OSTRUM EURO INFLATION

is a sub-fund of Natixis AM Funds (the "SICAV").

R/A (EUR) ISIN LU0935222900

Natixis Investment Managers International, part of the BPCE Group, is the Management Company of the Fund.

OBJECTIVES AND INVESTMENT POLICY

- The investment objective of the Product is to outperform the Bloomberg Euro Govt inflation linked 1 to 10 Year Treasury Index over its recommended minimum investment period of two years.
The Bloomberg Euro Govt Inflation Linked Bond 1 to 10 Year Treasury Index is an index tracking the performance of the Euro zone governments' inflation-linked bonds.
- The Product is actively managed and integrates environmental, social/societal and governance ("ESG") criteria. For indicative purposes only, the Product's performance may be compared to the Benchmark. In practice, the portfolio of the Product is likely to include constituents of the Benchmark, but the Delegated Investment Manager has full discretion in the selection of the securities comprising the portfolio within the limits of the Product's investment policy. However, it does not aim to replicate that Benchmark and may therefore significantly deviate from it.
- The Product promotes environmental or social characteristics but does not have as its objective a sustainable investment. Its SRI investment strategy is based on incorporating ESG factors into the research, applying an SRI selection process and an exclusion policy. The investment team systematically assess for each underlying issuer, whether the extra-financial dimensions impact the issuer's credit risk profile, both in terms of risk and opportunity, as well as their probability of occurrence. Thus, extra-financial dimensions are systematically integrated into the risk assessment and fundamental analysis of both private and public issuers. The investment team systematically assess for each underlying issuer, whether the extra-financial dimensions impact the issue. The Product adopts an ESG process based on the average rating method: the Product's average ESG rating is never lower than that of the Reference Index.
The investment policy of the Product, lies on an active management process combining:
 - Allocation between fixed income asset classes, modified duration, real rates curve and credit and
 - Selection of fixed income securities for the portfolioAfter analysing the key factors determining the evolution of real yields and inflation rates, the portfolio is built according to an allocation using several sources of added value (i.e: exposure to real rates, positioning on the real yield curves, arbitrage within Euro-zone countries and within inflation reference Index (for instance, French inflation against Euro-Zone Inflation), exposure to nominal rates, exposure to international (i.e. non-Euro zone) inflation-linked bonds systematically currency hedged, up to 10% of its net assets).
- The Product invests at least 75% of its net assets in Euro inflation-linked bonds. Depending on market conditions, the Product may be exposed to Euro nominal bonds. The modified duration of the Product (measurement of relation between the variation in price and variation in interest rate) varies between 0 and 6.
As regards the geographical area of the issuers, the exposure of the portfolio to the Euro Zone may range from 0% to 200% and it may range from 0% to 10% for the non-Euro zone exposure.
The Delegated Investment Manager relies on the appraisal of credit risk by its team and its own methodology. In addition to this appraisal, at the time of their acquisition, these securities are subject to a minimum rating constraint corresponding to "Investment Grade" a rating greater than or equal to BBB- (S&P) or Baa3 (Moody's) or BBB- (Fitch ratings) or an equivalent rating in accordance with the Delegated Investment Manager's analysis.
- The Product may use derivatives for hedging and investment purposes.
- Income earned by the Sub-Fund is reinvested.
- Shareholders may redeem Shares on demand on any business day, in both France and Luxembourg, by 13:30.

RISK AND REWARD PROFILE

Higher risk

Typically lower rewards

Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Sub-Fund is ranked on the synthetic risk and reward indicator scale due to its exposure to Euro zone fixed-income markets.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Sub-Fund.
- The lowest category does not mean "risk free".

The following risks may not be fully captured by the risk and reward indicator:

- **Credit risk:** Credit Risk arises from the risk of impairment of the quality of an issuer and/or an issue, which may entail a reduction in the value of the security. It may also arise from default at maturity by an issuer in the portfolio.
Further investment risks are set out in the "Principal risks" section of the Prospectus.
