## Investment objective

This Sub-Fund aims to generate long-term capital growth through a concentrated portfolio of equities, equity-related securities, bonds, and currencies. The Sub-Fund will invest primarily in securities of companies, which are incorporated, listed in or have their area of primary activity in Japan. The Sub-Fund may also invest in depository receipts including ADRs and GDRs, convertible bonds, preference shares, warrants and fixed income securities issued by Japan entities.

## Performance

Calendar year returns (%) (Class A (hedged))

Source: Eastspring Investments (Singapore) Limited. Past performances is not a guide to future performance and should not be the sole factor of consideration when selecting a product. The returns shown during the first year relate to the performance of the share class since its inception to the end of that calendar year. For full details, please refer to the performance disclosure.

**Benchmark:** This Sub-Fund aims to outperform the return of MSCI Japan Index ("Benchmark"). The Sub-Fund is actively managed. The Benchmark has been selected because it is representative of the investment universe of the Sub-Fund and it is therefore an appropriate performance comparator. The majority of the Sub-Fund's equity securities will not necessarily be components of, or have weightings derived from the Benchmark. The Investment Manager may use its discretion to overweight or underweight certain components of the Benchmark and may invest in companies or sectors not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Sub-Fund will materially deviate from the Benchmark.

## Summary risk indicator (SRI)

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

There are other risks materially relevant to the PRIIP which are not included in the summary risk indicator. For more information, please refer to the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance Disclosure:

(p.a.): per annum. **Source: Eastspring Investments (Singapore) Limited.** Returns are based in share class currency and computed on NAV-NAV basis with net income reinvested, if any. Since inception returns for periods less than a year are not annualised. The benchmark for the hedged share classes, if any, is also calculated on a hedged basis. Benchmark is for information purposes only unless specifically referenced in the Investment Objective and Policy section. Wef July 2018, the monthly fund and benchmark returns calculated are aligned to the last NAV date of the fund for the month. Returns may increase or decrease as a result of currency fluctuations. **Past performances is not a guide to future performance and should not be the sole factor of consideration when selecting a product.**

## Environmental, social and governance (ESG) characteristics

All data is from MSCI ESG Fund Ratings. Note the fund's ESG characteristics may differ from MSCI ESG Fund Ratings from time to time.

Potential risks and opportunities relating to environmental, social and governance factors are considered within the context of the investment objective of the fund, the fund's investment philosophy, investment approach and process. For the avoidance of any doubt, the above benchmark is a performance benchmark as per section 1.1 of the SICAV Prospectus and is not used as a reference for the attainment of the fund's E/S characteristics. The fund's aggregate ESG score and weighted average carbon intensity data are to be considered as outcomes of the investment approach and are not necessarily direct determinants of investment decisions. The fund's aggregate ESG score is derived from third party ESG vendor methodologies and are disclosed for illustrative purposes only. The ESG scoring methodology reflects the analysis and opinions of the third party ESG vendor, which may differ from the overall investment view held by the fund.

Eastspring Investments - Japan Dynamic Fund Class A (hedged) qualifies as Article 8 fund within the meaning of Sustainable Finance Disclosure Regulation ("SFDR" EU 2019/2088), promoting Environmental (E) and Social (S) characteristics without engaging into sustainable investing. Further SFDR disclosures, including information on the promotion of environmental and social characteristics by the fund are available under the SICAV Prospectus as well as under <https://www.eastspring.com/lu/funds/fund-downloads>.

## Glossary

**Overall ESG Score:** Overall ESG Scores represents either the ESG Ratings Final Industry Adjusted Score or Government Adjusted ESG Score of the issuer. ESG Rating indicate how well an issuer manages its most material ESG risks relative to sector peers. Government Ratings indicates overall environmental, social and governance (ESG) performance of a region. The Overall ESG Score is provided on a 0 to 10 score, with 0 and 10 being the respective lowest and highest possible scores.

**ESG Coverage:** Percentage of a fund's holdings that have ESG ratings data.

**Carbon Intensity:** This figure is measured by Weighted Average Carbon Intensity (WACI) which is the volume of carbon emissions per million dollars of revenue, expressed in CO2e/\$M revenue. The carbon emissions of a company cover scope 1 and scope 2 carbon emissions.

**Carbon Intensity Coverage:** Percentage of a fund's holdings that have Carbon Intensity data

**Morningstar overall rating:** The rating measures how well a fund has balanced risk and reward relative to its peers. Star ratings are strictly based on past performance and Morningstar suggests investors to use them to identify funds that are worthy for further research. The top 10% of the funds in a category will receive a 5-star rating, the next 22.5% receives a 4-star rating and the next 35% receives a 3-star rating. Only ratings of 3 to 5 stars are displayed on the factsheet.

**On-going charges:** The Ongoing Charge represents the costs you can reasonably expect to pay as an investor from one year to the next, under normal circumstances. For more information about charges, please refer to the most recent Prospectus.

**Performance fees:** A payment awarded to a fund manager if certain performance levels are attained in a set period of time. Often, it refers to the achievement of a return on a fund over and above the investment objective. Eastspring Investments do not charge a performance fee.

**Sharpe ratio:** The Sharpe ratio is a measure for calculating risk-adjusted performance, taking into account the return on a risk-free investment. The higher the Sharpe ratio, the better the fund's historical risk-adjusted performance.

**Synthetic risk and reward indicators ("SRRI"):** The SRRI aims to provide investors with a method of assessing a fund's risk. It measures the volatility of the fund. A higher volatility means there is greater uncertainty about the size of the changes in a fund's value. This means that the price of the fund can change dramatically over a short time period in either direction. A lower volatility means that a fund's value does not fluctuate dramatically, but changes in value at a steady pace over a period of time. Lowest volatility does not mean risk-free investments.

**Tracking error:** The tracking error calculates the volatility of the difference in returns between a fund and its benchmark.

**Volatility:** Volatility is the observed price movement of an asset. It is generally considered to be a measure of risk.
