### Fund manager's report

The global economic trend remains benign and inflation figures continue to fall, albeit slowly. All major central banks reaffirmed at their March meetings that interest rate cuts are likely to continue in the second half of the year, while the Swiss National Bank (SNB) has even pushed ahead with a first surprise rate reduction. Against this backdrop, interest rates in major currencies have fallen and risk premiums for corporate bonds and peripheral Eurozone government bonds have narrowed further. The fund's benchmark yield fell by 13 basis points to 3.08%. The fund generated a positive total return due to decreasing yields and has fallen slightly short of the benchmark return. Yield curve positioning, credit positioning and higher current interest rates contributed positively to relative performance, while selection had a negative impact.
