

AMUNDI FUNDS ABSOLUTE VOLATILITY WORLD EQUITIES - RHE

FACTSHEET

31/12/2017

ABSOLUTE PERFORMANCE

Key information (source : Amundi)

Net Asset Value (NAV) : 70.64 (EUR)
NAV and AUM as at : 29/12/2017
Assets Under Management (AUM) :
419.96 (million EUR)
ISIN code : (A) LU0839527339
(D) LU0839527685
Bloomberg code : AMARHEC LX
Benchmark : None

Investment Objective

The sub-fund aims to achieve a positive return in any type of market condition (absolute return strategy). Specifically, the sub-fund seeks to outperform (after applicable fees) the USD LIBOR 1-month index + 3% a year over any given 3- year period, while offering controlled risk exposure.

Risk & Reward Profile (SRRI)

Lower risk, potentially lower rewards

Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

Returns

Performance evolution (rebased to 100) from 16/09/2009 to 29/12/2017*

A : Simulation based on the performance from September 3, 2009 to October 14, 2012 of the "AHE" share class of the Sub-Fund.

Management commentary

The main event in December was the adoption of the tax reform promised by Donald Trump, which includes i.a. a significant reduction of the corporate tax rate. As widely expected, the Fed raised its rate by 0.25% and maintained its course with respect to future rate hikes. The monetary policy tightening did not prevent the Euro from rising further versus the US dollar. It is back at the highs reached in September.

In this context, there was a large dispersion in equity market performances across regions. Despite a well oriented first half of the month, equity markets of the Eurozone ended the month in negative territory. As opposed to the S&P 500, which delivered a positive performance for the 14th month in a row (+1.1%), and in Hong Kong to the HSI and HSCEI, which were up more than 2%, the Euro Stoxx 50 was down more than 1.7%. Thus it ended the year below the 10% mark at 9.2%, net return. The bulk of the profit taking occurred in the last days of the year as fears of political risk in Europe returned and also because of the appreciation of the European currency. The Nikkei 225 delivered a slightly positive performance at +0.3%.

However, this evolution and the consequential increase of realised volatility of the Euro Stoxx 50 to 11%, did not stop volatility sellers as it remains well below implied volatility.

The VSTOXX ended the month unchanged at 13.5% while the VIX and VNKY respectively lost 0.2 and 1 point at 11% and 16%. The 1-year implied volatility of our global basket dropped slightly, ending the year at 14.8% (S&P 500 at 13.6%, Euro Stoxx 50 at 15.25%, Nikkei 225 and HSI both at 17.35%, HSCEI at 21.3%), i.e. 340 bps below the level at the end of 2016. The reasons for the low implied volatilities are the same as last month, i.e. a lack of demand for protection, combined with a strong appetite for strategies offering yield. By selling index options the latter weigh on implied volatilities.

In this context, the strategy implemented in the fund cannot deliver good results. Indeed, the directional engine suffered from the decline in volatilities with an average sensitivity at 2.36 in December. Furthermore high replication costs again impacted the second engine. The geographic allocation was also a negative contributor to performance this month (-0.11%) due to our exposure to HSI and HSCEI, indices for which the volatilities decreased more than the one of the Nikkei 225. The sensitivity to volatility (Vega) remained stable and stood at 2.37 at the end of the month, of which 37% on the US, 33% on Europe and 30% on Asia.

We remain cautious and do not significantly increase our exposure. We will wait how 2018 begins to adapt our portfolio in terms of maturities and its Vega level. Currently, a little bit more than half of the exposure is on December 2018, while the remainder is on June 2019. Considering the very good year for equities in 2017, it is likely that markets start the year quietly. While this will again weigh on performance, it will also be an opportunity to increase our volatility sensitivity at cheap levels in order to rebound even more in case of market stress. Indeed, the higher the complacency – as it is the case on the volatility asset class –, the stronger the trend reversal in case of a market shock. We believe that 2018 may see a turning point, mainly due to the positioning of investors and the herd behavior, rather than due to an economic slowdown.

This document is designed exclusively for institutional, professional, qualified or sophisticated investors and distributors. It is not meant for the general public or private clients of any jurisdiction or those qualified as 'US Persons'. Approved investors in regard to the European Union are those which are defined as "Professional" investors in Directive 2004/39/EC of 21 April 2004 "MiFID" or, as the case may be, as defined under each local legislation and, insofar as the offer in Switzerland is concerned, "qualified investors" as set forth in the federal Law on Collective Investments (LPCC), the Ordinance on collective investments of 22 November 2006 (OPCC) and the FINMA 08/8 Circular regarding the legislation on collective investments of 20 November 2008. This document shall not, under any circumstance, be sent within the European Union to non "Professional" investors as defined by the MFI or under each local legislation, or in Switzerland to those investors which are not defined as "qualified investors" in the applicable law and regulations.

Legal information

This document is provided for information purposes only and does not constitute a recommendation, a solicitation, an offer, advice or an invitation to purchase or sell any units or shares of the fund (FCP), collective employee fund (FCPE), SICAV, SICAV sub-fund or SICAV investing primarily in real estate (SPPICAV) (collectively, "the Funds") described herein and should in no case be interpreted as such. This document is not a contract or commitment of any form. Information contained in this document may be altered without notice. The management company accepts no liability whatsoever, whether direct or indirect, that may arise from the use of information contained in this document. The management company can in no way be held responsible for any decision or investment made on the basis of information contained in this document. The information contained in this document is disclosed to you on a confidential basis and shall not be copied, reproduced, modified, translated or distributed without the prior written approval of the management company, to any third person or entity in any country or jurisdiction which would subject the management company or any of the funds, to any registration requirements within these jurisdictions or where it might be considered as unlawful. Not all of the funds are systematically registered in all jurisdictions of all investors. Investment involves risk. The past performances shown in this document, and simulations based on these, do not guarantee future results, nor are they reliable indicators of future performance. The value of an investment in units or shares of the funds may fluctuate according to market conditions and cause the value of an investment to go up or down. As a result, fund investors may lose all or part of the capital originally invested. All potential investors in the funds are advised to ascertain whether such an investment is compatible with the laws to which they are subject and the tax implications of such an investment prior to investing, and to familiarise themselves with the legal documents in force for each fund. Unless stated otherwise, the management company is the source of the data in this document. Unless stated otherwise, the data in this document are correct as at the date specified under MONTHLY REPORT at the beginning of this document.
