The charges you pay are used to pay the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The **entry, conversion** and **exit charges** shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or fund distributor.**The ongoing charges** figure is based on expenses for the period ending on December 31st, 2014. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units/shares in another collective investment undertaking.**For more information about charges, please see section "Fund expenses" of the Fund prospectus, which is available at www.pictetfunds.com**

INVESTMENT OBJECTIVE

The sub-fund invests at least two-thirds of its total assets in the shares of companies whose main business and/or registered office is in Japan. The sub-fund seeks to grow the capital invested by optimising the alpha-generating potential with a 130/30 management approach, i.e. by combining a long strategy on 130% of total assets with a short strategy on 30%. Net exposure is maintained at 100%.

RISK CONSIDERATIONS

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

- Historical data, such as that used to calculate the synthetic indicator, might not be a reliable indication of the future risk profile of the Share class.
- The risk category shown is neither a target nor a guarantee and may change over time.
- The lowest risk category does not mean a risk-free investment.
- Equity investments are subject to high price volatility (variations in net asset value of the Share class), but may offer rewards in line with the risks taken, which is why they are in this risk category.
- This value is affected by various factors, including:
  - The Compartment offers no capital guarantee or asset protection measures.
  - This asset class is subject to political and economic risks which may have a significant impact on the Compartment's performance and volatility.
- The Share class also bears the following risks that are not explained by the synthetic risk indicator:
  - Liquidity risk: when market conditions are unusual or a market is characterised by particularly low volumes, the Compartment may encounter difficulties in valuing and/or trading some of its assets, particularly to satisfy large redemption requests.
  - Operational risk: the Compartment is subject to the risk of material losses resulting from human error or system failures or incorrect valuation of the underlying securities.
  - Counterparty risk: the use of derivatives in the form of contracts with counterparties may imply significant losses if a counterparty defaults and cannot honour its liabilities.
