GENERAL INFORMATION

Investment objective

EdR Fund QUAM 5 aims not to exceed a maximum volatility restriction of 5% per year and is designed to produce positive performance. The risk level may be compared to a diversified bond portfolio. The Fund's exposure to equities is expected to be between 0% and 30%. The large and diversified investment universe consists of long-only funds covering bonds, balanced and equity and money markets, without restriction in terms of geographic or industrial sector. Investment decisions are based on mathematical models, thus eliminating any subjectivity in the portfolio allocation.

Monthly comment

During the first month of this year, equity indices were navigating by sight with no particular trends apparent; while on fixed income markets 10-year US bonds reached new levels not seen since March 2020. The markets hailed the US Democratic Party's victory in Georgia and anticipated the possibility of the new Biden Administration implementing a significant fiscal stimulus. Faced with these prospects, US rates have been reacting to the rise, and also aided by expectations of rising inflation, following the appointment of Janet Yellen as Secretary of the US Treasury. The prospect of concerted action between the US Federal Reserve (which she chaired from 2014-2018) and this government institution is seen as a positive sign on the inflation outlook.

In Europe, uncertainty persists. Concerns about the pandemic are resurfacing given a slower-than-expected vaccination roll-out, and political tensions in Italy are returning to centre stage. In terms of monetary policy, the vast majority of central banks have maintained their discourse on monetary policy flexibility, and reiterated that support for the economy is necessary.

During this period, our QuAM methodology has reduced the bond compartment in favour of money market funds, and rotated on geographic and sector terms.

With a weak equity compartment, allocation has remained relatively stable. On the bond side, the QuAM methodology took advantage of the hike in rates to invest in US government bonds, at the expense of European government bonds which have been offering negative yields. In a climate where the theme of reflation is being increasingly examined by the market, inflation-linked bonds are increasing in the portfolio. At the same time, corporate bonds —suffering from declining results—fell within the portfolio.

and/or on the following website (<http://funds.edram.com>), in order that investors analyse the risks and build their own opinion, independently from any entity of the Edmond de Rothschild Group. Investors are invited to request the opinion of their Legal Counsel where necessary, to ensure the suitability of the investment with regards to their financial situation, experience and investment objectives.

The numerical data, comments and analyses in this presentation reflect the opinion of Edmond de Rothschild Asset Management (Suisse) S.A. with respect to the markets and their trends, regulation and tax issues, on the basis of its own expertise, economic analyses and information available as of today. The figures mentioned refer to past years. Past performance and ratings are not indicative of future performance and ratings. Past performance can be misleading. The value of units or shares of funds and the returns are subject to fluctuation, and investors may not get back the full amount invested. Performance data is calculated on a dividend reinvested basis. These performances do not take into account the fees and expenses collected on the issue or redemption of shares/units, or taxes levied in the client's country of residence.

Figures mentioned in this document may be denominated in a currency other than that of the country in which the investor resides. As a result, potential gains may be increased or decreased by fluctuations in foreign exchange rates

The information in this document regarding this UCITS is not intended to replace the information in the full prospectus, or the partial prospectus if the cited subfund is authorised for distribution in Switzerland, the annual and semi-annual report. Prior to making any investment decision, the investor therefore has an obligation to read it.

This document is only for information and does not represent an offer to buy or a solicitation to sell; the basis of any contract or commitment; a financial, legal or tax advice. No part of this document should be interpreted as investment advice. Regulations related to fund marketing may vary from one country to the next. This UCITS may be marketed in a jurisdiction other than that of its country of registration, in particular under the private placement regime for qualified investors, when the law of that other jurisdiction authorizes it. If you have the slightest doubt about marketing requirements for this UCITS, we invite you to contact your usual adviser.

No UCITS can be offered or sold to persons, or in countries or jurisdictions where such offer or sale would be unlawful.

United States: The fund and its shares are not registered under the Securities Act of 1933 or any other US regulation. Its shares may not be offered, sold, transferred or delivered for the benefit of, or on behalf, of a US National, as defined by US law.

In accordance with current local regulations, the UCI, or the class of the UCI, have received marketing authorization to specific institutional investors, or more broadly to qualified or professionals investors in the following country(ies): **Singapore**

RISK SCALE

Synthetic risk/return indicator ranks the fund on a scale from 1 to 7 (1 being the less risky ranking, 7 being the most risky ranking). This rating system is based on average fluctuations in the fund's net asset value over the past five years, i.e. the scale of changes in the index securities, both up and down. If the net asset value is less than 5 years old, the rating is determined by other regulatory calculation methods. Historic data such as those used to calculate the synthetic indicator may not be a reliable indication of the future risk profile. The current category is neither a guarantee nor an objective. Category 1 does not signify a risk free investment. For more details on the methodology of the ranking, please consult the key investor information document (KIID) of the fund.
