### Sustainability characteristics

- ✓ Active Ownership and Engagement
- ✓ Enhanced exclusion filters and other limits
- ✓ Exclusion list
- ✓ Norms-based Screening
- ✓ Paris Aligned Fossil Fuel Policy (PAFF)
- ✓ Principal Adverse Impact (PAI) integration

### ESG integration summary

This fund does not invest in companies involved in the production of illegal or nuclear weapons or exhibiting more than 10% of their revenues from oil sand. We also exclude companies with large and sustained exposure to coal mining, with a 10% revenue threshold on thermal coal and a 30% revenue threshold on total coal (including metallurgical coal). Beyond these corporate exclusions (1), the fund adheres to NAM's Paris-Aligned Fossil Fuel Policy. Enhanced exclusion filters are applied to the portfolio construction process to restrict investments in companies and issuers with significant exposure to certain activities deemed to be damaging for the environment and/or the society at large, including tobacco companies and fossil fuel companies. The fund may use derivatives and such holdings are not in scope of the ESG criteria. Active ownership and engagement are key components in seeking to influence companies' behaviour. (1) Nordea Asset Management corporate exclusion list is available on the following link: <https://www.nordea.com/en/sustainability/sustainable-business/investments/exclusion-list/>.
