

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### UBAM - Emerging Market Corporate Bond Short Duration, a sub-fund of UBAM

**Class: IHC EUR (Capitalisation) LU0943510148**

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

### Objectives and investment policy

The Fund seeks to grow capital and generate income by investing primarily in Emerging countries high yield or investment grade corporate bonds.

The Fund is actively managed and invests mainly in securities in the currencies of OECD countries, but also in Emerging countries currencies up to 20%. The average duration of the portfolio will be between 1 and 4 via direct investment and / or via derivative products use.

The Fund will invest a minimum of 2/3 of its net assets in products/ issuers with a minimum rating of B- (S&P or Fitch), B3 (Moody's) or an equivalent rating by another rating agency and up to 1/3 of its net assets in products/ issuers with a lower rating.

The Fund may invest up to 15% of its net assets in non-rated products/ issuers.

The investment strategy relies on credit and macroeconomic assessment, Environmental, Social and Governance (ESG) analysis as well as on relative value.

The ESG analysis relies on external and internal research. In the absence of MSCI ESG rating, an internal rating may be assigned by the Investment Manager.

The sustainable objective of the Fund is to provide a lower carbon footprint than the investment universe, as measured by the JP Morgan Corporate EMBI Diversified Index.

The investment process includes a first phase of investment universe filtering and a second phase of ESG bottom-up research.

Up to 30% of the net assets of the Fund can be invested in issuers with a MSCI ESG rating below BB.

The first phase consists in (selecting issuers with sound ESG quality and

avoiding controversial activities as well as companies in breach of international norms (norms-based screening).

The second phase integrates ESG considerations into the issuers' qualitative credit assessment conducted by the Investment Manager. This analysis relies on different sources of information and data as well as external ESG data and scoring providers.

The ESG analysis covers at least 90% of the Fund's portfolio.

The Fund is not managed in reference with a benchmark.

The Fund may invest its net assets up to:

- 100% in High yield

*this exposure can be increased up to 120% through derivatives*

- 100% in Emerging countries

*this exposure can be increased up to 120% through derivatives*

- 20% of its net assets in Contingent Convertible bonds (CoCos).

High yield bonds are issued by entities whose activity is more sensitive to the economic cycle and pay higher interest. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

The Fund's value is calculated and expressed in US Dollars.

The currency risk in relation to the base currency USD is mainly hedged.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: United States (US).

Details of the closing days are available here:

<https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is minimum three years.

Any income received by the Fund is reinvested (capitalisation share class).

### Risk and reward profile

With lower risk, With higher risk,

← →

potentially lower rewards potentially higher rewards

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 4 reflects average/moderate potential gain and/or loss in the value of the portfolio.

This is due to investments in fixed income securities on Emerging countries.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

**Counterparty risk:** As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

**Credit risk:** The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of

this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

**Currency risk:** The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

**Emerging country risk:** The Fund invests in developing overseas countries which carry a higher risk than investing in larger established countries. Investments in Emerging countries are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in Emerging countries rather than more developed countries may encounter difficulties when buying and selling investments. Emerging countries are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.

**Liquidity risk:** Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.

## Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the Fund over a year

Ongoing charges	1.14%
-----------------	-------

### Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower. Your financial advisor or distributor can inform you of the associated entry and exit charges.

Ongoing charges are based on the charges for the previous year, ending on 31 December 2021. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another fund.

**For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at [www.ubp.com](http://www.ubp.com).**

## Past performance

The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund.

Fund creation date: 19/08/2013

Share class launch date: 11/09/2013

Share class currency: EUR
