Spanish Equity Class R EUR Shares (LU0995386439) a Sub-Fund of EDM International

The Fund is managed by Waystone Management Company (Lux) S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

This Sub-Fund is a feeder sub-fund and will as such at all times invest at least 85% of its assets in units of the Master Fund (EDM INVERSION, FI) which qualifies as a "master UCITS".

The objective of this Sub-Fund is to achieve capital appreciation through investment in the Master Fund.

Investment Policy

The Sub-Fund intends to realise its investment objective by investing substantially all of its assets into the units of the Master Fund. The Master Fund will invest in Euro equities.

The residual assets of the Sub-Fund will consist in ancillary liquid assets, as may be required from time to time for dealing liquidity purposes and payment of costs and expenses of the Sub-Fund. The Sub-Fund intends to minimize the level of ancillary liquid assets held for these purposes.

Description of the Master Fund

The Master Fund uses the General Index of the Madrid Stock Exchange "IGBM" as a benchmark index.

A minimum of 75% of the Master Fund's total exposure and 90% of the equity will be equity listed in Spanish markets and assets from Spanish companies listed in other markets, of mainly high capitalisation, without discarding those of low capitalisation. The remainder of the Master Fund will be invested in fixed-income assets, specifically public or private fixed income, including deposits and money market instruments, listed or otherwise, with a maximum exposure of 25% of the total Master Fund. The average term of the fixed-income portfolio of the Master Fund is not predetermined. Issues will be required to have a minimum average credit rating (minimum BBB-). However, up to 100% may always be invested in assets with a rating equal to or greater than that of the Kingdom of Spain at all times. The exposure to currency risk will not

exceed 30%. The Master Fund will not invest more than 10% of its equity in units of financial collective investment undertakings (CIU) which are qualifying assets, harmonised or otherwise, belonging or otherwise to the manager's group, with an investment policy consistent with that of the Master Fund.

The maximum exposure of the Master Fund to market risk through derivatives is the amount of the equity.

The Master Fund may operate with derivative financial instruments traded in organised derivative markets for hedging and investment purposes and with OTC derivatives for hedging purposes. This operation entails risks due to the possibility that the hedging is not perfect, the leverage involved and the lack of a clearing house

The Master Fund promotes, among other characteristics, environmental and social characteristics, but does not have as its objective a sustainable investment.

Benchmark

The Sub-Fund is actively managed and uses the General Index of the Madrid Stock Exchange "IGBM" for performance comparison purpose only. The Sub-Fund may select securities on a discretionary basis. The deviation of the portfolio composition of the Sub-Fund compared to the benchmark is material.

Sub-Fund Currency

The reference currency of this Sub-Fund is the EUR.

Income

All income received by the Share Class will be reinvested.

Subscription and Redemption

Investors may buy, switch and redeem shares of the Sub-Fund on any day, which is a bank business day in Luxembourg and in Catalonia (Spain).

RISK AND REWARD PROFILE

Risk Disclaimer

The risk and reward indicator illustrates where the Sub-Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Sub-Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

Why is this Sub-Fund in this category?

The Sub-Fund is subject to a high level of risk being linked to typical risks of securities markets, such as the macro-economic trends at global level. At this time, the level of the risk and reward profile is equal to 6.

Not all risks affecting the Sub-Fund are adequately captured by the synthetic risk indicator. The following risks may affect the Sub-Fund:

Liquidity risk: which may occur when investments are made in financial instruments that could have a lower level of liquidity in some circumstances for example in the case of a market crash or default of issuers; due to massive redemptions of shareholders resulting in a potential decrease of the value of certain of the Sub-Fund's investments;

Operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud;

The Sub-Fund is also indirectly exposed to the risks of the Master Fund.

For full details of the risks the Sub-Fund may be exposed to, please refer to the Prospectus of the fund.
