

Flossbach von Storch - Multiple Opportunities II - IT

Flossbach von Storch investment sub-fund under Luxembourg law (mutual fund) and authorised for distribution in Spain.

INVESTMENT STRATEGY

The Fund pursues an **active investment approach**. The Fund Manager can invest flexibly in the asset classes that appear attractive from his/her point of view in the respective capital market environment; the equity component is at least 25 per cent.

The basis for asset allocation is the Fund's own **independent investment world view**. The Fund deliberately does not follow any benchmark index. The primary objective is to generate sustainably attractive returns. Whether an individual investment is attractive is assessed within the framework of a thorough company analysis.

The **risk-reward ratio** is decisive for every investment decision; the potential return must clearly overcompensate for any risk of loss. The portfolio structure is based on the five guidelines of the Flossbach von Storch Pentagram: diversification, quality, flexibility, solvency, and value. The composition of the portfolio is made by the Fund Manager exclusively in accordance with the criteria defined in the investment policy and is regularly reviewed and adjusted if necessary.

The investment strategy includes in-house valuation models, ESG integration, engagement, and the exercise of voting rights. In addition, exclusion criteria defined within the Sub-Fund's investment policy are taken into account. The Sub-Fund is classified as an Article 8 product within the definition of the Disclosure Regulation (EU) 2019/2088 (SFDR). For detailed information on the objectives and investment policy, please refer to the current Sales Prospectus and the Key Information Document (PRIIP-KID).

² Performance for the period to 02 March 2014 was simulated using the performance of share class I (LU0952573300) of sub-fund Flossbach von Storch - Multiple Opportunities II. Share class I and share class IT have the same investment policy.

EXPLANATORY NOTES REGARDING PERFORMANCE

Past performance is not a reliable indicator of future performance. Performance is calculated based on the net asset value (NAV). The subscription fee, as well as other fees, are not taken into account and therefore have a negative effect on the performance of the investment. Example calculation (subscription fee included): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5%, €50 will be deducted from their investment as a one off initial charge. In addition, custody fees may be applied.

Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund. The reference index is merely informative. It does not constitute any obligation to track the index or achieve the same performance for the fund manager.

Flossbach von Storch - Multiple Opportunities II - IT

OPPORTUNITIES

- + Flexible investment policy without benchmarking.
- + Risk is broadly diversified by investing in a range of asset classes (e.g. equities, bonds, convertible bonds and precious metals indirect). Market potential can be exploited by investing across a wide range.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.
- + Derivatives can be used to increase potential yields.
- + Precious metals [indirect] (e.g. in the form of gold) can be used to increase potential yields.

RISKS

- Market risks: The securities in which the Management Company invests the sub-fund assets present opportunities for gain but also the possibility of risk. The ESG criteria restrict the selection of target investments in terms of category and number, sometimes considerably. If a sub-fund invests directly or indirectly in securities and other assets, it is subject to many general trends and tendencies on the markets, which are sometimes attributable to irrational factors, particularly on the securities markets. Losses can occur when the market value of the assets decreases against the cost price. If a unit holder disposes of units in a sub-fund at a time when the quoted price of the sub-fund assets is less than at the time of investment, then the unit holder will not recover the full value of the investment. While each sub-fund constantly strives to achieve growth, growth cannot be guaranteed. The risk exposure of the investor is, however, limited to the sum invested. There is no obligation to make additional capital contributions beyond investors' investments.
- Currency risks: If a sub-fund holds assets which are denominated in foreign currencies, it shall be subject to currency risk. In the event of a devaluation of the foreign currency against the reference currency of the subfund, the value of the assets held in foreign currencies shall fall.
- Credit risks: The fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.
- Interest change risks: Investing in securities at a fixed rate of interest is connected with the possibility that the current interest rate at the time of issuance of a security could change. If the current interest rate increases as against the interest at the time of issue, fixed rate securities will generally decrease in value. Conversely, if the current interest rate falls, fixed rate securities will increase.
- Risks relating to the use of derivatives: The fund may enter into derivative transactions for the purposes listed in the key information document (PRIIP-KID) and the sales prospectus. This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the fund.
- Risks of precious metals and commodities: Precious metals and commodities may be subject to greater price fluctuations. Trading prices may also fall.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

GROWTH-ORIENTED:

The fund is appropriate for growth-oriented investors. Due to the composition of the net sub-fund assets, there is a high degree of risk but also a high degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Long-term: over 5 years

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

LEGAL NOTICE

This document is intended amongst other things as advertising material and does not constitute an offer to sell, purchase or subscribe to securities or other assets.

The information contained in this document pertains to a sub-fund of Flossbach von Storch, a collective investment scheme registered with the Spanish National Stock Market Commission [Comisión Nacional del Mercado de Valores] (CNMV) under No. 1389. You can find the current list of the company's authorised distributors in Spain (hereafter: "Spanish distributors") at the CNMV website, www.cnmv.es.

This document does not disclose all the risks and other factors relevant to a potential investment in the sub-fund. To obtain more detailed information and prior to making an investment decision, investors are advised to consult the most recent legal documents. These include the key information document (PRIIP-KID) of the sub-fund and share class; the sales prospectus; as well as the articles of association, management regulations or contract conditions, in conjunction with the latest respective annual report and, if one has been published since the most recent annual report, the respective semi-annual report. These documents are available free of charge from the respective management company or depositary, either as a hardcopy or electronically. In addition, these documents can be obtained free of charge at the Allfunds Bank representative service (Complejo Pza. de la Fuente – Edificio 3, 28109 Alcobendas (Madrid) and their website www.allfundsbank.com) or at www.fvsinvest.lu. These documents form the binding basis for any purchase. For the summary of investor rights with additional information regarding legal disputes, please refer to the website <https://www.fvsinvest.lu/investor-rights>. The Management Company may make any country-specific adjustments to the distribution authorisation, including the revocation of distribution regarding its investment funds.

Spanish distributors must make all mandatory official documents available as a hardcopy or via appropriate electronic means. Investors are advised to obtain more information and seek professional advice prior to making an investment decision.

The latest net asset value (NAV) of the fund can be obtained from the management company's website.

The tax treatment of the investment depends on the investor's personal circumstances and may be subject to change. Please consult your tax advisor regarding the regulations currently in effect in Spain.

Past performance is not a reliable indicator of future performance. The value of the investment and any income from them can fluctuate and investors may not get back the full amount invested.
