

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Swisscanto (LU) Bond Fund Responsible Global Absolute Return AAH EUR
(ISIN: LU0957586737)

Swisscanto (LU) Bond Fund Responsible Global Absolute Return AAH EUR is a unit class of the subfund Swisscanto (LU) Bond Fund Responsible Global Absolute Return (hereinafter "fund"), a subfund in the umbrella fund Swisscanto (LU) Bond Fund. The fund is managed by Swisscanto Asset Management International S.A., Luxembourg.

Objectives and investment policy

The investment objective is to preserve the capital on a long-term basis and to generate a long-term positive return regardless of the market conditions by investing in bonds of all credit ratings, maturities and currencies worldwide.

Important features:

The fund invests at least 51% of its assets in fixed or variable-rate securities of private and public-sector debtors. An opportunistic approach is taken to the selection and weighting of the individual securities and investment types, i.e. depending on the assessment of the market at any given time. ESG criteria (environment, social, governance) are systematically taken into account in the investment selection process in accordance with responsibility requirements.

The securities are selected on a discretionary basis using a consistent investment process (active management). With regard to portfolio composition, the selection of stocks and the associated weightings are focused on companies from the FTSE 3-Month Euro Eurodeposit. The portfolio composition may deviate considerably from this benchmark index.

The investment policy is to outperform the benchmark index. The Asset Manager may at any time deviate – significantly or insignificantly, positively or negatively – from the benchmark index by actively overweighting or underweighting individual securities and sectors based on market conditions and risk assessments.

The fund pursues an optimal foreign currency hedging policy.

Derivatives may be used for achieving the investment objective.

Fund units will be issued or redeemed basically on any bank business day in Luxembourg.

Earnings and profits of the unit class are distributed.

Additional important information:

The subfund's overall risk is monitored by applying the absolute Value at Risk (VaR) method.

Recommendation on holding period: this fund is appropriate for investors with a short-term investment horizon (one to three years) or a longer-term investment horizon.

Risk and reward profile

The historical data used for calculating the risk and profit category cannot serve as a reliable indicator of the future risk profile.

The risk and profit category shown may very well undergo changes. Assignment to a category may change over time.

The lowest risk category cannot be equated with a risk-free investment.

Reasons for being assigned to the risk and profit category:

- Interest-rate curve
- Interest-rate increase
- Foreign currency risks

There is no capital guarantee and no capital protection.

Further risks that are essential for the fund and not adequately covered by the indicator above:

- Credit risks, because substantial investments are made in interest-bearing securities where repayment default is possible.

- Operational risks in connection with the safekeeping of assets and the use of derivative financial instruments and other financial techniques for steering risk exposure.

Charges

The costs borne by you are used for the management of the fund as well as its distribution and marketing. The costs may impair the further development of the fund.

One-off charges debited before or after you invest	
Entry charge (max.)	3.00%
Exit charge (max.)	n/a
Charges taken from the fund over a year
