 September 2023

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID/KIID before making any final investment decisions.

Investment Overview

The primary characteristic of a Shariah fund is its compliance with Shariah guidelines based on the principles of Islamic finance. A Shariah fund is required to appoint a Shariah supervisory board which independently ensures that the fund also meets such Shariah guidelines in the management of all of its assets. The Fund aims to maximise total investment return by achieving an increase in the value of its investments and earning income from Shariah-compliant securities over the medium to long term. The Fund pursues an actively managed investment strategy and invests mainly in Shariah-compliant debt securities, including Sukuk of any quality (including lower quality securities such as non-investment grade securities) and of any maturity, issued by governments, government-related entities and corporations located in developed and emerging markets, and Shariah-compliant short-term instruments (up to 40% of the Fund net assets).

Past performance does not predict future returns.

The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested.

Performance details provided are in share class currency, include the reinvested dividends gross of tax and are net of management fees. Sales charges, taxes and other locally applied costs have not been deducted. The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

Up to date performance figures can be found on our website.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Charges

Minimum Investment	USD 1000
Maximum Initial Charge	5.75%
Exit Charge	-
Ongoing Charges Figure	1.50%
Performance Fee	—

The charges are the fees the Fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

The **Ongoing Charges Figure (OCF)** is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period.

Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Portfolio Data Information

Exposure: Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

Credit Quality is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by Standard and Poor's, Moody's Investors Service and/or Fitch Ratings, Ltd. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, the manager assigns each security the middle rating from these three agencies. When only two agencies provide ratings, the lower of the two ratings will be assigned. When only one agency assigns a rating, that rating will be used. Foreign government bonds without a specific rating are assigned a country rating, if available. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the Fund's portfolio does not apply to the stability or safety of the Fund. These ratings are updated monthly and may change over time. **Please note, the Fund itself has not been rated by an independent rating agency.**

What are the Risks?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Counterparty risk:** the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes. **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets. **Shariah compliance risk:** the risk that the restriction to invest only in Shariah-compliant securities may place the Fund at a comparative disadvantage vs. funds that do not have this restriction. Returns to shareholders may also be reduced due to payments to Shariah approved charities to "purify" dividends **Sukuk risk:** the risk of loss arising from investing in sukuk instruments, which may fluctuate in value due to the impact of macro-economic factors on the supply and demand for financing or the willingness or ability of the counterparty (sovereign, sovereign-related, or corporate) to make payments according to the terms of the Sukuk. Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Comparator: Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Average Credit Quality:** The average credit quality reflects the holdings of the underlying issues, based on the size of each holding and ratings assigned to each based on rating agency assessments of its creditworthiness. **Weighted Average Maturity:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes. **Yield to Maturity ('YTM')** is the rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate. Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

This is a sub-fund ("Fund") of Franklin Templeton Shariah Funds, a Luxembourg-domiciled investment company with variable capital-specialised investment fund (SICAV-FIS). Subscriptions to shares of the Fund can only be made based on the Fund's current Prospectus and, where available, the relevant KID/KIID, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. An investment in the Fund entails risks which are described in the Fund's prospectus and, where available, the relevant KID/KIID. The Fund's documents are available in English, Arabic, French and Spanish at www.franklinresources.com/all-sites or can be requested via FT's European Facilities Service which is available at www.eifs.lu/franklintempleton. In addition, a summary of investor rights is available www.franklintempleton.lu/summary-of-investor-rights. The summary is available in English. Franklin Templeton Shariah Funds are notified for marketing in multiple EU Member States under the UCITS Directive. Franklin Templeton Shariah Funds can terminate such notifications for any share class and/or sub-fund at any time by using the process contained in Article 93a of the UCITS Directive. For the avoidance of doubt, if you decide to invest, you will be buying units/shares in the Fund and will not be investing directly in the underlying assets of the Fund.

Given the variety of investment options available today, we suggest investors seek guidance from a Financial Adviser. © Morningstar, Inc. All rights reserved.
