# Mortgage Income Portfolio

a sub-fund of ACMBernstein  
Class I2 Shares (LU1021292617)

This Fund is managed by AllianceBernstein (Luxembourg) S.à r.l., part of the AllianceBernstein Group

## OBJECTIVES AND INVESTMENT POLICY

### Investment objective

The Fund seeks to realize superior returns on your investment over the long term relative to the degree of risk taken.

### Investment policy

Under normal circumstances, the Fund invests mainly in mortgage-related and other asset-backed securities. The Fund may invest in both higher-rated (Investment Grade) and in higher-yielding, lower-rated (below Investment Grade) and therefore riskier debt securities.

Investments in below Investment Grade debt securities are not expected to exceed 50% of the Fund's net assets. The Fund will maintain a weighted average effective duration of no more than eight years. In addition, under normal circumstances, the Fund will hedge its non-USD currency exposure in order to maintain such exposure to a maximum of 5%.

The Fund may use derivatives (i) for efficient portfolio management and (ii) in seeking to reduce potential risks.

### Fund currency

The reference currency of the Fund is USD.

### Share class currency

The reference currency of the share class is USD.

### Distribution policy

This share class is a non-distributing share class. Income and capital gains derived from the Fund are reinvested.

### Redemption

Shares may be redeemed on any day when both the New York Stock Exchange and Luxembourg banks are open for business.

### Terms to understand

**Asset-backed securities:** Debt securities representing an interest in a pool of consumer debt, such as credit card debt or automobile loans.

**Debt securities:** Securities that represent the obligation to pay a debt, with interest.

**Derivatives:** Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

**Duration:** A measure of how much the price of a fixed-income asset will fluctuate as a result of changes in the interest rate environment. Securities with a higher duration are typically more sensitive and can have greater price fluctuations in case of changes in the interest rates.

**Mortgage-related securities:** Debt securities representing an interest in a pool of mortgages.

## RISK AND REWARD PROFILE

### What does this risk indicator mean?

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also mean a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Fund's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged and may shift over time.

### Why is this Fund in this category?

The Fund is not guaranteed in capital. The Fund is invested in debt securities that are subject to variations up or down and that can generate gains or losses.

### Risks materially relevant to the Fund but not adequately captured by the SRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

**Counterparty risk:** If an entity with which the Fund does business becomes insolvent, payments owed to the Fund could be delayed, reduced, or eliminated.

**Credit risk:** The financial health of debt security issuers could fall sharply, leading to defaults and to large losses in the value of debt securities.

**Focus risk:** Any industry, sector, country, geographical area, or type of market (such as emerging markets) to which the Fund has significant exposure could experience bad conditions.

**Liquidity risk:** Certain securities could become hard to buy or to sell at a desired time or price.
