## Key investor information

*This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.*

### UBAM - Global Convertible Bond, a sub-fund of UBAM

**Class: R, C EUR (Capitalisation) LU0940718280**

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

### Objectives and investment policy

The Fund seeks to grow your capital and generate income primarily by investing as a master / feeder structure in the French SICAV UBAM Convertibles Global.

The master, UBAM Convertibles Global, whose classification is "diversified", seeks to increase your capital and generate income, primarily through investments in convertible bonds and related securities. For managing overall exposure to equities and interest-rate risk, the Fund may use derivative instruments (futures, options etc...) on World stock markets.

Convertible bonds are debt instruments that may be converted into equities under certain conditions. This means that they have characteristics comparable to those of equities while maintaining the characteristics of conventional bonds.

The Fund consists of a portfolio that is actively managed on a discretionary basis and broadly diversified.

Considering the fact that less than 100 % of the net assets of the Fund may be invested in UBAM Convertibles Global, the performance of the Fund can be slightly different than the Master Fund's performance.

The value of the Fund is calculated and denominated in Euros. Currency risk will be hedged systematically, and only residual exposure below 10 % may remain. In order to achieve its objectives, the compartment invests up to two thirds of its assets in convertible bonds from any geographical area, with any rating or unrated, including a maximum of 50% of its assets in convertible bonds from emerging countries. This means the compartment may be exposed to high-yield, speculative-grade securities.

The compartment invests up to 33% of its assets in non-convertible bonds or similar (from private and public issuers), of any rating. The compartment has exposure of between 0% and 70% to the equity markets (its target exposure is between 10% and 60%).

Investors in the Fund can redeem their units on any business day in Luxembourg, although we recommend a holding period of at least three years.

Any income received by the Fund is reinvested (capitalisation share class).

### Risk and reward profile

With lower risk, With higher risk,  
  
 potentially lower rewards potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 4 reflects average/moderate potential gain and/or loss for the portfolio. This is due to investments in bonds in emerging markets.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

**Emerging market risk:** The Fund invests in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

**Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

**Credit risk:** The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

**Counterparty risk:** As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

## Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None
The percentage shown is the maximum amount that can be paid out of your investment. Your financial advisor or distributor can inform you of the associated entry and exit charges.	
Charges taken from the Fund over a year	
Ongoing charges	2.86%
Charges taken from the Fund under specific conditions	
Performance fee	None

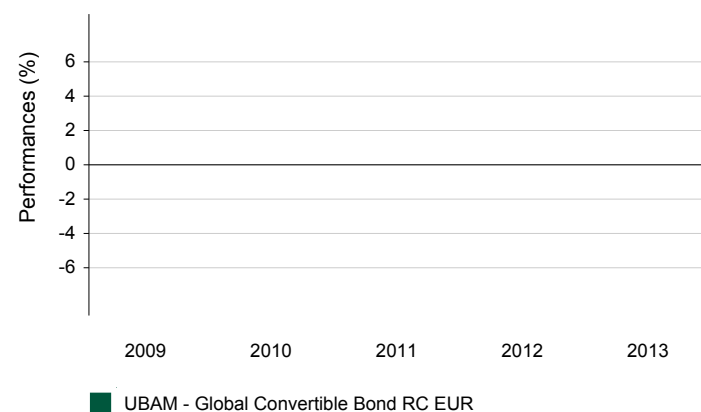

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

The indicated ongoing charges are an estimate based on the expected total amount of charges. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

**For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at [www.ubp.com](http://www.ubp.com).**

## Past performance

Information on past performance will be provided after the close of the first financial year.

The performance figures shown in the bar chart are not a reliable indication of future performance.

There is insufficient data to provide a useful indication of past performance to investors.

Fund creation date: 23 August 2013

Share class launch date: Not issued.

Share class currency: Euro.
