

Protea Fund - Sectoral Emerging Markets Healthcare Fund - PF USD

ISIN LU1033753986

As of 31/03/2024
Marketing material

Investment Objective

The Sub-Fund invests in healthcare companies domiciled in the emerging markets, across all market caps. Emerging markets are undergoing rapid population aging, leading to higher incidence of age-related disease and rising utilization of therapies and healthcare services. Alongside demographic shifts, rising discretionary income, a growing focus on innovation, favorable regulatory and drug approval trends, as well as increased government spending on healthcare are supporting strong growth for healthcare companies across emerging geographies. The Sub-Fund offers an investment opportunity that focuses on these growth drivers. Investments are focused on companies offering emerging therapies and services across all healthcare segments and addressing significant unmet medical need.

Investment Policy

The manager specializes in the area of healthcare investments and employs a bottom-up, research-intensive investment approach. The security selection process is based on primary research, analysis of industry and company fundamentals, and in-depth due diligence on companies to assess their scientific, business, and financial aspects. ESG and sustainability criteria are integrated throughout the process.

Market Commentary

During the month, the MSCI Emerging Markets Health Care Index (-1.7%) underperformed the MSCI Emerging Markets Index (+2.5%) and the MSCI World Health Care Index (2.5%).

China healthcare equities resumed their slump in March after a brief recovery last month. Geopolitical headlines continued to plague leading Chinese CXO groups Wuxi Aptec and Wuxi Biologics while a leaked document around full-scale policy support from the Chinese government for innovative drug development drove rallies in selected beneficiaries such as Hansoh Pharma. Healthcare services names such as Hygeia and Imeik held up thanks to strong earnings. Indian healthcare stocks were flat in March with Indian hospital players such as Apollo Hospital recovering, to some extent, from a pricing regulation scare. Large cap stocks fared better relative to small- and mid-caps in India as valuation concerns became more pronounced for the latter. Korea healthcare stocks rallied in March. HLB continued its speculative momentum into March. Yuhan and Samsung Biologics also contributed to the positive performance.

Top contributors: Underweight China Medical System -36% on earnings disappointment; Underweight Wuxi Biologics -25% on geopolitical concerns; Overweight Aspen Pharmacare +13% on positive clinical and commercial updates.

Top detractors: Underweight HLB +28% with Korea short sale ban speculations; Overweight New Horizon Health -29% with delayed annual report issuance; Overweight Dr Reddy’s -5%.

Notable transactions: no notable transactions in the month.

Methodologies

ESG Risk Rating

ESG Risk Rating measures the degree to which a company's economic value is at risk driven by ESG factors or, more technically speaking, the magnitude of a company's unmanaged material ESG risks.

Corporate Governance

Corporate Governance evaluates the governance structures, practices and behaviors of companies and their ability to build sustainable long-term value that can be delivered to stakeholders and shareholders in a fair and transparent manner.

GHG (Greenhouse Gas) Emissions

Scope 1 Emissions: Direct Greenhouse emissions that are generated from production processes which are owned and/or controlled by the company (ie: fuel combustion, company vehicles, fugitive emissions...).

Scope 2 Emissions: Indirect Greenhouse emissions associated with the purchase of energy (ie: electricity, heat or steam...).

Scope 3 Emissions: All indirect emissions arising from the activities of an organisation. This includes emissions from both suppliers and/or consumers (ie: purchased goods/services, travel, waste disposal, transportation and distributions, leased assets, investments...).

Carbon footprint: Aggregation of Scope 1, 2 and 3 GHG emissions of a company relative to its enterprise value.

Carbon intensity: Aggregation of Scope 1, 2 and 3 GHG emissions of a company relative to its sales or revenues.

Physical Climate Risk

Physical Climate Risk assesses the exposure of companies that may potentially be negatively affected by the physical impacts of climate change.

Controversies

ESG Controversies analysis of underlying companies is based on incidents and events that may pose a business or reputational risk due to the potential impact on stakeholders, the environment, or the company's operations.

Product Involvement

Product involvement provides research on companies' involvement in certain types of products and services. This enables screening approaches according to specific criteria such as ethical, impact, compliance or ESG risk considerations.

This research tracks both direct involvement in a product in one or more ways such as production, distribution or related services and indirect involvement in a product through ownership in an involved company.
