

## Fisher Investments Institutional Emerging Markets Equity Fund, USD <sup>1</sup>

**Investment Objective:** The investment objective of the Fisher Investments Institutional Emerging Markets Equity Fund (the "Fund") is to outperform the Benchmark by investing primarily in emerging markets securities. There is no assurance that the investment objective of the Fund will actually be achieved.

**Benchmark:** MSCI Emerging Markets Index. The Benchmark is a free float-adjusted market capitalisation index that is designed to measure equity market performance of emerging markets.

**Investment Policy:** The Fund invests primarily in equities and equity-related securities of, or linked to, issuers included in the country indices represented within the Benchmark, but may invest up to 20% of its total assets in equities and equity-related securities of, or linked to, issuers established in countries not represented within the Benchmark and may invest up to 10% of its total assets in unlisted equities. The Fund is actively managed by the Investment Manager, meaning that investment decisions are made on a fully discretionary basis. Accordingly, the portfolio holdings may significantly deviate from the Benchmark. Prior to investing in the Fund, you should take into account all characteristics and objectives of the Fund as described in the Fund's prospectus and supplement.

The calculation methodology for Ongoing Charges is slightly different for UCITS KIIDs and PRIIPs KIDs which is the reason for the different figures. In particular, figures for UCITS KIIDs do not include fees or expenses paid by the Fund for buying and selling investments, whereas the figures for PRIIPs KIDs do include such fees and expenses. See the Fund's prospectus and PRIIPs KID or UCITS KIID (as appropriate) for more information on charges. The total fees and charges deducted from the Fund will reduce the potential growth of your investment.

## RISKS

Investing in securities involves the risk of loss and there is no guarantee that all or any capital invested will be repaid. Past performance is never a guarantee of future returns. Investing in shares of the Fund does not grant an investor any ownership interests in the assets held by the Fund. Before investing in the Fund, the Fund's investment objectives, risk, charges and expenses should be carefully considered, including:

**Currency Risk:** The base currency of the Fund is USD. The non-USD share classes may be affected unfavourably by fluctuations in currency rates.

**Liquidity Risk:** Some of the Fund's investments may be difficult to buy or sell. This might affect the price at which the investments can be sold, which would affect the Fund's value.

**Counterparty Risk:** There is a risk that counterparties to some of the Fund's investments may not perform their obligations and that transactions may not settle.

**Emerging Markets Risk:** The Fund invests in the emerging markets equities market, which carries a higher than average investment risk and the Fund may have problems or delays in getting its investments back when required.

**Stock Connect Risk:** The Fund may trade through the Shanghai and Shenzhen Stock Connect programmes, which introduces regulatory risks that may prevent timely purchases and/or sales of securities and other risks unique to the stock connect programme.

As further described in the Fund's UCITS KIID or PRIIPs KID (as appropriate), this Fund has the following risk classification scores (scores may be different due to slightly different risk calculation methodologies for UCITS KIIDs and PRIIPs KIDs) due to its exposure to equity markets, which means the Fund may experience significant volatility:

UCITS KIID Risk Classification: 6

PRIIPs KID Risk Classification: 5
