LO Selection - TargetNetZero (USD) Credit Bond, PA

(the "Sub-Fund") a Sub-Fund of Lombard Odier Selection (the "SICAV")

Category P, Class accumulated, Currency USD, ISIN LU1035457651 (the "Class")

This Sub-Fund is managed by Lombard Odier Funds (Europe) S.A., part of Lombard Odier Group

Objectives and Investment Policy

Objectives and Investment Policy

The Sub-Fund is actively managed in reference to a benchmark. The ML 1-10 Y US Corporate (the "Benchmark") is used for performance comparison and internal risk monitoring purposes only. Bond issuers represented in the portfolio of the Sub-Fund will generally be similar to those of the Benchmark, however the Investment Manager has discretion to select issuers that are not part of the Benchmark universe. The Sub-Fund's holdings are therefore expected to deviate to a limited extent from the Benchmark. Securities in the Benchmark might be excluded from the Sub-Fund's portfolio depending on their involvement in specific activities listed in the SFDR Annex. Each remaining security is weighted according to the market capitalization of its issuer, its LOPTA (Lombard Odier Portfolio Temperature Alignment) and its carbon footprint, in order to increase significantly the exposure of the Sub-Fund's portfolio to issuers which can contribute to a reduction in global CO2 emissions and the eventual achievement of net zero CO2 emissions by 2050. The Sub-Fund's portfolio will aim for a faster rate of reduction in CO2 emissions when compared to the Benchmark. The Sub-Fund's portfolio aims for a significantly reduced carbon footprint when compared to the Benchmark. Ultimately the credit quality and valuation of each holding is controlled to ensure a portfolio with satisfying credit quality and attractive financial profile. While the Investment Manager intends to maintain a low tracking

error through controlled style, sector and country biases, the level of active risk associated with the realization of the investment objectives is likely to vary over time and is dependent on regulatory, technological and commercial developments external to the Investment Manager, that could significantly impact the temperature alignment or carbon footprint of securities in the Sub-Fund's portfolio. The Sub-Fund mainly invests worldwide in USD denominated bonds of corporate issuers. The use of financial derivative instruments is part of the investment strategy. The Sub-Fund is a product which promotes environmental or social characteristics or a combination of those characteristics for the purposes of article 9 of the Sustainable Finance Disclosure Regulation. The Investment Manager adopts a multifaceted approach to the way it analyses the sustainable profile of the Sub-Fund's investments (including sustainability focused screening & scoring, exclusions, restrictions and qualitative and quantitative reviews).

What does it mean?

This indicator (SRRI) represents the annualized historical volatility of the Sub-Fund over a 5-year period. Where there are less than 5 years worth of data, missing returns are simulated using an appropriate benchmark. The SRRI may change over time and should not be used as an indicator of future risk or returns. Even the lowest risk classification does not imply that the Sub-Fund is risk-free or that capital is necessarily guaranteed or protected.

Category

The classification of this Sub-Fund in this category is based on the volatility of a proxy of the Sub-Fund's weekly returns over the last 5 years. The Sub-Fund's history being shorter than 5 years, the Sub-Fund's returns have been proxied by benchmark returns for the period which falls short of the 5 year calculation period. A Risk-Reward indicator of 3 is associated with volatility levels of between 2% and 5%, which is

typical of investment grade CHF credit bond funds.

Are there any other particular risks?

The following risks may be materially relevant but may not always be adequately captured by the synthetic risk indicator and may cause additional loss:

- Liquidity risk: where a significant level of investment is made in financial instruments that may under certain circumstances have a relatively low level of liquidity, there is a material risk that the fund will not be able to transact at advantageous times or prices. This could reduce the Fund's returns.
- Credit risk: a significant level of investment in debt securities or risky securities implies that the risk of or actual default may have a material impact on the performance. The likelihood of this happening depends on the credit-worthiness of the issuers.
- Operational risk and risks related to asset safekeeping: in specific circumstances, they may be a material risk of loss resulting from human errors, inadequate or failed internal systems, processes or controls or from external events.

For more details about risk, see appendix B "Risk Factors Annex" of the prospectus.
