## INVESTMENT OBJECTIVE AND POLICY

The objective of the Fund is to provide a long-term capital appreciation and to outperform its Benchmark, investing in equities of companies, listed on stock exchanges of any participating member state of the Eurozone (qualifying as Regulated Markets). A dynamic management approach will give priority to a long-term outperformance towards the Fund's benchmark rather than to managing the deviation towards the benchmark. The Fund shall invest at least 75% of its net assets in Eurozone equities it also invest on an ancillary basis in equity-linked securities such as, but not limited to, debt securities convertible into common shares, preference shares and warrants on transferable securities of European issuers. The Fund may use financial instruments and derivatives for hedging purposes, for efficient portfolio management purposes and for investment purposes.

## FUND MANAGER'S COMMENTS

### Market review

In July, the euro equity market has continued to rise (+1,46%). Despite the threat of the Covid delta variant, the market was buoyed by central banks that were still very accommodating, economic statistics showing a still strong recovery and an earnings season that started well.

On the economic indicators, it should be noted that growth in China and the US, although strong, has slowed down a little and therefore fears of sustainable inflation have eased.

In this context, US 10-year rates fell by 0.2% to 1.24% and thus favored so-called "growth" stocks (technology, etc.) or those sensitive to interest rates (real estate).

In addition, merger and acquisition operations have accelerated in Europe (Morrisons, Iliad, etc.)

### Portfolio activity

Over the month, the fund has underperformed on a relative basis because of the negative contributions from cash allocation and also stock selection ; indeed, the fund was affected by the disappointing performances of Atos, Alstom and Prosus. The latest name is an holding company mainly invested in the leading tech company Tencent ; the Chinese government has decided to regulate tech industry by fostering competition on online education, gaming, data security, payments. On the other side, the fund has benefited from the strong performance of St Microelectronics (+13%), Cap Gemini (+12%) and St Gobain (+8%).

During this period, the main transaction have consisted into reducing positions on Atos, Prosus for specific reasons and also reduce positioning on some cyclical bets (St Gobain, Arkema). Among the buy transactions, the main ones were Sanofi, Danone (post strong Q2 and new CEO), LVMH and Intesa SanPaolo (ppost ECB lift on dividends, 7% yield).

### Outlook

We are cautiously optimistic about the equity market with the acceleration of immunizations around the world. However, given the presence of risks (rise in interest rates, variant resurgence, etc.) we favor equities offering good visibility in terms of cash flow generation and long-term growth (Vivendi, Thales, Linde plc, etc...) and some restructurings and very updated stories like Spie, St Gobain.
