

Semiannual Report | 30 June 2015

Vanguard Investment Series plc

The mission continues

On 1 May 1975, Vanguard began operations, a fledgling company based on the simple but revolutionary idea that a mutual fund company should be managed solely in the interest of its investors.

Four decades later, that revolutionary spirit continues to animate the enterprise. Vanguard remains on a mission to give investors the best chance of investment success.

As we mark our 40th anniversary, we thank you for entrusting your assets to Vanguard and giving us the opportunity to help you reach your financial goals in the decades to come.

Chairman's Letter

Dear Shareholder,

Some of the uncertainties weighing on the global economy lifted a little during the first half of 2015. Deflationary fears, which stood center stage at the beginning of the period, gradually subsided amid some stabilisation in the price of oil after its precipitous fall. Growth in the United States seemed to get back on track after stumbling in the first quarter, while the pace of expansion in the euro zone and Japan proved more robust than expected. These improvements helped counter a number of headwinds, such as flare-ups in the Greek debt crisis, slowing growth in China, and signs that the Federal Reserve was moving closer to raising interest rates for the first time in close to a decade.

For the six months ended 30 June 2015, global stocks returned less than 3%. US stocks, which constitute roughly half of the global stock market's value, handed in a subpar return of about 2%. (Except where noted otherwise, returns are based on MSCI indices and are in US dollars.) Outside of

the United States, developed markets fared better, returning almost 4% in Europe and close to 9% in the Pacific. Their results were even higher in local currencies as the dollar strengthened over the six months. Emerging markets as a whole performed in line with global stocks, although individual country returns varied widely.

Bonds lost some ground over the period. Although demand surged early on amid sputtering global growth and deflationary concerns, it slackened as the economic outlook brightened. In the United States, income earned by investment-grade bonds came close to offsetting price declines. The gap was wider, however, for European and Japanese bonds. The Citigroup World Government Bond Index returned about -4%; in local-currency terms, the return was just marginally negative.

The returns of the Vanguard Investment Series stock and bond index funds were generally in line with those of their benchmarks after taking the expenses of running the funds into account. The Series also includes four actively managed

Market Barometer

¹ Annualised.

² The returns of the S&P 500 Index are adjusted for the 30% withholding tax on dividends paid by US securities.

stock funds—Vanguard U.S. Discoveries Fund, which underperformed its benchmark, and Vanguard U.S. Fundamental Value Fund, Vanguard U.S. Opportunities Fund, and Vanguard Global Enhanced Equity Fund, which produced returns in line with or better than those of their benchmarks.

Many of the Investment Series funds are offered in multiple currencies. Because of exchange rate movements, that can mean the total return for a fund can vary, sometimes significantly, depending on what currency it's expressed in. Over the half year, the dollar continued to strengthen against a number of currencies, including the yen and the euro. As shown on page 1, that shift meant the return for the MSCI Pacific Index was about 3 percentage points lower in US dollars than in local currencies, and the difference for the MSCI Europe Index was even wider.

Aggressive central bank action buoyed stocks in Europe and Japan

The US economy stalled in the first quarter, which was marked by another severe winter in the Northeast and a port strike on the West Coast. Cuts to investment in the oil and gas industry hurt as well. At the same time, the stock market was troubled by valuations that were perceived to be high by some investors and the potential impact of a strong US dollar on the profits of US-based multinational companies.

The outlook improved, however. The economy continued to add jobs despite cuts in the energy sector, consumer confidence held up and the housing sector continued to heal. More support for stocks came from solid corporate earnings reports, which generally surpassed forecasts, and the ongoing surge in mergers and acquisitions.

As bailout negotiations between Greece and the euro zone intensified toward the end of June, stocks retrenched a bit. The S&P 500 Index ended the period up about 1%. US small- and medium-capitalisation stocks fared better, with returns closer to 4%.

The euro zone's economy continued to gather speed. Lower energy prices were one contributing factor, given that the region is a net importer of oil and natural gas. Another was the European Central Bank's much anticipated—and larger-than-expected—quantitative-easing programme. The ECB in March began buying sovereign bonds and other securities in an effort to support economic activity by keeping borrowing costs for households and businesses low. This also made exports more competitive through a weaker euro. Here too, however, Greece's troubles had a dampening effect on the region's stock markets.

Against this mostly positive backdrop, euro zone stocks as a whole returned just shy of 4%. In the larger markets, France and Italy were among the top performers, with gains of about 5% and 9%, respectively, while others, including Spain, posted losses. The returns expressed in euros were significantly higher given the significant weakening of that currency versus the US dollar over the six months. The United Kingdom, Europe's largest stock market (but not part of the euro zone), traveled a choppy course to finish up about 2%, with healthy economic data being partly offset by expectations of an interest rate increase.

In the Pacific, cheaper oil, further quantitative easing and the weakening of the yen last year helped Japan shake off two decades of economic stagnation. That country's stock market climbed to a 15-year high during the half year, finishing the period up more than 13%, with export-oriented companies doing particularly well. Hong Kong also posted a double-digit return amid investment inflows from mainland China. In contrast, Australian stocks declined by more than 3% as tepid global demand continued to weigh on commodity prices.

In emerging markets, performances by country ranged even more widely. Russian stocks, despite international sanctions and a shrinking economy, surged more than 27% amid the modest recovery in the price of oil. The Chinese government took further steps to avoid a hard landing, which included increasing infrastructure spending and lowering interest rates. That helped that country's stock market end the half year up 15%, even with the decline in prices that began in June as investor confidence flagged. Brazil was among the countries at the other end of the performance spectrum: Its stock market dropped more than 8% as its central bank raised interest rates to combat inflation and the economy continued to contract.

For some bond markets, volatility was the norm

It's not unusual for volatility to increase as a rate hike approaches, as was the case in the US bond market. Yields on ultra-safe Treasuries also fluctuated with the perceived likelihood of a Greek default, ending the period a little lower than where they started. Although short-term Treasury yields finished the period a little lower, the benchmark 10-year Treasury note rose 14 basis points, to 2.33%. (A basis point is one-hundredth of a percentage point.) The Barclays U.S. Aggregate Float Adjusted Index returned -0.13%.

Central bank bond purchases through quantitative-easing programmes put downward pressure on bond yields in the euro zone and Japan, but as investors gained more confidence that the economic outlook was improving,

those yields bounced back from very low (and in some cases, negative) levels. Ten-year German, British and Japanese government bond yields all ended the period up.

The return for global bonds, as measured by the Barclays Global Aggregate Float Adjusted Bond Index USD-Hedged, was -0.41%. (Bond prices fall as yields rise.) Shorter-term bonds generally fared better than their longer-term counterparts.

Our non-US dollar funds

The Investment Series' stock and bond index funds denominated in euros, pounds, yen and Swiss francs tracked the returns of their expense-free benchmarks during the period. Three of our actively managed stock funds are also offered in non-US currencies. (The following returns are for Investor Shares.)

Vanguard U.S. Discoveries Fund, which targets small companies with superior growth prospects, returned 4.44% in pounds. It lagged its benchmark by more than 5 percentage points. Returns for growth stocks varied widely by sector, with health care leading the way and energy bringing up the rear. Although stock selection was positive in a number of market sectors, including materials and consumer staples, an overweight allocation to industrials and stock selection among biotechnology companies in particular hurt the fund's relative return.

Vanguard U.S. Fundamental Value Fund, which invests in large-cap stocks that appear undervalued, returned -1.81% in pounds, matching the return of its benchmark. The fund benefited from its outsize allocation to well-performing segments of the financial sector, including banking and insurance stocks, and from its avoidance of utilities. That was offset, however, by subpar performances from its information technology and consumer discretionary holdings.

Vanguard U.S. Opportunities Fund, which focuses on growth stocks of all sizes, returned 4.63% in pounds and 14.61% in euros, surpassing its broad-market benchmark, which includes value stocks, by roughly 4 percentage points in both cases. A good part of the fund's result was produced by an outsize allocation to strong-performing biotechnology stocks, although subpar returns from consumer discretionary and information technology holdings dampened the outperformance.

Our US dollar-based share classes

The returns of our dollar-denominated Investment Series index funds were in line with those of their benchmarks. The returns of the stock index funds, however, tended to be lower than their returns in yen and especially euros, given the relative strength of the dollar over the six-month period. Most of the Series' bond funds that invest in foreign holdings employ currency hedging, which helps to mitigate the impact of currency fluctuations on their returns.

The Series includes one dollar-only actively managed fund, the Global Enhanced Equity Fund. It uses a proprietary quantitative approach to build a portfolio that seeks to outperform its benchmark without taking on substantially more risk. It succeeded in its mandate for this period, returning 3.31%, which put it a little more than half a percentage point ahead of its benchmark. The fund's holdings in banks, telecommunications companies and food retailers more than offset some missteps among internet retailers and technology companies.

To build for the long term, start with a solid foundation

At Vanguard, we believe that following four timeless, straightforward principles can help put you on the right track toward investment success: creating clear, appropriate investment goals; developing a suitable asset allocation using broadly diversified funds; minimising cost; and maintaining perspective and long-term discipline.

All four principles are essential, but every good investment plan begins with a clearly defined goal, which sets the foundation for building your portfolio. Being realistic about your goals—and how to meet them—can help you stick with your investment plan even when times get tough.

As always, thank you for investing with Vanguard.

Sincerely,

F. William McNabb III
Chairman
The Vanguard Group, Inc.

Tracking Error

In tracking the performance of the index, some of the funds attempt to replicate the index by investing all, or substantially all, of their assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index. Others attempt to select those securities that will create the representative sample that tracks the performance of the index as closely as possible. Optimisation or stratified sampling techniques, or both, are used to create the sample. Tracking error measures the volatility of the return difference between the fund and the index. It is calculated as the standard deviation of active returns gross of fees for the trailing 36-month period (or since the fund's inception if it does not have 36 months of performance history).

1. The fund attempts to select those securities that will create the representative sample that tracks the performance of the index as closely as possible.

2. The fund seeks to replicate the index by investing all, or substantially all, of its assets in the securities that make up the index, holding each in approximately the same proportion as its weighting in the index.

¹ Individual sub-fund financial statements are presented in the base currency of each sub-fund. For the purpose of calculating the consolidated Vanguard Investment Series plc US dollar total, the euro-based sub-funds have been translated into US dollars at an exchange rate of 0.8975 as at 30 June 2015, 0.8264 as at 31 December 2014, an average rate of 0.8968 for the period ended 30 June 2015, and an average rate of 0.7302 for the period ended 30 June 2014; the Japanese yen-based sub-fund has been translated into US dollars at an exchange rate of 122.3650 as at 30 June 2015, 119.8950 as at 31 December 2014, an average rate of 120.2800 for the period ended 30 June 2015, and an average rate of 102.1000 for the period ended 30 June 2014; and the GBP-based sub-funds have been translated into US dollars at an exchange rate of 0.6359 as at 30 June 2015, 0.6413 as at 31 December 2014, an average rate of 0.6565 for the period ended 30 June 2015 and an average rate of 0.5956 for the period ended 30 June 2014.

The resulting translation adjustment represents the difference in exchange rates applied to the net assets at the beginning of the period and an exchange rate differential in consolidating the Statement of Operations at the average rate for the period.

This adjustment is solely for the purposes of reporting a fund total in US dollars and has no effect on any individual sub-fund.

The accompanying notes form an integral part of the financial statements.

1 Annualised.

2 A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

3 The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

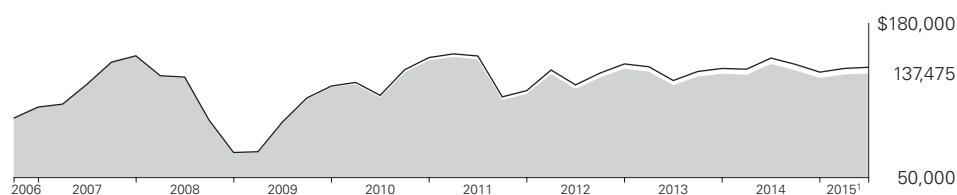

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Style		Value	Blend	Growth
Market Cap	Large			
	Medium			
	Small			

¹ Annualised.

² A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

³ The holdings listed exclude any temporary cash investments and equity index products.

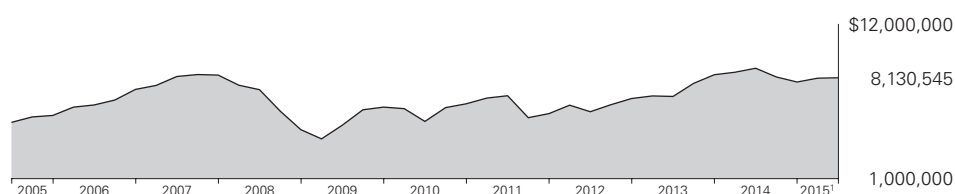

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Investment Focus

Style		Value	Blend	Growth
Market Cap	Large			
	Medium			
	Small			

1 Annualised.

2 A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

3 The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

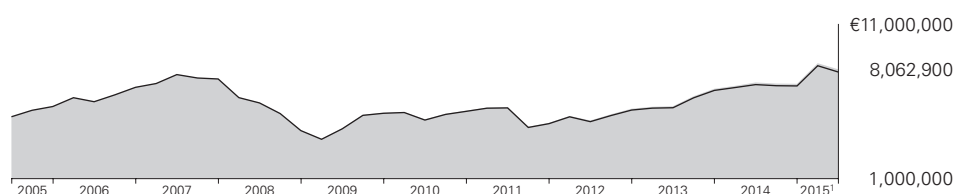

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Annualised.

² The holdings listed exclude any temporary cash investments and equity index products.

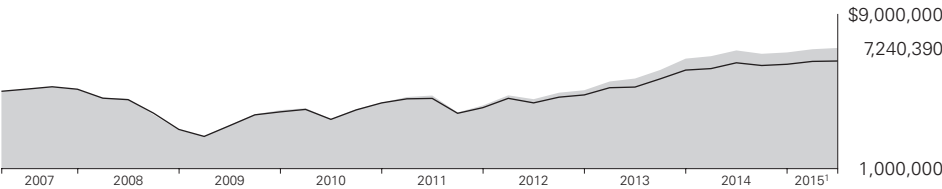

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

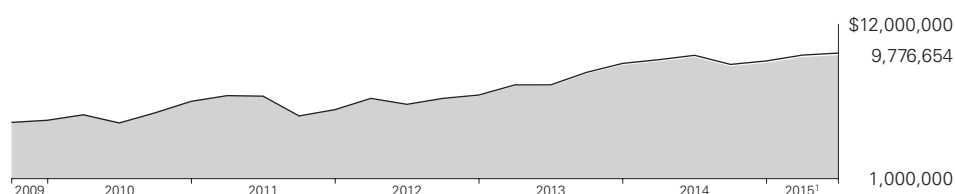

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Annualised.

² A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

³ The holdings listed exclude any temporary cash investments and equity index products.

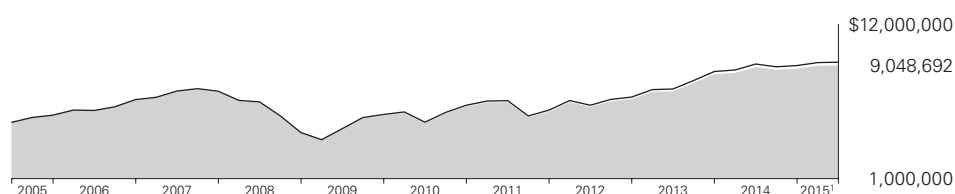

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

¹ Annualised.

² A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

³ The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

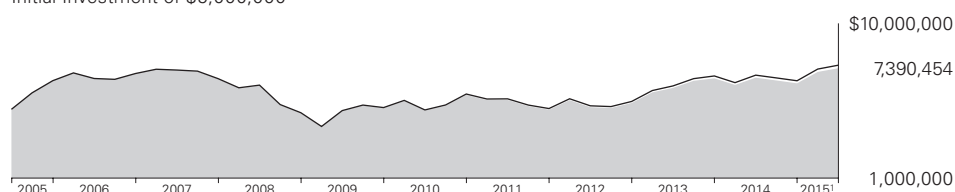

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Investment Focus

Style		Value	Blend	Growth
Market Cap	Large			
	Medium			
	Small			

¹ Annualised.

² A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

³ The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

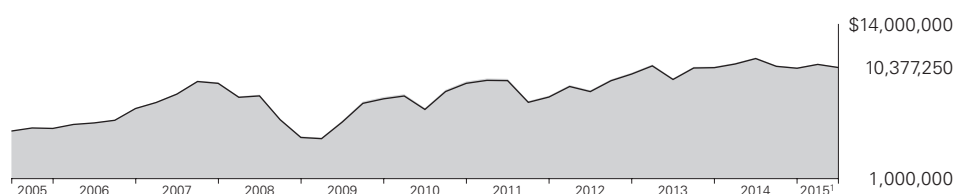

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Investment Focus

Style		Value	Blend	Growth
Market Cap	Large			
	Medium			
	Small			

1 Annualised.

2 A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

3 The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

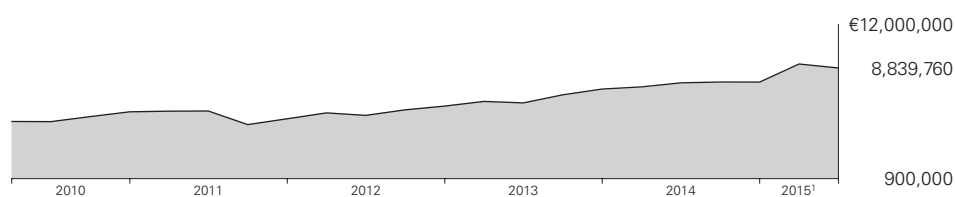

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

1 A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

2 Annualised.

3 The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

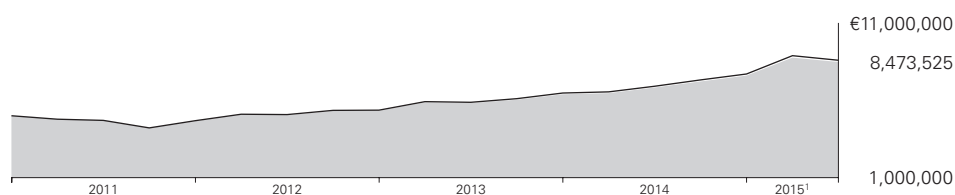

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Market Cap	Large			
	Medium			
	Small			

¹ Annualised.

² A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

³ The holdings listed exclude any temporary cash investments and equity index products.

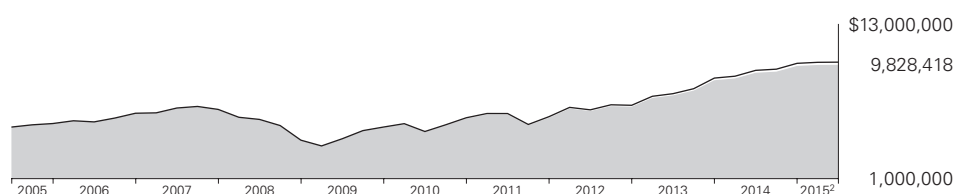

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost. The fund is actively managed and seeks to invest as described in the prospectus. The following performance information shows how the fund's returns compare with those of a market index that has investment characteristics similar to those of the fund.

Investment Focus

Style		Value	Blend	Growth
Market Cap	Large			
	Medium			
	Small			

¹ Annualised.

² A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

³ The holdings listed exclude any temporary cash investments and equity index products.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost. The fund is actively managed and seeks to invest as described in the prospectus. The following performance information shows how the fund's returns compare with those of a market index that has investment characteristics similar to those of the fund.

Style		Value	Blend	Growth
Market Cap	Large			
	Medium			
	Small			

1 Annualised.

2 A negative portfolio turnover indicates that the total value of subscriptions and redemptions exceeded the value of security transactions.

3 The holdings listed exclude any temporary cash investments and equity index products.

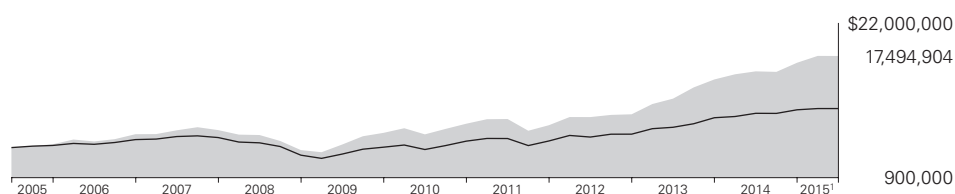

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost. The fund is actively managed and seeks to invest as described in the prospectus. The following performance information shows how the fund's returns compare with those of a market index that has investment characteristics similar to those of the fund.

¹ Barclays Euro Aggregate Treasury 20+ Year Index (AA– or above).

² Before expenses.

³ For more information on these ratings, see the Glossary entries for Average Quality and Credit Quality.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

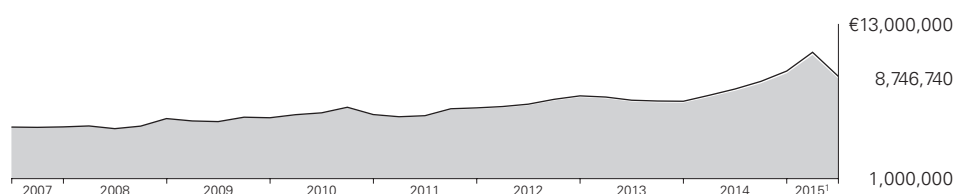

20+ Year Euro Treasury Index Fund

Benchmark: Barclays Euro Aggregate Treasury 20+ Year Index (AA– or Above)

Euro-Denominated

Cumulative Performance: 29 August 2007–30 June 2015

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

³ For more information on these ratings, see the Glossary entries for Average Quality and Credit Quality.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

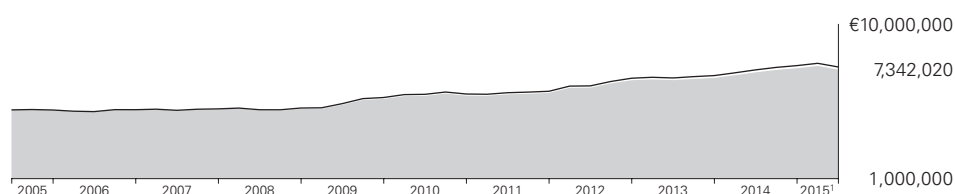

Euro Investment Grade Bond Index Fund

Benchmark: Barclays Global Aggregate Euro Non-Government Float Adjusted Bond Index

Euro-Denominated

Cumulative Performance: 30 June 2005–30 June 2015

Initial Investment of €5,000,000

	Total Returns Periods Ended 30 June 2015			Final Value of a €5,000,000 Investment
	Six Months	Five Years ²	Ten Years ²	
— Institutional Shares	–1.43%	4.72%	3.92%	€7,342,020
— Benchmark ³	–1.08	4.88	4.13	7,493,835

	Six Months	Five Years ²	Ten Years ²	Final Value of a €100,000 Investment
Investor Shares	–1.45%	4.63%	3.82%	€145,489
Benchmark ³	–1.08	4.88	4.13	149,877

	Six Months	Since Inception ⁴	Final Value of a €200,000,000 Investment
Institutional Plus Shares	–1.38%	4.32%	€213,692,194
Benchmark	–1.08	4.49	214,222,352

Fund performance figures above are adjusted for the 0.30% preset dilution levy on subscriptions.

Total Investment Returns (%): 31 December 2004–30 June 2015

1 Six months ended 30 June 2015.

2 Annualised.

3 Citigroup Non-EGBI EuroBIG Index through 31 December 2004; Barclays Global Aggregate Euro Non-Government Bond Index through 30 June 2010; and Barclays Global Aggregate Euro Non-Government Float Adjusted Bond Index thereafter.

4 Average annual returns since inception: 6 December 2013.

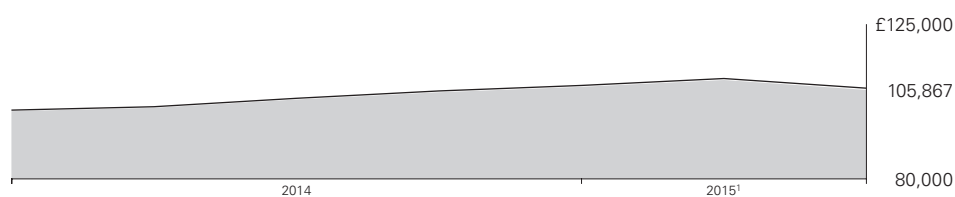

Euro Investment Grade Bond Index Fund

Benchmark: Barclays Global Aggregate Euro Non-Government Float Adjusted Bond Index GBP-Hedged

GBP-Hedged

Cumulative Performance: 31 January 2014–30 June 2015

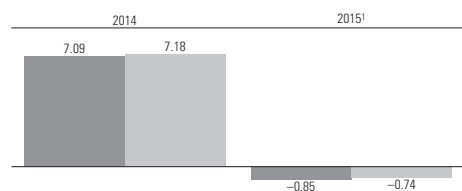

Initial Investment of £100,000

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

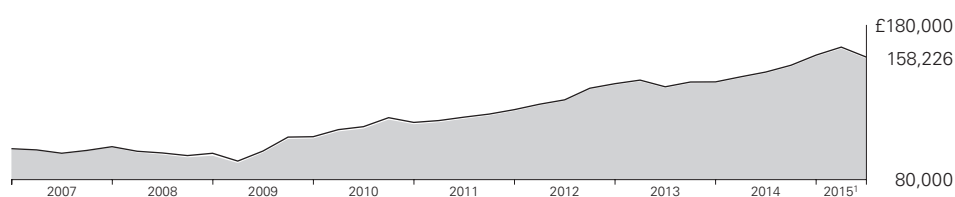

U.K. Investment Grade Bond Index Fund

Benchmark: Barclays Global Aggregate U.K. Non-Government Float Adjusted Bond Index

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

Performance Summary

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. (For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at <http://global.vanguard.com>.) Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost. The fund is actively managed and seeks to invest as described in the prospectus. The following performance information shows how the fund's returns compare with those of a benchmark that has investment characteristics similar to those of the fund.

Notes to the Condensed Financial Statements

1. General. Vanguard Investment Series plc ("the Company"), an investment company with variable capital, was incorporated on 4 March 1998 under the laws of the Republic of Ireland as a public limited company, and constituted as an umbrella fund insofar as the share capital of the Company (the "Shares") is divided into different series of Shares with each series of Shares representing a separate pool of assets (a "Portfolio"), which constitutes a separate sub-fund (a "Fund") of the Company. Shares in all of the Funds, with the exception of the four Funds that have yet to commence trading, as set out below, are listed on the Irish Stock Exchange. The Company is authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations"). On 24 May 2006 it was resolved that the Company be converted to an umbrella fund with segregated liabilities between Funds in accordance with the provisions of the Investment Funds, Companies and Miscellaneous Provisions Act, 2005.

The Company is organised in the form of an umbrella fund and during the period ended 30 June 2015 had 31 constituent Funds:

	Commenced Operations
Vanguard Emerging Markets Stock Index Fund (the "Emerging Markets Stock Index Fund")	7 June 2006
Vanguard European Stock Index Fund (the "European Stock Index Fund")	14 September 1998
Vanguard Eurozone Stock Index Fund (the "Eurozone Stock Index Fund")	25 October 2001
Vanguard Global Enhanced Equity Fund (the "Global Enhanced Equity Fund")	18 April 2007
Vanguard Global Small-Cap Index Fund (the "Global Small-Cap Index Fund")	10 December 2009
Vanguard Global Stock Index Fund (the "Global Stock Index Fund")	4 August 1998
Vanguard Japan Stock Index Fund (the "Japan Stock Index Fund")	22 October 2003
Vanguard Pacific ex-Japan Stock Index Fund (the "Pacific ex-Japan Stock Index Fund")	22 July 2005
Vanguard SRI European Stock Fund (the "SRI European Stock Fund")	29 June 2010
Vanguard SRI Global Stock Fund (the "SRI Global Stock Fund")	7 February 2011
Vanguard U.S. 500 Stock Index Fund (the "U.S. 500 Stock Index Fund")	4 November 1998
Vanguard U.S. Discoveries Fund (the "U.S. Discoveries Fund")	1 July 2004
Vanguard U.S. Fundamental Value Fund (the "U.S. Fundamental Value Fund")	3 May 2005
Vanguard U.S. Opportunities Fund (the "U.S. Opportunities Fund")	8 April 2002
Vanguard 20+ Year Euro Treasury Index Fund (the "20+ Year Euro Treasury Index Fund")	29 August 2007
Vanguard Euro Government Bond Index Fund (the "Euro Government Bond Index Fund")	29 September 2000
Vanguard Euro Investment Grade Bond Index Fund (the "Euro Investment Grade Bond Index Fund")	29 September 2000
Vanguard Eurozone Inflation-Linked Bond Index Fund (the "Eurozone Inflation-Linked Bond Index Fund")	31 May 2005
Vanguard Global Bond Index Fund (the "Global Bond Index Fund")	31 March 2008
Vanguard Global Short-Term Bond Index Fund (the "Global Short-Term Bond Index Fund")	31 January 2014
Vanguard Japan Government Bond Index Fund (the "Japan Government Bond Index Fund")	1 April 2004
Vanguard U.K. Government Bond Index Fund (the "U.K. Government Bond Index Fund")	23 June 2009
Vanguard U.K. Investment Grade Bond Index Fund (the "U.K. Investment Grade Bond Index Fund")	20 March 2007
Vanguard U.K. Short-Term Investment Grade Bond Index Fund (the "U.K. Short-Term Investment Grade Bond Index Fund")	22 May 2013
Vanguard U.S. Government Bond Index Fund (the "U.S. Government Bond Index Fund")	31 January 2002
Vanguard U.S. Investment Grade Credit Index Fund (the "U.S. Investment Grade Credit Index Fund")	16 December 2004
Vanguard U.S. Ultra-Short-Term Bond Fund (the "U.S. Ultra-Short-Term Bond Fund")	6 May 1999

A Portfolio is maintained for each Fund, each being invested in accordance with investment objectives applicable to the Fund to which the Portfolio relates.

2. Basis of Preparation. The financial statements are prepared under the historical cost convention modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The format and certain wording of the financial statements have been adapted from those contained in the Companies Act, 2014 to a format and wording that, in the opinion of the Directors, more appropriately reflect the Company's business as an investment fund. The profit and loss account is referred to as the Condensed Statement of Operations, and the balance sheet is referred to as the Condensed Statement of Assets and Liabilities. Total recognised gains and losses are reported in the Condensed Statement of Operations.

The Company has availed of the exemption contained in Financial Reporting Standard ("FRS") 102, Section 7.1A, Cash Flow Statements, and has presented a Condensed Statement of Changes in Net Assets in place of a cash flow statement. In the opinion of the Directors, this information also satisfies the requirement of FRS 102, Section 10.4, Reporting Financial Performance, in relation to a reconciliation of movements in Shareholders' Equity.

3. Significant Accounting Policies. The financial statements of the Company are prepared in compliance with FRS 104, Interim Financial Reporting, and the Central Bank of Ireland's UCITS Notices.

FRS 104 was issued by the Financial Reporting Council in March 2015 and replaces the Statement on Half-Yearly Financial Reports issued by the Accounting Standards Board in 2007.

FRS 104 is effective for interim periods commencing on or after 1 January 2015.

All references to net assets throughout this document refer to net assets attributable to holders of redeemable participating shares unless otherwise stated.

There have been no changes to the significant accounting policies adopted by the Company since the last audited financial statements on 31 December 2014, other than the fair value measurement and the fair value hierarchy disclosures. Please refer to Notes 10 and 11 for further details.

4. Ongoing Charges. The Company has entered into a management agreement with the Manager. Under this agreement Vanguard Group (Ireland) Limited incurs investment management fees in addition to the following other expenses on behalf of the Funds: audit fees, marketing costs, accounting fees, trustee fees, stock exchange fees, transfer agency fees, custodian fees, safekeeping fees, Directors' fees and expenses and domiciliary agents' fees.

For providing these services, Vanguard Group (Ireland) Limited received a fixed percentage of each Fund's net asset value as follows from 1 January 2015 to 30 June 2015.

The amounts paid for ongoing charges during the period are disclosed in the Condensed Statement of Operations. The amounts due to Vanguard Group (Ireland) Limited as at 30 June 2015 and 31 December 2014 for ongoing charges are disclosed in the Condensed Statement of Assets and Liabilities.

5. Custodian Fees. As described in Note 4, the custodian fees are paid by the Manager.

6. Directors' Fees and Expenses. As described in Note 4, Directors' fees and expenses are paid by the Manager. Directors' fees charged during the period amounted to US\$51,739 (30 June 2014: US\$18,192), with US\$0 outstanding at 30 June 2015 (31 December 2014: US\$0).

7. Audit Fees. As described in Note 4, audit fees are paid by the Manager. The Auditors provide statutory audit and Swiss reporting services to the Funds.

8. Cash Balances. All cash balances are held with the Custodian. Cash amounts were on deposit with counterparties for futures contracts as initial margin and/or variation margin of the contracts.

9. Net Asset Value Per Share. The net asset value per Share of each Fund is determined by dividing the value of the net assets of the Portfolio by the total number of Shares in issue at that time.

10. Distribution Policy. Details of the distributions can be found in the Condensed Statement of Operations.

11. Transition Notes to FRS 102.

Transition to FRS 102, the Financial Reporting Standard Applicable in the UK and Republic of Ireland. From 1 January 2015 the Company has adopted FRS 102. The transition to FRS 102 has resulted in a change to the fair value measurement policy. Further details are set out in the Fair Value Measurement section below.

Fair Value Measurement. On initial application of FRS 102, in accounting for its financial instruments a reporting entity is required to apply either (a) the full provisions of Section 11, Basis Financial Instruments, and Section 12, Other Financial Instruments, of FRS 102; (b) the recognition and measurement provisions of International Accounting Standard (IAS) 39, Financial Instruments: Recognition and Measurement, and only the disclosure requirements of Sections 11 and 12 of FRS 102; or (c) the recognition and measurement provisions of International Financial Reporting Standard (IFRS) 9, Financial Instruments, and/or IAS 39 (as amended following the publication of IFRS 9) and the disclosure requirements of Sections 11 and 12 of FRS 102. The Company has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of Sections 11 and 12 of FRS 102. The use of IAS 39 recognition and measurement provisions is an accounting policy change, with the Company moving from measuring fair value of its financial assets at bid and financial liabilities at ask, to the pricing policy as set out in the prospectus of the Company. The impact of this policy change on the Condensed Statement of Assets and Liabilities is the restatement of investment amounts previously reported as of 31 December 2014 and on the Condensed Statement of Operations is the restatement of change in unrealized gains and losses previously reported for the year ended 31 December 2014.

Fair Value Disclosures. The requirement for the Funds to measure financial instruments at fair value and estimate that fair value has not changed with the adoption of FRS 102. However, the categories in the fair value hierarchy into which the fair value measurements are categorised for disclosure purposes have changed from that previously disclosed. See Note 11 for further details.

12. Fair Value Hierarchy Disclosures. The Funds utilise various methods to value investments measured at fair value on a recurring and non-recurring basis. FRS 102 establishes a fair value hierarchy that prioritises inputs to valuation methods.

The three levels of inputs are defined as follows:

Level A: The best evidence of fair value is a quoted price for an identical asset in an active market. Quoted in an active market in this context means quoted prices are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level B: When quoted prices are unavailable, the price of a recent transaction for an identical asset provides evidence of fair value as long as there has not been a significant change in economic circumstances or a significant lapse of time since the transaction took place.

Level C: If the market for the asset is not active and recent transactions of an identical asset on their own are not a good estimate of fair value, an entity estimates the fair value by using a valuation technique. The objective of using a valuation technique is to estimate what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal business considerations.

The following table summarises the inputs used to value the Funds' financial instruments measured at fair value on a recurring and non-recurring basis as at 30 June 2015:

1 The Global Short-Term Bond Index Fund commenced operations on 31 January 2014.

As at 31 December 2014, the Emerging Markets Stock Index Fund, European Stock Index Fund, Eurozone Stock Index Fund, Global Small-Cap Index Fund, Global Stock Index Fund and SRI Global Stock Fund had holdings, the value of which have been written down to nil, which are determined as level C investments.

Financial instruments valued based on quoted market prices in active markets, and therefore classified within Level A, include active listed equities and exchange-traded derivatives. The Funds do not adjust the quoted price for these instruments. These include equities and exchange-traded futures contracts.

Financial instruments valued based on the price of a recent transaction when no quoted active price is available are classified within Level B.

Investments classified within Level C include instruments for which there is no active market, recent transactions of an identical instrument on their own are not a good estimate of fair value, and therefore fair value is estimated by using a valuation technique. The objective of using a valuation technique is to estimate what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal business considerations including market expectations and risk return factors.

The valuation techniques used to estimate fair value are based on market inputs or entity-determined inputs.

Valuation techniques using market inputs: This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data. Valuation techniques used for non-standardised financial instruments, such as OTC derivatives, include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

Valuation techniques using entity-determined inputs: This category includes all instruments where the valuation technique includes inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity-determined adjustments or assumptions are required to reflect differences between the instruments for which there is no active market. The use of entity-determined inputs requires significant judgement by the Investment Manager. The Investment Manager considers market data to be that data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

13. Related Parties. In the opinion of the Directors of the Manager, the Manager and the Investment Manager are related parties under Section 33 of FRS 102, Related Party Disclosures. Fees paid during the period to the Manager can be found under the heading "Expenses" in the Condensed Statement of Operations. Fees payable to the Manager are outlined in Note 4. Vanguard Group (Ireland) Limited reimburses The Vanguard Group, Inc., for these amounts. Mr Michael S. Miller is a Managing Director of The Vanguard Group, Inc., Mr James N. Norris is a Managing Director of Vanguard International, a division within The Vanguard Group, Inc., and Mr Thomas M. Rampulla is a Managing Director of Vanguard's Financial Advisor Services, a division within The Vanguard Group, Inc. The Vanguard Group, Inc., is a related party to the Company.

The table below details the inter-Fund trades between the Company and multiple US mutual funds, also managed by the Investment Manager during the period ended 30 June 2015. There were no amounts outstanding between these parties as at the balance sheet date.

¹ The Global Short-Term Bond Index Fund commenced operations on 31 January 2014.

14. Connected Party Transactions. Transactions carried out with the Company by the promoter, manager, trustee, investment adviser and/or associated or group companies of these ("Connected Parties") during the period ended between 1 January 2015 and 30 June 2015 were carried out as if negotiated at arm's length and were in the best interests of the Company's shareholders. The Directors of the Company are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that all transactions entered into by the Company with Connected Parties are carried out as if negotiated at arm's length and in the best interests of the Company's shareholders.

15. Taxation. Details of the taxation can be found in the Condensed Statement of Operations.

16. Efficient Portfolio Management. The Company may employ investment techniques and instruments for efficient portfolio management purposes only, subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland. Any such technique or instrument must be one which (alone or in combination with one or more other techniques or instruments) is believed by the Investment Manager to be economically appropriate to the efficient portfolio management of the Funds, i.e. the use of a technique or instrument may only be undertaken for the purposes of one or more of the following:

- a reduction in risk,
- a reduction in costs, or
- an increase in capital or income returns to the UCITS.

For UCITS which have engaged in efficient portfolio management techniques, disclosures are required under UCITS Notice 8.5.

During the period, a securities lending programme was entered into for the purpose of efficient portfolio management. Details of all open transactions at the period-end are disclosed in Note 26.

A UCITS is required to disclose the revenues arising from efficient portfolio management techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

The securities lending agent appointed is JPMorgan Chase Bank, N.A. (London Branch). All securities lending revenue, with the exception of a minimal lending agent fee, is received directly into the Funds. All operational costs in supporting the lending programme are borne by the lending agent and paid directly out of the agent lender fee received. The current securities lending income split between the Funds and the securities lending agent is 90:10, with 90% of all securities lending revenue earned received directly into the Funds.

17. Financial Derivative Instruments. The financial derivative instruments used during the reporting period are detailed below:

(i) **Forward Contracts.** A forward foreign currency exchange contract ("Forward Contract") is a commitment to purchase or sell a foreign currency at a future date, at a negotiated rate. The Funds may enter into three types of Forward Contracts: class level hedging, foreign security hedging and security transaction hedging.

Funds enter into forward contracts to maintain the same currency exposure as their respective indices. In addition, these Funds generally enter into Forward Contracts as a hedge upon the purchase or sale of a security denominated in a foreign currency.

Forward Contracts are valued at the closing prices of the forward currency contract rates in the London foreign exchange markets on a daily basis as provided by a reliable bank or dealer. The Funds will realise a gain or loss upon the closing or settlement of the Forward Contracts. For foreign security hedges and security transaction hedges which enter into Forward Contracts, realised and unrealised gains and losses are allocated at the Fund level. For class level hedges, the realised and unrealised gains or losses are allocated solely to the relevant Share classes.

Securities held in designated accounts to cover net exposure on outstanding Forward Contracts are noted in the Statement of Investments where applicable. Unrealised appreciation or depreciation on Forward Contracts is reported in the Condensed Statement of Assets and Liabilities.

Realised gains and losses are reported with all other foreign currency gains and losses in the Funds' Condensed Statement of Operations.

Risks relating to Forward Contracts include the potential inability of the counterparty to meet the terms of the contract and unanticipated movements in the value of a foreign currency relative to the US dollar (or euro, for the Japan Stock Index and Pacific ex-Japan Stock Index Funds).

(ii) Futures Contracts. Funds may use index futures contracts to a limited extent, to maintain full exposure to the stock market, maintain liquidity and minimise transaction costs. Funds may purchase futures contracts to immediately invest incoming cash in the market, or sell futures in response to cash outflows, thereby simulating a fully invested position in the underlying index while maintaining a cash balance for liquidity.

Upon entering into a futures contract, the Funds are required to deposit either cash or securities (initial margin) in an amount equal to a certain percentage of the contract value, which can be found in the Condensed Statement of Assets and Liabilities under Cash. Subsequent payments or receipts (variation margin) are made or received by the Funds each day.

The variation margin payments or receipts are equal to the daily changes in the contract value and are recorded as unrealised gains and losses in the Condensed Statement of Operations. The Funds recognise a gain or loss when the contract is closed/expires.

18. Collateral. The tables below list collateral posted for the futures and forward contracts. The details of collateral for securities lending are disclosed in Note 26.

The tables below list the collateral posted for the futures contracts.

Collateral 30 June 2015

19. Credit Facility. The Company and certain other funds managed by The Vanguard Group participate in a \$3 billion committed credit facility provided by a syndicate of lenders pursuant to a credit agreement entered into 21 March 2014 which may be renewed annually; each participating fund is individually liable for its borrowings, if any, under the credit facility. Borrowings may be utilised for temporary or emergency purposes, and are subject to the participating fund's regulatory and contractual borrowing restrictions. The participating funds are charged administrative fees and an annual commitment fee of 0.06% of the undrawn amount of the facility, which are allocated to the funds in accordance with a methodology approved by the Board. Vanguard Group (Ireland) Limited pays the administrative and annual commitment fees on behalf of the funds. Any borrowings under this facility bear interest at a rate equal to the higher of the federal funds rate or LIBOR reference rate plus an agreed-upon spread and are treated as a finance cost in the Condensed Statement of Operations.

None of the Funds had any borrowings outstanding at 30 June 2015 or 31 December 2014 or at any time during the period then ended, and none has incurred any interest charges.

20. Exchange Rates. The principal exchange rates to the US dollar used in the preparation of the financial statements at 30 June 2015 were:

21. Soft Commission Arrangements. Neither The Vanguard Group, Inc., nor PRIMECAP Management Company has a client commission arrangement on behalf of the Company. Both Granahan Investment Management, Inc., and Pzena Investment Management, LLC, have established client commission arrangements consistent with the concepts of Section 28(e) of the Securities Exchange Act of 1934 and the relevant interpretive guidance issued by the US Securities and Exchange Commission. Under these arrangements, an adviser receives a variety of research and brokerage products and services, including but not limited to written research reports analyzing performance or securities, discussions with research analysts, meetings with corporate executives regarding company performance, and market data. Any benefits obtained by an adviser in conjunction with a client commission arrangement are used for the benefit of the Funds.

22. Segregated Liability. Each Fund is treated as bearing its own liabilities.

23. Contingent Liability. There were no contingent liabilities as at 30 June 2015 and 31 December 2014.

24. Events During the Period. A revised prospectus for the Company was approved by the Central Bank of Ireland on 2 March 2015 and replaced the previous prospectus dated 1 September 2014. The revised prospectus, among other things, reflects the addition of a number of Hong Kong dollar-denominated Share classes for certain Funds of the Company, the amendment of a Share class name in the Vanguard Japan Stock Index Fund, updates to the dealing deadlines for Vanguard U.S. Investment Grade Credit Index Fund and Vanguard U.S. Government Bond Index Fund, reduction of the ongoing charges figure for the Institutional Plus Share class of Vanguard U.K. Short-Term Investment Grade Bond Index Fund to 0.05% and the establishment of the Institutional Plus CHF Share class of Vanguard Emerging Markets Stock Index Fund. There were also a number of other minor amendments made to the prospectus. Mr Thomas M. Rampulla left his position as a Managing Director of Vanguard Asset Management, Limited, a subsidiary of The Vanguard Group, Inc., and took up his role as Managing Director of Vanguard's Financial Advisor Services, a division within The Vanguard Group, Inc., on 11 May 2015.

25. Events Since the Balance Sheet Date. Mr Michael S. Miller retired as Managing Director of The Vanguard Group, Inc., as at 17 July 2015. There have been no other significant events after the Balance Sheet date that would require disclosure in the financial statements.

26. Securities Lending. At 30 June 2015, the aggregate ream of securities on loan by the Funds and the value of collateral held by the Funds in respect of these securities are set out below. The cash collateral received was invested by the Investment Manager in the form of time deposits and repurchase agreements.

Fund	Value of Outstanding Securities on Loan	Value of Collateral
	US Dollars (\$)	US Dollars (\$)
Emerging Markets Stock Index	112,287,244	119,315,087

Total	400,846,821	423,045,733

27. Approval of Financial Statements. The Financial Statements were approved by the Directors on 26 August 2015.

Glossary of Investment Terms

Average Coupon. The average interest rate paid on the fixed income securities held by a fund. It is expressed as a percentage of face value.

Average Duration. An estimate of how much the value of the bonds held by a fund will fluctuate in response to a change in interest rates. To see how the value could change, multiply the average duration by the change in rates. If interest rates rise by 1 percentage point, the value of the bonds in a fund with an average duration of five years would decline by about 5%. If rates decrease by a percentage point, the value would rise by 5%.

Average Effective Maturity. The average length of time until fixed income securities held by a fund reach maturity and are repaid, taking into consideration the possibility that the issuer may call the bond before its maturity date. The figure reflects the proportion of fund assets represented by each security; it also reflects any futures contracts held. In general, the longer the average effective maturity, the more a fund's share price will fluctuate in response to changes in market interest rates.

Average Quality. An indicator of credit risk, this figure is the average of the ratings assigned to a fund's fixed income holdings by credit-rating agencies. The agencies make their judgment after appraising an issuer's ability to meet its obligations. Quality is graded on a scale, with Aaa or AAA indicating the most creditworthy bond issuers.

Average Weighted Maturity. The average length of time until fixed income securities held by a fund reach maturity and are repaid. The figure reflects the proportion of fund assets represented by each security.

Beta. A measure of the magnitude of a fund's past share-price fluctuations in relation to the ups and downs of a given market index. The index is assigned a beta of 1.00. Compared with a given index, a fund with a beta of 1.20 typically would have seen its share price rise or fall by 12% when the index rose or fell by 10%. For this report, beta is based on returns over the past 36 months for both the fund and the index. Note that a fund's beta should be reviewed in conjunction with its R-squared (see definition below). The lower the R-squared, the less correlation there is between the fund and the index, and the less reliable beta is as an indicator of volatility.

Credit Quality. The credit ratings assigned to fixed income securities are an indicator of risk. They represent a rating agency's assessment of the issuer's ability to meet its obligations. For this report, credit-quality ratings for each issue are obtained from Moody's Investors Service.

Earnings Growth Rate. The average annual rate of growth in earnings over the past five years for the stocks now in a fund.

Inception Date. The date on which the assets of a fund (or one of its share classes) are first invested in accordance with the fund's investment objective. For funds with a subscription period, the inception date is the day after that period ends. Investment performance is measured from the inception date.

Median Market Cap. An indicator of the size of companies in which a fund invests; the midpoint of market capitalisation (market price x shares outstanding) of a fund's stocks, weighted by the proportion of the fund's assets invested in each stock. Stocks representing half of the fund's assets have market capitalisations above the median, and the rest are below it.

Non-US Holdings. The percentage of a fund's equity assets represented by stocks or depositary receipts of companies based outside the United States.

Ongoing Charges Figure. The fund's total annual operating expenses expressed as a percentage of the fund's average net assets. The expense ratio includes management and administrative expenses, but does not include the transaction costs of buying and selling portfolio securities.

Price/Book Ratio. The share price of a stock divided by its net worth, or book value, per share. For a fund, the weighted average price/book ratio of the stocks it holds.

Price/Earnings Ratio. The ratio of a stock's current price to its per-share earnings over the past year. For a fund, the weighted average P/E of the stocks it holds. P/E is an indicator of market expectations about corporate prospects; the higher the P/E, the greater the expectations for a company's future growth.

R-Squared. A measure of how much of a fund's past returns can be explained by the returns from the market in general, as measured by a given index. If a fund's total returns were precisely synchronised with an index's returns, its R-squared would be 1.00. If the fund's returns bore no relationship to the index's returns, its R-squared would be 0. For this report, R-squared is based on returns over the past 36 months for both the fund and the index.

Return on Equity. The annual average rate of return generated by a company during the past five years for each dollar of shareholder's equity (net income divided by shareholder's equity). For a fund, the weighted average return on equity for the companies whose stocks it holds.

Short-Term Reserves. The percentage of a fund invested in highly liquid, short-term securities that can be readily converted to cash.

Turnover Rate. An indication of the fund's trading activity. Funds with high turnover rates incur higher transaction costs. The turnover rate excludes in-kind transactions, which have minimal impact on costs.

Yield. The current annualised rate of dividends paid on a share of stock, divided by its current share price. For a fund, the average weighted yield for stocks it holds. For Vanguard U.S. Ultra-Short-Term Bond Fund, the yield is expressed as a percentage of the fund's net asset value, is based on income earned over the past 30 days and is annualised, or projected forward for the coming year.

Yield to Maturity. The rate of return an investor would receive if the fixed income securities held by a fund were held to their maturity dates.

VANGUARD INVESTMENT SERIES PLC

Additional Information for Investors in Switzerland

This additional information for investors in Switzerland forms part of the semi-annual report for the period ended 30 June 2015 and should be read in conjunction with the Prospectus of Vanguard Investment Series Plc (hereinafter the “Company”) dated 12 March 2015 and all notes, explanations and additions thereto.

1. SWISS REPRESENTATIVE AND PAYING AGENT

BNP Paribas Securities Services, Paris, Zurich Branch, Selnaustrasse 16, CH-8002 Zurich.

Copies of the prospectus, the Key Investor Information Documents, the articles of association, any later versions of the above documents, the current annual report and financial statements of the Company or, if more recent, the interim report and interim financial statements are available at no charge at the registered office of the Swiss representative.

2. TOTAL EXPENSE RATIO (TER)

All the total expense ratios (TER) reported in the Fund Profile section of the report were calculated in accordance with the 16 May 2008 guidelines on the calculation and disclosure of the TER of the Swiss Funds & Asset Management Association (SFAMA). The calculation method corresponds to the method used in Ireland. As the Company is subject to Irish law, the TER was calculated in accordance with the SFAMA guidelines and was provided for information purposes only. As a rule, deviations are limited to rounding differences.

The TER was calculated for each segment (“sub-fund”) or each share class for the period ended 31 December 2014.

Depending on the transaction, transaction costs are stated at the purchase price of the securities or separately in the revenue statement. These costs, which are not included in operating expenses under the guidelines on calculation and disclosure of the TER, are not taken into account in calculating the TER.

3. PERFORMANCE OF THE FUND AND PORTFOLIO TURNOVER RATE

Fund performance was calculated in accordance with the SFAMA’s 16 May 2008 guidelines for the calculation and disclosure of fund performance. Historical performance data does not provide an indication of current or future performance. These performance data do not include fees and costs incurred on the issue and redemption of shares.

Fund performance for the period ended 31 December 2014 is presented in the Performance Summary section of the report.

The portfolio turnover rate (PTR) was calculated in accordance with the SFAMA’s 16 May 2008 guidelines for the calculation and disclosure of the PTR and is presented separately for each sub-fund.

4. CHANGES IN THE COMPOSITION OF THE SECURITIES PORTFOLIO

An overview of the changes in the composition of the securities portfolio during the period under review (1 January 2014 to 31 December 2014) may be obtained at no charge from the Swiss representative.

5. REFUNDS

Refunds to institutional investors are paid in accordance with the provisions of Irish law.

The Vanguard funds are not sponsored, endorsed, issued, sold or promoted by Barclays Capital Inc. or any of its affiliates ("Barclays"). Barclays makes no representation or warranty, express or implied, to the owners or purchasers of the funds or any member of the public regarding the advisability of investing in securities generally or in the funds particularly or the ability of the Barclays indices to track general bond market performance. Barclays has not passed on the legality or suitability of the funds with respect to any person or entity. Barclays' only relationship to Vanguard and the funds is the licensing of the Barclays indices, which are determined, composed and calculated by Barclays without regard to Vanguard or the funds or any owners or purchasers of the funds. Barclays has no obligation to take the needs of Vanguard, the funds or the owners of the funds into consideration in determining, composing or calculating the Barclays indices. Barclays is not responsible for and has not participated in the determination of the timing of, prices at, or quantities of the funds to be issued. Barclays has no obligation or liability in connection with the administration, marketing or trading of the funds.

Barclays shall have no liability to third parties for the quality, accuracy and/or completeness of the indices or any data included therein or for interruptions in the delivery of the indices. Barclays makes no warranty, express or implied, as to results to be obtained by owners of the funds or any other person or entity from the use of the indices or any data included therein in connection with the rights licensed hereunder or for any other use. Barclays reserves the right to change the methods of calculation or publication, or to cease the calculation or publication of the Barclays Euro Aggregate Treasury 20+ Year Index (AA- or Above), Barclays Global Aggregate Euro Government Float Adjusted Bond Index, Barclays Global Aggregate Euro Non-Government Float Adjusted Bond Index, Barclays Global Inflation-Linked: Eurozone – Euro CPI Index, Barclays Global Aggregate Float Adjusted Bond Index, Barclays Global Aggregate 1–5 Years ex US MBS Float Adjusted Bond Index, Barclays Global Aggregate Japan Government Float Adjusted Bond Index, Barclays Global Aggregate U.K. Government Float Adjusted Bond Index, Barclays Global Aggregate U.K. Non-Government Float Adjusted Bond Index, Barclays Global Aggregate 500MM U.K. Non-Government 1–5 Year Float Adjusted Bond Index, Barclays Global Aggregate U.S. Government Float Adjusted Bond Index, and Barclays Global Aggregate U.S. Credit Float Adjusted Bond Index, and Barclays shall not be liable for any miscalculation of or any incorrect, delayed or interrupted publication with respect to any of the Barclays indices. Barclays makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to the indices or any data included therein. Barclays shall not be liable for any damages, including, without limitation, any indirect or consequential damages resulting from the use of the indices or any data included therein.
