About the fund

The Fund aims to achieve a positive absolute return over the long term regardless of market conditions, though a positive absolute return is not guaranteed over any time period.

The Fund will typically invest at least 60% of its total assets, by taking long and short positions, in equities or equity related derivative contracts of:

- companies having their registered office in the United Kingdom; and
- companies that do not have their registered office in the United Kingdom but either (i) carry out a predominant proportion of their business activity in these markets, or (ii) are holding companies which predominantly own companies with registered offices in the United Kingdom, or (iii) are listed on the London Stock Exchange.

In addition, in seeking to implement the Fund's investment strategy, manage market exposure and ensure that the Fund remains sufficiently liquid to cover obligations arising from its derivative positions, a substantial proportion of the Fund's assets may at any time consist of cash, near cash, deposits and/or Money Market Instruments. The Fund will invest in companies of any market capitalisation.

Long positions may be held through a combination of direct investment and/or derivative instruments, and short positions will be held through derivative positions, including but not limited to swaps and futures. The use of derivatives forms an important part of the investment strategy.

The Fund may also invest at the Investment Manager's discretion in other Transferable Securities, derivative instruments and collective investment schemes. Ben Wallace joined Henderson as a fund manager in 2011 as part of the Gartmore acquisition. Prior to that, Ben worked with Luke Newman as a Senior Investment Manager at Gartmore. Before joining Gartmore in 2002, Ben worked at Deutsche Asset Management, where he managed UK equity funds from 1997-2002. Ben graduated from the University of Edinburgh with a BCom (Hons). He is also a member of the UK Society of Investment Professionals. Luke Newman joined Henderson as a fund manager in 2011 as part of the Gartmore acquisition. Prior to that, Luke worked at Gartmore from June 2009 as co-manager with Ben Wallace on a number of funds. Previously, Luke was a UK Fund Manager at Deutsche Asset Management running high performance retail and institutional mandates before moving to Foreign & Colonial in 2005. Luke graduated from the University of Warwick with a BSc (Hons) in Economics & Politics.

On 16 January 2014, the Fund changed its investment objective and policy.

On 31 March 2010 the Fund changed its name, investment objective, risk profile, Fund Manager and fee structure. The Fund was previously known as the Gartmore SICAV United Kingdom Fund.

General risks

- The value of the funds and the income from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested.
- Past performance is not a guide to future performance.

Risk profile

- The fund aims to typically deliver absolute (more than zero) returns in each year, although an absolute return performance is not guaranteed.
- Over the short-term it may experience periods of negative returns and consequently the Fund may not achieve this objective.
- The fund makes extensive use of investment techniques, particularly those that involve derivatives, to obtain both its long and short investment exposure. Certain derivatives could behave unexpectedly or could expose the fund to losses that are significantly greater than the cost of the derivative.
- You should bear in mind that the value of all investments can go down as well as up.
- In aiming to achieve the investment objective and policy, the fund may invest in derivatives for efficient portfolio management and investment purposes.
- The fund may trade instruments, the performance of which depends on the continued solvency of the counterparties to the trade.
- The investment approach for this fund may involve a high level of investment activity and turnover of investments which may generate substantial transaction costs which will be borne by the fund.
- The Fund may be subject to a Performance Fee which may influence the Investment Manager to change the risk profile of the fund.
- GBP is the base currency of the fund but assets may be denominated in other currencies.
- Changes in exchange rates may cause the value of the assets to fall or rise.
- The fund will hedge on a best efforts basis, a significant proportion of this currency risk through forward foreign exchange contracts and other methods but this will not entirely eliminate the fund's currency risk. Also while the fund or its authorised agent may attempt to hedge currency risks in a Hedged Share Class, there can be no guarantee that currency risk will be eliminated.
- The costs and gains or losses associated with any hedging transactions for Hedged Share Classes will accrue solely to the Hedged Share Class to which it relates.
- Investors should note the Investment Information and Risks section in the full Prospectus.
- This fund is designed to be used only as one component in several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this fund.
- The fund may invest up to 40% in shares or derivatives of share of companies outside the UK.

Important information

Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%.
