

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Class: AC USD (Capitalisation) LU0862302675

UBAM is managed by UBP Asset Management (Europe) S.A.

The Fund seeks to grow capital and generate income by investing primarily in Emerging countries corporate bonds.

The Fund is actively managed and invests in relatively high-quality bonds with a minimum credit rating of BBB- (S&P or Fitch) or Baa3 (Moody's).

As an exception to this rule, the Fund may invest up to 15% of its net assets in non-rated products/issuers.

The Fund will invest at least 80% in the currencies of OECD countries. The currency risk against USD will be largely hedged.

The Fund uses the JP Morgan CEMBI Diversified Investment Grade Index (the "Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Fund although the Investment Manager has significant discretion to deviate from its securities and weighting.

The Fund may invest its net assets up to:

- 100% in Emerging countries

This exposure can be increased up to 120% through derivatives

- 20% in Contingent Convertible bonds (CoCos).

The Fund's base currency is USD.

Any income received by the Fund is reinvested (capitalisation share class).

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: United States (US).

Details of the closing days are available here: <https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum 3 years.

Risk Category 4 reflects average/moderate potential gain and/or loss in the value of the portfolio.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Counterparty risk: The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty to the transactions will fully or partially fail to

honour its contractual obligations. This may result in a financial loss for the Fund.

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Currency risk: The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Emerging countries risk: The Fund invests in overseas countries which carry a higher risk than investing in larger established countries. Investments in Emerging countries are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in Emerging countries rather than more developed countries may encounter difficulties when buying and selling investments. Emerging countries are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
