## DECEMBER 2018 / FACTSHEET

### OBJECTIVE

The Barings Global Senior Secured Bond Fund ("the Fund") is an actively managed senior secured bond strategy that seeks to provide high current income generation and, where appropriate, capital appreciation.

### STRATEGY

The Fund seeks to achieve its investment objective by investing primarily in a portfolio of senior secured high yield (i.e. sub-investment grade) corporate debt instruments which are listed or traded on recognized markets in Europe or North America. Opportunities are captured using a fundamental credit selection process performed by our in-house team of research analysts coupled with a regional allocation strategy determined by our Global High Yield Allocation Committee.

### MARKET OPPORTUNITY

- Exposure to senior secured bonds can provide additional security
- Over the past few years, generally the market has not priced in the benefit of secured versus unsecured risk as spreads traded in line with each other
- Default rates outside of commodities continue to remain low as economic fundamentals for corporate issuers have remained stable
- Senior secured issuance accounts for a meaningful percentage of the U.S. and European high yield debt market

**PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.** An investment entails a risk of loss. Performance reflects the deduction of fees and expenses based upon the lowest fee share class available within the periods provided. Please note that this does not reflect what a new investor will experience, as their returns will be reduced by the deduction of such fees and expenses of the applicable share class. Returns for periods greater than one year are annualized.

### Key Risks:

- Debt securities are subject to risks that the issuer will not meet its payment obligations (ie, default). Low rated (high yield) or equivalent unrated debt securities of the type in which the fund will invest generally offer a higher return than higher rated debt securities, but also are subject to greater risks that the issuer will default.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets
- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings Global Senior Secured Bond Fund tranche D USD Acc share was rated 5 stars against the following numbers of EAA Fund Global High Yield Bond investments over the following time periods: 461 investments in the last three years, 317 investments in the last five years, and 124 investments in the last ten years. Past performance is no guarantee of future results.

Morningstar Rating is for the D share tranche only; other tranches may have different performance characteristics.
