RISKS

The risk indicator assumes that you will hold the product for at least 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Investing in this product also entails risks that are materially relevant but not included in the risk indicator:

- Concentration risk: As the portfolio is mainly composed of equity securities issued by European real estate companies, it is likely to be more specifically exposed to the economic development of this sector and area.
- Liquidity risk: Instruments in the real estate sector may have high liquidity risk. This risk mainly arises during periods of market tension

This product does not include any protection from future market performance so you could lose some or all of your investment.

We refer to the prospectus and KID for more explanation and a complete overview of the risks.
