GENERAL INFORMATION

Nomura Funds Ireland Plc (the "Fund") is structured as an open-ended umbrella investment company with variable capital, incorporated under the laws of Ireland on 13th April, 2006 as a public limited company pursuant to the Companies Act 2014. The Fund has been authorised by the Central Bank of Ireland (the "Central Bank") pursuant to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The Fund commenced operations on 18th December, 2006.

The Fund has segregated liability between its Sub-Funds (the "Sub-Funds") and accordingly any liability incurred on behalf of or attributable to any Sub-Fund shall be discharged solely out of the assets of that Sub-Fund. The Sub-Funds are set out below:

- Nomura Funds Ireland India Equity Fund
- Nomura Funds Ireland Fundamental Index Global Equity Fund¹

Nomura Funds Ireland - India Equity Fund

The investment objective of the Nomura Funds Ireland - India Equity Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of Indian securities.

The Sub-Fund invests, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in India. The Sub-Fund may invest in equity and equity-related securities listed or traded on any recognised exchange outside India provided that the business activities of the issuers of such securities are in India. The Sub-Fund may also hold exposure to India through investment in such instruments as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") and which may be listed on any recognised exchange outside India.

It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund is considered to be actively managed in reference to the MSCI India Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

Nomura Funds Ireland - Fundamental Index Global Equity Fund

The Nomura Funds Ireland - Fundamental Index Global Equity Fund (the "Sub-Fund") was fully redeemed on 4th January, 2017 but the Central Bank has not withdrawn its approval yet.

Nomura Funds Ireland - NEWS Emerging Markets Small Cap Equity Fund

The Nomura Funds Ireland - NEWS Emerging Markets Small Cap Equity Fund was fully redeemed on 27th June, 2014 but the Central Bank has not withdrawn its approval yet.

As at 31st December, 2022, the Sub-Fund held three illiquid positions in its portfolio – Inepar SA Industria e Construcoes, China Lumena New Materials Corp, China Metal Recycling Holdings Ltd. The Sub-Fund had a cash balance of USD 10,089 at the financial year end.

Nomura Funds Ireland - Japan Strategic Value Fund

The investment objective of the Nomura Funds Ireland - Japan Strategic Value Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in a portfolio of Japanese equity securities.

The Sub-Fund invests, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Japan. The Sub-Fund may invest up to 30% of its net assets in equity and equity-related securities listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund seeks to identify equity and equity-related securities, whose valuations are, in the opinion of the Sub-Investment Manager, low in comparison to assets and profitability, and which may be expected to rise in the future. In addition to these valuation opportunities, the Sub-Fund seeks investments based on other strategic features as detailed below:

- a) equity and equity-related securities where changes to financial conditions, such as changes in operations, strategy and dividend and share buy-back policies, are expected;
- b) equity and equity-related securities where potential for growth has been identified, including improved results and increasing market share, as new business operations are developed and the underlying economy improves; and
- c) equity and equity-related securities relating to companies that have been identified as candidates for business restructuring, corporate governance reform or attractive merger and acquisition opportunities.

The Sub-Fund is considered to be actively managed in reference to the TOPIX Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

The Sub-Fund is managed so as to maintain a near fully invested position, other than during periods where the Investment Manager believes that a larger cash position is warranted.

Nomura Funds Ireland - US High Yield Bond Fund

The investment objective of the Nomura Funds Ireland - US High Yield Bond Fund (the "Sub-Fund") is to achieve current yield and capital gains, through investment in a diversified portfolio of primarily high yielding US Dollar denominated debt and debt-related securities issued principally by companies in the United States and Canada.

The Sub-Fund may invest in debt and debt-related securities issued by United States or non-United States corporations, limited liability companies or limited partnerships and other forms of enterprise.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund invests at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated.

No more than 30% of the Sub-Fund's net assets may be invested in debt and debt-related securities with a rating of lower than B3/B- by both Moody's and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

The Sub-Fund may invest up to 25% of its net assets in debt and debt-related securities issued by companies, governments or governmental agencies in countries other than the United States or Canada.

No more than 5% of the Sub-Fund's net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund's net assets may be invested in debt and debt-related securities in any one industry. The Sub-Fund may invest up to 20% of its net assets in debt and debt-related securities not denominated in US Dollar.

The Sub-Fund is considered to be actively managed in reference to the ICE Bank of America Merrill Lynch US High Yield Constrained Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

A change in Index proposed by the Directors will be subject to shareholder approval and disclosure in a revised supplement for the Sub-Fund.

Nomura Funds Ireland - Japan High Conviction Fund

The investment objective of the Nomura Funds Ireland - Japan High Conviction Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of Japanese equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Japan.

The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund is considered to be actively managed in reference to the TOPIX Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

Investors should note that due to the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a high annualised volatility.

Nomura Funds Ireland - Asia Ex Japan High Conviction Fund

The investment objective of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of Asian (excluding Japan) equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country Asia Ex Japan Index (the "Index Countries").

Nomura Funds Ireland - Asia Ex Japan High Conviction Fund (continued)

The Sub-Fund may invest up to 30% of its net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, provided that the business activities of the issuers of such securities are in the Index Countries.

The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or Non-Voting Depositary Receipts ("NVDRs") and which may be listed on any recognised exchange in a non-Index Country. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Fund is considered to be actively managed in reference to the MSCI All Countries Asia Ex Japan Index (total return with net dividends reinvested) (the "Benchmark") by virtue of the fact that it seeks to outperform the Benchmark. While certain of the Fund's securities may be components of and may have similar weightings to the Benchmark, the Investment Manager will use its discretion to invest in securities or sectors not included in the Benchmark in order to take advantage of investment opportunities. The investment strategy does not restrict the extent to which the Fund's holdings may deviate from the Benchmark and deviations may be material. This is likely to increase the extent to which the Fund can outperform or underperform the Benchmark.

Investors should note that due to the general nature of Asian markets, and the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a high annualised volatility.

Nomura Funds Ireland - Global Sustainable High Yield Bond Fund

The investment objective of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund (the "Sub-Fund") is sustainable investment to achieve current yield and capital gains through investment in a diversified portfolio of primarily high yielding debt and debt-related securities issued in the United States or major Eurobond developed markets.

The Sub-Fund shall invest in a diversified portfolio of primarily high yielding debt and debt-related securities issued in developed markets principally by companies, which are listed or traded on a recognised exchange and which constitute sustainable investments. Investors should note that high yielding securities generally have a high volatility.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities.

The Sub-Fund may hold equity and equity-related securities, which may or may not be listed or traded on a recognised exchange, that it receives or purchases in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. No more than 30% of the Sub-Fund's net assets may be invested in debt and debt-related securities with a rating lower than B3/B - by both Moody's and S&P, respectively or which are deemed to be of equivalent quality by the Investment Manager.

Subject to Section 2.1 of Appendix 1 to the Prospectus, the Sub-Fund may invest up to 10% of its net assets in loans, loan participations and/or loan assignments, which constitute transferable securities or money market instruments.

No more than 5% of the Sub-Fund's net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund's net assets may be invested in debt and debt-related securities in any one industry (as defined by reference to ICE BofA Level 4 Industry Classification which comprises a detailed sector classification for constituents of the ICE BofA global fixed income universe).

The Sub-Fund is considered to be actively managed in reference to the ICE BofA Developed Markets High Yield Constrained (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund seeks to achieve its sustainable investment objective by investing in debt and debt-related securities of issuers that contribute to the sustainable development of society and/or the environment and which also provide attractive return.

The Sub-Fund may also employ spot foreign exchange transactions, forward foreign exchange contracts and currency futures to seek to hedge the foreign exchange exposure of the assets of the Sub-Fund from the impact of fluctuations in the relevant exchange rates.

Nomura Funds Ireland - Diversified Growth Fund

The Nomura Funds Ireland - Diversified Growth Fund (the "Sub-Fund") was fully redeemed on 26th February, 2021, but the Central Bank has not withdrawn its approval yet.

Nomura Funds Ireland - Global Dynamic Bond Fund

The investment objective of the Nomura Funds Ireland - Global Dynamic Bond Fund (the "Sub-Fund") is to provide a combination of income and growth through investing principally in debt and debt-related securities with fixed or variable rates of income.

The Sub-Fund shall invest principally in debt and debt-related securities with fixed or variable (linked to inflation or other indices) rates of income, issued by corporations, limited liability companies, limited partnerships, sovereign, government agencies, supranational or other issuers, which are listed or traded on recognised exchanges. In addition to direct investment in debt and debt-related securities, the Sub-Fund may also gain exposure to debt and debt-related securities indirectly through investment in financial derivative instruments.

There are no geographical restrictions as to the debt and debt-related securities that may be held, but a maximum of 30% of the Net Asset Value of the Sub-Fund may be invested in debt and debt-related securities of emerging market issuers.

The Sub-Fund may invest either in investment grade or sub-investment grade debt and debt-related securities, which have been rated as such by at least one rating agency (either Standard & Poors or Moody's). The Sub-Fund may also invest up to 30% of its Net Asset Value in unrated securities (which are not rated by a rating agency), if the Investment Manager determines that the security is of comparable quality to a rated security that the Sub-Fund may purchase.

Subject to Section 2.1 of Appendix 1 to the Prospectus, the Sub-Fund may invest up to 10% of its net assets in loans, loan participations and/or loan assignments, which constitute transferable securities or money market instruments.

With the exception of equity options and equity index options no investment shall be made in equity securities provided, however, that equity securities up to 10% of the Net Asset Value may be held as a result of investments in preferred securities, which have equity/warrant characteristics or as a result of acquisitions of equity securities upon conversion or exercise of convertible bonds.

The Sub-Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio, subject to the stated investment objectives and policies of the Sub-Fund.

Nomura Funds Ireland - Emerging Market Local Currency Debt Fund

The investment objective of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund (the "Sub-Fund") is to generate a total return through a combination of capital gains and income gains.

The Sub-Fund seeks to achieve its objective principally by investing in local currency denominated emerging debt and debt-related securities and derivative instruments comprising forward currency contracts, non-deliverable forward contracts ("NDFs"), futures, interest rate swaps, cross currency swaps, credit default swaps, FX options and interest rate options. The Sub-Fund may, without limitation, also invest in non-local currency denominated emerging debt and debt-related securities and non-emerging debt and debt-related securities.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies or limited partnerships and other forms of enterprise, and in sovereign, quasi-sovereign and supranational bonds which are listed or traded on a recognised exchange.

The Sub-Fund will not invest in debt and debt-related securities rated below B3 or B- by Moody's or S&P respectively. If any debt and debt-related securities are downgraded, then they will be held within the portfolio until upgraded, or, disposed of within 6 months, if not upgraded. The Sub-Fund may purchase unrated securities (which are not rated by a rating agency) if the Investment Manager determines that the security is of comparable quality to a rated security that the Sub-Fund may purchase. Unrated securities may be less liquid than comparable rated securities and involve the risk that the Investment Manager may not accurately evaluate the security's comparative credit rating.

No investment shall be made in equity securities provided, however, equity securities up to 10% of the Net Asset Value may be held as a result of investments in hybrid preferred securities which have equity/warrant characteristics or as a result of acquisitions of equity securities upon conversion or exercise of convertible bonds or upon allotments to the bondholders.

Nomura Funds Ireland - Emerging Market Local Currency Debt Fund (continued)

The Sub-Fund is considered to be actively managed in reference to the JPMorgan GBI-EM Global Diversified Composite Unhedged USD Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - Asia High Yield Bond Fund

The investment objective of the Nomura Funds Ireland - Asia High Yield Bond Fund (the "Sub-Fund") is to generate income and capital growth through investing primarily in a diversified portfolio of primarily high yielding debt and debt-related securities in Asia.

The Sub-Fund shall invest primarily in a diversified portfolio of high yielding debt and debt-related securities issued in countries covered by the Index (the "Index Countries") or issued in other countries provided that the business activities of the issuers of such securities are in the Index countries as defined above.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed on recognised exchanges.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated below investment grade by at least one rating agency or are unrated. From time to time, the Sub-Fund may invest in investment grade debt and debt-related securities provided that no more than 20% of the Sub-Fund's net assets may be invested in non-benchmark debt and debt-related securities which are rated as investment grade. The Sub-Fund will take a higher rating of either Standard & Poors or Moody's when determining a rating constraint. Investors should note that high yielding debt and debt-related securities which are rated non-investment grade and/or unrated will generally have a high volatility.

The Sub-Fund may hold equity and equity-related Securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities. While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund shall primarily consist of securities denominated in US Dollars as well as the various Asian currencies included of the Index countries.

The Sub-Fund is considered to be actively managed in reference to the J.P. Morgan Asia Credit Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - Asia Investment Grade Bond Fund

The investment objective of the Nomura Funds Ireland - Asia Investment Grade Bond Fund (the "Sub-Fund") is to generate income and capital growth by investing firstly in a diversified portfolio of primarily investment grade debt and debt-related securities in Asia.

The Sub-Fund shall invest primarily in a diversified portfolio of investment grade debt and debt-related securities issued in the countries covered by the J.P. Morgan Asia Credit Index (JACI) Investment Grade Index (the "Index Countries") or issued in other countries provided that the business activities of the issuers of such securities are in the Index countries, as defined above.

The Sub-Fund may invest in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed or traded on recognised exchanges.

Nomura Funds Ireland - Asia Investment Grade Bond Fund (continued)

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in investment grade debt and debt-related securities. Investors should note that investment grade debt and debt-related securities may be subject to ratings downgrades by the rating agencies during the holding period of the debt and debt-related securities. In the instance of one or more downgrades to below investment grade or otherwise, the Sub-Fund may continue to hold such securities. Such downgrades might affect the Net Asset Value of the Sub-Fund.

No more than 30% of the Sub-Fund's net assets may be invested in debt and debt-related securities which have a rating of below investment grade or are unrated. The Sub-Fund will take a higher rating of either Standard & Poors or Moody's when determining a rating constraint.

The Sub-Fund shall primarily consist of debt and debt-related securities denominated in US Dollars as well as the various Asian currencies included in the Index countries.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund is considered to be actively managed in reference to the J.P. Morgan Asia Credit Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - China Fund

The investment objective of the Nomura Funds Ireland - China Fund (the "Sub-Fund") is to achieve long term capital growth through investment in an actively managed portfolio of Chinese securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities of companies listed or traded on recognised exchanges in the People's Republic of China ("PRC"), comprising Hong Kong Special Administrative Region ("SAR"). The Sub-Fund may also invest in equity and equity-related securities listed or traded on any recognised exchange outside the PRC, provided that the companies issuing such securities carry out a significant part of their business activities in the PRC. The Sub-Fund may also hold exposure to China through investment in such instruments as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") and which may be listed on any recognised exchange outside China.

It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund may also invest in "A" shares of companies in the PRC. "A" Shares of companies in the PRC are shares denominated in Renminbi (the official currency of the PRC) and issued by companies in the PRC and listed on PRC stock exchanges.

The Sub-Fund may also invest from time to time in debt and debt-related securities issued by corporations, financial institutions, limited liability companies or limited partnerships, other forms of enterprise and in sovereign and quasi-sovereign debt and debt-related securities, which are listed or traded on a recognised exchange. Such debt and debt-related securities will be rated investment grade (BBB) by at least one rating agency (either Standard & Poors or Moody's).

While certain debt and debt-related securities (i.e. convertible bonds) and equity and equity-related securities (i.e. convertible shares) may embed a derivative component (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

The Sub-Fund is considered to be actively managed in reference to the MSCI China Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - Global High Conviction Fund

The investment objective of the Nomura Funds Ireland - Global High Conviction Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of global equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country World Index (the "Index Countries").

The Sub-Fund may also invest from time to time in equity and equity-related securities listed or traded on a recognised exchange in a Non-Index Country, when market opportunities so arise.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs"), Non-Voting Depositary Receipts ("NVDRs") or PNotes (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund may invest in equity and equity-related securities (such as convertible securities) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

It is anticipated that the Sub-Fund will invest on a long-only basis across a range of capitalisations but generally this will be from medium cap to high cap. There is no particular industry / sector focus to the Sub-Fund's investments.

The Sub-Fund will be highly concentrated in that it will own approximately 20 stocks and aims to generate a higher excess return than is available from a more diversified portfolio. Investors should note that due to the highly concentrated nature of the portfolio, the Sub-Fund is likely to have a higher annualised absolute volatility than a more diversified portfolio. Annualised volatility can be described as the distribution of periodic returns recalculated in such a way to show the level of volatility as if over a one year period. A more concentrated portfolio is likely to experience higher volatility of returns than a less concentrated portfolio as the impact on portfolio returns from the movement in one holding will, by definition, be higher when the weight of that holding within the portfolio is higher.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - Select US High Yield Bond Fund

The Nomura Funds Ireland - Select US High Yield Bond Fund was fully redeemed on 21st December, 2022 but the Central Bank has not withdrawn its approval yet.

Nomura Funds Ireland - European High Yield Bond Fund

The investment objective of the Nomura Funds Ireland - European High Yield Bond Fund (the "Sub-Fund") is to achieve current yield and capital gains, through investment primarily in a diversified portfolio of debt and debt-related securities rated below investment grade and issued in European currencies.

Such debt and debt-related securities shall be issued by European and Non-European issuers such as corporations, limited liability companies and/or limited partnerships. The Sub-Fund may also invest in debt and debt-related securities issued by emerging market issuers such as corporations, limited liability companies and/or limited partnerships, if these are determined to be suitable by the Investment Manager.

The Sub-Fund may hold equity and equity-related securities, which are listed or traded on a recognised exchange, that it receives or acquires in connection with its ownership of certain debt and debt-related securities, such as defaulted high yield securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

Under normal circumstances, the Sub-Fund will invest at least 80% of its net assets in debt and debt-related securities that are rated between BB and CCC. The minimum rating for securities at purchase is CCC- and D.

No more than 5% of the Sub-Fund's net assets may be invested in the debt and debt-related securities of any one issuer and no more than 25% of the Sub-Fund's net assets may be invested in debt and debt-related securities in any one industry sector.

Nomura Funds Ireland - European High Yield Bond Fund (continued)

The Sub-Fund is considered to be actively managed in reference to the ICE Bank of America Merrill Lynch European Currency High Yield Constrained Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - Global Sustainable Equity Fund

The investment objective of the Nomura Funds Ireland – Global Sustainable Equity Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in a relatively concentrated, actively managed portfolio of global equity securities issued by companies with a high overall positive impact on society.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in the countries covered by the MSCI All Country World Index (the "Index Countries").

The Sub-Fund may also invest from time to time in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may also hold exposure to Index and non-Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs"), Non-Voting Depositary Receipts ("NVDRs") or PNotes (as further described in Section 8 of the Supplement) and which will be listed on a recognised exchange.

The Sub-Fund may invest in equity and equity-related securities (such as convertible securities) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to buy the underlying asset at a predetermined price), they will not embed any leverage.

Investors should note that due to the relatively concentrated nature of the Sub-Fund, the Sub-Fund is likely to have a higher annualised volatility than a more diversified portfolio.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate materially from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The strategy focuses on investing in businesses that provide a positive impact on the sustainable development of society. The Investment Manager defines such companies as follows: a) companies that create high total value which is shared among all stakeholders in both monetary and non-monetary terms; b) companies that demonstrate ethical business practices (i.e. they follow proper business policies and practices regarding such issues as corporate governance, bribery, discrimination, corporate social responsibility and fiduciary responsibilities) in respect of all employees, supply chain and customers alike; c) companies that actively demonstrate socially responsible corporate governance and engage with the wider community, which is assessed by a combination of external research and data, and an internal assessment of any strengths and weaknesses of engagements conducted by the Investment Manager's analyst team.

The Sub-Fund may hold up to 10% of net assets in debt and debt-related securities, which are listed or traded on debt and debt-related securities, that it receives or purchases in connection with its ownership of certain equity and equity-related securities and accordingly, holding such debt and debt-related securities will be as a result of investment in equity and equity-related securities. This occurs in circumstances where the Sub-Fund has purchased equity and equity-related securities which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security. Such debt and debt-related securities will be issued by corporations, limited liability companies or limited partnerships, other forms of enterprise (such as state owned enterprises) and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody's, Standard and Poors, Fitch or Rating and Investment Information Inc.).

The Sub-Fund may invest up to 30% of net assets in emerging market countries at any given time.

The Sub-Fund may invest up to 10% of net assets in Russian markets provided that the Sub-Fund will only invest in securities that are listed / traded on the Moscow Exchange.

American Century Global Small Cap Equity Fund

The investment objective of the American Century Global Small Cap Equity Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of equity and equity-related securities issued by small capitalisation companies in both developed and emerging countries.

The Investment Manager will invest primarily in companies within the MSCI ACWI Small Cap Index (the "Index") or other companies whose capitalisation is no greater than that of the largest company within the Index at the time of investment.

The Sub-Fund shall invest in countries world-wide, including both developed and emerging markets. The Sub-Fund shall invest, under normal market conditions, at least 40% (unless the Investment Manager deems market conditions to be detrimental to the performance of the Sub-Fund, in which case the Sub-Fund would invest at least 30%) of its assets in equity and equity-related securities of issuers located outside of the United States. The Sub-Fund will allocate its assets among at least three different countries.

The Sub-Fund may invest in equity and equity-related securities denominated in both US dollar and other currencies.

The Sub-Fund may also hold exposure through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or Non-Voting Depositary Receipts ("NVDRs") (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

In the event of exceptional market or economic conditions, the Sub-Fund may also invest up to 10% of net assets in debt and debt-related securities, whether rated investment grade or non-investment grade, comprising notes, bonds, convertible bonds, preferred securities, zero coupon, pay-in-kind or deferred payment securities, variable and floating rate instruments, issued by governments, governmental agencies or corporates.

The Sub-Fund may also invest up to 10% in other collective investment schemes including equity exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes as appropriate and as set out in Appendix I to the Prospectus.

American Century Global Growth Equity Fund

The investment objective of the American Century Global Growth Equity Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of global equity and equity-related securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities of issuers located in the countries covered by the MSCI All Country World Index (the "Index Countries") and which are listed or traded on a recognised exchange.

The Sub-Fund may also invest from time to time in equity and equity-related securities of issuers located in Non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may invest in equity and equity-related securities of companies located in emerging market countries.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or Non-Voting Depositary Receipts ("NVDRs") (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

American Century Global Growth Equity Fund (continued)

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

American Century Concentrated Global Growth Equity Fund

The investment objective of the American Century Concentrated Global Growth Equity Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in a concentrated, actively managed portfolio of global equity and equity-related securities.

The Sub-Fund shall invest, under normal market conditions, primarily (at least 65% of net assets) in equity and equity-related securities of approximately 30 to 50 different issuers located in the countries covered by the MSCI All Country World Index (the "Index Countries") and which are listed on a recognised exchange.

The Sub-Fund may also invest from time to time in equity and equity-related securities of issuers located in Non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may invest in equity and equity-related securities of companies located in emerging market countries.

The Sub-Fund may also hold exposure to Index and Non-Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or Non-Voting Depositary Receipts ("NVDRs") (as further described in Section 8 of the Supplement of the Prospectus) and which will be listed on a recognised exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

American Century Emerging Markets Equity Fund

The investment objective of the American Century Emerging Markets Equity Fund (the "Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of emerging market equity securities.

The Sub-Fund will invest at least 80% of its assets in equity and equity-related securities of companies located in the countries covered by the MSCI Emerging Markets Index (the "Index Countries") and which are listed or traded on a recognised exchange. The Sub-Fund may invest up to 20% of net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager. The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or Non-Voting Depositary Receipts ("NVDRs") and which may be listed on any recognised exchange in a non-Index Country.

Shareholders should note that the Sub-Fund's exposure may also include Chinese A shares traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI Emerging Markets Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

American Century Emerging Markets Equity Fund (continued)

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also, in accordance with the investment powers and restrictions set out in Appendix I of the Prospectus, use derivatives for efficient portfolio management and /or hedging purposes.

American Century Emerging Markets Debt Total Return Fund

The investment objective of the American Century Emerging Markets Debt Total Return Fund (the "Sub-Fund") is to generate a total return through investing primarily in debt and debt-related securities and derivative instruments that are economically tied to the emerging market countries (the "Emerging Market Countries").

Under normal market conditions, the Sub-Fund shall invest its assets that are not cash/cash equivalents primarily in debt and debt-related securities and derivatives that are economically tied to the Emerging Market Countries, which are listed or traded on a recognised exchange. In addition, a portion of the Sub-Fund's assets may be invested in debt and debt-related securities and derivatives that are economically tied to frontier markets (i.e. the Emerging Market Countries at an earlier stage of development).

The Sub-Fund may invest in debt and debt-related securities issued by corporations, limited liability companies, limited partnerships and in government, sovereign and quasi-sovereign debt and debt-related securities. The Sub-Fund may, without limitation, invest in both investment grade and non-investment grade debt and debt-related securities. Investment grade securities are those that have been rated in one of the four highest categories used by a nationally recognised statistical rating organisation or determined by the Investment Manager to be of comparable credit quality. Non-investment grade securities are those that have been rated below the four highest categories used by a nationally recognised statistical rating organisation, or determined by the Investment Manager to be of similar quality.

Shareholders should note that the Sub-Fund may also invest in debt and debt-related securities in the People's Republic of China ("PRC") through the China interbank bond market ("CIBM") or the exchange-traded bond market in the PRC via Bond Connect. Bond Connect is the historic opening up of the CIBM to global investors through the China-Hong Kong mutual access program. The program allows foreign and Mainland China investors the ability to trade in each other's bond market through a connection between the Mainland and Hong Kong based financial infrastructure institutions. Bond Connect aims to enhance the efficiency and flexibility of investing in the China Interbank Bond Market. This is accomplished by easing the access requirements to enter the market, the use of the Hong Kong trading infrastructure to connect to China Foreign Exchange Trading System ("CFETS"), removal of the investment quota and Bond Settlement Agent, all which are required to invest in the CIBM directly. Participants to Bond Connect register with Tradeweb, the Bond Connect offshore electronic trading platform which links directly into CFETS. This platform will allow trading with designated onshore Bond Connect market makers using the Request for Quotation ("RFQ") protocol. The designated bond connect market makers provide tradable prices through CFETS. The quote will include the full amount with the clean price, yield to maturity and effective period for the response.

The market makers can decline to respond to the RFQ and can decline, amend or withdraw the quote as long as it hasn't been accepted by the potential buyer. Upon acceptance of the quote by the potential buyer, all other quotes automatically become invalid. CFETS will then generate a trade confirmation on which the market maker, buyers, CFETS and depository will use to process the settlement.

The Sub-Fund invests in derivative instruments in order to shift its investment exposure from one currency into another for hedging purposes or to enhance returns. The Sub-Fund may also invest in other types of derivative instruments such as futures contracts, options and swap agreements in order to manage duration, credit exposure and country exposure.

The instruments in which the Sub-Fund invests may be denominated in any currency, including local currencies of the Emerging Market Countries, as well as hard currencies (such as the U.S. Dollar, Euro, British Pound and Japanese Yen).

The Sub-Fund also may invest directly in foreign currencies.

The Sub-Fund may hold equity and equity-related securities that it receives in connection with its ownership of certain debt and debt-related securities, such as defaulted securities in the course of reorganisation which are subsequently converted into equity and equity-related securities.

The Sub-Fund is actively managed without reference to any index meaning that the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio, subject to the stated investment objectives and policies of the Sub-Fund.

Nomura Funds Ireland - Global Multi-Theme Equity Fund

The investment objective of the Nomura Funds Ireland – Global Multi-Theme Equity Fund (the "Sub-Fund") is to achieve medium to long-term capital appreciation through investment in an actively managed portfolio of global equity securities.

The Sub-Fund shall invest, under normal market conditions, primarily in equity and equity-related securities listed or traded on a recognised exchange in Index Countries.

The Sub-Fund may also invest from time to time less than 20% of net asset value in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager.

The Sub-Fund may also hold exposure to Index and non-Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs"), Non-Voting Depositary Receipts ("NVDRs") or PNotes and which will be listed on a recognised exchange.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested, in aggregate, in collective investment schemes. The Sub-Fund will invest in such instruments when such investment is consistent with the Sub-Fund's primary investment objective.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

The Sub-Fund may hold up to 10% of net assets in debt and debt-related securities, which are listed or traded on recognised exchanges, that it receives or purchases in connection with its ownership of certain equity and equity-related securities and accordingly, holding such debt and debt-related securities will be as a result of investment in equity and equity-related securities. This occurs in circumstances where the Sub-Fund has purchased equity and equity-related securities which have subsequently been subject to a corporate action which results in the issuance of debt and debt-related securities. These debt and debt-related securities are held by the Sub-Fund until they can be sold at a price which the Investment Manager believes reflects the underlying value of the security.

Such debt and debt-related securities may be issued by corporations, limited liability companies or limited partnerships, state owned enterprises and sovereign and quasi-sovereign entities and may be rated either investment grade or non-investment grade by at least one rating agency (such as Moody's, Standard and Poors, Fitch or Rating and Investment Information, Inc.).

The Sub-Fund may invest up to 10% of net assets in Russian markets provided that the Sub-Fund will only invest in securities that are listed /traded on the Moscow Exchange.

The Sub-Fund is considered to be actively managed in reference to the MSCI All Country World Index (the "Index"). Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager will use its discretion to invest in companies or sectors not included in the Index.

Nomura Funds Ireland - Japan Small Cap Equity Fund

The investment objective of the Nomura Funds Ireland – Japan Small Cap Equity Fund ("Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of equity and equity-related securities of small capitalisation companies in Japan.

The Sub-Fund shall invest primarily in equity and equity-related securities of small capitalization companies that are listed or traded on a recognised exchange in Japan.

The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities of small capitalisation companies that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Investment Manager considers small capitalisation companies to be those that have a market capitalisation of less than JPY 1 trillion at the time of investment.

Nomura Funds Ireland - Japan Small Cap Equity Fund (continued)

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted. Examples are situations such as financial crisis where the Investment Manager expects large redemption from shareholders and/or the Investment Manager deems it appropriate to reduce market exposure in the face of deteriorating market condition.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested, in aggregate, in collective investment schemes, including Exchange Traded Funds ("ETFs"). The Sub-Fund will invest in such schemes when such investment is consistent with the Sub-Fund's primary investment objective.

Up to 10% of the net asset value of the Sub-Fund may be invested in real estate investment trusts ("REITs").

The Sub-Fund is actively managed in reference to the Russell/Nomura Small Cap Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the Benchmark.

American Century Emerging Markets Sustainable Impact Equity Fund

The investment objective of the American Century Emerging Markets Sustainable Impact Equity Fund ("Sub-Fund") is to achieve long-term capital growth through investment in an actively managed portfolio of emerging market equity securities issued by companies that create a positive social and/or environmental impact.

The Sub-Fund will invest at least 80% of its assets in equity and equity-related securities of companies located in Index Countries and which are listed or traded on a recognised exchange, whose products or behaviour, in the opinion of the Investment Manager, have a positive social and/or environmental impact. The Sub-Fund may invest up to 20% of net assets in equity and equity-related securities listed or traded on any recognised exchange in non-Index Countries, if suitable investments are identified which meet the investment strategy of the Investment Manager. The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or Non-Voting Depositary Receipts ("NVDRs") and which may be listed on any recognised exchange in a non-Index Country.

Shareholders should note that the Sub-Fund's exposure may also include Chinese A shares traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

In order to achieve its investment objective described in the Prospectus, the Sub-Fund will invest principally in sustainable investments which are defined as those investments that contribute to an environmental or social objective, provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices. As a result, the Investment Manager seeks to invest in companies or other organisations which have a commercial purpose of solving social or environmental problems.

In the event of exceptional market or economic conditions, the Sub-Fund may also invest up to 10% of net assets in both investment grade and non-investment grade debt and debt-related securities comprising notes (such as sort term treasury notes), bonds, convertible bonds, (which may embed a derivative element but will not embed any leverage), preferred securities, (such bonds with hybrid features and characteristics of both bonds and equities which are in general perpetual and callable, and pay fixed-rate or floating-rate dividends instead of coupons and rank higher than common stocks but lower than senior debt), zero coupon, pay-in-kind or deferred payment securities, variable and floating rate instruments (debt securities with floating coupon rates whereby the interest paid to an investor fluctuates over time with an underlying interest rate level, such as floating rate notes) issued by governments, governmental agencies or corporates.

American Century Emerging Markets Sustainable Impact Equity Fund (continued)

Investment grade securities are those that have been rated in one of the four highest categories used by a nationally recognised statistical rating organisation or determined by the Investment Manager to be of comparable credit quality. Non-investment grade securities are those that have been rated below the four highest categories used by a nationally recognized statistical rating organisation, or, if not rated, determined by the Investment Manager to be of similar quality (which assessment is made by the Investment Manager reviewing the credit attributes of the issuer of the security, such as its financial strength (profitability, cash flows, liquidity, leverage etc.) business profile, management quality as well as the political, legal and regulatory environment).

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes.

The Sub-Fund may engage in active trading of portfolio securities to achieve its investment objective.

The Sub-Fund may also, in accordance with the investment powers and restrictions, use financial derivative instruments for efficient portfolio management and/or hedging.

The Sub-Fund is actively managed in reference to the MSCI Emerging Markets Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Investment Manager may use its discretion to invest in companies or sectors not included in the Index.

American Century Advanced Medical Impact Equity Fund

The investment objective of the American Century Advanced Medical Impact Equity Fund ("Sub-Fund") is to achieve long-term capital growth and to create a positive societal impact through investment in an actively managed portfolio of equity securities of companies engaged in the health care sector.

The Sub-Fund will invest, under normal market conditions, primarily in equity and equity-related securities of companies engaged in the health care sector, which are listed or traded on a recognised exchange and which companies may be selected from the MSCI World Healthcare Index (the "Index").

The Sub-Fund will consist of health care companies, which are companies classified in the health care category as per the Global Industry Classification Standard (GICS®) and/or those companies that otherwise, in the opinion of the Investment Manager, promote the philosophy of healthy lives and well-being for all and are innovative and capable of sustainable business development.

The Sub-Fund may gain exposure to the Index directly or through investment in such instruments as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") and which may be listed on any Recognised Exchange in a non-Index Country.

The Sub-Fund may also invest up to 30% of its Net Asset Value in Health Care Companies outside the Index, such as lower cap Health Care Companies (including companies with capitalization as low as \$500 million at purchase) and Health Care Companies located in emerging countries, such as China. The Sub-Fund may gain exposure to China by investment in Chinese A shares of issuers which are engaged in the health care sector and which are traded via Shanghai Hong Kong Stock Connect or Shenzhen Hong Kong Stock Connect. Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China; these are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds. The Sub-Fund may also invest in closed-ended exchange traded funds provided any such investment is in accordance with the investment limits for investment in transferable securities.

American Century US Focused Innovation Equity Fund

The investment objective of the American Century US Focused Innovation Equity Fund ("Sub-Fund") is to provide a total return that exceeds the MSCI USA Growth Index (the "Index") through investment in a concentrated, actively managed portfolio of companies with significant long-term growth potential.

The Sub-Fund will invest primarily, under normal market conditions, in equity and equity-related securities of US companies that are listed or traded on a recognised exchange. Such US companies may be selected from the Index or from outside the Index. In addition, the Sub-Fund may also invest up to 10% in non-US companies which will be selected from outside the Index. The Investment Manager will favour stocks of early and rapid stage growth companies, which the Investment Manager believes will increase in value over time, as further set out in the investment strategy below.

The Sub-Fund may gain exposure to the Index directly or through investment in such instruments as American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"), which may be listed on any recognised exchange in a non-Index Country.

The Sub-Fund will generally invest in companies which have a market capitalisation at the date of investment of \$2 billion or greater.

The Sub-Fund will be managed so as to maintain a near fully invested position in equity and equity-related securities, other than during periods where the Investment Manager believes that a larger cash position is warranted.

The Sub-Fund may also invest up to 10% in other eligible collective investment schemes, including exchange-traded funds. Any investment in exchange-traded funds will be in accordance with the investment limits for investment in transferable securities and collective investment schemes.

Nomura Funds Ireland - Japan Sustainable Equity Growth Fund

The investment objective of the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund ("Sub-Fund") is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Japanese equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Japanese equity and equity-related securities, which constitute Sustainable Investments, as further described below.

The Sub-Fund is actively managed in reference to the TOPIX Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance ("ESG") impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified five SDGs aligned "Impact Goals", reflecting its sustainable investment objective, to pursue over the long term. The "Impact Goals" are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion, 3) Promote Good Health and Well-Being, 4) Improve Quality of Life and 5) Promote Sustainable Industrialisation and Foster Innovation. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the "Impact Goals". The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in Japan. The Sub-Fund may also invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

Nomura Funds Ireland - Japan Sustainable Equity Core Fund

The investment objective of the Nomura Funds Ireland - Japan Sustainable Equity Core Fund ("Sub-Fund") is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Japanese equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

Nomura Funds Ireland - Japan Sustainable Equity Core Fund (continued)

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Japanese equity and equity-related securities, which constitute sustainable investments, as further described below.

The Sub-Fund is actively managed in reference to the TOPIX Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance ("ESG") impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified three SDGs aligned "Impact Goals," reflecting its sustainable investment objective, to pursue over the long term. The "Impact Goals" are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion and 3) Promote Good Health and Well-Being. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the "Impact Goals". The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in Japan. The Sub-Fund may also invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange outside Japan, provided that the business activities of the issuers of such securities are in Japan.

The Sub-Fund may also invest in equity and equity-related securities (such as convertible preferred shares) with embedded derivative instruments. While these securities may embed a derivative element, (such as an option, which would give the holder the option to convert the preferred shares into a fixed number of common shares), they will not embed any leverage.

Nomura Funds Ireland - Asia Sustainable Equity Fund

The investment objective of the Nomura Funds Ireland - Asia Sustainable Equity Fund ("Sub-Fund") is sustainable investment and the Sub-Fund seeks to achieve long-term capital growth through investment in an actively managed portfolio of Asian equity and equity-related securities, issued by companies with a high overall positive environmental and/or societal impact.

In order to achieve its objective of sustainable investment, the Sub-Fund shall invest in Asian equity and equity-related securities, which constitute sustainable investments, as further described below.

The Sub-Fund is actively managed in reference to the MSCI All Countries Asia Pacific ex Japan Index (the "Index") by virtue of the fact that it uses the Index for performance comparison purposes.

The Investment Manager has a responsible investment philosophy of considering the environmental, social and governance ("ESG") impact of investment decisions on all the stakeholders of the issuing company, including the environment, society, customers, suppliers, employees and investors. Within this philosophical framework, the Investment Manager has identified six SDGs aligned "Impact Goals," reflecting its sustainable investment objective, to pursue over the long term. The "Impact Goals" are as follows: 1) Mitigate Climate Change, 2) Mitigate Natural Capital Depletion, 3) Global Access to Basic Financial Services, 4) Global Access to Clean Drinking Water, 5) Eliminate Communicable Disease and 6) Mitigate the Obesity Epidemic. The Investment Manager will select sustainable investments which contribute directly or indirectly to achieving the "Impact Goals". The strategy seeks to identify those companies that have the greatest positive total impact on all stakeholders of the company.

The Sub-Fund shall invest primarily in equity and equity-related securities that are listed or traded on a recognised exchange in the countries covered by the Index (the "Index Countries"). The Sub-Fund may invest up to 20% of its net assets in equity and equity-related securities that are listed or traded on any recognised exchange in non-Index countries, provided that the business activities of the issuers of such securities are in the Index countries.

The Sub-Fund may also hold exposure to the Index Countries through investment in such instruments as American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs"), Non-Voting Depositary Receipts ("NVDRs") or PNotes (as further described in Section 8 of the Supplement) and which may be listed on any recognised exchange in a non-Index country. It is anticipated that the Sub-Fund will invest across the entire range of capitalisations (from small cap to large cap).

The Sub-Fund may invest in China A shares listed on the Shanghai Stock Exchange via the Shanghai Hong Kong Stock Connect scheme, or the Shenzhen Stock Exchange via the Shenzhen Hong Kong Stock Connect scheme. Such investment is expected to range generally between 5% and 15% of the Net Asset Value of the Sub-Fund but may fluctuate lower or higher than this.

Up to 10% of the Net Asset Value of the Sub-Fund may be invested in real estate investment trusts ("REITs").

DIRECTORS' REPORT

The Directors present, herewith, their annual report and audited financial statements for Nomura Funds Ireland Plc (the "Fund") for the year ended 31st December, 2022.

The Fund is organised in the form of an umbrella fund with thirty sub-funds: the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Diversified Growth Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Select US High Yield Bond Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund and the Nomura Funds Ireland - Asia Sustainable Equity Fund (the "Sub-Funds").

Statement of Directors' responsibilities

The Directors are responsible for preparing the annual report and the audited financial statements in accordance with applicable Irish law and International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Irish company law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the assets, liabilities and financial position of the Fund and of the profit or loss of the Fund for that year. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent; and
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Fund will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Fund;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Fund to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors confirm that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for keeping adequate accounting records, which disclose with reasonable accuracy at any time the financial position of the Fund and enable them to ensure that the financial statements are prepared in accordance with IFRS as adopted by the European Union and comply with Irish statute comprising the Companies Act 2014, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended). They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Fund to the Depositary for safekeeping. In carrying out this duty, the Fund has delegated custody of the Fund's assets to Brown Brothers Harriman Trustee Services (Ireland) Limited.

Statement of Manager's responsibilities

Bridge Fund Management Limited has been appointed as the Manager of the Company on 29th April, 2022.

The Manager is responsible for monitoring the below managerial functions:

- Operational Risk Management monitoring of delegates so that there are appropriate effective operational risk procedures;
- Fund Risk Management monitoring through the delegates that the Sub-Funds' risks are identified and managed;
- Investment Management monitoring that the Investment Manager is in compliance with the approved investment approach and on an ongoing basis monitoring the investment process and performance;
- Capital and Financial Management monitors that relevant accounting records are properly maintained and that the assets and liabilities of the Sub-Funds are valued appropriately. The Manager also ensures it is appropriately capitalised at all times;
- Regulatory Compliance monitors that the Sub-Funds are incompliance with regulatory obligations; and
- Distribution monitors the approved distribution.

Accounting records

The Directors are responsible for ensuring that adequate accounting records as outlined in Section 281 to 285 of the Companies Act 2014 are maintained by the Fund. To achieve this, the Directors have appointed a service organisation Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Fund's accounting records are retained at Brown Brothers Harriman Fund Administration Services (Ireland) Limited, 30 Herbert Street, Dublin 2.

Directors

The following Directors who held office on 31st December, 2022 or at any time during the year, under the Memorandum and Articles of Association, are not required to retire by rotation:

David Dillon – Irish¹
John Walley – Irish²
James Tucker – British (Chairman)¹
Go Hiramatsu – Japanese¹
James Downing – British¹
Tomohisa Hanabata – Japanese¹

Details of Directors' fees and expenses are given in Note 15.

Directors' and Company Secretary's interests in shares and contracts

None of the Directors, the Company Secretary or their families, hold or held, at 31st December, 2022 or during the year, any direct and indirect interest in the shares of the Fund, with the exception of James Tucker as detailed under Note 17.

Connected Parties

Regulation 43 of the Central Bank UCITS Regulations 2019 "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the shareholders of the UCITS".

As required under UCITS Regulation 81.4, the Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected party; and all transactions with a connected parties that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Transactions involving Directors

Except as noted in Note 17, there are no contracts or arrangements of any significance in relation to the business of the Fund in which the Directors or Company Secretary had any interest as defined in the Companies Act 2014 at any time during the year ended 31st December, 2022.

¹ Non-Executive Director.

² Independent Non-Executive Director.

Directors' Compliance Statement

It is the policy of the Fund to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Fund's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Fund's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Fund's relevant obligations.

Statement of Relevant Audit Information

The Directors in office at the date of this report have each confirmed that:

- as far as he/she is aware, there is no relevant audit information of which the Fund's auditor is unaware; and
- he/she has taken all the steps that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Fund's auditor is aware of that information.

Review of business activities and future developments

The change in the Net Asset Value of the Sub-Funds for the year in the Directors' opinion is a key indicator to the performance of the Fund, as well as to a detailed review of the business and future developments.

The Directors have directed the affairs of the Fund in accordance with the Irish Companies Act 2014. The Fund was incorporated on 13th April, 2006 and issued its Prospectus on 30th August, 2006, while an amended Prospectus was noted by the Central Bank on 1st December, 2022.

After making reasonable inquiries, the Directors have a reasonable expectation that the Fund has adequate resources to continue in operational existence for the foreseeable future. Accordingly financial statements have been prepared on a going concern basis.

Risk management objectives and policies

Investment in a Sub-Fund of the Fund carries with it a degree of risk including, but not limited to, the risks referred to in Note 16 of these financial statements.

Results for the year and assets, liabilities and financial position as at 31st December, 2022

The Statement of Financial Position and the Statement of Comprehensive Income of the Fund are set out on pages 93 to 122.

Dividends

Details of dividends declared by the Fund during the year ended 31st December, 2022 are disclosed in Note 21 of the financial statements.

Events during the year

In February 2022 Russia invaded Ukraine and global financial markets have experienced and may continue to experience significant volatility. Russian, Ukrainian and Belarusian assets held within a number of Sub-Funds may be impaired or written off and interest and dividend income due may not be received by the relevant Sub-Funds due to sanctions imposed on Russia and the ongoing war and this may negatively impact the Sub-Fund's performance.

Corporate Governance Statement

General Principles

The Fund is obliged to comply with the requirements of the Companies Act 2014, Central Bank UCITS Regulations and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), as applicable to the Fund.

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report. The Fund is subject to corporate governance practices imposed by;

- i) The Companies Act 2014 which is available for inspection at the registered office of the Fund; and may also be obtained at http://www.irishstatutebook.ie/;
- ii) The Articles of Association of the Fund which are available for inspection at the registered office of the Fund and at the Companies Registration Office in Ireland;
- iii) The Central Bank in their Central Bank UCITS Regulations which can be obtained from the Central Bank's website at https://www.centralbank.ie/regulation/industry-market-sectors/funds and are available for inspection at the registered office of the Fund; and

On 14th December, 2011, Irish Funds ("IF") published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The IF Code became effective from 1st January, 2012 with a twelve month transitional period until 1st January, 2013. The IF Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors' Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

On 31st December, 2012 the Board of Directors (the "Board") voluntarily adopted the Corporate Governance Code for Irish Domiciled Collective Investment Schemes as published by the Irish Funds, as the Fund's corporate governance code.

Internal Control and Risk Management Systems in Relation to Financial Reporting

The Directors are responsible for the oversight of the implementation and operation of the internal controls and risk management systems of the Fund in relation to the financial reporting process, by way of delegation to third parties, namely the Administrator and the Investment Manager. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Fund's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Fund has procedures in place to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and half yearly financial statements. These procedures include appointing the Administrator to maintain the accounting records of the Fund independently of the Investment Manager and the Depositary. The Administrator is authorised and regulated by the Central Bank and must comply with the rules imposed by the Central Bank. From time to time, the Board of Directors examines and evaluates the Administrator's financial accounting and reporting routines. The annual financial statements of the Fund are produced by the Administrator and reviewed by the Investment Manager. They are required to be approved by the Board and the annual and half yearly financial statements of the Fund are required to be filed with the Central Bank.

DIRECTORS' REPORT (CONTINUED)

Internal Control and Risk Management Systems in Relation to Financial Reporting (continued)

During the period of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings.

The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of its review procedures, the Directors receive presentations from relevant parties including consideration of Irish accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process.

The Directors also evaluate and discuss significant accounting and reporting issues as the need arises.

Independent Auditors

The Independent Auditors, EY, Chartered Accountants, have indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014.

On behalf of the Board of Directors

David Dillon

James Tucker

REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

We have enquired into the conduct of Nomura Funds Ireland Plc (the "Fund") for the year ended 31st December, 2022, in our capacity as Depositary to the Fund.

This report including the opinion has been prepared for and solely for the shareholders in the Fund, in accordance with the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (S.I. No, 430 of 2019) (the "Central Bank UCITS Regulations") and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

A UCITS V Depositary Agreement was signed with Brown Brothers Harriman & Co., effective from 21st March, 2016. As a result, the Custodian is hereinafter referred to as the Depositary.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the Central Bank UCITS Regulations. One of those duties is to enquire into the conduct of the Fund in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Fund has been managed in that period in accordance with the provisions of the Fund's Memorandum and Articles of Association and the Central Bank UCITS Regulations. It is the overall responsibility of the Fund to comply with these provisions. If the Fund has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Central Bank UCITS Regulations and to ensure that, in all material respects, the Fund has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations; and
- otherwise in accordance with the Fund's constitutional documentation and the appropriate regulations. (ii)

Opinion

In our opinion, the Fund has been managed during the year, in all material respects:

- in accordance with the limitations imposed on the investment and borrowing powers of the Fund by the Memorandum & Articles of Association and by the Central Bank UCITS Regulations; and
- otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Central Bank UCITS Regulations.

NOMURA FUNDS IRELAND – INDIA EQUITY FUND INVESTMENT MANAGER'S REPORT For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-4.69	1.14	-15.23	37.15	247.44
Benchmark	-5.48	1.98	-7.95	34.26	137.35
Out/(Under) Performance	0.79	-0.84	-7.28	2.89	110.09

Source BBH; % Returns in USD. Benchmark is MSCI India Index. *Since Inception date is 13th January, 2007.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of -15.23%, compared with the benchmark return of -7.95% and therefore underperformed the benchmark by 7.28%.

Key negative contributors were stocks selection in Consumer Discretionary, Information Technology (IT) and Materials, as well as underweight in Utilities.

In the consumer discretionary sector, Nykaa contributed negatively to performance. After strong listing gains in 2021, Nykaa was weak along-side global tech sell-off. Towards, the end of the year sell down pressure from pre-IPO investors weighed on the stock. Our mid-cap holdings in IT viz. Mphasis and Coforge were also drags on performance. Growth outlook weakened in the developed markets during the year, which weighed on IT sector multiples. In Healthcare, Gland Pharma did poorly as result delivery was weak. Delay in raw material supplies significantly affected the Company's ability to take up orders affecting stock performance.

Our underweight to Utilities detracted from performance due to absence of Adani group stocks like Adani Total Gas, Adani Transmission Ltd and Adani Green Energy. The stocks re-rated on limited liquidity and their focus on the renewable energy sector. Institutional ownership in these stocks is thin and we need more comfort with respect to corporate governance to explore investment in these stocks.

Meanwhile, our overweight to Consumer Discretionary and stock selection in Financials helped to alleviate the impact. Our Consumer Discretionary holdings like Indian Hotels and Vedant Fashion gained. Hotels are on a cyclical upturn with occupancies improving and supply significantly lagging demand. Indian Hotels is best-placed to benefit from this trend. Pent-up wedding demand helped Vedant's operational performance. In Financials, banks like ICICI Bank saw loans growth and profitability pick up driving strong return metrics. Consumer staples holding, Varun Beverages doubled profits in the year and the stock rose sharply to add value.

Investment Outlook

The market declined by ~7.95% in US\$ terms in 2022 while in local currency terms, the market gained ~2.44% significantly outperforming the regional markets and emerging markets. MSCI EM declined 22.3% in the same period. Gains were mixed with mid cap index gaining 3.5%, but small cap index declining ~14% (nifty, local currency). Equity markets were stable on steady earnings momentum coupled with decent economic recovery. Flows were mixed in this period as DII inflows of ~US\$36 billion cushioned large FII outflows of ~US\$17 billion in this period.

Key developments that shaped market performance were – (1) Russia-Ukraine war, (2) sharp increase in global inflation leading to rapid increase in interest rates, especially in developed markets, (3) periods of supply-chain imbalances weighing on manufacturing, (4) weakening of EM currencies and (5) economic normalization especially in domestic services. The year began on a positive note with Indian economy opening up and macro indicators improving. Government presented a budget where fiscal deficit was gradually being reduced (6.4% budgeted for the financial year 2023). Steady normalization in economic activity helped in tax collections out-performing budgeted estimates. However, the government had to support the economy from sharp increase in global energy costs, resulting in reduction in excise duties on fuel and increase in subsidies on food fertilizer. The Indian energy sector was impacted as (1) auto fuel prices remained capped, despite high crude prices, (2) windfall taxes imposed on crude oil production and exports of diesel and ATF. Weakening of external position along with increase in domestic inflation caused RBI to increase its policy rates from 4% in May 2022 to 6.25% in December 2022. Despite the domestic monetary tightening cycle, economic activity was decent as residential real estate sales continued its strong momentum and non-food credit growth continued to increase steadily. Corporate result performance too was decent but earnings upgrades came to a halt in the third quarter.

NOMURA FUNDS IRELAND – INDIA EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

Looking ahead, we continue to believe that India is in the midst of a multi-year growth cycle. 1) The banking sector's asset quality, return metrics and capital adequacy allows for strong credit growth, which is already ~16%+. 2) Government continues to focus on capex with increased budgetary allocation and strategic PLI schemes. This should drive both infrastructure and manufacturing growth. 3) Real Estate pre-sales remains robust despite rising interest rates as affordability is high. Housing prices have started to rise, which has historically been a driver of demand. 4) Private sector capex too is seeing nascent recovery. 5) The top tier consumers continue to see wage growth and should drive consumption demand despite inflation. Overall, India's real GDP growth at around 6.5% (RBI estimate) in the financial year 2024 will outpace most large economies.

Markets have outperformed the region on robust economic recovery, corporate earnings delivery and strong domestic flows. Market valuation are at 22.7 times one year forward P/E and at a premium to history. Underlying momentum in the economy measured by high frequency indicators like credit growth, industrial order books, real estate demand, GST collections remains robust. Inflation should return to the RBI's target zone at \sim 5% providing space to cap policy rate at \sim 6.25-6.5%. External sector headwinds are also likely to reduce with the financial year 2024 CAD/GDP at 2.3% (vs 3.5% in the financial year 2023) especially as crude oil prices stay relatively benign. This combined with strong FX reserves provide comfort for the INR. Corporate earnings growth is strong at \sim 7% and \sim 22% in the financial year 2023 and 2024, respectively. These factors provide support to valuations however we do not expect it re-rate further. Opportunities are likely to be bottom-up in nature.

The key risks are mostly global. RBI has proactively raised rates to counter domestic inflation. Global interest rate outlook, though, may have implications for INR and therefore compel RBI to hike further. India's growth is driven largely by domestic factors. However, change in global growth outlook can impact India through exports. Lastly, crude oil is an important factor for a current account deficit economy like India. At 85\$/barrel, it appears manageable.

In the current environment, earnings will be a key driver of stock prices. Our portfolio holdings are likely to see earnings growth that is stronger than market earnings growth with far more visibility and stability. Our focus sectors are domestic cyclicals - Consumer Discretionary, Financials and Real Estate. We are also favourably positioned in Healthcare especially hospitals that are growing steadily. We are underweight information technology given growth concerns in developed markets. We currently favour large caps over mid-small caps and will watch out for opportunities amongst smaller companies offering higher earnings visibility.

Sustainable Finance Disclosure Regulations (SFDR) (Unaudited)

NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-3.94	4.60	4.33	24.20	169.50
Benchmark	-4.57	3.26	-2.45	18.10	160.19
Out/(Under) Performance	0.63	1.34	6.78	6.10	9.31

Source BBH; % Returns in USD. Benchmark is TOPIX Index.
*Since Inception date is 26th August, 2009.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of 4.33%, compared with a benchmark return of -2.45% and therefore outperformed the benchmark by 6.78%.

Summary of 1st half of the year

There were significant differences in returns among styles. While the value index appreciated by 5.9%, the growth index fell by 15.4% in terms of the Russell Nomura Japan Total Return (TR) indices in the first half of 2022.

Returns differed significantly among industry sectors as well. Among the TSE33 industry sectors, the best-performing sector, Mining, rose 46.3%, while the worst performing sector, Services, fell 21.9%. Other outperforming sectors during the six-month review period included Electric Power & Gas and Oil & Coal Products. Other underperforming sectors included Electric Appliances and Precision Instruments.

During the review period, the yen depreciated significantly, weakening by 18% (from 115.1 to 135.7 versus the US dollar) mainly due to widening interest rate differentials between the yen and other currencies.

Summary of the first quarter

Over the first quarter of 2022, the TOPIX total return index depreciated by 1.2% in local currency terms.

Looking at styles, the Russell Nomura Total Value Index appreciated by 6.1% in the first quarter, outperforming the TOPIX by 7.3%. Mining was the best performing sector and rose 39.8%, while the worst performing sector, Precision Instruments, fell 14.9%. Other outperforming sectors during the three month review period included Marine Transportation and Nonferrous Metals. Other underperforming sectors included Metal Products and Services.

Energy prices soared as a result of Russia's invasion of Ukraine, raising concerns over global economic trends and corporate performance. Meanwhile, on 28th March the Bank of Japan implemented yield curve control measures to limit the rise in interest rates on 10-year government bonds to 0.25%. At one point, the yen depreciated to 125 against the US dollar before ending the quarter at 121.7. On a positive note, on 21st March the government lifted the quasi-state of emergency that it had implemented to mitigate the spread of the COVID-19 Omicron variant, and therefore economic activity was expected to resume.

Summary of the second quarter

In the second quarter of 2022, the TOPIX total return index fell by 3.7% in local currency terms.

Looking at quarterly returns from a style perspective, the Russell Nomura Total Value Index fell by 0.2% in the second quarter, outperforming the TOPIX by 3.5%. The outperformance was largely a result of depreciating high-valuation stocks, of which there are few holdings in the JSV portfolio. Richly valued companies that outperformed during the initial phase of the market recovery from the pandemic, including Internet and Semiconductor-related names, continued to be sold. Defensive stocks outperformed, including those related to Infrastructure and Consumption/Distribution. The best performing sector, Electric Power & Gas, rose 18.0%, while the worst performing sector, Services, fell 15.0%. Other outperforming sectors during the quarter included Oil & Coal Products and Textiles & Apparel. Other underperforming sectors included Electric Appliances and Precision Instruments. The yen weakened further during the quarter from 121.7 to 135.7 against the US dollar.

When comparing the sector composition with the market at the end of June, the portfolio held overweight positions in Insurance, Real Estate, and Banks, while its underweight positions included Services, Electric Appliances, and Foods (Note that sector weights are the result of bottom up stock selection decisions, and are not due to intentional top down allocations).

NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

We will continue to pay close attention to companies with "enabling technologies" capable of supporting social, structural changes such as digital transformation and the reduction of greenhouse gases, as well as companies that are expected to benefit from a full recovery of domestic economic activity. We will also look for companies with strong competitive positions and high profitability that will give them the ability to strengthen their shareholder returns. As a crucial point, we aim to maximize potential upside by investing in stocks only when their valuations are attractive. Going forward, we believe the market environment will remain positive for financial companies that are expected to increase their shareholder returns, and for domestic demand-oriented sectors including Real Estate and Retail Trade, which should benefit from the normalization of economic activity.

Summary of 2nd half of the year

There were sizable differences in returns among styles. The value index rose by 3.8%, and the growth index rose by 1.5% in terms of the Russell Nomura Japan Total Return indices in the second half of 2022.

Returns differed significantly among industry sectors as well. Looking at the TSE33, the Banks sector performed best and rose by 24.9%. Other outperforming sectors during the six-month review period included Wholesale Trade (trading firms) and Iron & Steel. Meanwhile, Electric Power & Gas performed the worst and fell 9.1%. Other underperforming sectors included Transportation Equipment (automobiles) and Oil & Coal Products.

During the review period, the yen appreciated by 3.5% strengthening from 135.7 to 131.1 against the US dollar.

Summary of the third quarter

In the third quarter of 2022 the TOPIX total return index fell by 0.8% in local currency terms. The equity market continued to retreat due to the negative impact of monetary tightening in the US and concerns about an economic slowdown. This worked to the disadvantage of cyclical stocks such as shipping, machinery, automobiles, and electronics.

Looking at quarterly returns from a style perspective, the Russell Nomura Total Value Index fell 1.6% in the third quarter, underperforming the TOPIX by 0.8%. The Air Transportation sector performed best and rose 8.7%. Other outperforming sectors during the three month period included Precision Instruments and Retail Trade. Meanwhile, Marine Transportation performed worst, falling by 11.0%. Other underperforming sectors included Electric Power & Gas and Transportation Equipment (automobiles). The yen weakened from 135.7 to 144.5 against the US dollar during the quarter.

Summary of the fourth quarter

In the fourth quarter of 2022 the TOPIX total return index rose by 3.3% in local currency terms. The market rebounded due to expectations for a slowdown in US interest rate hikes, a post-pandemic recovery in domestic economic activity, and inbound tourism amidst expectations of China's reopening.

Looking at quarterly returns from a style perspective, the Russell Nomura Total Value Index rose 5.5% in the fourth quarter, outperforming the TOPIX by 2.2%. Electric Power & Gas performed best, advancing 18.0%. Other outperforming sectors during the quarter included Oil & Coal Products and Textiles & Apparel. Meanwhile, the Services sector performed worst, falling 15.0%. Other underperforming sectors included Electric Appliances and Precision Instruments.

The yen appreciated from 144.5 to 131.1 against the US dollar during the quarter. However, the yen momentarily weakened significantly in October to the 151/USD level due to widening interest rate differentials between the US and Japan.

Investment Outlook

From a macroeconomic perspective the next topic to focus on will be wage increases. In this area, Japan has lagged behind other economies over the past 20 years. Against a backdrop of rising inflation, the Kishida administration is calling on corporate entities to raise wages above the inflation rate. We believe external demand-related manufacturers in the automobile and electronics sectors are strong candidates to lead the way, as the yen weakness has led to surprisingly strong corporate earnings (despite the recent rebound in the yen versus the dollar). In either case, we will need to pay particular attention to the outcome of wage negotiations between management and labour unions, which should become clear in February to March.

NOMURA FUNDS IRELAND – JAPAN STRATEGIC VALUE FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

Additionally, wage increases amidst elevated inflation should raise expectations for further revisions to the Bank of Japan's monetary policy. Although the timing of the decision to widen the yield curve control (YCC) range from +/-0.25% to +/-0.50% in December was a surprise, the decision to adjust the YCC is viewed as a first step towards the longer term goal of normalizing monetary policy. If companies do follow through with wage increases, it could increase the probability that the BOJ will act accordingly.

Due to a revision of the Corporate Governance Code which takes effect from March 2023, each listed company will begin disclosing information related to human capital, such as the ratio of female managers and the wage gap between men and women. Mandatory disclosure will give a clearer view on which individual companies are taking action to address social issues, which may lead to revaluation. As such, we will pay close attention to companies that are actively working on these issues.

When comparing the sector composition of the portfolio with the benchmark index at the end of December, the portfolio held overweight positions in Banks, Real Estate, and Construction, while its underweight positions included Services, Foods, and Machinery (note that sector weights are the result of bottom up stock selection decisions and are not due to intentional top down allocations).

We will continue to pay close attention to companies with "enabling technologies" capable of supporting social, structural changes such as digital transformation and the reduction of greenhouse gases, as well as companies that are expected to benefit from the full recovery of domestic economic activity. We will also look for companies with strong competitive positions and high profitability that will give them the ability to strengthen their shareholder returns. Crucially, we aim to maximise the upside potential by investing in attractive stocks when valuations are at their most appealing.

Although corporate earnings growth forecasts may face downwards pressure due to the impact of a slowing global economy, current forecasts still expect average recurring profits to increase by 11.0% in the financial year 2022 ending March 2023 and 6.0% in the financial year 2023. (Nomura Securities Financial & Economic Centre, TOPIX ex-financials). Looking at valuations based on this the financial year 2022 outlook, the market is trading at a PER of 13.7 with a dividend yield of 2.52% and a PBR of 1.52.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -11.23% compared with the benchmark return of -11.21% and therefore underperformed the benchmark by 0.02%.

Drivers of our portfolios' relative performance in the first quarter included our investments in Energy and Leisure, managing our duration and rating posture, and key underweights in sectors most exposed to rates and inflation. The top positive contributors to relative performance in the first quarter on a sector basis included our overweights and positive credit selection in Energy Exploration & Production and Oil Field Equipment & Services, which continued to outperform on production volume and commodity price strength, as well as our underweight to Wholesale Food. Other contributors included positive security selection in Chemicals and our overweight in Recreation & Travel. The key sector detractors in the quarter were Cable & Satellite TV and Satellite Telecom, where headwinds included duration and rates, sectoral decline, and Intelsat's drawn-out bankruptcy process. From a ratings perspective, our BB underweight and B overweight continued to contribute to relative returns, and positive credit selection in the lower end of the credit quality spectrum boosted returns as well.

In the second quarter, our ratings posture was generally a detractor, due to our underweight to BBs and overweight to Bs. The top sector contributors to the portfolio's relative performance in the second quarter included our underweight and security selection in Specialty Retail and Satellite Telecom, and our overweight and positive credit selection in Energy. In Retail, key contributors included auto retailer Service King, and avoiding Bed Bath & Beyond. The largest sector detractor for the quarter was our overweight in Recreation & Travel, where our investments in cruise lines were pressured by fuel price exposure and consumer spending concerns. Other detractors included negative security selection in Support Services and Health Facilities. Hospital companies like Tenet and Community Health were pressured by labor challenges and high costs, but reported a recovery in demand for elective procedures.

Our ratings posture contributed to relative performance in the third quarter, as we had meaningfully reduced our BB underweight. The top sector contributors to the portfolio's relative performance included security selection in Specialty Retail and our Energy overweight, particularly in Exploration & Production and Oil Field Equipment & Services. Services companies in particular were seeing robust backlogs, and the pricing environment continued to be supportive for energy producers. In Retail, we maintained our underweight, and avoiding problem credits like Carvana drove outperformance in the sector. Additionally, in Banking, our underweight and avoiding key underperformers helped relative returns. Key sector detractors for the quarter included Recreation & Travel, Wireless Telecom, and Automakers. The main source of drag was our overweight in cruise lines and specifically Carnival. Toward the end of the month, the company gave an update on its third quarter's results which missed market expectations. In Automakers, Ford was pressured by a slower-than-hoped recovery in production volume and inventory delivery, but the company reconfirmed its 2022 guidance amidst still solid demand.

Positive security selection drove outperformance in the fourth quarter. The portfolio's rating posture was a slight drag in the quarter due to our modest BB underweight, which we narrowed during the year. The top sector contributors to the portfolio's relative performance included Oil Field Equipment & Services, Gaming, and Cable & Satellite TV. Oil Field Service companies benefitted from the generally strong commodity pricing environment during the year, and were insulated from falling gas prices in the fourth quarter by robust contract backlogs and resilient demand. In the Gaming sector, holdings in Macau gaming contributed, as the Macau government awarded new 10-year gaming concessions, and the market anticipated accelerating reopening in China. In Cable & Satellite TV, the portfolio benefitted from our investments in longer-duration, higher quality names like Charter. Additionally, in Support Services, Ahern was acquired by United Rentals, and the bonds were taken out at their par call price as part of the transaction. Key sector detractors in the fourth quarter included Theaters & Entertainment and Wireless Telecom. In Theaters, AMC Entertainment reported higher-than-expected cash burn amid disappointing box office numbers. In Wireless, Digicel contended with severe unrest in Haiti and faces near-term refinancing risk, but the company reported results in line with expectations and guidance, and we view current prices as significantly discounted.

NOMURA FUNDS IRELAND – US HIGH YIELD BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

For the full year, NCRAM's strategy outperformed on a gross of fees basis in a challenging market environment, consolidating gains in the 2nd half and particularly in the fourth quarter rally. Sector positioning was effective, and the portfolio benefitted from an overweight to Energy and an underweight to Retail. Energy added value throughout the year despite falling oil and natural gas prices in the fourth quarter, as issuers in that sector continue to generate cash flow. Looking at the full year, security selection was mixed: Banking and Media contributed, while Leisure, Healthcare, and Telecom detracted. Duration positioning added value, as the portfolio was underweight duration for most of the first three quarters of the year, and overweight duration in the fourth quarter. Overweights in B-rated issuers added value, but the portfolio was negatively impacted by an overweight in CCC-rated issuers in the first three quarters of the year. Avoiding default candidates Carvana and Bed Bath & Beyond helped performance. Our overweight in cruise lines like Carnival was a drag earlier in the year as the recovery in this space was lower than expected, but Carnival and other travel credits rallied in the fourth quarter on improved bookings during the holiday period.

Investment Outlook

Looking forward, NCRAM believes current yield levels provide a compelling entry point for high yield investors. We expect a mild recession during 2023, but we also expect the Fed to pause in the first quarter and potentially ease later in the year, which creates a more favorable investment environment. High yield companies have entered this period with lower leverage and higher credit ratings relative to history, so we expect only a moderate increase in default rates.

Given the improved credit quality profile of the market, one would expect investors to demand a lower risk premium to hold high yield. Thus, US spreads look relatively more appealing on a quality-adjusted basis. Also note that average high yield bond prices in both the US and Europe are trading close to their deepest discounts in the last decade, improving the risk/reward ratio.

Based on the asset class' relatively healthy fundamentals, highly supportive market technicals, and the attractive yields on offer that help to compensate for the risks of investing in high yield, we believe the high yield market could offer a good return in the coming year.

*Since Inception date is 7th August, 2013.

Performance Commentary

For the year ending 31st December, 2022, the Sub-Fund recorded a return of -19.72%, while the benchmark recorded a return of -2.45% therefore the Sub-Fund underperformed the benchmark by 17.27%.

Equity markets fell in the first three months of 2022 in response to rising US interest rates and the escalating geopolitical tensions following Russia's invasion of Ukraine. Stocks with high price-to-book ratios were the weakest almost across the board in the first quarter, but some stocks that had been facing selling pressure rebounded later. After the release of its earnings announcement, Montoro, the leading positive contributor to the portfolio's performance in the first quarter, saw a sharp rebound in its stock price in part due to a reversal of the selling pressure.

The position in Idec Corp. had the largest negative impact on the portfolio performance in the first quarter. In addition to the reversal in it is previously rising share price, the stock plummeted due to concerns over risks to its business performance. These concerns were rooted in rising raw material prices, and prolonged automobile production cuts, as well as the selloff among stocks with high price-to-book ratios due to US interest rate hikes.

The Sub-Fund acquired a new position in HOYA, which is a leading player in HDD glass discs and mask blanks for semiconductors. We also took profits on shares whose prices were relatively firm. We made bargain-hunting related purchases of stocks that seemed to have become oversold in terms of fundamentals. The addition of a new stock position brought the total number of the Sub-Fund's holdings to 33 at the end of the first quarter.

In the second quarter, equity markets fell in reaction to the accelerating rise in US policy interest rates and fears of a slowdown in the US economy. While cyclical industries were noticeably down, some defensive stocks experienced solid price movements. Fast Retailing Co., the leading positive contributor to the portfolio performance in the second quarter, saw its stock price rally aggressively due to strong monthly sales and expectations of a recovery in earnings from the easing of regional lockdowns in China.

Stocks with high price-to-book ratios were generally weak amid rising US interest rates. Recruit Co. had the largest negative impact on the portfolio performance in the second quarter, as the stock price fell largely due to concerns that earnings for its jobs listing site Indeed were about to peak. Earnings had been favorable due to tightening supply in the US job market during the recovery from the pandemic. We will pay close attention to Indeed's business performance in the short term, but we believe it will be able to demonstrate its relative strength against a slowdown in the overall human resources market given that further scope exists for improvements in profitability, in addition to the existence of structural and geographic growth factors.

The Sub-Fund liquidated the position in Kakaku.com. Considering a slowdown in growth potential for the Tabelog restaurant booking website, as well as the risk of the company having violated anti-monopoly laws, we decided to sell this stock. We also took profits on shares whose prices were relatively firm; and we also made bargain-hunting purchases of stocks that looked oversold in terms of fundamentals. The removal of one stock position brought the total number of the Sub-Fund's holdings to 32 at the end of the second quarter.

In the third quarter, equity markets retreated along with growing fears of an economic recession in the US. Market buying trends tended to favour defensive stocks over cyclical stocks; overall, defensive sectors advanced and cyclical sectors fell.

Nihon M&A Center Holdings made the greatest positive contribution to the portfolio performance. The company saw its share price rise sharply in a turnaround from previous selling pressure. Meanwhile, Shin-Etsu Chemical detracted most from the performance. Its stock prices declined on fears of a peak in PVC market conditions and a slowdown in the semiconductor market. However, the market has already priced in this demand peak, and with a high proportion of long-term contracts for silicon wafers, we believe there will be limited impact from the semiconductor market slowdown. As such, the Sub-Fund purchased the stock on price dips during this review period.

NOMURA FUNDS IRELAND – JAPAN HIGH CONVICTION FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

The Sub-Fund acquired new positions in Nissan Chemical and Katitas. Applying a 'big fish in a small pond' strategy, Nissan Chemical has many products with high shares in niche markets. Katitas is highly competitive in the expanding, high potential market for existing home sales. Meanwhile, the Sub-Fund liquidated the positions in Softbank Group, Suzuki, and JustSystems. Softbank Group and Suzuki became unable to maintain their high ROE levels, and they were removed from the Growth Stock Committee approved list. There was some deterioration in the competitive environment of JustSystems. We took profits on shares where we judged that prices were too high in terms of fundamentals, while we increased purchase transactions on price dips among stocks where share prices seemed be lagging behind in terms of fundamentals. The removal of one stock position brought the total number of the Sub-Fund's holdings to 31 at the end of the third quarter.

In the fourth quarter, equity markets staged a recovery and advanced on expectations of an eventual peak in US interest rates. However, there was a sell off among blue-chip stocks after the Bank of Japan revised its monetary policy settings in December.

Shin-Etsu Chemical generated the greatest positive contribution to the portfolio performance during the fourth quarter. The company saw its share price rally sharply following a recent sell off. However, some blue-chip stocks with high PBR saw prices fall due to monetary policy revisions by the Bank of Japan. M3 detracted most from the portfolio performance as its share price fell on speculation related to these revisions. The company also mentioned budget restraints by overseas pharmaceutical companies placed on its medical information-sharing tool, "MR-kun". However, we purchased the stock during these price dips since the budget constraints on its medical information system are considered a temporary measure triggered by the rapid depreciation of the yen and appreciation of the US dollar. Meanwhile, our assessment of its growth potential over the medium term remains unchanged.

The Sub-Fund continued to incorporate Nissan Chemical into the portfolio. We took profits where share prices seemed too high in terms of fundamentals and increased purchase transactions on price dips where share prices were lagging behind in terms of fundamentals. The total number of the Sub-Fund's holdings remained unchanged at 31 at the end of the fourth quarter of 2022.

Investment Outlook

We expect the TOPIX to fluctuate in a range between 1,513-2,080 points over the next quarter.

Equity markets rallied in the fourth quarter due to expectations of a peak in US interest rates, but we will keep in mind that the following risk factors could emerge over the months ahead.

- (1) Changes in central bank monetary policy: We will assess expectations for changes in the Fed's monetary policy and its impact on the real economy. We will also pay close attention to the possibility of the Bank of Japan changing its policy as it continues to make significant purchases of equity ETFs.
- (2) Slowing Chinese economy: We will examine the effects from shadow-banking regulations imposed by the Chinese authorities. We will also pay attention to the default risk of financial instruments including wealth management products.
- (3) Disruption in the US credit markets: We will monitor the risk of the US corporate bond and leveraged loan markets being thrown into confusion amid heightened concerns over defaults. These markets have more than doubled in size since the Global Financial Crisis. In turn, this could have an adverse impact on all financial markets.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -26.37% compared with the benchmark return of -19.67% and therefore underperformed the benchmark by 6.70%.

Country allocation outcomes were positive, with our key overweight markets – India, Indonesia and Singapore all contributing positively. Our largest underweights - Korea and Taiwan also added value while the underweight to China detracted marginally due to the market rally over the last two months. Stock selection outcomes however were the main cause of the underperformance over the year, with exposures in China the biggest drag. Stock selection in Taiwan, Korea and Singapore also detracted.

Extremes of market noise and volatility have resulted in the worst performance for global equity markets since the financial crisis of 2008. After the geopolitical shock of Russia's invasion of Ukraine, the markets then focused on the Federal Reserve's hawkish determination to control soaring consumer price inflation together with most other central banks. Meanwhile, still in the grip of the pandemic, China seemed unable to do anything right and only magnified this negativity, at least until an abrupt policy shift towards the year end. While the Santa rally in December bucked the trend and the last quarter of the calendar year brought a better outcome, fears of recession loomed large even as the Fed remained hawkish. Over the course of the final quarter, growth stocks in the US were hammered down with the leaders also caving in towards the end, oil and commodity prices fell back; and though the 10-year treasury yield reflected the hawkish tone for the month of December, bond yields settled well short of the peaks we saw earlier this year. The dollar index, which soared towards a high of almost 115 in September, experienced a significant correction over the fourth quarter, ending below 104. The JPY and the GBP staged especially strong recoveries from their earlier steep declines.

Asian markets also experienced a terrible year, with sentiment completely overwhelmed by China, although the latter staged a significant recovery in December. The two other large North Asian markets however continued to suffer, as both Korea and Taiwan ended the year with large drawdowns. Almost all currencies exacerbated the equity markets losses too. Countries with large domestic markets like India and Indonesia were relatively more stable. Indonesia was actually the only Asian market to end the year with an overall gain. Mean reversion however was visible in the month of December, with both of these markets suffering reversals and ending the month lower.

China stock selection was the biggest drag on our performance. Auto dealer China Meidong underperformed on concerns that new car sales margins might be weaker than expected given easing of supply bottlenecks in the auto industry as well as weaker than expected demand during the COVID-19 lockdowns. Will Semiconductor fell as the smartphone component supplier faced challenges in the end consumer market, given the slowdown in sales of 5G smartphones in China. Likewise, our overweight in Riyue Heavy Industry underperformed. This was due to earnings visibility clouded by weaker demand and higher raw material costs. Shenzhou declined as earnings were weaker than expected due to production constraints as a result of the pandemic. On the other hand, our overweight position in Shanghai International Airport contributed positively to performance; the stock held up for most of the year as investors rotated from outperformers and back into stocks that had hitherto lagged behind. We took advantage of the cheap valuations, and with the reopening play in China, we saw an opportunity for a sharp turnaround in operating earnings. Other HK listed but China linked exposures – Galaxy Entertainment and AIA added value, with the stocks rallying towards the year end amid reopening expectations.

In Korea, no exposure to Samsung electronics and Naver Corp helped. However, this was negated by our overweight position in SK Hynix where investors' concerns over the deteriorating demand for semiconductor chips and the risk of a further decline in DRAM average selling price, weighed on the performance of the stock.

NOMURA FUNDS IRELAND – ASIA EX JAPAN HIGH CONVICTION FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

Our technology positions in Taiwan also hurt our performance as the sector is heavily influenced by the decline in the US Nasdaq index and concerns about a margin squeeze due to raw material price hikes. Mediatek and Tong Hsing Electric lagged behind due to concerns about a drop in sales related to the smartphone business. Our overweight in Makalot fared well; with exchange rate and lower raw materials tailwinds that helped with margins, and capacity expansion in Indonesia and Bangladesh, contributed to its outperformance.

In Singapore, SEA Ltd weighed on the portfolio as the stock remained out of favour in a rising interest rate environment despite efforts to streamline costs. This was somewhat alleviated by the positive performance from our overweight position in DBS where strong earnings coupled with the economic reopening in Singapore provided catalysts for its share price.

In Thailand, our overweight position in Airports of Thailand outperformed because of the accelerating recovery in tourist arrivals following the easing of travel restrictions in Thailand over the year.

Investment Outlook

Calendar year 2023 seems to be shaping up as one with several contradictions. The global investment environment is likely to present even more challenges than in the previous years, which themselves offered no shortage of excitement in the form of volatility, uncertainty, complexity, and ambiguity (VUCA). The Federal Reserve shows no sign of backing off from its fight against inflation, and while headline numbers have cooled off, labour market strength is the key to interest rates remaining higher. While the interest rates hikes have been frequent and steep, the transmission time for a significant impact on the economy seems unusually long. So, while a recession now looks imminent, it seems unlikely to be confirmed until the second half of the year, implying that interest rates could remain higher for the time being even as money markets have already signalled otherwise. Profit forecasts for the US corporate sector are also looking south, with prospects for the developed world looking gloomier even as the emerging market world put its hand up for the year. China comprises an overwhelming share of the Emerging Markets/Asia, and it has just made a massive U-turn on its COVID policies. Reopening could mean relatively more cheerful prospects for the Asian economies, even while fighting the global recessionary headwinds. In summary, we are looking at a challenging global environment to start the year with, eventually leading to some optimism from a peak in interest rates, possibly followed by rate cuts later in the year, and a very promising set up for the Asian markets.

A change in the calendar is not always expected to mark a sea-change in the investment environment. However, this time it seems the seeds had already been planted to an extent towards the end of the year by the drastic turnaround in China's COVID policies.

China has dominated the news agenda over the last month or so, and the New Year has definitely forced investors to do a U-turn in expectations with respect to the economic prospects for China. After many false starts on reopening, the authorities seemed to have taken a herd immunity approach and released almost all restrictions on the population. This might have been forced on the authorities by socio-economic factors, including large-scale unemployment and an all-time low in consumer sentiment. Therefore, growth seems to have taken over as the mantra, with the U-turn also encompassing a back-stop for the property sector and deregulation of the new economy. Common Prosperity, which was the overarching theme last year, seems to have been relegated for the time being. Reopening has happened much faster and more broadly than expected, and that would mean big upgrades across every aspect of the economy, ultimately boiling down to earnings growth coming back strongly over time. However, we cannot extrapolate this positive scenario very far since many structural issues remain unresolved; those of debt and demography can only be accentuated. Macroeconomic and corporate numbers will see the impact only from the second quarter and with a sharp rise in stock prices, paper supply is expected to be substantial. On the other hand, markets conditions have been disastrous over the last two years and even with limited earnings growth prospects, valuations are very cheap. Unlike most other markets, Chinese stocks have sunk to barely half of their post COVID peak levels, even after a sharp 50% rebound over the last two months. China is known for large equity market moves, and this could be one big positive move, the risks notwithstanding. We had removed the risk of being underweight China in November given that pessimism was at its peak and we will now take the big step of moving to an overweight exposure with consumption being the biggest thematic position in our view given the excess savings and long period of pent up consumer demand for the Chinese. The playbook is not too dissimilar for other countries. Hong Kong is an obvious beneficiary from the reopening and for all the similar reasons. Post these changes which we will implement in January, we expect China/ HK to be among our largest overweight markets.

The two other large North Asian markets of Korea and Taiwan are far more exposed to global growth, or rather the lack thereof. The technology sector is fundamentally still very weak, facing demand cuts first from the smartphone and PC markets, then from the server and enterprise markets, and now from data centres and hyper-scalers. Despite the capital spending discipline and consolidation, earnings downgrades are yet to come to an end and shareholder friendly policies can only help so much. In addition Taiwan also has geopolitical concerns to contend with. As such, we will retain the big underweight positions in both markets.

NOMURA FUNDS IRELAND – ASIA EX JAPAN HIGH CONVICTION FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

The large move in the country exposure in favour of China warranted significant funding from other markets, especially as every other market is a much smaller index weighting. Fundamentally, however, there is nothing wrong with most of the regional economies; they have been recovering well, they have been resilient with respect to the external shocks, and they are also beneficiaries of China's reopening. Inbound tourism from the latter has also been a big factor. Singapore held up very well for most of last year, supported more by the restructuring opportunities in the government-linked companies (GLCs) and the ample liquidity ensuring a strong currency. Upside catalysts are few and far between though, so we have reduced the long standing large overweight position to a much smaller one now. Similarly, for Indonesia, the economy is stable and the external finances have been a revelation, but foreign investors have chosen to take profits from the stellar performance over the last year. For the time being, we see no major catalysts for the market, although valuations have become attractive. We had already reduced the overweight position earlier and for the time being we will maintain this exposure. India also falls into a similar category as a funding source. To some extent, it has been a hiding place for many investors as the market provides both quality and secular growth, though at the cost of stretched valuations. Foreign investors have been selling down this market almost throughout last year, but stocks have continued to find support from strong domestic fund flows and high confidence. Notwithstanding all the foreign selling, the country is still a large overweight for most portfolios. It could therefore become a funding source too in the absence of fresh inflows into Asia. While we continue to like India's corporate story, especially the bottom-up opportunities among individual stocks, we believe that better entry opportunities could arise sooner rather than later. For the time being, we will shift some allocation towards China. The India exposure will remain overweight though. Market moves tend to be large, especially in China, and while the situation looks somewhat clearer than before, the markets are not out of the woods yet. Therefore, high equity market volatility is likely to persist.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -12.71% compared to the benchmark return of -12.71% and therefore the performance was flat.

In the first quarter, our ratings posture contributed to relative performance given our BB underweight, but negative credit selection outweighed this positive effect. From a sector perspective, the biggest drivers of positive relative performance in the first quarter included security selection in Integrated Electric, Wireline Telecom, and Real Estate, as well as underweights in Wholesale Food and Chemicals. In electric, renewable power companies in Europe did well. In Real Estate, names like Vivion and Signa rallied as those bonds had reached oversold levels given the stable nature of their businesses. The key drags on relative performance included Packaging, Satellite Telecom, and Auto Parts & Equipment. In Packaging, some names were down on concerns that their margins could be more exposed to inflationary pressures. In Auto Parts, Goodyear bonds were lower mainly in sympathy with rates. In Satellites, Telesat was downgraded by S&P, predicated on declining revenues and increasing longer-term leverage before potential improvement from the company's Low Earth Orbit (LEO) operations.

Our ratings posture continued to contribute to relative performance in the second quarter as BBs outperformed Bs and CCCs. From a sector perspective, key contributors included our underweights and security selection in Pharmaceuticals, Specialty Retail, and Real Estate, as well as security selection in Health Facilities. In Pharma, the key contributors were avoiding Bausch Health and Endo. Specialty Retail was driven by security selection, as we avoided certain problem credits while positions in stable names outperformed. In Real Estate, security selection drove outperformance as we avoided several fallen angels whose bonds came under pressure due to questions about accounting. Outperformance in Health Facilities was driven by HCA, which was upgraded to investment grade in the quarter. The biggest drags on relative performance were in the Recreation & Travel, Support Services, and Auto Parts & Equipment sectors. In Recreation & Travel, cruise lines were particularly weak as investors pushed out their expectations for cash flow recovery in the face of slower demand recovery and higher fuel prices. In Support Services, Diebold bonds fell after the company reduced guidance due to weaker-than-expected demand and margin pressure. In Auto Parts, our exposure to higher quality issuers detracted as longer duration bonds in the sector hurt with rate volatility.

In the third quarter, BBs lagged given the rate move, so our ratings posture generally helped relative performance. From a sector perspective, the key drivers of positive relative performance included Electric Generation, Building & Construction, and Banking. Issuers in the Electric Generation sector benefitted from the strong power pricing environment and in many cases extended their hedges which was expected to preserve free cash flow. Building & Construction was driven by the acquisition announcement of IEA by MasTec. Banking was driven by our underweight, particularly to certain German banks. Sector detractors included security selection in Personal & Household Products and Metals & Mining, and the portfolio's underweight to Energy Exploration & Production. The energy sector meaningfully outperformed the overall market in 2022, as the pricing environment continued to be supportive for energy producers and services companies, but many such companies do not fit our strategy's dual investment objective. In Personal & Household Products, Spectrum Brands bonds were down following an earnings report that missed expectations. In Metals & Mining, our overweight to Constellium was down with the market, partly due to its longer duration, but the company reported better-than-expected the second quarter results and demand for its aluminum products remained strong.

NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE HIGH YIELD BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

In the final quarter of the year, our ratings posture contributed to relative returns, given the BB outperformance, and positive security selection also helped. From a sector perspective, the biggest drivers of positive relative performance included Auto Parts & Equipment, Cable & Satellite TV, and underweights in Specialty Retail and Media Content. In Auto Parts, Schaeffler and Faurecia did well with strong earnings. In Cable, select longer duration positions such as UPCB and Charter did well, while our overall underweight helped given the sector's relative underperformance. The biggest drags on relative performance were Support Services and Building & Construction. In Support Services, Atalian bonds fell after the company announced that it would only sell a part of its business rather than the entire company. Most of the bonds will remain outstanding, and they traded down as the market had been expecting them to get taken out. Underweights in Chemicals and Oil Field Services were a drag in the quarter amid a supportive pricing environment in those sectors.

Investment Outlook

Looking forward, we continue to expect a slower economy in the US as the housing contraction has an effect, but it should remain a mild recession thanks to accumulated consumer savings and the strength of certain sectors like energy and travel. European growth is likely to underperform, but a mild start to winter, healthy energy stockpiles, and dramatically lower natural gas prices have provided some relief. Additionally, successful reopening in China would be positive for growth in Asia and for European export economies, though it may complicate the inflation picture.

Given slower GDP growth, wage growth, and inflation, we believe the Fed will pause their rate increases in early 2023 to acknowledge the slowdown, and also to take stock of the significant tightening that has already occurred. As this pause comes into focus, we believe high yield and other risk markets can perform well in 2023. Part of this view is driven by our expectations that, though high yield default rates will rise from historically low levels, they will remain manageable given generally high credit quality across the asset class, ample liquidity, and limited maturities in the next few years. Furthermore, at current yield and price levels, we believe that global high yield offers ample carry and sufficient discount to provide attractive total returns in the coming year.

NOMURA FUNDS IRELAND – GLOBAL DYNAMIC BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-0.28	3.93	-15.51	-3.5	24.73

Source BBH; % Returns in USD. This Sub-Fund has no Benchmark.
*Since Inception date is 30th January, 2015.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -15.51%.

In an environment where almost all global bond market gave double-digit negative returns, the Sub-Fund was not immune. However, the Sub-Fund was well-positioned for much of the volatility that we saw in global bond markets, as the portfolio management team had forecast sticky inflation leading to interest rate hikes by a number of central banks, most notably the Fed. The Sub-Fund had close to 40% in cash or cash-like short dated US Treasuries at the start of the year which helped to cushion the impact of negative bond markets.

However, the Team did not foresee the invasion of Ukraine by Russia and the impact of this on both the Sub-Fund and bond markets was profound. Most directly, the Sub-Fund's near 6% position in Russian Local Currency Sovereign debt was written down to zero, resulting in a sharp negative return for the Sub-Fund. All other risky allocations also delivered negative contributions (albeit of lesser scale) as the impact of the war on risk sentiment and the positive shock to inflation globally rippled through markets.

By mid-2022, the US 10 year yield had reached 3.5% and the Team suspected that weaker economic data in the US in the second half of 2022 would force the Fed to slow its path of rate hikes. The Team thus raised the duration of the Sub-Fund. With hindsight, this move was too early. The US economy, particularly the labour market, continued to show remarkable resilience and the Fed was able to maintain its hawkish stance.

Late in the year, comments by the Fed alluding to the lagged damage that its rate hikes were causing led markets to price an earlier finish to the monetary policy tightening and even rate cuts in late 2023. A rally in both bond markets and risk assets followed, with the Sub-Fund's positions in both subordinated financials and Emerging Market debt instruments in particular allowing the Sub-Fund to benefit fully from the uptick.

Investment Outlook

- We are inching towards the point where the Fed can stop raising rates.
- However, it is clear that inflation remains unacceptably high and the Federal Reserve (and other major central banks) will continue to raise rates in the short term, likely leading to volatility.
- Our belief is that they will signal a cessation in rate rises in the first quarter of 2023. The economy, both in the US and elsewhere, is slowing and inflation is falling. The US labour market has held up reasonably well so far, allowing the Fed further room to hike, but the Fed has already begun to acknowledge the lagged damage higher rates will have on the economy and the necessity to continue hiking will diminish.
- A concern of ours is that this view is close to consensus, and markets seem to be willing to seize on any hint of a more dovish Fed and we are aware of the degree of cash that still sits on the sidelines something that could support asset prices even in the near term.
- Instead of focusing on this rather unpredictable short term, we are adopting a longer-term view. We know that the Federal Reserve will soon cease hiking rates, they will go on hold for a while and eventually be forced to cut rates, possibly as early as late 2023 although it could easily be later.
- Meanwhile, many bond yields now reflect significant value, even if we accept there could be volatility in the short term.
- Areas of the market we believe will offer the possibility for significant capital appreciation (in addition to the substantial yields available) include Bank debt across the capital structure and Emerging Markets sovereigns, where our positions have already recovered to a degree, but which can continue to perform into 2023 and beyond.
- As we have increased positions in these areas of the markets, we have reduced our US Treasury exposure, but the overall duration of the Sub-Fund has been maintained close to 6 years. The short position we have in US inflation is also correlated to duration to an extent, and this was reduced in December, as mentioned above.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -9.54% compared with a benchmark return of -11.69% and therefore outperformed the benchmark by 2.15%.

The world's recovery from the COVID pandemic was overshadowed by the war in Ukraine and its complications through continued price pressures. Volatility remained high throughout the year and the Fed and the major western central banks raised key interest rates. Specifically, the war hit euro area growth through higher energy prices, lower confidence, trade disruptions and financial sanctions. In addition to high energy prices, the war and bilateral sanctions also hit key agricultural commodities such as corn and wheat. Supply shocks further pushed up inflation in the global economy. In response to the deteriorating inflation outlook, the Fed raised its key interest rate from 0.25% to 4.50% during the year and began to reduce its balance sheet through quantitative tightening. Similarly, the European Central Bank raised its key interest rate from -0.50% to 2.00%. Throughout the year, markets had accepted the stagflation narrative, concerned about a combination of higher-than-expected prices and weakening growth.

Following China's 20th Party Congress, the authorities maintained a zero-tolerance approach to the COVID pandemic. While investors were concerned about how China would revive its lagging economy, the outbreak of civil unrest in China has forced officials to take steps to ease COVID restrictions in late 2022. China's earlier-than-expected decision to reopen in December, the cooling trend in US inflation, and lower energy costs due to mild weather and the EU's energy diversification measures (LNG, etc.) boosted market sentiment in the final months of the year.

We steadily increased our duration exposure and positioned ourselves to benefit from the peak in inflation and high real interest rates in selected countries. Our active weights in EM Asia turned negative due to China's restrictive COVID policy and unattractive interest rate differentials. On the contrary, we increased our active weight in selected Latam countries, betting on their commodity export strength and sound monetary policies.

As global monetary policy turned to tightening, emerging market local currency bonds generally posted a large loss, driven by both a sharp rise in yields and currency depreciation against the US dollar. In terms of price returns, Turkey and Brazil were the best performers, while Colombia, Hungary and the Philippines were the worst. Emerging market currencies were mostly negative over the year. The Uruguayan peso and the Brazilian real were the best performers, while the Turkish lira and the Egyptian pound were the worst.

The Sub-Fund benefited from underweight positions in Russia, Egypt and Colombia, off-benchmark short position in Taiwan as well as overweight positions in Mexico and Brazil. The detractors were the underweight positions in South Africa and Turkey.

Investment Outlook

Emerging market local currency bonds held up relatively well in the historic bond bear market of 2022, outperforming developed market peers in most instances. Positive returns in major markets such as Brazil and Mexico helped to offset the write-down on Russian government bonds whilst most Asian rates markets held up relatively well due to comparatively moderate inflation.

Key to the relative resilience of local EM bond markets has been the proactive response of their central banks to rising inflation rates. This contrasts sharply with the belated response from their developed market peers. Prudent rate hikes contributed to a downturn in many EM inflation rates and led to real yields turning positive in some markets. Over the course of 2023, a number of EM central banks should therefore have scope to cut interest rates, with Latin America potentially leading the way. This would likely support positive capital returns in local EM bond markets, in addition to the 7.4% yield of the asset class at the index level. This is a key reason for our positive view on the asset class in 2023 (and beyond).

NOMURA FUNDS IRELAND – EMERGING MARKET LOCAL CURRENCY DEBT FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

However, upside risks to inflation remain (e.g. from food and energy prices, robust labour markets), which could lead to near-term volatility, especially if the US Federal Reserve continues to tighten aggressively. While the end of Fed hikes may now be within reach, markets are pricing in rate cuts from mid-2023 onwards. We think this is premature given the stubborn inflation in services and strong wage growth. If US yields remain elevated, this would likely reduce the carry appeal of EM currencies to some extent.

Moreover, we recognize that slowing global economic growth could remain a drag on risk sentiment. In particular, Asian and Eastern European export hubs are likely to suffer from the cooling of the electronics/manufacturing cycle, while Latin America is vulnerable to falling commodity prices. China's economic performance will also be important in this context. The recent rapid unwinding of its rigid COVID policies is a source of uncertainty over the course of 2023 and a return to pre-pandemic growth rates in China is unlikely given its ongoing structural burdens, most notably the ailing property sector.

For these reasons, we do not (yet) believe that the economic conditions are in place for a sustained improvement in risk sentiment. Yet, they are getting closer, and the risk/reward dynamic of local EM debt is skewed to the positive in the face of slowing inflation and (now) higher yields. For now, our exposure remains concentrated in the more fundamentally sound EMs (such as Mexico and Indonesia). Looking ahead, a stabilisation of global growth expectations (and EM trade balances) as well as confirmation of a peak in US policy rates could prompt us to further allocate to more risk-sensitive markets such as South Africa.

NOMURA FUNDS IRELAND – ASIA HIGH YIELD BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	7.61	14.36	-24.26	-36.12	-17.09
Benchmark	6.31	11.25	-15.09	-20.74	6.18
Out/(Under) Performance	1.30	3.11	-9.17	-15.38	-23.27

Source: BBH % Returns in USD. Benchmark shown is the JP Morgan Asia Credit Non-Investment Grade Index.
*Since Inception date is 6th March, 2015.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of -24.26% compared with the benchmark return of -15.09%, and therefore underperformed the benchmark by 9.17%.

Credit Selection in China was the main contributor to the underperformance.

Our duration was mainly neutral relative to the benchmark and had limited but positive impact on portfolio performance. Curve positioning performance contribution was also minimal.

The benchmarked returned -15.09% for the full year of 2022, underperforming both Developed Markets HY performance of -10.83% and CEMBI HY performance of -14.03%. The current benchmark yield of 12.76% and spread of 885 basis points is cheap when compared to EM and US HY levels.

Investment Outlook

AHY underperformance vs EM and developed market peers in 2002 has made it attractive from a relative value basis and we believe this attractive valuation will attract global investors.

China has abandoned its zero-COVID policy and has announced plans to support the property sector. We expect these changes in policies to provide key support for China's growth prospects in 2023 and view quality private and state owned enterprises to be the key beneficiaries, especially those with higher exposure to retail and hospitality. The situation in the Chinese property sector is still challenging and defaults are still likely for the weaker players. We do however expect the stronger private and state owned property developers to pull through given the improvement in onshore financing channels for these issuers.

India and Indonesia credits have done well last year in comparison with Chinese credits and we expect both countries to continue to contribute strongly to Asia's growth. Valuations are however starting to look expensive given the recent outperformance.

We expect default rates to improve for 2023. We are closely monitoring several potential risk prospects given near term refinancing risks.

NOMURA FUNDS IRELAND – ASIA INVESTMENT GRADE BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	1.59	1.98	-10.40	-2.72	19.79
Benchmark	0.84	1.93	-10.01	-3.86	18.51
Out/(Under) Performance	0.75	0.05	-0.39	1.14	1.28

Source: BBH % Returns in USD. Benchmark shown is the JP Morgan Asia Credit Investment Grade Index.
*Inception date is 13th March, 2015.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of -10.40% compared with the benchmark -10.01% and therefore underperformed the benchmark by 0.39%.

In 2022, US inflation rose more than expected, and aggressive Fed rate hikes led to higher Treasury yields.

We kept the portfolio duration slightly shorter than that of the benchmark and total active duration position generated positive excess return. However, we kept overweight exposure in 5 year maturity zone and underweight exposure to long end of the curve which resulted in the negative excess return as 5-30 year UST yield curve flattened in 2022.

In 2022, we experienced several credit spread cycles triggered by market expectations of U.S. monetary policy. IG average spreads widened from the end of 2021 to the end of 2022. Although we kept moderate overweight Duration Times Spread ("DTS") position throughout of the year 2022, tactical DTS control offset the negative contribution from DTS overweight.

Our country selection strategy didn't work well in 2022. We kept underweight exposure to Indonesia and Indonesian bonds, especially sovereign bonds, showed resilience during the risk-off market in October. We gradually increased our exposures to Korea, however the underperformance of the Korean USD bonds continued toward the end of the year and which resulted in the negative country allocation effect. Korean bonds were traded at attractive level at the end 2022 and we think there is a room for them to recover in 2023.

Our credit selections were the main contributors to the portfolio performance. We tactically switched our investment positions based on the relative value assessments, and our credit selections performed well especially in China and Hong Kong.

The benchmark returned -10.01% for the full year of 2022. The US Treasury factor contributed -10.12 % to the benchmark return. The 10 year US Treasury yield rose by 2.36% 2022 driven by the accelerated inflation in the U.S and hawkish monetary policy stance by the Fed. The benchmark spread widened from 130 basis points to 142 basis points and spread return including capital and income contributed 0.12% to the benchmark return. The benchmark yield at the end of 2022 was 5.49%, rose from 2.80% of 2021.

Investment Outlook

Due to the aggressive rate hikes implemented by central banks in developed countries, global economy will slow down further in 2023. In 2022, US economy still showed resilience especially in service sector and labor market. However, the U.S. economy will also be affected by cumulative interest rate hikes and growth rate will be significantly lower in 2023. ISM manufacturing index has already declined to below 50 level in November 2022 driven by weak new orders. Our economist team expects the US growth rate will drop to around 1% or lower driven by the weak housing and manufacturing sector.

Although the service sector price is showing stickiness, head line inflation has peaked out in mid-2022 and gradually declined in the second half of 2022 driven by energy and goods. We expect this trend will continue in 2023 and our economist team expects the US inflation rate decline to around 4% at the end of 2023. The market expects the Fed can lower interest rate toward the end of 2023 after they implement several rate hikes in early 2023. Our house view also expects the Fed implement rate cut in the second half of the year or early in 2024. Given the economic outlook above, slowing economic activity and lower inflation pressure, we expect the USD bonds generate capital gain in 2023 as well as attractive carry. At the end of 2022 we slightly overweighed duration and we are considering to increase our overweight.

As for the credit market, despite the strong market recovery in November and December, the spread level in Asia IG market is still attractive at the beginning of 2023 and can be supported by the favorable interest environment and better new issue supply demand.

NOMURA FUNDS IRELAND – ASIA INVESTMENT GRADE BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

Asian countries are expected to derive a bigger benefit from the reopening story of Chinese economy. China has in effect decided to remove COVID-related restrictions in December and the process of this reopening has been much faster than we previously expected. After the termination of their zero-COVID policy, the estimated number of COVID cases in China surged in December, and which affected economic activity. While the hasty reopening had a negative impact on economic growth in the short term, it is expected to have a positive impact in the medium term. We believe that China's infection situation will calm down in the first quarter of this year and that economic growth in 2023 will be higher than previously assumed and can achieve above 5% economic growth in this year. Therefore, private sectors and cyclical financial sector such as property and AMCs can benefit from the reopening. They underperformed in 2022 and we expect them to perform well in 2023. Other Asian countries also can be positively affected as they have close economic relations with China.

NOMURA FUNDS IRELAND – CHINA FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	5.85	7.64	-28.83	-27.13	170.58
Benchmark	5.20	13.52	-21.93	-20.86	285.89
Out/(Under) Performance	0.65	-5.88	-6.90	-6.27	-115.31

Source BBH; % Returns in USD. Benchmark is MSCI China Index.
*Since Inception date is 1st June, 2005 as the Nomura Funds Luxembourg China
Opportunities Fund. The Nomura Funds Ireland - China Fund was launched on 27th April, 2015.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -28.83% compared with the benchmark return of -21.93% and therefore underperformed the benchmark by 6.90%.

Attribution analysis shows that both allocation and selection effect made negative contribution.

In sector allocation, our underweight and overweight in Financials and Industrial sectors are negative contributors while the underweight in Communication Services and overweight Consumer Discretionary sectors are positive factors of the relative performance.

In stock selection, our underweight in China Construction Bank (Financials) and overweight in Will Semiconductor (Information Technology) made negative contribution due to defensives name outperforming and high inventory issue respectively. While positives come from overweight in CNOOC Limited (Energy) and China Telecom (Communication Services) due to elevated oil price and defensive business model respectively.

MSCI China remained highly volatile and significantly corrected by 24% as the market was heavily plagued by a series of negative issues, namely geographical conflict between Russia and Ukraine, exports deceleration on slowing global demands, property mortgage crisis, and more importantly, sporadic and severe COVID lockdowns throughout most of time of the year.

Despite the better-than-expected economy growth at 4.8% YoY in the first quarter of 2022, it witnessed significant deceleration in the second quarter of 2022 as dragged by multiple major cities lockdown including Shanghai shutting down from April to June. Escalating geographical conflict between Russia and Ukraine also significantly heightened risks related to demand disruption and inflation hike on elevated commodity prices. As a result, the GDP growth dipped to 0.4% YoY in the second quarter of 2022. Fear of potential regulatory crackdown and rate hike also caused big volatility to the market, leading to significant MSCI China retreat along with the deteriorating macro environments with MSCI China dropping by 32% in February to March 2022. On the bright side, the market confidence was partially restored later in May 2022 as Chinese Vice-Premier Liu He publicly promised to stabilize markets and promote economic growth with a series of accommodative fiscal and monetary policies supports roll-out.

Going into the third quarter of 2022, the economy along with market sentiment moderately improved from the second quarter trough. But the burst of property mortgage crisis and on-and-off COVID restrictions across China which constantly constrained mobility, production and consumption demands again took a heavy toll on the macro environment. Most macro data cannot manage to sustain the strong post-stringent lockdown momentum and hovered at lower-than-expected levels during the quarter. The situation became even worse into the fourth quarter of 2022 as COVID resurgence and lockdowns widely emerged across China, leading to severe supply chain disruption and demand suppression. Everything changed until the government took step to end its long-standing zero-COVID policy in late November 2022 in an extremely quick and abrupt manner. The market reacted quickly to the positive changes with MSCI China strongly rebounding by 39% from the Nov year-lowest level to the high at end of 2022.

Investment Outlook

The market sentiment has significantly improved and witnessed strong rally since the government announced a sharp U-turn in COVID policy in November. Going into 2023, we believe the worst is already behind us given the zero-COVID policy removal and support towards the property and technology sector.

On economy re-opening, we expect the swift removal of COVID-zero policy as well as the subsequent quick peak of COVID infection in various top-tier cities in Jan also imply the COVID impact on mobility and consumption would gradually subside in the short term. Domestic economic activities should gradually normalize as soon as end of the first quarter of 2023, followed by growth in the second quarter of 2023 onwards backed by the low-base effect as well as more potential pro-growth stimulus policy supports.

NOMURA FUNDS IRELAND – CHINA FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

On property sector, we have been seeing much stronger policy support, such as 16 supporting measures, three 'arrow' rescue plans and relaxation of escrow accounts rules, supporting demand-side easing measures as well as accelerating home delivery progress. We expect supportive policy support will continue in 2023 and lift the sector sentiment. Property data should gradually recover into 2023 as benefited from policy as well as re-opening. Additionally, on technology sector, the approval for Ant Group to raise RMB 10 billion for its consumer unit by CBIRC and approval of publishing licenses for 70 online games are further signs of government increasing support towards the sector.

All in all, we are increasingly positive to the China economy outlook. Post-pandemic consumption recovery and property comeback could support recovering domestic macro environment amid low base last year. The removal of regulatory overhang on Tech names should also support sector re-rating going ahead. With the stabilizing COVID situation, we expect the consumer sector would be the beneficiary, especially with more potential pro-growth policy supports going forward. We are positioned on re-opening recovery with overweight positions in consumer discretionary sector such as e-commerce and consumer staples sector.

Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Net Return Index.
*Since Inception date is 21st December, 2015.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -19.56 compared to the benchmark return of -18.36% and therefore underperformed the benchmark by 1.20%.

Stock selection contributed positively by allocation to Sectors a significant headwind. Not holding Energy stocks accounted for most of the negative effect from Sectors, but additionally overweight in Consumer Discretionary and underweight in Financials and Materials were also negative.

We do not make top down allocations to Sectors, the allocations are an outcome of our bottom up process, which looks for higher quality companies when they are trading at a discount to fair or intrinsic value. 2022 saw the conflict between Russia and Ukraine ultimately reduce the supply of natural gas to Europe so increasing prices globally and also put upward pressure on the oil price both of which were drivers of the out performance of Energy stocks. However in our view the historically relatively low returns on capital of Energy companies and high dependence on the rather unpredictable oil price as a driver of their profitability not to mention the negative impact on the climate makes it difficult to consider these high quality companies. As such they don't fit very well with our approach. Consumer Discretionary has been, conversely, a source of attractive companies for several years, but in 2022 suffered from weaker performance, as the market became concerned over the ability of consumers to continue spending in the face of higher energy prices and inflation generally, which impacted overall Sub-Fund performance. As we mentioned midway through 2022 the general investment philosophy has not been conducive to strong excess returns during the period, but we continue to believe it is the right way to invest for the long term and the large sector related impact aside, stock selection remained positive. The best performing stocks for the year were:

Cigna, a US health insurer, was up strongly in 2022 after a difficult 2021 (especially the second half). In 2020/21 the company had made some mistakes in the pricing of its products and also was experiencing medical cost inflation so was suffering from high medical expenses relative to insurance premiums. This put a lot of pressure on the stock, but ultimately the issue reverse to the benefit of the stock price and in addition the Healthcare sector has generally outperformed in the falling stock market, which has also been a positive for the Cigna stock price.

Novo Nordisk, a Danish pharmaceutical company, was up strongly in 2022 as well. Partly this was due to the relatively positive performance of the Healthcare sector, but also in large part due to the significant success of its anti-obesity drug, Wegovy. This drug has proven popular and with no immediate competitor products at present, supply is the limiting factor in sales.

AIA, a Hong Kong based life insurer, was up 12.5% during the year (vs market down 18%). The stock had lagged in 2021, but with the Chinese economy opening up (despite the now abandoned zero COVID policy) and the business model of AIA being relatively stable the stock performed well as the rest of the market fell sharply.

The worst performing stocks were:

Persimmon, the UK house builder. This stock suffered significantly during the year and was the largest drag on performance in the Sub-Fund. Worries about the UK economy were compounded by the increasing Bank of England base rate pushing up mortgage rates (to the detriment of housing demand) and then the disastrous 'Mini Budget' which sent mortgage rates spiraling higher and collapsed confidence among potential house buyers. These effects all contributed to a significant decline in the sales towards the end of the year and pressured the stock.

NOMURA FUNDS IRELAND – GLOBAL HIGH CONVICTION FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

PayPal, the leading online payment processor, significantly disappointed on the rate of growth in subscribers and hence the revenue growth. Indeed it surprised the market and undermined its investment case, in our view, by announcing a decision to move away from a subscriber growth driven business model to one where the company would seek to make more money from the more extensive users of its services. In hindsight we should have seen the warning sign in the company's plan to acquire Pinterest in late 2021. However the extent of the issue did not become apparent until the results announcement of early 2022. Despite the disappointment and impact to the share price we decided to exit the stock given the change in strategy and our lack of faith in that strategy. Since we exited the stock it has fallen further, but still most of the fall was during our ownership so there was a negative impact on performance.

Alphabet, an internet service provider primarily deriving advertising revenue through its offerings such as for internet search (Google) and video (YouTube). The stock suffered in two ways. Firstly being a Growth stock it has sold off as yields have risen and secondly from concerns over advertising revenue coming under pressure as the economy weakens. Earnings expectations have faltered during the year but the larger impact on the stock price came from the reduction in the earnings multiple. Falling from around 22-23 times to around 16 times by the end of the year, which is a reflection of how far out of favour stocks like this have become.

Aside from investment results the Sub-Fund is an SFDR Article 8 strategy and as such has environmental, social and governance objectives as well. The Sub-Fund has been invested in companies that in aggregate are well within the Sustainable Development Scenario for climate change. The team maintains an exclusion list to avoid investments in the very worst companies from a sustainability perspective and during 2022 did multiple engagement communications with portfolio companies, some specifically intended to encourage the companies to adopt science based targets for carbon emission reduction.

Investment Outlook

2022 has been dominated by the story of inflation and monetary tightening by central banks as they try to reduce it. Whether the taming of inflation will be the story of 2023 remains to be seen, but more likely than not we will see inflation reduce this year. Recent CPI data in the US and Europe already show that inflation is coming down with only certain areas like services and shelter being the persistently high inflation contributors. These are likely to moderate soon, particularly shelter, which tends to be a lagging indicator. At the present moment central banks continue to give hawkish messages, which is not surprising as they don't want to undermine the efforts made on inflation, but the market expects that policy rate rises are at least ¾ done now and perhaps will even start to fall later in the year. If this turns out to be the case and the economy generally slows as expected, even falling into recession, then it is likely that higher quality stocks or even perhaps growth stocks will tend to do well. Companies that can continued to generate strong earnings without a cyclical tailwind and perhaps even those companies with a structural growth driver would be the market focus in a scenario where the economy is struggling to grow, especially if there was less valuation headwind coming from interest rate increases. Our philosophy focuses on quality stocks, which should do relatively well in a slower economic environment especially with stable bond yields.

Aside from the economic cycle and interest rates we also must give consideration to energy prices, which have contributed heavily to the cost of living crisis around the world. In particular European natural gas prices have risen over ten fold from where they were just a few years ago, driving up direct costs for homes and business and indirect costs for example via electricity. Natural gas prices have come down considerably from their peak and this should be of benefit to the European economy and also the US economy (which has become a large LNG exporter). With exports from Russia effectively ceased the downside to supply is limited now, but still there is a danger that prices will rise again especially if there is particularly cold weather later in the winter period. Similarly oil prices have remained under control despite the conflict in Ukraine as Russia has continued to export oil to India, in particular, and this has kept the overall market well supplied. Disruption to this 'unstable equilibrium' represents a risk to the progression of the global economy towards a recovery.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -13.70% compared with the benchmark return of -11.93%, and therefore underperformed the benchmark by 1.77%.

During the first quarter, our ratings posture helped relative performance due to our overweight of Bs, which outperformed given their shorter duration. Our overweight of CCCs hurt relative performance, though we had reduced our CCC overweight dramatically starting in late fourth quarter of 2021. In general, we used weakness in the BB space to upgrade credit quality at attractive valuations while reducing our CCC and B overweights. From a sector standpoint, the biggest sources of positive relative performance for the portfolio were Energy, Specialty Retail, and Real Estate. Our overweight of the Energy complex helped with rising commodity prices, as did our avoidance of Russian issuers like Gazprom. In Specialty Retail, several key overweights continued to perform well early in the quarter, and we took advantage to lock in gains in Matalan. Real Estate names like Vivion and Signa did well as those bonds had reached oversold levels given the stable nature of their businesses. The biggest drags on relative performance were Consumer Finance, Wireline Telecom, and Auto Parts & Equipment. In Consumer Finance, Credito Real, which operates a Mexican lender and a US car financing business, fell as the company failed to meet a near term maturity. In Auto Parts, Standard Profil bonds were lower given an uncertain outlook for auto production due to supply chain issues and the company's relatively tight liquidity position. After the company announced an extension of its credit facility, we used a bounce in the bonds to exit the position. Goodyear bonds were also lower in sympathy with rates. In Wireline Telecom, long duration Telecom Italia bonds were lower with rates and uncertainty around potential M&A.

Turning to the second quarter, our ratings posture hurt relative performance due to our underweight of BBs, which began outperforming as the market became focused on growth concerns. Our overweight of CCCs hurt relative performance, though we had reduced our CCC overweight dramatically starting in late fourth quarter of 2021. From a sector standpoint, the biggest sources of positive relative performance for the portfolio included Gaming, Real Estate, and Integrated Electric. Gaming was driven by our overweight of Intralot bonds, which outperformed as the company benefited from growth in sports betting in the US and generally strong trends around the world. In Real Estate, security selection drove outperformance as we avoided several fallen angels whose bonds came under pressure due to questions about accounting. In Integrated Electric, our underweight helped as the sector underperformed due to concerns about French utility EDF. The key drags on relative performance were Support Services, Banking, and Auto Parts & Equipment. In Support Services, our overweight hurt as the sector underperformed in the quarter, and Diebold bonds were lower after the company reduced guidance due to weaker-than-expected demand and margin pressure, before stabilizing somewhat in June. Our Banking underweight was a drag as the sector outlook improved with higher rates and as higher quality outperformed. Meanwhile, exposure to major Italian banks Unicredit and Intesa hurt as they widened due to fragmentation concerns. In Auto Parts, certain higher quality, best-in-class issuers underperformed amidst concerns about supply chain issues in the sector and as longer duration, low-coupon BBs struggled.

In the third quarter, our ratings posture was again overall a drag on relative performance given the CCC outperformance, as we had substantially reduced our overweight in CCCs to position the portfolio more defensively. From a sector standpoint, the key sources of positive relative performance for the portfolio included Support Services, Food & Drug Retailers, and Specialty Retail. Support Services was driven by the avoidance of problem credits like Lincoln Financing and Elis Group. In Food & Drug Retailers, security selection helped as we were underweight Casino which continued to be over-levered and underperform its French peers. Similarly, Specialty Retail was driven by security selection as we avoided Constellation and Ceconomy which underperformed. The biggest drags on relative performance were Real Estate, Recreation & Travel, and Banking. The Real Estate sector continued to be out of favor, partly driven by higher interest rates, and Signa Development and Peach underperformed. In Banking, our exposure to Barclays hurt given volatility in the UK banking sector. In Travel, the biggest source of drag was our overweight in cruise lines and specifically Carnival. Toward the end of the month, the company gave an update on its third quarter results which missed market expectations.

NOMURA FUNDS IRELAND - EUROPEAN HIGH YIELD BOND FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

In the last quarter of the year, the key sources of positive relative performance for the portfolio included Diversified Capital Goods, Wholesale Food, and Air Transportation. Diversified Capital goods was driven by exposure to the Chinese conglomerate Fosun, whose bonds rallied with the positive developments in China. In Food, Premier Foods and Upfield both did well on the back of strong earnings. Our overweight to Air Transportation helped as airlines like International Consolidated Airlines Group and Air France/KLM benefitted from the rebound in travel. The biggest drags on relative performance were Support Services, Restaurants, and Gaming. In Support Services, Atalian bonds fell after the company announced it would only consummate part of its planned sale to CD&R. We still expect the transaction to close, but the market responded negatively. Selecta continued to be a drag despite steadily improving results as the illiquid bonds underperformed. In Restaurants, Telepizza bonds fell after news that KKR would seek to restructure its balance sheet due to high franchise fee payments to Pizza Hut. In Gaming, Intralot lagged the market move and Codere was weak, despite strong earnings from both operators. Codere is somewhat illiquid and was soft at the end of the year in thin, holiday season trading.

Investment Outlook

Looking forward, we continue to expect a slower economy in the US as the housing contraction has an effect, but it should remain a mild recession thanks to accumulated consumer savings and the strength of certain sectors like energy and travel. European growth is likely to underperform, but a mild start to winter, healthy energy stockpiles, and dramatically lower natural gas prices have provided some relief. Additionally, successful reopening in China would be positive for growth in Asia and for European export economies, though it may complicate the inflation picture.

While inflation appears to be cooling, core inflation in Europe is still too high, and the ECB is likely to continue on its path of tighter policy. In the US, we believe the Fed will pause their rate increases in early 2023 to acknowledge the growth slowdown, and also to take stock of the significant tightening that has already occurred. As this pause comes into focus, we believe high yield and other risk markets can perform well in 2023. Part of this view is driven by our expectations that, though high yield default rates will rise from historically low levels, they will remain manageable given generally high credit quality across the asset class, substantial liquidity, and limited maturities in the next few years. Furthermore, at nearly 8% YTW with average prices in the mid-80s, we believe that European high yield offers ample carry and sufficient discount to provide attractive total returns in the coming year. Additionally we see significant pockets of value in lower-rated segments of the market that underperformed in 2022.

Gross return, close of day numbers.
*Inception date is 15th April, 2019.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -16.48 compared to the benchmark return of -18.36% and therefore outperformed the benchmark by 1.88%.

Outperformance was driven broadly evenly by allocation and selection as headwinds from being underweight Energy were offset by the benefit from being underweight Consumer Discretionary and overweight Healthcare. Selection was strong in Technology, Healthcare and Financials but weaker in Industrials and Materials as a number of more economically sensitive stocks which had driven outperformance in prior years consolidated within a tougher macro-economic backdrop. For the full year style was a material contribution to performance, the underweights to earnings variability and growth contributed ca 80 basis points and ca 70 basis points respectively whilst the modest underweight to Value was a -40 basis points drag. It has been a tough period for equity investors as inflation and interest rates have pushed higher (US ten year increased from 1.51% to 3.78% by yearend) and central banks have continued to tighten monetary policy aggressively. We are pleased that we have been able to outperform the benchmark over this period, especially given the very large headwind from Energy outperformance, and further note that relative to our largest Sustainable Equity peers we have outperformed strongly and did a much better job protecting our client's capital in a growth led market decline.

The top contributors to performance for the full year were Cigna (+46%) and Novo Nordisk (+21%) in addition to not holding Amazon (-50%) on sustainability grounds. Novo Nordisk continued to deliver stellar results through the year raising guidance on multiple occasions as a result of stronger growth across GLP-1 products and growing optimism around the outlook for its obesity treatment Wegovy as the company worked through supply constraints. In addition to strong fundamentals, the team believe the shares also continued to benefit from investors looking for more defensive equities in a general risk-off mood. After a very disappointing year for Cigna in 2021, during 2022 the company did a great job bringing down its medical loss ratio and delivering much better than had been expected earnings. Healthcare has historically been less macro-sensitive than other sectors and the defensiveness of Cigna has also helped the shares outperform the market. The top detractors were PayPal (-51%) and DSM (-45%). PayPal experienced a pull forward of demand for e-commerce related payments during the pandemic and management had given bullish 5 year user growth based on this demand but e-commerce growth slowed as stores reopened and management were forced to retract the long term guidance. Ultimately we put too much confidence in the quality of the management and following multiple downgrades to guidance and the departure of the CFO lost confidence in their credibility and therefore exited the stock. Along with many other industrial and/ or consumer oriented companies DSM underperformed in 2022 after a very strong 2021. The stock suffered from worries about the economic situation as well as rising interest rates, which has pressured many stocks with a positive growth outlook. The team took the opportunity throughout the period to add to DSM as a great sustainability contributor at increasingly attractive valuation.

Outperformance in the second half of the year was driven predominantly by selection with a modest contribution from allocation, as headwinds from being underweight Energy were offset by the benefit from being underweight Consumer Discretionary and overweight Healthcare and Industrials, whilst stock selection was particularly strong within Technology and Financials. On a regional basis the strategy has benefitted from being overweight Europe. Style was broadly neutral over the period, the modest underweight to Value was a headwind given its extreme outperformance however this was offset by other small positive style tailwinds.

NOMURA FUNDS IRELAND – GLOBAL SUSTAINABLE EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

The top contributors to performance over the second half of the year were Johnson Controls (+35%) and Gilead (+41%). Johnson Controls has continued to recover strongly on both company specific and industry level tailwinds. Data has remained resilient for non-residential HVAC where it is especially strong whilst at the company level it has managed to recover from some company specific supply chain issues. The company remains very well positioned to benefit from an increase in spending to reduce the emissions of buildings particularly within the commercial space and valuation remains undemanding. Gilead performed exceptionally well particularly through the fourth quarter of the year as a number of drug trials had better than expected readouts. Gilead had been largely written off by investors with regards to growth prospects and had been trading on a single digit PE multiple with double digit FCF yield. As a result even though the readouts were not extraordinary they drove an extreme reaction in the share price towards our fair value and we therefore reduced the position. The greatest detractors have been Fidelity National (-25%) and Alphabet (-19%). Fidelity International delivered very disappointing results for its third quarter and weak guidance was initiated by the new CEO. Whilst the team were disappointed by results and recognise have been overly positive on the quality of the merchant solutions business the position was sized appropriately for the risk and the team believe that the new CEO has used this as a clearing event. The opportunity was therefore taken to add to the position, following the selloff post results, and the stock has already recovered meaningfully, though it remains a lower weight holding.

Investment Outlook

The most recent inflation data releases have taken some of the pressure off central bankers particularly in the United States, but also in Europe. However, stickier core components remain very high and the Fed has been vocal that they remain concerned by the level of these and expect the Federal Funds Rate to remain elevated over the next two years in order to fully stamp out inflation. Global equity markets remain eager to rally and get ahead of the Fed with regards to when they will be able to pivot, and will continue to be laser focused on the inflation numbers and related economic data. However, there does now appear to be more consensus and stability around expectations, and an increasing focus on the impact of a global recession on corporate earnings. Within this environment we strongly believe Quality will outperform as a result of the typical characteristics these businesses exhibit – such as lower earnings variability, higher quality management teams and lower levels of debt – which will support riding out any economic downturn. Furthermore Quality as a style, which is the primary investment focus of the team alongside valuation, has underperformed materially over the past two years and the team are excited by the opportunities that this has created to invest in high quality business at attractive valuations. Value as a style factor has also strongly outperformed over the past two years, in part due to an extremely strong Energy sector to which the Sub-Fund has no exposure and has been a material headwind for performance. Given the extent of outperformance of Value as a factor and the effect that higher interest rates will have on broader demand the team believe it is very unlikely such outperformance of Value and traditional Energy will continue.

Impact Outlook: The team are also very positive on the potential for markets to refocus on sustainability and the huge environmental and societal challenges faced globally in 2023. Indeed in 2022 the focus of the investment community on 'sustainability' megatrends took pause as concerns over huge spikes in energy prices following the invasion of Ukraine and spiralling inflation dominated. However, looking further out the events of 2022 have only served to strengthen the need to reduce reliance on fossil fuels and catalyse energy efficiency megatrends. Furthermore there has been a huge increase in government funding and support for investment in energy security, climate change and water resiliency through for example the Inflation Reduction Act (IRA) and Infrastructure Investment and Jobs Act (IIJA), that the team do not believe has been fully priced into a number of the stocks the Sub-Fund invests in. Through speaking with investee companies the team believe that the benefit from the huge increases in funding through these multiple Federal Acts introduced by the Biden administration will start to feed through into company revenues this year and provide long term structurally higher demand.

AMERICAN CENTURY GLOBAL SMALL CAP EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-2.79	5.08	-29.07	21.96	31.40
Benchmark	-3.13	10.45	-18.67	9.84	18.49
Out/(Under) Performance	0.34	-5.37	-10.40	12.12	12.91

Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Index Small Cap.
*Since Inception date is 2nd July, 2019.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -29.07% compared with the benchmark return of -18.67% and therefore underperformed the benchmark by 10.40%.

Geopolitical uncertainty, supply chain disruptions and higher commodity prices led to heightened market volatility over the 12-month period. Soaring inflation led most central banks to tighten monetary policy. Rising interest rates and inflation pressures weakened economic growth, and recession fears weighed on stock performance later in the year. This environment was especially challenging for small-cap stocks, as investors worried that smaller companies would have more trouble accessing capital and expanding operations. As a result, small caps underperformed large caps for the period.

Against this backdrop, stock selection detracted from the Sub-Fund's relative performance, especially in the financials and health care sectors. From a geographic perspective, stock selection in the U.S. detracted. Among individual holdings, Codexis was a notable detractor. The stock of this protein engineering company fell on growth concerns for Pfizer's COVID-19 antiviral pill Paxlovid. Codexis makes the active enzyme used in Paxlovid, and weaker demand for the pill could affect the pace of future orders for the enzyme.

On a positive note, the Sub-Fund's overweight in the consumer staples sector aided relative performance. From a country standpoint, investments in Germany also contributed, due in part to stock selection. Among individual holdings, NOW was a top positive contributor. This energy products distributor reported healthy revenue and earnings growth, supported by increased oil patch activity. It also benefits from a strong balance sheet and healthy end-market demand for its products. It recently raised its full-year guidance and expects to generate free cash flow in 2022.

Investment Outlook

We remain committed to our disciplined process. We believe our active, bottom-up approach has the potential to identify companies with accelerating and sustainable growth, supported by our balanced approach to risks and opportunities. We have responded to a less certain global economic environment by focusing on companies with durable pricing power, healthy balance sheets and stock-specific drivers of earnings growth. We also favor companies with strong free cash flow that reduces the need for capital markets funding.

Reopening in Asia is creating opportunities for consumer-facing companies. Economic reopening in Asia is occurring later than in other markets but is now driving improved mobility and consumer spending. Japan has seen increased tourism after relaxing its cap on inbound travel, leading to opportunities for drugstores, restaurants and tourism-related names. China is also moving away from its zero-tolerance COVID-19 policy, and we added exposure to select travel- and consumer-related companies that may benefit from increased mobility in China.

We see positive secular trends for information technology. We remain on the lookout for innovative technology companies capitalizing on long-term secular trends such as cybersecurity, logistics software, digitalization, cloud computing and data centers.

We see growth potential tied to increased spending on energy and renewables. A heightened focus on energy security is driving increased spending on energy-related infrastructure. We have also found opportunities in companies that may benefit as Europe seeks non-Russian energy sources. Additionally, we see potential as government incentives and disruptions in the global energy market drive investments in renewables.

Small-cap valuations remain attractive relative to large caps. While economic uncertainty and slowing earnings growth may lead to near-term volatility, we continue to identify small-cap companies that we believe have the potential to deliver accelerating and sustainable earnings growth. We believe bottom-up stock selection and a prudent level of diversification remain critical, as we continue to find growth opportunities across a broad array of sectors and geographies.

AMERICAN CENTURY GLOBAL GROWTH EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-2.95	6.51	-24.31	8.58	174.07
Benchmark	-3.94	9.76	-18.36	12.50	145.08
Out/(Under) Performance	0.99	-3.25	-5.95	-3.92	28.99

Source BBH; % Returns in USD. Net Returns. Institutional Class. Benchmark is the MSCI All Country World Index.
*Since Inception date is 14th April, 2010 (Please note that this Sub-Fund become a sub-fund of Nomura Funds Ireland by way of a merger
on 2nd August, 2019).

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -24.31% compared with the benchmark return of -18.36% and therefore underperformed the benchmark by 5.95%.

Inflationary pressures built globally throughout the year, driven by the persistence of strong demand, a variety of COVID-19-related supply chain constraints and the effects of the war in Ukraine. Central bankers around the world reacted vigorously to the persistence of high inflation, with the Fed and other central banks tightening rates. Rising rates weighed heavily on the earnings multiples for growth stocks.

From a geographic perspective, the Sub-Fund was pressured significantly by its stock selection in the U.S., while not having exposure to Russian equities aided relative results. On a sector basis, health care was the biggest detractor, whereas financials provided some degree of support. Amazon detracted for the period. Economic conditions, including high labor costs and supply chain issues, have made for a difficult environment for the stock. The long-term growth drivers continue to be supported by its dominant position in cloud computing services and its strong market position in online shopping. The largest stock contributor was Cheniere Energy. High natural gas prices drove share price appreciation for the liquefied natural gas company. The U.S. also approved expanded liquefied natural gas exports, which supported gains.

Investment Outlook

Focused on resilient earners. Companies with highly resilient business models, such as those with recurring and predictable revenue profiles, are well represented in the portfolio. Businesses with revenues tied to long-term contracts or based on subscription models are particularly attractive.

Evaluating stock-specific drivers of growth. We believe businesses with the ability to grow and deliver earnings not dependent on the economic cycle will be rewarded as growth becomes increasingly scarce. We are also biased toward businesses with financial strength and low leverage. We expect these companies to remain profitable in a global economy where growth will remain under pressure.

Secular growth remains well represented. As economic growth slows in reaction to tighter monetary policies and rising costs, our bias moves toward businesses tied to structural drivers rather than growth that relies on a cyclical tailwind. The portfolio continues to have exposure to many secular trends, such as digitization, cloud computing, 5G network rollout, data center expansion and vehicle electrification. From a risk management perspective, we are mindful of taking unintended exposure to a few themes or to one economic outcome.

Select cyclical opportunities remain. The portfolio's exposure to businesses with a cyclical element to growth is focused on a handful of opportunities. For example, we continue to hold investments tied to the automobiles industry, specifically those companies benefiting from trends such as vehicle electrification. We expect global automobile demand to remain strong despite the risk of slowing macroeconomic growth.

Taking advantage of market turmoil. As the relative weakness in many growth stocks continues, we will seek to take advantage of the correction in market multiples and add to existing positions or establish new positions in names where we believe the risk/reward ratio appears more favorable.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -22.60% compared with the benchmark return of -18.36% and therefore underperformed the benchmark by 4.24%.

Inflationary pressures built globally throughout the year, driven by the persistence of strong demand, a variety of COVID-19-related supply chain constraints and the effects of the war in Ukraine. Central bankers around the world reacted vigorously to the persistence of high inflation, with the Fed and other central banks tightening rates. Rising rates weighed heavily on the earnings multiples for growth stocks.

From a geographic perspective, the Sub-Fund was pressured significantly by its stock selection in the U.S., while an overweight position in Brazil lifted relative results. On a sector basis, health care was the biggest detractor, whereas financials provided some degree of support. Catalent detracted for the period. The stock declined as a result of reporting lower-than-expected revenue. The drugmaker also provided analysts with weaker guidance going forward. We expect, however, that the company will be able to address short-term challenges, and the long-term outlook for growth remains attractive. The largest stock contributor was Cheniere Energy. High natural gas prices drove share price appreciation for the liquefied natural gas company. The U.S. also approved expanded liquefied natural gas exports, which supported gains.

Investment Outlook

Focused on resilient earners. Companies with highly resilient business models, such as those with recurring and predictable revenue profiles, are well represented in the portfolio. Businesses with revenues tied to long-term contracts or based on subscription models are particularly attractive.

Evaluating stock-specific drivers of growth. We believe businesses with the ability to grow and deliver earnings not dependent on the economic cycle will be rewarded as growth becomes increasingly scarce. AMERICAN CENTURY EMERGING MARKETS EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-0.42	11.14	-27.93	-14.44	31.13
Benchmark	-1.41	9.70	-20.09	-7.87	28.42
Out/(Under) Performance	0.99	1.44	-7.84	-6.57	2.71

Source BBH; % Returns in USD. Benchmark is the MSCI Emerging Markets Index.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -27.93% compared with the benchmark return of -20.09% and therefore underperformed the benchmark by 7.84%.

The investing environment of the prior year was characterized by soaring inflation and tighter central bank policy from the U.S. Fed and elsewhere, which ignited recession fears in many countries and roiled global assets. Macroeconomic and geopolitical uncertainty also pressured emerging markets stocks as the Russia-Ukraine conflict drove high energy and commodity prices. In China, regulatory pressures and COVID-19-induced restrictions weighed on corporate earnings and snarled supply chains. Investors rotated toward value stocks, which sharply outperformed growth names, and the continuing rise in value was challenging for our investment approach as a growth manager. Both style and factor returns in 2022 were dominated by rising rates, and the sharp rally in the value factor and rise in yields weighed on our relative returns. On a sector basis, materials was the largest relative detractor during the period, driven by stock selection. Conversely, energy was the largest contributor, owing to stock selection. The single largest detracting stock was Novatek. The Russia-based natural gas producer and distributor's shares declined sharply amid the Russia-Ukraine war and sanctions from the West. Thailand-based PTT Exploration & Production was the largest individual contributor. The petroleum exploration and production company benefited from higher global crude oil prices, sanctions on Russia, relatively low inventory levels, volume growth and strong gas prices. From a geographic perspective, holdings in China, Taiwan and India weighed on relative returns. Holdings in Thailand, Malaysia and Indonesia were the largest contributors.

Investment Outlook

In 2022, interest rate increases and the steepening trajectory of U.S. Fed policy tightening weighed on investor sentiment. Also, China's zero-COVID policy pressured growth and disrupted global supply chains, and the Russia-Ukraine war added to headwinds through higher energy and commodity prices. Each of these weighed heavily on emerging markets (EM) equities.

We believe the asset class appears ready to turn the corner toward recovery as key macroeconomic conditions that pressured EM stocks evolve and headwinds start to dissipate. Growth-oriented policy in China, a weaker U.S. dollar and expectations that Fed tightening has peaked support our positive view on EM stocks.

China's regulatory issues appear to be easing. The relaxation of COVID-19 restrictions and new, pro-growth policies will likely support stronger economic growth in 2023, in our view. Reopening may be bumpy as the virus runs its course, but we expect consumption to become a key driver in 2023 as mobility bounces back. A rebound in Chinese equities, which has already begun due to reopening optimism, is a large driver of the headline EM index upside expected in 2023.

EM economies stand, for the most part, closer to the likely peak in their policy rates cycle compared to developed markets. Furthermore, after a sharp cut to consensus estimates, 2022 could mark a bottom for EM earnings, setting the stage for a recovery in 2023.

In this environment, we have been increasing our exposure to China, which holds a prominent position in the portfolio. We continue to favor stocks that benefit from government policy focus (such as names tied to the green economy and electric vehicles), reopening of the economy and an improving consumer. We believe services activity and consumption will likely rebound, driven by pent-up consumer demand, employment and income growth and increasing consumer and business confidence.

^{*}Since Inception date is 8th November, 2017 (Please note that this Sub-Fund become a sub-fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).

AMERICAN CENTURY EMERGING MARKETS DEBT TOTAL RETURN FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	1.06	5.90	-12.75	-12.28	-3.67

Source BBH; % Returns in USD. This Sub-Fund has no Benchmark. *Since Inception date is 6th June, 2017 (Please note that this Sub-Fund became a sub-fund of Nomura Funds Ireland by way of a merger on 2nd August, 2019).

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -12.75%.

Like most other asset classes, emerging markets debt faced a tumultuous year. Soaring inflation, broken supply chains, aggressive central bank tightening, war in Ukraine and slowing global growth contributed to steep losses for the asset class. Furthermore, China's zero-COVID policy, which remained in place for most of the year, weighed on the global economy and markets, while a surging U.S. dollar pressured emerging markets currencies. Sentiment improved late in the year, as inflation moderated, China lifted COVID-19 restrictions and the prospect for less-aggressive central bank policy gathered steam. Against this backdrop, the U.S. dollar gave back some of its year-to-date gains. Risk appetites improved, which helped trigger a fourth-quarter rally for emerging markets debt. Against this challenging backdrop, we maintained a more conservative risk profile. Performance suffered from Russian and related investments, which plummeted early in the year as Russia invaded Ukraine and world markets halted trading in Russian assets. A hedge helped buffer our losses in Russian external bonds, but exposure in local rates issues and the ruble declined considerably. We quickly reduced our exposure to small stakes in sovereign bonds and the ruble. Amid Russia's aggression, Ukrainian corporate and sovereign external holdings retreated. We sold the corporates but retained select sovereigns. We also kept a stake in external Kazakhstan issues, which lagged due to proximity to the conflict. Conversely, we exited our external exposure in Ukraine neighbor, Belarus. Local bonds in Brazil and Colombia were main detractors, but positive results from local positioning in Mexico helped buffer the losses. Currency positioning was also broadly negative, but there were some notable contributors, including the Brazilian real, Chilean peso and Israeli shekel.

Investment Outlook

With the growing risk of a global recession, we continue to see near-term challenges for emerging markets securities. However, we also believe the turmoil of 2022 may lead to opportunity in 2023.

We expect the combination of elevated inflation and restrictive monetary policy in developed markets to drive a slowdown in global economic growth. The timing and depth of a recession remain uncertain, given the time it takes for monetary policy to work through the economy. In our view, a U.S. recession should emerge in the second half of 2023.

While China's outlook is trending positive, it's not certain. The downgrade in China's COVID-19 risk level and removal of quarantine requirements are major steps in reopening. But as mobility improves, infections may spike. We expect volatility as the nation adjusts to these spikes and moves toward herd immunity and resumption of normal work and consumption behavior.

Slowing U.S. rate volatility signals a better backdrop for emerging markets rates and duration. Countries with negative real rates and high current account deficits should find it easier to fund themselves, and emerging markets central banks may avoid tightening further. Our local positioning favors countries with steep yield curves and those offering real rate cushions, such as Peru, Indonesia, South Africa and Malaysia. We are avoiding Eastern European countries, where geopolitics and high inflation offer inverted yield curves and negative real yields.

Given the recent tightening of emerging markets spreads, valuations have become full, particularly among investment-grade securities. Valuations appear slightly better among high-yield securities. Accordingly, security selection will be important, particularly among countries facing restructuring and political tensions, such as Ghana and Brazil. Overall, we believe Latin American countries are attractively positioned for the pending global slowdown. The region has already faced tighter monetary and fiscal policies, and inflation has generally peaked. Valuations appear attractive for select sovereigns with strong fundamentals.

Source BBH; % Returns in USD. Benchmark is the MSCI All Country World Index.
*Since Inception date is 3rd February, 2020.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of -23.16% compared to the benchmark return of -18.41% and therefore underperformed the benchmark by 4.75%.

Market Review

The first quarter

During the first quarter, the MSCI All Country World Index (Total Return, Net Dividend) declined by 5.4% in US dollar terms. Global equity markets fell due to growing concerns about inflation and hawkish statements from major central banks. When looking at the MSCI ACWI index by region, North America came out on top and Europe saw the worst performance.

CPI inflation in the US kept rising to +7.9% (yoy) in February, driven by higher commodity prices following Russia's invasion of Ukraine. High core services inflation and persistent supply chain bottlenecks after the COVID-19 crisis also contributed to the figure. While the economic implications of geopolitical uncertainty remained unclear, during the FOMC meeting in March Federal Reserve Chair Jerome Powell mentioned that the US economy is very strong and positioned well to handle tighter monetary policy. The Fed forecast a sequence of rate hikes, anticipating that the policy rate would finish the year at 1.9% and then rise to about 2.8% by the end of 2023.

During the quarter, the MSCI ACWI value index outperformed the MSCI ACWI growth index, reflecting higher commodity prices and market expectations of faster monetary tightening in the US. By sector, Energy was the top performer, followed by Materials, which was backed by higher commodity prices. Meanwhile, growth sectors such as Information Technology, Consumer Discretionary, and Communication Services underperformed as the rise in bond yields weighed on long duration growth stocks.

Negative results came from our overweight position in high quality technology companies with strong cash flow generation such as Adobe, Elastic, Meta Platforms, and ServiceNow in the AI Cloud theme, as well as Intuit in the Outsource theme. Leading animal healthcare companies with attractive long-term growth stories in the Aging theme such as Zoetis and Idexx also weighed on the relative return. Meanwhile, the Sub-Fund benefited from positions we added during the quarter such as Bristol Myers, Coterra Energy, Devon Energy, and Vertex Pharma.

We did not change our medium- to long-term view of our portfolio holdings, and we did not forecast a recession to follow the shift to an inverted US yield curve. However, we acknowledged that investor appetite for high growth stocks with high valuations has been waning, while nominal yields and real 10-year bond yields started moving higher from the beginning of the year. As such, we modified the portfolio characteristics in January in accordance with our cautious view of the overall market environment. Rather than considering the fundamentals of specific companies, we reduced our positions in high growth stocks with high valuations, especially in the AI/Cloud and New Tech themes. Meanwhile, we increased our exposure to the Infrastructure/Energy and Aging themes. We have also increased our cash level to nearly 10%, which is the maximum we can hold in this strategy.

In terms of Barra risk exposure, we have reduced our risk index exposures to "growth" and "momentum", but they are still in the positive range. From a sector exposure perspective, we reduced our exposure to Information Technology and Consumer Discretionary in line with of our efforts to reduce the exposure to high growth shares with high valuations. On the other hand, we raised our exposure to Financials, Energy, and Materials, which benefit from the rise in interest rates and the current inflationary environment. We also increased the exposure to Industrials and Utilities, which benefit from the economic shift towards "green" products and renewable energy, and they should be attractive growth drivers given that earnings are less sensitive to the economic cycle.

Performance Commentary (continued)

The second quarter

During the second quarter, the MSCI ACWI declined by 15.7% in US dollar terms. Global equity markets fell as upside inflationary pressure has continued to surprise, fuelled by ever higher oil and commodity prices, labour shortages, and ongoing supply chain disruptions.

When looking at the MSCI ACWI index by region, Emerging Markets came out on top and North America was the worst performer.

Global central banks have in general acted in a coordinated fashion to combat inflation by raising policy rates. The Bank of Japan and the Bank of China are exceptions. Market consensus is that interest rates in the US are expected to rise to 3.3% by the end of this year. At the same time, recession fears have also deepened due to the squeeze on consumers from higher prices and higher borrowing costs. The University of Michigan Consumer Sentiment Index in the US has fallen to 50 in June from 70 in last December, while consumer confidence in the UK has hit a record low. In Europe consumer confidence has also fallen, significantly affected by the reduction in gas supply from Russia. Meanwhile, China modified its COVID-19 lockdown policies and reported a modest increase in industrial production.

During the quarter, the MSCI ACWI value index outperformed the MSCI ACWI growth index by nearly 10%. Looking at the GICS 11 sectors, Energy was the top performer. It was supported by higher oil prices, which were still about 40% above 2021 year-end levels. Energy was followed by defensive sectors such as Consumer Staples, Utilities, and Healthcare. On the other hand, growth sectors such as Information Technology and Consumer Discretionary were major detractors from the performance.

During the quarter, main contributions to the relative performance came from positions we added when we modified our portfolio characteristics in January of this year. More specifically, the Sub-Fund benefited by nearly 170 basis points from our increased exposures to the Aging theme mainly through pharmaceutical and biotech stocks. Energy/Infrastructure theme companies, such as Coterra Energy and Devon Energy, also contributed positively by a combined total of around 40 basis points. On the other hand, major negative results came from our overweight positions in relatively volatile selections in the New Tech theme, as well as the industrial commodity supplier Freeport-McMoRan, which is also from the Energy/Infrastructure theme.

We have not made meaningful changes to our portfolio since January 2022 when we modified its characteristics by reducing the exposure to stocks with high growth rates and high valuations in accordance with our cautious view of the overall market environment. Meanwhile, we increased our exposure to Aging theme companies with stable growth stories.

Specific companies added during the quarter included Merck. We believe Keytruda, their key product in the field of oncology, offers a promising growth story and is underappreciated by the market. We also added Microchip Technology in the New Tech theme. It is a leading producer of microcontrollers and this segment is still largely fragmented. We believe they have the potential to gain market share from acquiring clients among automotive and industrial companies. Meanwhile, we closed our positions in Pepsico in the New Consumer theme and Verizon Communication in the Energy/Infrastructure theme as we thought both the stable nature of their business and their defensive characteristics have already been priced into their shares.

The third quarter

During the third quarter, the MSCI ACWI declined by 6.8% in US dollar terms. Although the quarter began with a solid rebound driven by resilient corporate earnings and signs of a possible peak in inflation as well as expectations for the end of this cycle of rate hikes, global equity markets fell for the quarter overall. When looking at the MSCI ACWI index by region, North America came out on top and Emerging markets saw the worst performance.

In line with other central banks, at August's Jackson Hole summit the US Fed reaffirmed their commitment to fight against inflation rather than support growth, which disappointed market expectations of possible rate cuts in 2023. The Fed raised the federal funds rate by 75 basis points to 3.25% in September, the third consecutive increase of the same magnitude, while the European Central Bank and the Bank of England both raised interest rates during the quarter amidst the ongoing energy crisis and fears about the outlook for economic growth. At the end of September, global currency and bond markets saw a dramatic increase in volatility as the UK government announced a spending package to stimulate the economy, which would likely contribute to upward inflationary pressure. This also resulted in a spike in global bond yields. While global inflationary pressures moderated as a result of lower oil and food prices, core inflation stayed well above central bank targets.

Performance Commentary (continued)

Looking at the GICS 11 sectors, Communication Services was among the weakest, with relatively highly valued stocks lagging behind the most due to rising real yields. Poor performance in the Communication Services sector was followed by Real Estate, which was affected by higher mortgage rates. On the other hand, Energy was the most resilient sector. It benefitted from solid earnings and high natural gas prices. This was followed by the Consumer Discretionary sector, which was supported by strong consumer spending and low unemployment.

Our selections in the Energy/Infrastructure theme such as Constellation Energy and Devon Energy contributed positively to the portfolio performance by a total of roughly 150 basis points. These companies benefitted from a market environment characterized by persistent inflationary pressure. Constellation Energy in particular has an attractive long-term outlook supported by the nuclear production tax credits provided in the Inflation Reduction Act of 2022. Within the AI/Cloud Service theme, the positive contributions came from Amazon, Workday, and Intuit, which added a little over 50 basis points. However, these gains were mostly offset by the negative performance from Adobe.

We maintain a cautious view on the equity markets, at least for the foreseeable future, and made tactical adjustments in our portfolio by reducing the exposure to companies that are more susceptible to trends in global industrial production. The Sub-Fund also added positions in companies with attractive structural growth stories, especially in the IT sector. For example, we exited our position in Meta. Amid growing fears of a recession, there have been deepening concerns about slashed advertising budgets, resulting in slower future earnings growth. We have also exited our positions in Hilton Worldwide and ULTA Beauty, as they tend to be sensitive to broad macro-economic conditions. Their stock prices have already adjusted for the benefits of economic reopening. We topped up positions in some software names such as ServiceNow and Oracle, which we believe have attractive exposure to favorable secular drivers. These stocks had approached the attractive valuation range even in the current volatile equity market.

The fourth quarter

During the fourth quarter, the MSCI ACWI rose by 9.8% in US dollar terms. Global equity markets rose at the beginning of the review period but lost some momentum towards the end. While value stocks significantly outperformed growth stocks, aided by a weaker US dollar, Europe and Asia/Pacific including Japan also outperformed North America. Other contributions came from lower gas prices as well as the Chinese government's decision to relax its zero-COVID policy earlier and in a more comprehensive way than expected.

Until the end of November, the stock market was supported by the easing of inflation pressures and a resolution to the fiscal turmoil in the UK, which resulted in the replacement of Liz Truss as Prime Minister with former Chancellor of the Exchequer Rishi Sunak. In the US, the October CPI report showed the first solid decline in consumer price inflation for the year and November CPI figures also indicated continuing deceleration to 0.1% (mom). Market participants hoped these would result in a lower terminal rate. The Fed's rate hike in December was reduced to 50 basis points after four consecutive tightening moves of 75 basis points each. Even so, the Fed revealed they expected rate hikes to push the benchmark federal funds rate above 5%, which was above market expectations. Meanwhile, economic data for manufacturing and retail sales released in December showed that economic activity was slowing. Several negative earnings announcements in December also raised concerns over an earnings recession in 2023.

In terms of sector level relative performance, disappointing earnings results as well as rising bond yields continued to weigh on growth sectors such as Information Technology, Communication Services, and Consumer Discretionary. On the other hand, less economically sensitive companies with lower valuations in defensive sectors, as well as potential beneficiaries from China's reopening, outperformed the overall market.

Negative results for the quarter came from our overweight positions in growth sectors. Overweight positions in North America as well as underweight positions in Europe and emerging markets also detracted significant value. Among individual stocks, the three largest negative results came from overweight positions focusing on companies with favorable structural growth, including Crowdstrike, Atlassian, and Amazon in the Al/Cloud theme. Although we believe Atlassian still has long-term appeal, we sold due to concerns about the short-term negative impact on their seat-based sales growth of the hiring freeze as well as the negative impact from restructuring plans by software and internet companies. On the other hand, Oracle made the largest contribution to added value. We see attractive growth opportunities in its applications business especially in enterprise resource planning products as well as in its recent acquisition of Cerner. The second largest positive contribution to the portfolio performance was Merck, not only because its business is considered more resilient than high growth companies, but also because of higher conviction among investors about its multiple strategies to strengthen its key product position, Keytruda.

Performance Commentary (continued)

We maintained our rather defensive portfolio positioning. Major transactions during the quarter included the decision to trim the position in Intuit. Against a backdrop of uncertain market conditions, US software stocks such as Intuit were out of favor, with high growth expectations and relatively high valuations. Meanwhile, we opened a new position in Marsh & McLennan in the Fintech theme. This company is the largest global insurance broker, and even though they are a financial institution we believe they are resistant to uncertainly in the current financial market. The company will be able to provide stable earnings growth arising from its own unique growth story, supported by the increasing demand for corporate property and casualty insurance as well as risk management advisory services amid increasing risks including climate change, international conflict, and cybercrime.

Investment Outlook

The estimated earnings growth rate for the S&P 500 for financial year 2023 was revised down to 4.8% from 8.1% at the end of the third quarter. We remain vigilant concerning economic risks, and are increasingly focused on the financial year 2023 EPS guidance from fourth quarter earnings results.

We are paying close attention to evidence suggesting that factors influencing the market most in 2022 are gradually stabilizing or may soon reach a turning point. These include decades-high inflation rates, aggressive interest rate hikes by the US Fed, and geopolitical unrest.

Regarding portfolio construction over the short term, we will maintain our rather defensive positioning among growth stocks and will work hard to identify companies with impressive business models that we believe can overcome recent headwinds and perform well over the medium to long term. Despite recent volatility, we believe Digital Transformation, Cybersecurity, and the Transition to a Carbon-Neutral Society remain attractive themes. The pandemic has accelerated many emerging technology trends and has changed working styles as well as consumer behaviour. Beneficiaries will not just include technology companies, but will include any company that more efficiently uses data and new technologies. Maintaining our focus on these long-term trends, we believe there will be some attractive opportunities to increase positions in equities that have experienced losses under the current volatile environment.

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-1.17	4.70	0.86	n/a	14.80
Benchmark	-2.93	1.91	1.27	n/a	11.63
Out/(Under) Performance	-1.76	2.79	-0.41	n/a	3.17

Source BBH; % Returns in USD. Benchmark is the Russell Nomura Small Cap (RNS) Index.
*Since Inception date is 7th February, 2020.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of 0.86% compared with the benchmark return of 1.27% and therefore underperformed the benchmark by 0.41%.

The benchmark (RNS index) rose by 1.3% in the calendar year ending December 2022, during which it recorded performance figures of -2.7% in the first quarter, -0.4% in the second, +2.6% in the third, and +1.9% over the fourth quarter in local currency terms. The RNS index outperformed relative to the TOPIX index, which recorded a decline of 2.5% over the same review period. In the first quarter, the Japanese stock market fell due to the increasingly hawkish statements made by some Federal Reserve officials. Meanwhile, at the same time, investor confidence was dealt a significant blow by Russia's invasion of Ukraine. In the second quarter, there was a major correction in global stock markets; however, due to improved sentiment towards economic reopening in Japan, small-cap stocks remained relatively strong and declined only slightly as they have a relatively high exposure to the domestic market. In the third quarter, small cap stocks advanced following confirmation of the Liberal Democratic Party's landslide victory in the House of Councillors election and the fading prospect of further major rate hikes in the United States. In the fourth quarter, while the stock market retreated following the Bank of Japan's review of its Yield Curve Control (YCC) policy toward the end of the period, the Japanese equity market rallied throughout much of the final quarter as caution about monetary tightening in the United States eased.

Sector allocation had a positive effect on the relative performance for the annual review period. While an overweight position in the Chemicals sector and an underweight position in the Land Transportation sector detracted from the relative performance, it benefitted from underweight positions in the Electric Appliances and Information & Communication sectors.

Stock selection added value to the relative performance. Positive stock selection contributions over the review period came from positions in Totoku Electric in the Nonferrous Metals sector and Fukuoka Financial Group in the Banks sector. Meanwhile, holdings in Tokyo Base in the Retail Trade sector and Sprix in the Services sector had a negative impact on the Sub-Fund's performance. Totoku Electric is a consolidated subsidiary of Furukawa Electric. The announcement that an investment Sub-Fund would offer a takeover bid at about 2.5 times the value of its most recent share price caused the stock price to jump and trade close to the bid price. Meanwhile, Fukuoka Financial Group is a major regional bank, and its stock price rallied sharply after the BOJ's decision to relax its YCC measures by widening the allowable trading range for 10-year government bond yields, which boosted long-term interest rates. Tokyo Base is a retailer headquartered in the country's capital and operates select shops specialized in Japanese brands. The company had been accelerating its new store openings in China, but the stock price declined amid concerns about the negative business impact from China's zero-COVID lockdowns. Sprix operates private tutoring schools mainly in the Kanto region, but its stock price declined as its turnaround from the pandemic underperformed market expectations.

In this review period, we added new portfolio positions in Osaka Soda in the Chemicals sector. The company has several major niche products, and we believe that some of these will drive future earnings growth. These include allyl ethers for electronic components and purification materials for diabetes drugs. On the other hand, we sold the position in T&D Holdings in the Insurance sector for profit taking. The stock price soared after the BOJ's decision to relax its YCC measures boosted long-term interest rates.

Investment Outlook

In 2022, the RNS index appreciated by 1.3%, the RNS Value Index rose 6.3%, and the RNS Growth Index lost 7.0%. The valuation gap between value and growth stocks has narrowed to pre-pandemic levels, but growth stocks are still at a historical high. Our outlook remains unchanged. Though lagging behind other central banks around the world, with the Bank of Japan also moving to modify its easy-money policy, we expect headwinds to continue for growth stocks with high valuations. While value stocks have outperformed growth stocks since 2021, the driver appears to be gradually shifting from large-cap and cyclical value stocks to small-cap defensive value stocks. Our portfolio has a barbell structure in terms of value and growth stocks (i.e. no particular style bias), but we had been gradually increasing the tilt towards value. We will maintain the current tilt. We will continue to base our investment decisions on thorough fundamental analysis to take advantage of such market distortions. At the end of December, the Price to Book Ratio (PBR) of the benchmark RNS Index was 0.93 and the portfolio's PBR was 0.80 (Source: Nomura Asset Management).

We will actively continue to seek out companies whose stock prices are currently judged to be trading below their "intrinsic value". We will select stocks from a wide range of industries, particularly companies that have not received much attention from the market despite their excellent business strategies, companies where management has shown signs of change due to internal reforms, and companies where capital efficiency is expected to improve due to changes in their attitude toward shareholder returns. In the Japanese stock market, we have seen increasing involvement of activist funds. Year by year, traditional asset management companies are engaging more with listed companies, and there is increasing demand to improve capital efficiency. In addition to the corporate governance code, external pressure has led to a gradual rise in the number of small-cap companies that are working to improve corporate governance and investor relations while adopting a more shareholder-friendly management approach. We continue to focus on companies with rich cash flows, and we also emphasise progress in improving the governance of Japanese companies. This includes issues such as the double listing of parent companies and subsidiaries.

While we tend to focus on determining whether it is possible to maintain long-term sustainable growth and a high ROIC (return on invested capital) in order to identify the "intrinsic investment value" of a company, we are also paying attention to whether it is possible to maintain or improve ROE (Return on Equity) through appropriate capital policies. The main points of this analysis are summarised in our assessment of how competitive the company is (i.e., its strengths and weaknesses). In addition to analysing the strengths of business operations, we also place importance on analysing what we call the "vitality" of a company, such as the quality of management leadership and employee awareness. In addition to analysing financial statements, which are the result of management actions, we believe that stable investment performance can be achieved over the long term by conducting careful research and analysis of companies from the viewpoint of management quality.

AMERICAN CENTURY EMERGING MARKETS SUSTAINABLE IMPACT EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	0.09	12.86	-22.71	n/a	-8.38
Benchmark	-1.41	9.70	-20.09	n/a	-1.19
Out/(Under) Performance	1.50	3.16	-2.62	n/a	-7.19

Source BBH; % Returns in USD. Benchmark is the MSCI Emerging Markets (Net) Index. *Since Inception date is 4th March, 2020.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -22.71% compared with the benchmark return of -20.09% and therefore underperformed the benchmark by 2.62%.

The investing environment of the prior year was characterized by soaring inflation and tighter central bank policy from the U.S. Fed and elsewhere, which ignited recession fears in many countries and roiled global assets. Macroeconomic and geopolitical uncertainty also pressured emerging markets stocks as the Russia-Ukraine conflict drove high energy and commodity prices. In China, regulatory pressures and COVID-19-induced restrictions weighed on corporate earnings and snarled supply chains. Investors rotated toward value stocks, which sharply outperformed growth names, and the continuing rise in value was challenging for our investment approach as a growth manager. Both style and factor returns in 2022 were dominated by rising rates, and the sharp rally in the value factor and rise in yields weighed on our relative returns. On a sector basis, materials was the largest relative detractor during the period, driven by our underweight to the sector. Conversely, financials was the largest contributor, owing primarily to a beneficial overweight. The single largest detracting stock was Hapvida Participacoes e Investimentos. The Brazil-based health care firm reported mixed results in 2022, raising concerns about future growth, amid weaker-than-expected top-line growth and higher expenses. Mexico-based bank Gentera was the largest individual contributor. Gentera's earnings returned to pre-pandemic levels in early 2022 and shares later benefited from strong margins and solid operating trends. Given positive recovery trends in Mexico, weakened competition and a large addressable market, we believe Gentera has ample room for margin improvement. From a geographic perspective, holdings in Brazil, China and Taiwan weighed on relative returns. Holdings in Mexico and Hong Kong were the largest contributors.

Investment Outlook

In 2022, interest rate increases and the steepening trajectory of U.S. Fed policy tightening weighed on investor sentiment. Also, China's zero-COVID policy pressured growth and disrupted global supply chains, and the Russia-Ukraine war added to headwinds through higher energy and commodity prices. Each of these weighed heavily on emerging markets (EM) equities.

We believe the asset class appears ready to turn the corner toward recovery as key macroeconomic conditions that pressured EM stocks evolve and headwinds start to dissipate. Growth-oriented policy in China, a weaker U.S. dollar and expectations that Fed tightening has peaked support our positive view on EM stocks.

China's regulatory issues appear to be easing. The relaxation of COVID-19 restrictions and new, pro-growth policies will likely support stronger economic growth in 2023, in our view. Reopening may be bumpy as the virus runs its course, but we expect consumption to become a key driver in 2023 as mobility bounces back. A rebound in Chinese equities, which has already begun due to reopening optimism, is a large driver of the headline EM index upside expected in 2023.

EM economies stand, for the most part, closer to the likely peak in their policy rates cycle compared to developed markets. Furthermore, after a sharp cut to consensus estimates, 2022 could mark a bottom for EM earnings, setting the stage for a recovery in 2023.

In this environment, we have been increasing our exposure to China, which holds a prominent position in the portfolio. We continue to favor stocks that benefit from government policy focus (such as names tied to the green economy and electric vehicles), reopening of the economy and an improving consumer. We believe services activity and consumption will likely rebound, driven by pent-up consumer demand, employment and income growth and increasing consumer and business confidence.

AMERICAN CENTURY ADVANCED MEDICAL IMPACT EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-1.79	6.35	-13.93	n/a	-3.87
Benchmark	-1.26	12.89	-6.63	n/a	6.58
Out/(Under) Performance	-0.53	-6.54	-7.30	n/a	-10.45

Source BBH; % Returns in USD. Benchmark is the MSCI World Health Care Index.
*Since Inception date is 22nd January, 2021.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -13.93% compared with the benchmark return of -6.63% and therefore underperformed the benchmark by 7.30%.

U.S. stocks fell sharply over the past 12 months, with the heaviest losses coming during the first three quarters of 2022. The downturn began amid a combination of factors—the new omicron variant of the coronavirus, rising inflation, the Fed signaling interest rate increases—that led to investors moving to more defensive positioning. The market action was marked by a rotation out of the highest-growth stocks and pandemic winners into either lower growth or more traditional cyclical value stocks. Market declines intensified after Russia invaded Ukraine, exacerbating already stretched supply chains and leading to soaring oil prices that helped drive inflation to four-decade highs. In that environment, health care stocks declined but held up much better than the broader market. The sector benefited from more durable earnings growth and a surge in innovation in 2022, providing a more positive outlook heading into the new year. Within the MSCI World Health Care Index, biotechnology performed best, recording a double-digit advance. Pharmaceuticals and health care providers and services also posted gains. All other industries fell sharply.

Stock selection in the pharmaceuticals industry was the largest detractor from relative performance. Merck & Co. continued to post better-than-anticipated sales and earnings, driven in part by its top-selling drug, Keytruda, which treats a range of cancers. Our lack of exposure detracted from performance compared with the benchmark. We had an underweight allocation to Eli Lilly & Co., which hampered relative performance. The pharmaceutical company benefited from Biogen's positive trial news for its Alzheimer's treatment. We are underweight the pharmaceuticals industry, where we typically don't find the kind of innovation we seek. Pharmaceuticals outperformed during a period that investors sought more defensive, value-oriented holdings. Stock choices among health care technology companies also weighed on performance, largely driven by holdings that had surged during the height of the pandemic, such as Health Catalyst and Veeva Systems, but were out of favor as value outperformed.

The health care equipment and supplies industry benefited relative performance as we did not own several laggards, such as Align Technology and Medtronic. Top contributors included Bristol-Myers Squibb, one of our largest positions. This research-driven biopharmaceutical company benefited from the FDA approval of its psoriasis drug. We consider it the company's most important near-term drug in development, which has advantages over competing drugs in that it has fewer side effects and greater efficacy over time. Regeneron Pharmaceuticals reported better-than-expected revenue and earnings and announced strong trial results for Eylea, its drug for wet age-related macular degeneration. Regeneron recently released positive phase 1/2 clinical trial data for particularly hard-to-treat prostate cancer.

Investment Outlook

Our process uses fundamental analysis aimed at identifying growing, innovative health care companies producing attractive, sustainable earnings growth. They also demonstrate corporate behaviors consistent with U.N. Sustainable Development Goal 3 - Ensure Healthy Lives and Promote Well-Being for All at All Ages.

The portfolio is aligned with social impact themes. In addition to deep fundamental research, ESG risk analysis is incorporated into the investment decision-making process. Our objective is to create a portfolio of stocks that are attractive on fundamental measures and also align with one of four social-impact themes.

- 1. New or innovative treatments for diseases as well as mental and neurological disorders.
- 2. Improved access to medicines and health care services in developed and emerging markets.
- 3. New solutions that lead to lowering the cost of health care.
- 4. More productive and efficient equipment, services and software used for research, diagnostic testing, environmental monitoring and development of new therapies.

AMERICAN CENTURY ADVANCED MEDICAL IMPACT EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

Health care innovation and opportunity. The health care sector is subject to the same macroeconomic conditions and volatility affecting the broader market. However, our analysis shows that health care companies have produced more durable earnings growth than the broader market going back to the 2008-2009 Great Financial Crisis. In addition, innovation and drug approvals are running at all-time highs. Tremendous progress on genetic therapies in recent years means we have the chance to treat or prevent some of mankind's most intractable diseases. Indeed, in the third quarter of 2022 alone, we received positive news on breakthrough treatments for diabetes, obesity and Alzheimer's disease. We think these characteristics make the sector attractive in today's uncertain economic environment.

Industry allocations reflect opportunities. The portfolio was overweight health care equipment and supplies stocks. Along with health care technology companies, we see these stocks as central to the innovation and research that is driving progress in the sector. We were also overweight biotechnology, which we believe is at the intersection of several powerful, positive secular trends and is positioned to do well financially, while addressing some of humanity's most intractable diseases. The portfolio is underrepresented in shares of pharmaceuticals, life sciences tools and services and health care providers and services companies. Many of these companies tend to lack the innovation-led fundamentals we seek.

AMERICAN CENTURY US FOCUSED INNOVATION EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*

Benchmark	-8.15	0.54	-32.08	n/a	-24.30
Out/(Under) Performance	3.23	-4.66	-4.11	n/a	-12.53

Source BBH; % Returns in USD. Benchmark is the MSCI USA Growth Index.
*Since Inception date is 30th June, 2021.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund returned -36.19% compared with the benchmark return of -32.08% and therefore underperformed the benchmark by 4.11%.

U.S. stocks fell sharply over the past 12 months, with the heaviest losses during the first three quarters of 2022. The downturn began amid a combination of factors—the new omicron variant of the coronavirus, rising inflation, the Fed signaling interest rate increases—that led to investors moving to more defensive positioning. The market action was marked by a rotation out of the highest-growth stocks and pandemic winners into either lower growth or more traditional value stocks. Market declines intensified after Russia invaded Ukraine, exacerbating already stretched supply chains and leading to soaring oil prices that helped drive inflation to four-decade highs. Value stocks outperformed growth stocks by a wide margin as investors sought the relative safety of more stable, dividend-paying companies. In this environment, the portfolio underperformed its benchmark.

Stock selection in the information technology sector helped drive underperformance as stocks that outperformed during the height of the pandemic were shunned by investors looking for more defensive holdings.

Cloud security firm Okta fell even though it reported strong revenue growth, margins and full-year guidance. Okta's stock took a beating as pandemic-driven enterprise digital transformation has slowed. The stock fell further on news of management turnover and issues integrating a new acquisition into its organization. Stock of Bill.com Holdings, a provider of cloud-based back-office software for small and midsize companies, fell along with other high-growth shares as investors positioned more defensively. Bill.com announced fee increases, and we believe it is well positioned to capitalize on growth in business-to-business payments. The digital signature company DocuSign is a key part of the ongoing enterprise digital transformation. The stock soared during the height of the pandemic but has fallen sharply as the work-from-home environment has waned and investors shifted away from high-growth stocks. Other key detractors included Tesla. The electric vehicle maker's stock fell on concerns about softening demand. In addition, investors want to see a resolution to Elon Musk's management of Twitter and a focus on Tesla's business. We continue to believe the company has a deep management bench and are optimistic about Tesla's long-term fundamentals.

The health care sector led positive contributors. Health care stocks outperformed during the year, benefiting from more durable earnings growth and a surge in innovation in 2022. Regeneron Pharmaceuticals reported better-than-expected revenue and earnings and announced strong trial results for Eylea, its drug for wet age-related macular degeneration. Regeneron also released positive phase 1/2 clinical trial data for particularly hard-to-treat prostate cancer. The stock of biotechnology company Alnylam Pharmaceuticals surged following positive late-stage trial results for its drug to treat a rare heart condition. The stock got a further boost when a competitor ran into complications in its trial for a drug meant to compete with Alnylam's Onpattro. Other top contributors included Westinghouse Air Brake Technologies. The stock of the transportation company outperformed, aided by the strong results of its freight rail segment. Westinghouse Air Brake makes products for locomotives, freight cars and other transit vehicles, addressing safety improvement in mass transit markets across many geographies. The stock of Constellation Brands, an innovative beer, wine and spirits beverage company, outperformed, aided by investors' shift to stocks likely to hold up better in a slowing economy. Constellation reported quarterly revenue and earnings that beat expectations, driven by strength in its portfolio of beer brands.

Investment Outlook

When we look at the world, we believe innovation, technology and the demand for greater efficiency and convenience are transforming our lives in meaningful, positive ways. And for that reason, when we see these sorts of massive growth sell-offs, we view these downdrafts as opportunities to buy incredibly innovative companies cheaply. As a result, we view this as a chance to upgrade our portfolios and reallocate capital to more attractive opportunities or names we may have missed.

AMERICAN CENTURY US FOCUSED INNOVATION EQUITY FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

Worries about inflation and the economy are driving market action. Stocks endured a difficult year, as rising inflation and interest rates led to fears of a looming recession. In that environment, value stocks held up much better than growth, as investors favored more defensive shares. We think corporate earnings growth will be required to help lay the groundwork for an eventual recovery. However, earnings growth forecasts for 2023 and beyond are coming down. As a result, we think it's reasonable to expect more volatility ahead. It's important to note that, at times like these, we don't capitulate or change our approach. Instead, we double down on our fundamental research, risk controls and diversification.

We maintain a long-term perspective. We seek high-quality companies with healthy balance sheets—that's precisely the opposite of companies that performed well late in 2021 and throughout 2022. But we're not investing for a horizon of a few days, months or even quarters—our horizon is many years long. We are trying to outperform across the full market cycle. We buy dynamic, innovative growth companies with healthy balance sheets and cash flows, so they can grow and improve throughout the cycle as opportunities present themselves.

Performance Commentary

For the year ended 31st December, 2022, the Sub-Fund recorded a return of -18.01%, while the Index recorded a return of -2.45% therefore the Sub-Fund outperformed the index by 15.56%.

The Japanese equity market was weak throughout much of the review period from January to June. Since January, oil prices have risen in response to the Russian invasion of Ukraine and broader consumer prices have continued to rise amid continuing supply-side constraints. The US Federal Reserve began tightening monetary policy, and market interest rates have also risen sharply. The depreciation of the yen has helped to support share prices, but repeated lockdowns in China since March, due to pandemic control and China's zero-COVID policy, and concerns over an economic slowdown in Western countries have contributed to the market decline in Japan over this review period.

Over the sixth month review period ending in June 2022, Komatsu made the largest positive contribution to performance. Its share price rose on expectations of a recovery in demand from mining customers due to rising resource prices. The second largest positive contribution came from Hitachi. Its stock price advanced in response to the announcement of a share repurchase program and a medium-term management plan. The company will seek growth mainly through digital and environmental solutions.

The decline in growth stocks due to the rise in global interest rates was the main factor that detracted from the stock selection results and especially those holdings that performed most poorly over the six-month review period, but we also saw strengths and weaknesses due to some individual factors. Nidec Corp. made the largest negative contribution to performance. Its stock price fell due to concerns over disruption to automobile output in Europe, lockdowns in China, and soaring raw material prices. Recruit Holdings had the second largest negative impact on the performance. Its share prices fell due to concerns over slowing growth in its Human Resource (HR) technology business and a worsening labor market caused by monetary tightening policies.

In terms of transactions, over the same review period, the Sub-Fund not only rebalanced but also incorporated new portfolio companies and liquidated some positions.

We added a new position in Renesas Electronics. The company is involved in the manufacture and sale of analog semiconductors. From the standpoint of industry digitalization, it has made particular contributions to SDG No. 9, "Industry, Innovation and Infrastructure". We have determined that it will be able to maintain a high cash flow return on invested capital (CFROIC) in the medium term.

Meanwhile, we also added a new position in Toyota Tsusho, which we judged would be able to maintain a high CFROIC in the medium term. The company operates businesses in Africa, renewable energy businesses, and automotive electronics-related businesses. Among others, they have made particular contributions to SDG No. 8, "Decent work and economic growth," as well as SDG No. 13, "Climate action."

Finally, we also introduced Sompo Holdings into the portfolio. This insurance business is involved with disaster coverage and mitigation. The company has made a social contribution to mitigating losses in the non-life insurance business as well as through SDG No. 13, "Climate action." We believe the company will be able to maintain a high return on equity over the medium term.

In terms of major sales transactions, the Sub-Fund liquidated its position in Kao given the continued deterioration in its business performance resulting from intensifying competition in Japan as well as changes in the consumer environment. The outlook for its CFROIC was lowered because of difficulties in passing on price increases to customers, and we determined that the company would have difficulty maintaining its current high level of CFROIC in the future.

The Sub-Fund also closed out its position in Ryohin Keikaku. While opening locations in Japan, sales at existing stores continued to be sluggish. Meanwhile, the CFROIC outlook was lowered, as the company faces difficulties in passing cost increases on to customers. The company has also lagged behind its peers in terms of ESG initiatives.

NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY GROWTH FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Performance Commentary (continued)

In the third quarter, equity markets retreated along with growing fears of an economic recession in the US. Market buying trends tended to favour defensive stocks over cyclical stocks; overall, defensive sectors advanced and cyclical sectors fell.

For the third quarter review period, there were positive stock selection contributions from HOYA and Hamamatsu Photonics K.K. HOYA's share price was falling until the end of the second quarter due to the global rise in interest rates, but the stock later rallied due to strong earnings. The announcement of share buybacks buoyed the performance, as did the stock's inclusion into the Nikkei Average. The stock price of Hamamatsu Photonics K.K. has also been falling until the end of the second quarter due to the global interest rate hikes, but the stock rebounded amid apparent bargain hunting on the back of solid earnings. Meanwhile, negative contributions to the portfolio's relative performance came from Komatsu and Sony Group. Komatsu's stock price fell along with concerns about slowing demand from mining customers due to falling resource prices. Sony Group's share price fell on concerns of slowing growth in its videogame business, rising development costs, and intensifying competition.

In terms of investment activities, the Sub-Fund established a new position in Fuyo General Lease. Among others, they have made particular contributions to SDG No. 8, "Decent work and economic growth," and SDG No. 7, "Affordable and clean energy" through not only their existing leasing business, but also through business process outsourcing, as well as expanding operations in areas with a relatively high return on assets, such as the renewable energy business. We believe the company will be able to maintain a high ROE over the medium term. In addition, we trimmed the position in Komatsu amid concerns about a decline in demand from mining equipment customers due to falling resource prices. The Sub-Fund did not liquidate any positions in the third quarter.

In the fourth quarter, equity markets staged a recovery and advanced on expectations of an eventual peak in US interest rates. However, there was a sell off among blue-chip stocks after the Bank of Japan revised its monetary policy settings in December.

For the fourth quarter review period, positive stock selection contributions to the relative performance came from Shin-Etsu Chemical and Nitori Holdings. Shin-Etsu Chemical's stock price was supported by signs that hitherto rising US long-term interest rates were beginning to stabilize. This alleviated concerns about its vinyl chloride business, which mainly supplies the residential construction industry in the US. Nitori Holdings' stock price rose on hopes that the stabilization of the yen would improve performance. Meanwhile, the absence of banking sector positions as well as the Daikin Industries holding had a negative impact on the portfolio's relative performance. Banks rose on expectations of improved earnings due to the Bank of Japan's policy shift to relax its Yield Curve Control measures by widening the allowable trading range for 10-year government bond yields. Daikin's stock price fell due to concerns about demand from deteriorating real estate markets in the US and China.

In terms of investment activities, the Sub-Fund opened a position in Internet Initiative Japan. By taking charge of IT infrastructure such as internet and web security, the company is contributing to SDG No. 9, "Industry, Innovation and Infrastructure". We have determined that it will be able to maintain a high cash flow return on invested capital (CFROIC). Meanwhile, we trimmed the position in Hitachi. Although there is no change in our outlook for a continued high level of CFROIC, the stock price has been relatively firm. The Sub-Fund did not liquidate any positions in the third quarter.

Investment Outlook

We expect the TOPIX to fluctuate in a range between 1,670-2,090 points over the next quarter.

With inflation remaining high, monetary policy in Europe and the United States has tightened further. Until official data can confirm that inflation has subsided, we are unlikely to see a policy shift toward monetary easing. Therefore, the global economy is expected to face a difficult period in the short term and we expect to see concerns about the extent of this slowdown. On the other hand, supply and demand dynamics are expected to normalize over the medium term as a result of falling demand levels and the elimination of supply constraints. The global economy is then expected to move towards a recovery path as the inflation rate settles. With stock market valuations below their historical averages, we believe there is room for revision given the medium-term outlook, although the extent of the near-term slowdown is uncertain.

Corporate performance and valuation

Operating profit forecasts for the Russell Nomura Large Cap Index (excluding financial institutions) suggest an increase of 11.8% in the financial year to March 2023. The assumed exchange rate is JPY137/US dollar and JPY136.8/Euro. The TOPIX EPS based on a top-down forecast is 144.23 points. At a TOPIX level of 1,900 points, the expected P/E ratio is 13.2 with an actual PBR for the financial year to March 2022 of 1.22.

NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY GROWTH FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

Investment strategy

We believe it is necessary to identify changes in social structure over the medium term, such as in terms of public health awareness and work style shifts brought about by the pandemic, changes in energy security due to rising geopolitical risk, and changes in environmental policies in Japan, the United States and elsewhere. It will also be necessary to review the profitability outlook for the groups of stocks in which we invest.

Recently, price increases have been due partly to higher raw material costs, constraints on energy supplies to Europe due to the sanctions against Russia and higher credit costs due to global monetary tightening. In these conditions, we believe the market will test companies' ability to respond to changes in the environment and their ability to execute their business strategies, such as passing on cost increases to product prices, increasing the in-house production share of key components, and holding sufficient inventories. As part of our investment strategy, we will continue to monitor carefully the ability of companies with long-term, stable growth to execute business while responding to changes in the business environment.

Although the global economy is expected to slow down, the portfolio's holdings have strong business execution capabilities, and we believe stable profit growth in the future could lead to steady investment returns. In addition, in light of the recent shift in focus towards ESG themes, it has become increasingly important to expand business initiatives based on the social value of products and services. We believe the portfolio is comprised of highly attractive investments. We will continue to focus on improving returns in the medium term by appropriately rebalancing (adjusting the investment weightings) in reference to short-term stock price overreactions. Meanwhile, we will assess the degree of corporate social value created in the medium to long term and the levels of CFROIC that can be realized in the future.

NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY CORE FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-5.61	3.57	n/a	n/a	-2.14
Benchmark	-4.57	3.26	n/a	n/a	-2.36
Out/(Under) Performance	-1.04	0.31	n/a	n/a	0.22

Source BBH; % Returns in USD. Benchmark is the TOPIX Index. *Since Inception date is 30th March, 2022.

Performance Commentary

For the period ended 31st December, 2022, the Sub-Fund recorded a return of -2.14%, while the Index recorded a return of -2.36% therefore outperforming the benchmark by 0.22%.

The Japanese stock market has been in a difficult period since the Sub-Fund's inception and through the review period ending December 2022. As consumer price inflation accelerated, monetary policy in Europe and the United States shifted towards tighter settings, in turn raising fears of a global economic slowdown. The financial sector performed remarkably well at the end of the year due the global rise in interest rates and the effect on lending margins. Their performance was also boosted by the Bank of Japan's monetary policy adjustments. The performance of economically sensitive growth and blue chip stocks was weak, especially given the more risk-averse stock market environment and fears of an economic slowdown.

Daiichi Sankyo made the greatest positive contribution to the relative performance of the Sub-Fund since inception. It outperformed given its more defensive characteristics and lower sensitivity to the external economic environment. The company announced favorable trial results for breast cancer drugs under development at recent academic conferences, which helped to raise the company's medium-term growth expectations. The second largest positive contribution to the portfolio performance came from the absence of a position in Tokyo Electron. The company experienced a significant drop in its share price due to concerns about a slowdown in semiconductor capital investment.

Meanwhile, since the Sub-Fund's inception, the position in Taiyo Yuden has detracted most from the relative performance. It underperformed due to concerns about a decline in earnings caused by slowing demand for smartphones and PCs. The second largest negative effect came from the position in Aisin. This stock underperformed due to concerns about lower automobile production forecasts and deteriorating business conditions in the Chinese automobile market.

In terms of investment activity since inception, the Sub-Fund established new positions in twelve stocks and exited positions in fifteen.

Recruit Holdings was the largest purchase. We regard the Indeed online jobs listing business as extremely competitive, while there is also considerable potential for expansion in the HR technology area given the favorable medium term business environment in North America. The company's share price has adjusted significantly due to concerns about an economic slowdown, and the Sub-Fund added to the position after determining that the stock had become undervalued relative to its medium-term growth potential. Santen Pharmaceutical ranked second. We determined that under its new management team the company has a lot of room to improve earnings as it restructures its unprofitable overseas operations.

Toyota Motor Corp was the largest sales transaction, as we liquidated the position. The decision was made in order to reshuffle positions within the Automobile sector and was based on the fact that the Toyota's raw materials cost burden was heavier than that of auto component producers, excluding the impact of foreign currency effects. The Sub-Fund also exited the position in Tokai Carbon. Amid soaring production costs, there were concerns that the company's earnings outlook for the financial year ending December 2023 would fall short of market expectations due to slowing demand.

Investment Outlook

With inflation remaining high, central banks in Europe and the United States tightened monetary policy further. Until inflation is confirmed to have subsided, monetary policy is unlikely to shift towards easing. Therefore, the global economy is expected to face a difficult period in the short term and we expect to notice concerns about the extent of the slowdown. On the other hand, supply and demand dynamics are expected to normalize over the medium term as a result of falling demand levels and the elimination of supply constraints, and the global economy is expected to move towards recovery as the inflation rate settles. With stock market valuations below historical averages, we believe there is room for revision given the medium-term outlook, although the extent of the near-term slowdown is uncertain.

NOMURA FUNDS IRELAND – JAPAN SUSTAINABLE EQUITY CORE FUND INVESTMENT MANAGER'S REPORT (CONTINUED) For the year ended 31st December, 2022

Investment Outlook (continued)

We believe companies with business operations that can contribute to achieving a sustainable society are also able to improve enterprise value over the long term. We carefully select these companies based on the expectation that their progressive ESG policies are aligned with our commitment to helping build a sustainable society while delivering superior returns to our clients.

From that perspective, we are investing in companies that help mitigate climate change, mitigate natural capital depletion, and promote good health and well-being. Among companies that can be expected to contribute, we are focusing our efforts on identifying those which have high medium- to long-term growth potential and are competitive, as well as companies that offer opportunities for re-evaluation, such as those that are expected to undergo structural changes. We are also focusing on companies that are relatively undervalued compared to their corporate fundamentals.

At present, we are paying attention to blue-chip companies whose stock prices have fallen sharply, companies that have been less affected by changes in the external economic environment, companies that are expected to benefit from structural reforms such as reductions in fixed costs, and companies whose business performance is expected to recover due to the normalization of automobile production. In addition, as the trend toward carbon neutrality intensifies, the Sub-Fund will focus on companies that will benefit from environmental changes as well as companies that can expect to reform their business portfolios.

Investment Performance

	1 Month	3 Month	1 Year	3 Year	Since Inception*
Sub-Fund	-1.18	12.39	n/a	n/a	-14.08
Benchmark	-0.49	12.10	n/a	n/a	-12.50
Out/(Under) Performance	-0.69	0.29	n/a	n/a	-1.58

Source BBH; % Returns in USD. Benchmark is the MSCI All Country Asia Pacific Ex-Japan Index.
*Since Inception date is 31st March, 2022.

Performance Commentary

For the period ended 31st December, 2022, the Sub-Fund posted a return of -14.08% against the benchmark return of -12.50%, therefore underperforming the benchmark by 1.58%.

For country/asset allocation, the underweight position in China and Taiwan, the overweight position in Hong Kong and the cash position added value to relative performance over the period while the underweight position in Australia detracted value.

As for stock selection, in Australia, the underweight position in material stocks such as BHP detracted value as the material stocks outperformed on the expectation for demand recovery after lifting zero-COVID policy by the Chinese government. In China, the overweight position in ENN Energy Holdings was main dragger as its gas distribution business suffer from natural gas price hike. EV brand stocks such as Li Auto and Xpeng underperformed on the back of rising competition in Chinese market. In Indonesia, the overweight position in Bank Jago detracted the performance due to concern for risking delinquency ratio.

In Singapore, Sembcorp Industries outperformed as the firm announced spin-off the coal fire business in India. DBS Group was also positively contributed back by improvement in net interest margins. In Taiwan, the overweight position in Delta Electronics added value as its EV components business observed high sales growth.

Investment Outlook

Calendar year 2023 seems to be shaping up as one with several contradictions. The global investment environment is likely to present even more challenges than in the previous years, which themselves offered no shortage of excitement in the form of volatility, uncertainty, complexity, and ambiguity (VUCA). The Federal Reserve shows no sign of backing off from its fight against inflation, and while headline numbers have cooled off, labour market strength is the key to interest rates remaining higher. While the interest rates hikes have been frequent and steep, the transmission time for a significant impact on the economy seems unusually long. So, while a recession now looks imminent, it seems unlikely to be confirmed until the second half of the year, implying that interest rates could remain higher for the time being even as money markets have already signalled otherwise. Profit forecasts for the US corporate sector are also looking south, with prospects for the developed world looking gloomier even as the emerging market world put its hand up for the year. China comprises an overwhelming share of the Emerging Markets/Asia, and it has just made a massive U-turn on its COVID policies. Reopening could mean relatively more cheerful prospects for the Asian economies, even while fighting the global recessionary headwinds. In summary, we are looking at a challenging global environment to start the year with, eventually leading to some optimism from a peak in interest rates, possibly followed by rate cuts later in the year, and a very promising set up for the Asian markets.

A change in the calendar is not always expected to mark a sea-change in the investment environment. However, this time it seems the seeds had already been planted to an extent towards the end of the year by the drastic turn in China's COVID policies.

Investment Outlook (continued)

China has dominated the news agenda over the last month or so, and the New Year has definitely forced investors to do a U-turn in expectations with respect to the economic prospects for China. After many false starts on reopening, the authorities seemed to have taken a herd immunity approach and released almost all restrictions on the population. This might have been forced on the authorities by socio-economic factors, including large-scale unemployment and an all-time low in consumer sentiment. Therefore, growth seems to have taken over as the mantra, with the U-turn also encompassing a back-stop for the property sector and deregulation of the new economy. Common Prosperity, which was the overarching theme last year, seems to have been relegated for the time being. Reopening has happened much faster and more broadly than expected, and that would mean big upgrades across every aspect of the economy, ultimately boiling down to earnings growth coming back strongly over time. However, we cannot extrapolate this positive scenario very far since many structural issues remain unresolved; those of debt and demography can only be accentuated. Macroeconomic and corporate numbers will see the impact only from the second quarter and with a sharp rise in stock prices, paper supply is expected to be substantial. On the other hand, markets conditions have been disastrous over the last two years and even with limited earnings growth prospects, valuations are very cheap. Unlike most other markets, Chinese stocks have sunk to barely half of their post COVID peak levels, even after a sharp 50% rebound over the last two months. China is known for large equity market moves, and this could be one big positive move, the risks notwithstanding. We had removed the risk of being underweight China in November given that pessimism was at its peak and we will now take the big step of moving to an overweight exposure with consumption being the biggest thematic position in our view given the excess savings and long period of pent up consumer demand for the Chinese. The playbook is not too dissimilar for other countries. Hong Kong is an obvious beneficiary from the reopening and for all the similar reasons. We eased the underweight position here and we will review the remaining underweight position as we gain confidence on the economic trajectory.

The two other large North Asian markets of Korea and Taiwan are far more exposed to global growth, or rather the lack thereof. The technology sector is fundamentally still very weak, facing demand cuts first from the smartphone and PC markets, then from the server and enterprise markets, and now from data centres and hyper-scalers. Despite the capital spending discipline and consolidation, earnings downgrades are yet to come to an end and shareholder friendly policies can only help so much. In addition Taiwan also has geopolitical concerns to contend with. As such, South Korean markets are preferred over Taiwan, but for now, we will retain the big underweight positions in both markets.

The large move in the country exposure in favour of China warranted significant funding from other markets, especially as every other market is a much smaller index weighting. Fundamentally, however, there is nothing wrong with most of the regional economies; they have been recovering well, they have been resilient with respect to the external shocks, and they are also beneficiaries of China's reopening. Inbound tourism from the latter has also been a big factor. Singapore held up very well for most of last year, supported more by the restructuring opportunities in the government-linked companies (GLCs) and the ample liquidity ensuring a strong currency. Upside catalysts are few and far between though, so we have reduced the long standing large overweight position to a much smaller one now. Similarly, for Indonesia, the economy is stable and the external finances have been a revelation, but foreign investors have chosen to take profits from the stellar performance over the last year. For the time being, we see no major catalysts for the market, although valuations have become attractive. We had already reduced the overweight position earlier and for the time being we will maintain this exposure. India also falls into a similar category as a funding source. To some extent, it has been a hiding place for many investors as the market provides both quality and secular growth, though at the cost of stretched valuations. Foreign investors have been selling down this market almost throughout last year, but stocks have continued to find support from strong domestic fund flows and high confidence. Notwithstanding all the foreign selling, the country is still a large overweight for most portfolios. It could therefore become a funding source too in the absence of fresh inflows into Asia. While we continue to like India's corporate story, especially the bottom-up opportunities among individual stocks, we believe that better entry opportunities could arise sooner rather than later. For the time being, we will shift some allocation towards China. The India exposure will remain overweight though. Market moves tend to be large, especially in China, and while the situation looks somewhat clearer than before, the markets are not out of the woods yet. Therefore, high equity market volatility is likely to persist.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Nomura Funds Ireland Plc ('the Company') for the year ended 31 December 2022, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows, Statements of Investments and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards ('IFRS') as adopted by the European Union.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2022 and of its loss for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC (CONT'D)

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to disclosures of directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOMURA FUNDS IRELAND PLC (CONT'D)

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 29, the directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditor's report.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

The accompanying notes on pages 148 to 388 form an integral part of these financial statements.

 ⁸ The Japan Sustainable Equity Core Fund was launched on 30th March, 2022.
 9 The Asia Sustainable Equity Fund was launched on 31st March, 2022.
 * The Fund Totals as at 31st December, 2022 and 31st December, 2021, have been adjusted to account for balances in the name of the Fund.

1. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below.

Basis of preparation of financial statements

The financial statements of Nomura Funds Ireland Plc (the "Fund") have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union and Irish statute comprising the Companies Act 2014, the requirements of the Central Bank UCITS Regulations and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (as amended) (the "UCITS Regulations") and any regulations made thereafter.

The financial statements are prepared under the historical cost convention, as modified to include investments at valuation. Valuation time is 3pm (Irish time) on a Dealing Day or such other time or times in such place as the Directors may from time to time determine and notify to shareholders in relation to any Sub-Fund with the approval of Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator").

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Fund's accounting policies. Uncertainty about these estimates and assumptions could result in outcomes that might require a material adjustment to the carrying amount of the asset or liability affected in future periods. Certain reclassifications have been made to previously reported amounts to conform to current year presentation, which had no impact on reported net assets.

Going concern

The Fund's management has made an assessment of the Fund's ability to continue as a going concern and is satisfied that the Fund has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Fund's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded. The Fund establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment's domicile. As the Fund assesses the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognised.

Standards, amendments and interpretations effective for annual period beginning on 1st January, 2022

There are no new standards, amendments to existing standards and interpretations that are effective for the first time for the annual period beginning on 1st January, 2022 that have a material effect of the financial statements of the Fund.

Accounting standards in issue that are not yet effective and have not been early adopted

There are no new standards not yet effective which will have a material impact on the Fund.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2022

1. Summary of significant accounting policies (continued)

Financial assets and financial liabilities at fair value through profit or loss

(a) Classification

The Fund has assessed the classification of financial instruments as at the date of initial application and has applied such classification retrospectively. Based on that assessment:

- All financial assets previously held at fair value continue to be measured at fair value.
- Debt instruments and equity instruments, are acquired for the purpose of generating short-term profit. Therefore, they meet the hold-for-trading criteria and are required to be measured at fair value through profit or loss.
- Financial assets previously classified as receivables are held to collect contractual cash flows and give rise to cash flows representing solely payments of principal and interest. Thus, such instruments continue to be measured at amortised cost under IFRS 9.
- The classification of financial liabilities under IFRS 9 remains broadly the same as under IAS39.

Impairment

IFRS 9 requires the Fund to record expected credit losses ("ECLs") on all of its debt securities, loans, trade receivables, either on a 12- month or lifetime basis. Given the limited exposure of the fund to credit risk, this amendment has not had a material impact on the financial statements. The Fund only holds trade receivables with no financing component and that have maturities of less than 12 months at amortised cost. Therefore, it has adopted an approach similar to the simplified approach to ECLs.

Hedge accounting

The Fund has not applied hedge accounting under IAS 39 nor will it apply hedge accounting under IFRS 9.

(b) Recognition/Derecognition

The Fund recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Purchases and sales of financial assets at fair value through profit or loss are recognised on trade date – the date on which the Fund commits to purchase or sell the financial instrument.

A financial asset (or, where applicable, part of a financial asset or a part of a group of similar financial assets) is derecognised where the rights to receive cash flows from the asset have expired, or the Fund has transferred its rights to receive cash flow from the asset, or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement and either:

(a) the Fund has transferred substantially all of the risks and rewards of the asset.

Or

(b) the Fund has neither transferred nor retained substantially all the risk and rewards of the asset, but has transferred control of the asset.

When the Fund has transferred its right to receive cash flows from an asset (or has entered into a pass-through arrangement), and has neither transferred nor retained substantially all of the risk and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Fund's continuing involvement in the asset. In that case, the fund also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the fund has retained.

The Fund derecognises a financial liability when the obligation under the liability is discharged, cancelled or expired.

1. Summary of significant accounting policies (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

(b) Recognition/Derecognition (continued)

Realised fair value gains and losses on disposals of financial instruments are calculated using the average cost method for the Nomura Funds Ireland - India Equity Fund and the first in, first out method for the Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland -Diversified Growth Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Select US High Yield Bond Fund, the Nomura Funds Ireland - European High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund and the Nomura Funds Ireland - Asia Sustainable Equity Fund.

(c) Measurement

Financial assets and financial liabilities at fair value through profit or loss are recorded in the Statement of Financial Position at fair value. The main impact on measurement from the classification of liabilities under IFRS 9 relates to the element of gains and losses for financial liabilities designated as at fair value through profit or loss attributable to changes in credit risk. IFRS 9 requires that such element be recognised in other comprehensive income, unless this treatment creates or enlarged an accounting mismatch in profit or loss, in which case, all gains and losses on that liability (including the effects of changes in credit risk) should be presented in profit or loss. The Fund has not designated any financial liabilities at fair value through profit or loss. Therefore, this requirement has not had an impact on the Fund.

Transaction costs are expensed in the Statement of Comprehensive Income. Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers and brokers. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value (see Note d).

Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within operating income when the Fund's right to receive payments is established.

(d) Determination of fair value

Fair value is the amount for which an asset could be exchanged or a liability settled, between knowledgeable willing parties in an arm's length transaction. The fair value of financial instruments traded in active markets (such as trading securities) is based on quoted market prices at 3pm (Irish time) on the relevant dealing day. For the purpose of these financial statements, the quoted market price used is the quoted market prices at 3pm (Irish time) on the relevant dealing day. The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Sub-Funds use a variety of methods and make assumptions that are based on market conditions existing at each statement of financial position date.

Units or shares in collective investment schemes are valued at the bid quotation or if unavailable the latest available Net Asset Value or, if listed or traded on a regulated market, at the latest quoted trade price or the mid quotation or, if unavailable or unrepresentative, the latest available Net Asset Value as deemed relevant to the collective investment scheme.

Financial assets and financial liabilities at fair value through profit or loss (continued)

Foreign currency translation

Functional and presentation currency

The functional and presentation currency of the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland -Fundamental Index Global Equity Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland -Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Diversified Growth Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Select US High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Concentrated Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund and the Nomura Funds Ireland - Asia Sustainable Equity Fund is US Dollar. The functional and presentation currency of the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and the Nomura Funds Ireland - Japan Sustainable Equity Core Fund is Japanese Yen. The functional and presentation currency of the Nomura Funds Ireland - European High Yield Bond Fund is Euro. The presentation currency of the aggregated financial statements is US Dollar.

Transactions and balances

Assets and liabilities denominated in currencies other than the functional currency of the Sub-Fund are translated into the functional currency at the exchange rates ruling at the statement of financial position date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the year. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions.

Futures contracts

Upon entering into a futures contract, a Sub-Fund is required to deposit with its futures broker, an amount of cash in accordance with the initial margin requirements of the broker or exchange. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. The Sub-Fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract ("variation margin").

For open futures, changes in the value of the contract are recognised as unrealised gains or losses by "marking-to-market" the value of the contract at the statement of financial position date. When the contract is closed, the difference between the proceeds (or cost) of the closing transactions and the original transaction is recorded as a realised gain or loss in the Statement of Comprehensive Income.

Forward foreign currency contracts

All forward foreign currency contract commitments are marked to market at the applicable translation rates and any resulting unrealised gains or losses are recorded in the Statement of Comprehensive Income. The Sub-Fund records realised gains or losses upon closing of the forward foreign currency contracts. Where the Sub-Fund enters into forward foreign currency contracts as a way of managing foreign exchange risk for specific unit classes, gains and losses from these contracts are allocated solely to the corresponding unit classes. Purchases and sales of forward foreign currency contracts having the same notional value, settlement date and counterparty are generally offset and any realised gains or losses are recognised on settlement date. Forward foreign currency contracts may result in credit exposure to the counterparty.

1. Summary of significant accounting policies (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

Swaps

Swap agreements are privately negotiated agreements between a Sub-Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies, market-linked returns or other identified amounts at specified future intervals. In connection with these agreements, securities or cash may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Swaps are marked-to-market daily based upon quotations received from counterparties or valued using a pricing service and in other cases based upon calculations using valuation models.

The significant assumptions and the formula behind the calculations used in the valuation models are defined explicitly in the individual term sheets. Generally, the total returns are determined by the daily index level or daily price multiplied by a predetermined notional amount and the financing portion is built-in to create an all-in valuation.

Changes in valuations, if any, are recorded as unrealised gains or losses. Payments received or made are recorded as realised gains or losses.

Credit Default Swaps

A credit default swap is a bilateral financial contract under which the protection buyer pays a fee, usually expressed in basis points per annum on the notional amount, in return for a payment by the protection seller contingent on the occurrence of a credit event, such as a bankruptcy, default, or restructuring, with respect to a referenced entity. The credit events and applicable settlement mechanism used to determine the contingent payment are negotiated between the counterparties at the time of trading. Once the credit event has been declared, the protection buyer has the right to settle the contract. Settlement is usually physical, with the protection buyer having the right to deliver bonds of the reference entity up to the notional amount of the contract. In return, the protection buyer receives the par value of those obligations. Selling protection is the synthetic equivalent of buying a bond or alternative form of debt. Buying protection is the equivalent of synthetically shorting or hedging a bond or other credit exposure.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the reference entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices change periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Sub-Fund may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which may be less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

The use of credit default swap contracts is restricted to the extent that the benefits to the Sub-Fund mirror that which could be obtained by direct investment in the underlying instruments and that the swaps do not expose the Sub-Fund to risks which it would not otherwise assume (other than the exposure to the credit default swap counterparty). The upfront payment received by a Sub-Fund, as protection seller, is recorded as a liability on the Sub-Fund's books. An upfront payment made by a Sub-Fund, as protection buyer, is recorded as an asset on the Sub-Fund's books.

Swaptions

When a Sub-Fund writes a swaption, an amount equal to the premium received by the Sub-Fund is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Sub-Fund on the expiration dates as realised gains. If a written call swaption is exercised, the premium is added to the proceeds from the sale of the underlying swap in determining the realised gain or loss. If a written put swaption is exercised, the premium reduces the cost basis of the swap purchased.

1. Summary of significant accounting policies (continued)

Financial assets and financial liabilities at fair value through profit or loss (continued)

Swaps (continued)

Swaptions (continued)

When a Sub-Fund purchases a swaption, an amount equal to the premium paid by the Sub-Fund is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Sub-Fund has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been swapped.

Options

The unrealised gain or loss on open option positions is calculated and recorded as the fair value of the option less the premium paid on that option. The fair value of the options which are dealt in on a securities market are the settlement price as determined by the market. Unrealised gains or losses on open option positions are included in financial assets and liabilities at fair value through profit or loss in the Statement of Financial Position.

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid from the purchase of options, which expire unexercised, are treated as realised losses.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Due from and due to brokers

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased respectively, that have been contracted for but not yet settled or delivered on the statement of financial position date.

These amounts are recognised initially at fair value and subsequently measured at amortised cost, less provision for impairment for amounts due from brokers, if any. A provision for impairment of amounts due from brokers is established when there is objective evidence that the Fund will not be able to collect all amounts due from the relevant broker.

Cash at bank

Cash at bank includes cash in hand, deposits held on call with banks or brokers and other short-term highly liquid investments with original maturities of three months or less. Cash and other liquid assets are valued at their face value with interest accrued, where applicable, to the valuation point on the relevant dealing day, unless in the opinion of the Directors (in consultation with Nomura Asset Management U.K. Limited (the "Investment Manager") and the Administrator), any adjustment should be made to reflect the true value thereof.

Company cash accounts

A number of Company cash accounts are being operated by the Administrator, on behalf of the Company pursuant to the Central Bank of Ireland Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies. These cash accounts, held with Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") for collection of unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors for the Company are deemed assets of the Company. The balance on these cash accounts is reflected on the Statement of Financial Position of the Company with an appropriate equal and opposite liability.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

For the year ended 31st December, 2022

1. Summary of significant accounting policies (continued)

Amounts due from broker on margin accounts

The amounts receivable from brokers on margin accounts include cash held with the futures brokers as well as the appropriate payable or receivable for the change in value when the futures contracts are marked to market each day.

Amount due from broker on margin account are detailed in Note 4.

Redeemable participating shares

The Fund issues redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the particular Sub-Fund's Net Asset Value. The redeemable participating share is carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Sub-Fund's Net Asset Value per share at the time of issue or redemption. The Sub-Fund's Net Asset Value per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares with the total number of outstanding redeemable participating shares. In accordance with the provisions of the Fund's regulations, investment positions are valued based on the last traded market price for the purpose of determining the Net Asset Value per share for subscriptions and redemptions.

Dividend income

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend" to the extent that information thereon is reasonably available to the Sub-Fund. Dividend income is accounted for gross of any non-reclaimable/irrecoverable withholding taxes and net of any tax credits.

Interest income

Interest income and expense are recognised in the Statement of Comprehensive Income at nominal rate for financial instruments at fair value through profit or loss and on an effective yield methodology for bank interest income.

Accrued expenses

All expenses, including management fees and performance fees, are recognised in the Statement of Comprehensive Income on an accrual basis.

Reimbursement expense policy

Fund reimbursement expense policy is at the sole discretion of the Investment Manager. The reimbursement is set with reference to a maximum Total Expense Ratio ("TER") per share class, and may be utilized for the purpose of setting TER at specific level.

1. Summary of significant accounting policies (continued)

Distribution policy

Distributions proposed and approved by the Board of Directors subsequent to the financial year end are not recognised as a liability at the financial year end date.

Distributions are recognised in the financial year that they are approved by the Board of Directors.

The Nomura Funds Ireland - Fundamental Index Global Equity Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global High Conviction Fund, the Nomura Funds Ireland - Select US High Yield Bond Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Global Small Cap Equity Fund, the American Century Global Growth Equity Fund, the American Century Emerging Markets Equity Fund, the American Century Emerging Markets Debt Total Return Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Emerging Markets Sustainable Impact Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund, the Nomura Funds Ireland - Asia Sustainable Equity Fund are accumulating Sub-Funds and therefore they do not currently intend to distribute dividends to the holders of redeemable participating shares. The income and earnings of these Sub-Funds will be accumulated and reinvested on behalf of the holders of redeemable participating shares.

The Articles of Association of the Fund empower the Directors to declare dividends in respect of any shares in the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - US High Yield Bond Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, the Nomura Funds Ireland - Asia High Yield Bond Fund, the Nomura Funds Ireland - Asia Investment Grade Bond Fund and the Nomura Funds Ireland - European High Yield Bond Fund out of the net income of the Sub-Funds whether from dividends, interest or otherwise and/or net realised gains (i.e. realised gains net of realised and unrealised losses) or net realised and unrealised gains (i.e. realised and unrealised losses), subject to certain adjustments.

The Fund currently makes a distribution out of the net assets of Class ID of the Nomura Funds Ireland - India Equity Fund, Class AD, Class ID and Class RD of the Nomura Funds Ireland - Japan Strategic Value Fund, Class AD, Class BD, Class D, Class ID, Class TD and Class TID of the Nomura Funds Ireland - US High Yield Bond Fund, Class FD and Class ID of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, Class BD, Class ID and Class TD of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Class AD, Class AD2, Class AD3, Class BD, Class CD, Class FD, Class ID4, Class ID5, Class ID6, Class ID7, Class ID7, Class ID7, Class ID8, Class ID8,

It is not the current intention of the Directors to make distributions in respect of the net assets of Class A, Class I, Class S, Class T and Class Z of the Nomura Funds Ireland - India Equity Fund, Class A, Class B, Class I, Class R and Class T of the Nomura Funds Ireland - Japan Strategic Value Fund, Class A, Class C, Class I, Class T, Class TI and Class Z of the Nomura Funds Ireland - US High Yield Bond Fund, Class A, Class F, Class I, Class R and Class Z of the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, Class A, Class F, Class I, Class T, Class TI and Class R of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, Class A, Class C, Class F, Class I, Class R, Class S, Class T and Class Z of the Nomura Funds Ireland - Global Dynamic Bond Fund, Class A, Class F, Class I, Class R and Class Z of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, Class A, Class F, Class I and Class Z of the Nomura Funds Ireland - Asia High Yield Bond Fund, Class A, Class F, Class I and Class Z of the Nomura Funds Ireland - Asia Investment Grade Bond Fund and Class A and Class I of the Nomura Funds Ireland - European High Yield Bond Fund. The income, earnings and gains of these Classes are accumulated and reinvested on behalf of the shareholders of the Sub-Funds. Distributions to holders of Redeemable Participating Shares are recognised as finance costs in the Statement of Comprehensive Income.

1. Summary of significant accounting policies (continued)

Distribution policy (continued)

A new reporting fund regime was introduced by HM Revenue and Customs with effect from 1st December, 2009. The reporting regime removes the requirement for an offshore fund to seek certification as a distributing fund following the end of each financial year and instead permits an offshore fund to seek advance approval from HM Revenue and Customs to be treated as a "reporting fund" for accounting periods commencing on or after 1st December, 2009. Once an "Offshore fund" has been granted "reporting fund" status it will maintain that status for so long as it continues to satisfy the conditions to be a "reporting fund" without a requirement to apply for further certification by HM Revenue and Customs.

The share classes below, with their date of approval, have been approved by HM Revenue and Customs as having "reporting fund" status under the United Kingdom Income and Corporation Taxes Act 1988, as amended, for the purposes of UK taxation.

Sub-Fund	Share Class	Date of approval
American Century Advanced Medical Impact Equity Fund	Class A US\$	15th March, 2021
American Century Advanced Medical Impact Equity Fund	Class F US\$	22nd January, 2021
American Century Advanced Medical Impact Equity Fund	Class I US\$	22nd January, 2021

Taxation

Under current law and practice, the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or capital gains. However, Irish tax can arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption or transfer of shares. A chargeable event can also include a deemed disposal of shares every eight years beginning from the date of acquisition of those shares.

No Irish tax will arise on the Fund in respect of chargeable events in respect of:

- a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidated Act, 1997 as amended, are held by the Fund; and
- certain exempted Irish tax resident shareholders who have provided the Fund with the necessary signed statutory declarations.

Capital gains, dividends, and interest received (if any) by the Fund may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Fund or its shareholders.

Where there is uncertainty over future income tax treatments that may arise on the sale of investments an accrual is in place for capital gains tax and is disclosed separately in the Statement of Financial Position. This accrual currently relates to Indian emerging market investments and can change depending on the market value of these investments. A decrease in the market value of these investments may require a reduction in the accrual which can result in a negative value in the Statement of Comprehensive Income. A holding period of up to one year is classified as short-term and anything more than that is long-term.

Income from Securities Lending

The Fund may lend portions of its securities to third parties. The volume of the securities lending transactions is kept at an appropriate level. The Fund is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It is ensured that securities lending transactions do not jeopardise the management of the Fund's assets in accordance with its investment policy. The income earned from the securities lending programme is included in "Operating income" in the Statement of Comprehensive Income and detailed in "Securities lending income" in Note 10. Income from securities lending is accounted for on a receipt basis.

Swing Pricing

Under certain circumstances and unless otherwise provided in the Supplement relating to a Sub-Fund, the Directors have the power to adjust the Net Asset Value per share applicable to the issue price (the "Swing Pricing"). In any case, the adjustments to the Net Asset Value per share applicable at any valuation point shall be identical for all issues dealt with as of that business day.

1. Summary of significant accounting policies (continued)

Swing Pricing (continued)

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the shareholders' interests in a Sub-Fund. In order to prevent this effect, called "dilution", the Directors may determine that the Swing Pricing methodology applies so as to allow for the Net Asset Value per share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Sub-Fund if the net capital activity exceeds, as a consequence of the aggregate transactions in that Sub-Fund on a given business day, a threshold set by the Directors from time to time.

If the net cash movement of subscriptions and redemptions into and out of a particular Sub-Fund across all share classes on a given business day (the "Net Capital Activity") leads to a net inflow of assets in excess of the threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Sub-Fund is adjusted upwards by the swing factor set by the Directors from time to time. If the Net Capital Activity on a given business day leads to a net outflow of assets in excess of the threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Sub-Fund is adjusted downwards by the swing factor set by the Directors from time to time.

In any case, the swing factor shall not exceed 1.00% of the Net Asset Value per share of the relevant Sub-Fund. Further, for the purpose of calculating the expenses of a Sub-Fund which are based on the Net Asset Value of the relevant Sub-Fund, the Administrator will continue to use the un-swung Net Asset Value.

^{*} The Fund Totals as at 31st December, 2022 and 31st December, 2021, have been adjusted to account for balances in the name of the Fund. In line with the Central Bank of Ireland (the "CBI") Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Company cash accounts are being operated by the Administrator, on behalf of the Company, in accordance with the requirements of the CBI. Such Company cash accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors. As at 31st December, 2022, the amount held in these cash accounts was USD 1,088,593 (31st December, 2021: USD 2,957,524). The Fund Total overdraft of USD 36 was held with Brown Brothers Harriman & Co. as at 31st December, 2022 (31st December, 2021: USD 2,477).

All cash at bank balances at the year end are held with Brown Brothers Harriman & Co. or with third party institutions approved by the Fund on overnight deposit or directly with a sub-custodian.

3. Security lending

The following tables show the fair value of securities on loan at 31st December, 2022 and at 31st December, 2021 as well as the collateral held and collateral level.

In accordance with the Securities Lending Agency Agreement (SLAA), for each loan of securities Brown Brothers Harriman & Co. ("BBH") accepts non-cash collateral on behalf of the Nomura Funds participating in the BBH Securities Lending Programme. Non-cash collateral is limited to securities issued or fully guaranteed by the United States government or issued and unconditionally guaranteed by any agencies thereof or issued or fully guaranteed by any of the G-10 sovereigns.

The sovereign debt currently accepted by BBH on behalf of the Nomura Funds which participate in the BBH Securities Lending Programme are: US, UK, Sweden, Switzerland, France, Germany and Netherlands.

The following table is presented in USD as all of the collateral referred to is USD denominated.

8. Net Asset Value per redeemable participating share reconciliation

The Net Asset Value per redeemable participating share is calculated by dividing the total net assets (as calculated for shareholder dealing purposes) of the Sub-Fund by the number of redeemable participating shares of that class in issue. The Net Asset Value per redeemable participating share reported in the Statement of Financial Position is that used for financial statement purposes.

Organisational expenses totalling JPY 1,819,654 for the Nomura Funds Ireland - Japan High Conviction Fund and USD 18,569 for the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund were written off in the year ended 31st December, 2013. Organisational expenses totalling USD 17,682 for the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, USD 17,959 for the Nomura Funds Ireland - Diversified Growth Fund were written off in the year ended 31st December, 2014. Organisational expenses totalling USD 18,286 for the Nomura Funds Ireland - Global Dynamic Bond Fund, USD 13,707 for the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, USD 13,917 for the Nomura Funds Ireland - Asia High Yield Bond Fund, USD 13,273 for the Nomura Funds Ireland - Asia Investment Grade Bond Fund, USD 13,310 for the Nomura Funds Ireland - China Fund, USD 16,310 for the Nomura Funds Ireland - Global High Conviction Fund were written off in the year ended 31st December, 2015. Organisational expenses totalling USD 15,757 for the Nomura Funds Ireland - Select US High Yield Bond Fund were written off in the year ended 31st December, 2016. Organisational expenses totalling EUR 15,000 for the Nomura Funds Ireland - European High Yield Bond Fund were written off in the year ended 31st December, 2017. Organisational expenses totalling USD 16,905 for the Nomura Funds Ireland - Global Sustainable Equity Fund and USD 17,040 for the American Century Global Small Cap Equity Fund were written off in the year ended 31st December, 2019. Organisational expenses totalling JPY 1,718,773 for the Nomura Funds Ireland - Japan Small Cap Equity Fund and USD 13,755 for the American Century Emerging Markets Sustainable Impact Equity Fund were written off in the year ended 31st December, 2020. Organisational expenses totalling USD 13,548 for the American Century Advanced Medical Impact Equity Fund, USD 16,703 for the American Century US Focused Innovation Equity Fund and JPY1,436,222 for the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund were written off in the year ended 31st December, 2021. Organisational expenses totalling USD 10,550 for the American Century Advanced Medical Impact Equity Fund were written off in the year ended 31st December, 2022.

For the purpose of calculating the Net Asset Value per share for shareholder dealing, organisational expenses are being amortised over the first five financial years of the lifetime of the Fund, USD 10,550 (31st December, 2021: USD 107,559) was amortised for the year ended 31st December, 2022. For the purpose of calculating the Net Asset Value per share for shareholder dealing, swing pricing mechanism was adopted to protect the interest of the shareholders of the Sub-Fund, USD Nil (31st December, 2021: USD Nil) was adjusted for the year ended 31st December, 2022.

The amounts in the following tables are presented in the functional currency of the share class.

9. Share capital

Authorised

The authorised share capital of the Fund is EUR 300,000 divided into 300,000 redeemable non-participating shares of EUR 1 each and 500,000,000,000,000 Redeemable Participating Shares of no par value. One redeemable non-participating share has been paid up and is beneficially owned by Nomura Asset Management USA Inc. which, along with the Investment Manager, is a wholly owned subsidiary of Nomura Asset Management Co Ltd. (Japan). A redeemable non-participating share carries voting rights, it does not entitle the holder thereof to any dividend and on a winding up entitles the holder thereof to receive the amount paid up thereon but does not otherwise entitle them to participate in the Net Asset Value of the Fund. They are thus disclosed in the financial statements by way of this note only.

The following tables set out the movement of shares in issue for the year ended 31st December, 2022 and 31st December, 2021 respectively:

12. Investment Management expense and performance expense

Nomura Asset Management U.K. Limited, the Investment Manager earned a fee of USD 69,081,434 for the year ended 31st December, 2022 (31st December, 2021: USD 76,175,918), of which USD 15,136,157 (31st December, 2021: USD 22,081,260) was due at the year end.

The Investment Management expense is calculated and accrued daily and payable quarterly in arrears. The Investment Manager is entitled to be reimbursed by the Sub-Funds for reasonable out-of-pocket expenses incurred by it and any VAT on fees and expenses payable to or by it. The Investment Manager shall pay, out of its own fee, the fees of any Sub-Investment Managers appointed in respect of one or more Sub-Funds. The Investment Manager may from time to time, at its sole discretion, and out of its own resources, rebate to affiliated entities/intermediaries and/or shareholders, part or all of the Investment Management Fee and/or the Incentive Fee. This Incentive Fee is calculated and paid as agreed directly between the Investment Manager and the relevant individual Shareholder. There was no performance fees charged during the year ended 31st December, 2022 (31st December, 2021: none), none of which was due at the year end (31st December, 2021: none).

13. Manager's expense

Bridge Fund Management Limited, the Manager, earned a fee of USD 368,438 for the year ended 31st December, 2022 (31st December, 2021: none), of which USD 69,501 (31st December, 2021: none) was due at the year end.

Pursuant to the Management Agreement, the Manager is entitled to charge the Fund an annual fee not to exceed a maximum of 0.01% of the Net Asset Value of the Fund. The Manager's fee shall be subject to the imposition of VAT, if required. The fee will be calculated and accrued daily and is payable monthly in arrears. The Manager's expense may be waived or reduced by the Manager, in consultation with the Directors.

The Manager shall also be entitled to be repaid all of its out-of-pocket expenses out of the assets of the Fund. The Manager shall be entitled to be reimbursed out of the assets of the Fund for any VAT on all fees and expenses payable to or by it.

14. Administration, Depositary, Brokerage and Audit fees

The Fund pays to the Administrator, out of the assets of each Sub-Fund, an annual fee, accrued at each valuation point and payable monthly in arrears, at a rate between 0.015% and 0.045% which shall not exceed 0.045% per annum of the aggregate value of all Sub-Funds under the Fund umbrella. The rate of 0.045% is subject to an aggregate annual minimum fee of USD 48,000 per Sub-Fund plus VAT, if any, thereon. The Administrator is also entitled to receive a monthly fee of USD 333.33 per share class of a Sub-Fund launched (such fee will not be applied to the first three share classes of a Sub-Fund launched by the Fund).

The Administrator is entitled to receive a register fee per Sub-Fund of USD 10,000 per annum and also receives registration fees, and transaction charges as agreed at normal commercial rates and is also entitled to be repaid out of the assets of the Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Fund which shall include legal fees, couriers' fees and telecommunication costs and expenses together with VAT, if any, thereon. Each Sub-Fund will bear its proportion of the fees and expenses of the Administrator.

The Administrator earned a fee of USD 6,381,881 for the year ended 31st December, 2022 (31st December, 2021: USD 3,319,784), of which USD 686,014 (31st December, 2021: USD 638,723) was due at the year end.

Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary") is entitled to receive, out of the assets of each Sub-Fund, a trustee fee, accrued at each valuation point and payable monthly in arrears, of 0.0125% per annum of the Net Asset Value of each Sub-Fund. The Depositary is also entitled to receive, out of the assets of each Sub-Fund, a depositary fee, accrued at each valuation point and payable monthly in arrears, which shall not exceed 0.4% per annum, calculated by reference to the fair value of the investments that the Sub-Fund may make in each relevant market, subject to a minimum annual fee of USD 12,000 per annum.

The Depositary is also entitled to agree upon transaction charges and to recover properly vouched out-of-pocket expenses out of the assets of the relevant Sub-Fund (plus VAT thereon, if any), including legal fees, couriers' fees and telecommunication costs and expenses and the fees, transaction charges and expenses of any sub-custodian appointed by it which shall be at normal commercial rates (plus VAT thereon, if any). Each Sub-Fund will bear its proportion of the fees and expenses of the Depositary.

The Depositary earned a fee of USD 2,406,830 for depositary and trustee services for the year ended 31st December, 2022 (31st December, 2021: USD 2,597,450), of which USD 370,606 (31st December, 2021: USD 504,336) was due at the year end.

Sub-Funds may be subject to a brokerage fees related to financial derivative instruments which are listed on Recognised Exchanges. There was no brokerage fees charged during the year ended 31st December, 2022 (31st December, 2021: none), none of which was due at the year end (31st December, 2021: none).

Audit fees accrued for the year amounted to USD 491,406 (31st December, 2021: USD 205,653), including VAT, of which USD 340,404 (31st December, 2021: USD 117,683) was due at the year end. Differences between the amounts charged to the Statement of Comprehensive Income and the figures noted above are in relation to under and over accruals for the respective years.

Statutory auditors' fees in respect of the financial year are analysed as follows:

	31st December, 2022 EUR	31st December, 2021 EUR
Audit of individual company accounts	224,356	263,436
Other assurances services	-	-
Tax advisory services	-	-
Other non-audit services	-	-
	224,356	263,436

15. Directors' fees and expenses

Each Director is entitled to charge a fee for their services at a rate determined by the Directors up to a maximum fee per Director of EUR 40,000 per annum (plus VAT) and may be entitled to special remuneration if called upon to perform any special or extra services to the Fund. The Directors fees are fixed annually by the Board of Directors. All Directors are entitled to reimbursement by the Fund of expenses properly incurred in connection with the business of the Fund or the discharge of their duties.

Directors' fees accrued for the year amounted to USD 19,600 (31st December, 2021: USD 48,621) of which USD 6,880 was due at the year end (31st December, 2021: USD 32,584). The Directors' fees paid during the year ended 31st December, 2022 were USD 39,393.

16. Financial risk management

Strategy in using financial instruments

The investment objective of the Sub-Funds is to achieve long-term capital growth through investment in an actively managed portfolio of global emerging market securities (Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, American Century Emerging Markets Equity Fund, American Century Emerging Markets Debt Total Return Fund and American Century Emerging Markets Sustainable Impact Equity Fund), Indian securities (Nomura Funds Ireland - India Equity Fund), Asian securities (Nomura Funds Ireland - Asia Sustainable Equity Fund), Asian (excluding Japan) securities (Nomura Funds Ireland - Asia Ex Japan High Conviction Fund), global equity securities (Nomura Funds Ireland - Global High Conviction Fund, Nomura Funds Ireland - Global Sustainable Equity Fund, American Century Global Small Cap Equity Fund, American Century Global Growth Equity Fund, American Century Concentrated Global Growth Equity Fund, Nomura Funds Ireland - Global Multi-Theme Equity Fund, American Century Advanced Medical Impact Equity Fund and Nomura Funds Ireland - Japan Small Cap Equity Fund), Japanese equity securities (Nomura Funds Ireland - Japan Strategic Value Fund, Nomura Funds Ireland - Japan High Conviction Fund, Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and Nomura Funds Ireland - Japan Sustainable Equity Core Fund), high yield debt securities (Nomura Funds Ireland -US High Yield Bond Fund, Nomura Funds Ireland - Global Sustainable High Yield Bond Fund and Nomura Funds Ireland -European High Yield Bond Fund), debt securities (Nomura Funds Ireland - Global Dynamic Bond Fund, Nomura Funds Ireland - Asia High Yield Bond Fund and Nomura Funds Ireland - Asia Investment Grade Bond Fund) or Chinese securities (Nomura Funds Ireland - China Fund). The investment objective of the Sub-Fund is to provide a total return that exceeds the Index through investment in a concentrated, actively managed portfolio of companies with significant long-term potential (American Century US Focused Innovation Equity Fund).

In pursuing its investment objectives, the Fund is exposed to a variety of financial risks: market risk (including market price risk, currency risk and interest rate risk), credit risk and liquidity risk that could result in a reduction in the Fund's Net Asset Value. The Fund's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Sub-Funds' financial performance.

The risks, and the Directors' approach to the management of the risks, are as follows.

Market price risk

Market price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Fund's assets consist principally of quoted equities and debt securities, the values of which are determined by market forces. All security investments present a risk of loss of capital. The Investment Manager moderates this risk through a careful selection of securities within specified limits including maximum overweight limits for individual stocks and country weights versus the benchmark. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. The Board of Directors manage the market price risks inherent in the investment portfolios by ensuring full and timely access to relevant information from the Investment Manager.

The Board of Directors meets regularly and at each meeting reviews investment performance and overall market positions. They monitor the Investment Manager's compliance with the Fund's objectives and are directly responsible for investment strategy and asset allocation. There were no material changes to the Fund's policies and processes for managing market risk and the methods used to measure risk since the prior year end.

16. Financial risk management

Market price risk (continued)

The Board of Directors is ultimately responsible for identifying and controlling risks, however the Investment Manager is responsible for the day to day monitoring of risk, and will bring any material events in relation to any changes in the risk profile of the Sub-Funds to the attention of the Directors. The Sub-Funds' global exposure is managed through the use of the "Commitment Approach" method or the value at risk ("VaR") approach. Where using the Commitment Approach, the global exposure through the use of derivatives is limited to 100 percent of the Net Asset Value of the Sub-Fund. Additionally, the Sub-Investment Managers monitor the risk of the Sub-Funds using a variety of proprietary and third party analysis tools to analyse the risk characteristics of the portfolios. The impact of individual trades on the risk profile of the Sub-Fund is also considered before the investment decision is made.

The Sub-Funds' equity securities are susceptible to market price risk arising from uncertainties about future prices of the instruments. The Sub-Funds' market price risk is managed through diversification of the investment portfolio ratios by exposures. An analysis of the Sub-Funds investment portfolio is shown in the Statement of Investments on pages 389 to 592. The equity securities are selected from a variety of regulated stock exchanges as detailed in the prospectus.

At 31st December, 2022 and 31st December, 2021, a 5% increase in equity security prices would have increased the net assets attributable to holders of redeemable participating shares of each Sub-Fund as outlined in the tables below; an equal change in the opposite direction would have decreased the net assets attributable to holders of redeemable shares by an equal but opposite amount.

As at December, 2022

Sub-Fund	Currency	Impact on Net Asset Value due to movement in Prices
India Equity Fund	USD	9,619,164

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Certain, of each Sub-Fund's, assets, liabilities and income are denominated in currencies other than the Sub-Fund's functional currency. They are, therefore, exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. Income denominated in foreign currencies is converted to the Sub-Fund's functional currency on receipt.

In accordance with the Fund's policy, the Investment Manager monitors the Fund's currency position on a daily basis and will bring any material events to the attention of the Board of Directors. There were no material changes to the Fund's policies and processes for managing currency risk and the methods used to measure risk since the prior year end. The following tables list the exposure to currencies with a value of greater than 5% of the net assets of each Sub-Fund.

For the year ended 31st December, 2022

Interest rate risk (continued)

A bond's sensitivity to interest rates can be expressed in terms of duration, which gives the estimated percentage change in portfolio value, associated with a 1% increase in interest rates.

The following analysis is estimated based on the duration calculations as at 31st December, 2022 and 31st December, 2021. This analysis is intended as a relative estimate of interest rate risk for the Sub-Fund rather than as precise numbers. Therefore, the amounts presented represent hypothetical outcomes which are not intended to be predictive, as future market conditions could vary significantly from those experienced in the past.

Also shown in the tables is the estimated impact on the portfolio of a 1 basis point (0.01 of 1 per cent) increase in interest rates. The sensitivity analysis is based on a small parallel shift of the yield curve (interest rates of all maturities moving in unison). A 1 basis point decrease would have an equal but opposite effect.

¹ The Nomura Funds Ireland - Select US High Yield Bond Fund was fully redeemed on 21st December, 2022.

16. Financial risk management (continued)

Credit risk (continued)

The concentration of credit risk, split out by the country and the industry each security is invested in, is included in the Statement of Investments on pages 389 to 592.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ('BBH') are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, 'agency accounts') are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Fund. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. At 31st December, 2022 and 31st December, 2021, all institutions holding cash on behalf of the Fund had an F2 or better short-term credit rating as measured by Fitch's. The institutions holding cash on behalf of the Fund at 31st December, 2022 and 31st December, 2021 are listed in Note 2. At 31st December, 2022 and 31st December, 2021, all derivative assets and liabilities were held with the counterparties that had a BBB+ or better long-term credit rating as measured by Fitch's. The counterparties of derivatives assets and liabilities are disclosed in the Statements of Investments.

The Trustee must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Trustee, Brown Brothers Harriman Trustee Services (Ireland) Ltd. must ensure the ownership of each asset and the location of documents of title for each asset.

Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with liabilities.

The Sub-Funds are exposed to daily cash redemptions of redeemable participating shares. The Sub-Funds therefore invest the majority of their assets in financial instruments that are traded in an active market and can be readily disposed of; they may invest a limited proportion of their assets in investments not actively traded on a stock exchange.

The Sub-Funds' listed securities are considered readily realisable, as they are listed on the regulated stock exchanges as detailed in the prospectus. The Sub-Funds have the ability to borrow in the short term to ensure settlement. At 31st December, 2022, the Nomura Funds Ireland - Global Dynamic Bond Fund had an overdraft cash balance of USD 16 (31st December, 2021: USD 2,432), the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund had no overdraft cash balance (31st December, 2021: USD 2), the American Century Global Small Cap Equity Fund had an overdraft cash balance of USD 10 (31st December, 2021: USD 24), the American Century Global Growth Equity Fund had an overdraft cash balance of USD 4 (31st December, 2021: USD 5), the American Century Concentrated Global Growth Equity Fund had an overdraft cash balance of USD 1 (31st December, 2021: USD 9) and the American Century Emerging Markets Debt Total Return Fund had an overdraft cash balance of USD 5 (31st December, 2021: USD 5).

In accordance with the Fund's policy, the Investment Manager monitors the Sub-Funds' liquidity position on a daily basis and will bring any material events to the attention of the Board of Directors. There were no material changes to the Fund's policies and processes for managing liquidity risk and the methods used to measure risk since the prior year end.

A detailed analysis of the Sub-Funds' assets is not shown as they are considered liquid based on the fact that they could be converted to cash at close to their carrying value.

The tables that follow analyse the Sub-Funds' liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances, as the impact of discounting is not significant.

For the year ended 31st December, 2022

16. Financial risk management (continued)

Fair value estimation

The Fund has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. Quoted prices for these instruments are not adjusted.
- (ii) Level 2: Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds, listed equities on markets that are not active and over-the-counter derivatives. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. Investments classified within Level 2 are the following asset classes: bonds, forward foreign currency contracts, swaps and OTC derivatives. Forward Foreign Currency Contracts are priced based on the current spot rate, provided by financial FX vendors, plus or minus the applicable number of forward points. This is the forward rate. The number of forward points on a given exchange rate is determined by the prevailing interest rates in each market, the time period between the spot and forward rates as well as other market factors. Bonds are valued based on the latest bid prices obtained from Markit as per the Nomura Funds Ireland Plc pricing hierarchy. Swaps are valued at single price obtained from Markit prior day as per the Nomura Funds Ireland Plc pricing hierarchy. All assets that are not exchange traded but where the price is observable either directly or indirectly is deemed to be a Level 2.
- (iii) Level 3: Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Pricing inputs are unobservable for the investment and include situations where there is little, if any, market activity for the Instrument. The inputs into the determination of fair value require significant management judgement or estimation. As observable prices are not available for these securities, the Fund has used valuation techniques to derive the fair value, if applicable.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Directors in consultation with the Investment Manager. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables analyse within the fair value hierarchy the Sub-Funds' financial assets and financial liabilities measured at fair value at 31st December, 2022 and 31st December, 2021:

Foreign Currency Contracts

The Fund is required to disclose the impact of offsetting assets and liabilities represented in the Statement of Financial Position to enable users of the financial statements to evaluate the effect or potential effect of netting arrangements on its financial position for recognized assets and liabilities. These recognized assets and liabilities are derivative instruments that are either subject to an enforceable master netting arrangement or similar agreement or meet the following right of set-off criteria: the amounts owed by the Fund to another party are determinable, the Fund has the right to set-off the amounts owed with the amounts owed by the other party, the Fund intends to set-off on a net basis, and the fund right of set-off is enforceable at law.

For financial reporting purpose, the Fund does not offset derivative assets and derivative liabilities in the Statement of Financial Position. The following tables present the Fund's derivative assets and liabilities by counterparty, net of amounts available for offset under a master netting agreement and net of the related collateral received by the Fund for assets and pledged by the Fund for liabilities as at 31st December, 2022 and 31st December, 2021:

The Board of Directors are not aware of any transactions with related parties during the year ended 31st December, 2022 and 31st December, 2021, other than those disclosed in the financial statements.

18. Efficient portfolio management

The Fund may employ (subject to the conditions and within the limits laid down by the Central Bank techniques and instruments relating to transferable securities, including but not limited to futures contracts, swaps, options, stock-lending, repurchase agreements and reverse repurchase agreements and any other techniques and instruments the Investment Manager may consider appropriate for efficient portfolio management purposes. Efficient portfolio management transactions may be entered into by the Investment Manager with one of the following aims: a) a reduction of risk; b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The techniques and instruments employed during the year were futures contracts, swaps, options and stock-lending. Details of stock-lending, including counterparties, are presented in Note 3.

The following table shows the realised gains/(losses), movements in unrealised gains/(losses) and commission expenses related to futures contracts, swaps and options during the year ended 31st December, 2022 and 31st December, 2021. Counterparties for futures contracts, swaps and option contracts used by the Sub-Funds are disclosed in relevant Statement of Investments.

The use of financial derivative instruments by a Sub-Fund may create leverage. To the extent that leverage is employed, leverage will be measured using the commitment approach of measuring risk, whereby such leverage cannot exceed 100 per cent of the Net Asset Value of a Sub-Fund. Where a Sub-Fund invests in financial derivative instruments for such purposes, a risk management process will be submitted to the Central Bank by the Fund, prior to a Sub-Fund engaging in such transactions in accordance with the Central Bank's requirements as set out in UCITS Regulations. It is expected at the use of financial derivative techniques and instruments will not increase a Sub-Fund's risk level.

19. Global Exposure

UCITS funds are required to monitor exposures on a daily basis by utilising either the commitment approach or the value at risk ("VaR") approach when financial derivative instruments are held by the Sub-Funds. With the exception of the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund and the American Century Emerging Markets Debt Total Return Fund, the Investment Manager utilises the commitment approach in monitoring the exposures of the Sub-Funds as the market risk can be adequately monitored through this method. The use of financial derivative instruments by a Sub-Fund may create leverage. The leverage of a sub-fund cannot exceed 100 per cent of the Net Asset Value of the Sub-Fund. With the exception of the Nomura Funds Ireland - Global Dynamic Bond Fund, the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund and the American Century Emerging Markets Debt Total Return Fund, derivatives will be primarily used to achieve one of the following aims: a) a reduction of risk; b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return).

Although permitted to hold derivatives, the Nomura Funds Ireland - India Equity Fund, the Nomura Funds Ireland - Asia Ex Japan High Conviction Fund, the Nomura Funds Ireland - China Fund, the Nomura Funds Ireland - Global Sustainable Equity Fund, the American Century Emerging Markets Equity Fund, the Nomura Funds Ireland - Global Multi-Theme Equity Fund, the Nomura Funds Ireland - Japan Small Cap Equity Fund, the American Century Advanced Medical Impact Equity Fund, the American Century US Focused Innovation Equity Fund and the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund did not hold any derivatives at 31st December, 2022 and 31st December, 2021, the American Century Emerging Markets Sustainable Impact Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Core Fund and the Nomura Funds Ireland - Asia Sustainable Equity Fund did not hold any derivatives at 31st December, 2022, the Nomura Funds Ireland - Diversified Growth Fund and the Nomura Funds Ireland - Global High Conviction Fund did not hold any derivatives at 31st December, 2021. These Sub-Funds held equities, bonds and collective investment schemes at 31st December, 2022 and 31st December, 2021, respectively. These Sub-Funds are monitored regularly for any change that would require FDI risk monitoring.

The Nomura Funds Ireland - Japan Strategic Value Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The Nomura Funds Ireland - US High Yield Bond Fund held equities, bonds, warrants, term loans and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The Nomura Funds Ireland - Japan High Conviction Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The Nomura Funds Ireland - Global Sustainable High Yield Bond Fund held bonds, equities, term loans, warrants and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The Nomura Funds Ireland - Asia High Yield Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The Nomura Funds Ireland - Asia Investment Grade Bond Fund held bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The Nomura Funds Ireland - Global High Conviction Fund held equities and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and equities at 31st December 2021. The Nomura Funds Ireland - Select US High Yield Bond Fund held forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2021. The Nomura Funds Ireland - European High Yield Bond Fund held equities, bonds, term loans and forward foreign currency forwards for the purposes of currency hedging at 31st December 2022 and bonds and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2021. The American Century Global Small Cap Equity Fund held equities, collective investment schemes and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021. The American Century Concentrated Global Growth Equity Fund held equities, collective investment schemes and forward foreign currency contracts for the purposes of currency hedging at 31st December, 2022 and 31st December, 2021.

Breaches of exposure limits, if any, are identified using the commitment approach, addressed by the Investment Manager and reported to the Directors. An annual FDI report is provided to the Central Bank detailing any exposures breached during the year and any material changes to the risk monitoring process.

19. Global Exposure (continued)

American Century Emerging Markets Debt Total Return Fund

VaR Summary at 31st December, 2021

Confidence Interval: 99%	Horizon: 20 days
VaR Methodology	Monte Carlo
Portfolio VaR %	3.22
Absolute Change % (T-1)	(0.12)
Portfolio Conditional VaR %	3.86
Portfolio Volatility %	5.61
Portfolio Systematic Risk %	84.89
Sum of Notional Leverage %	74.97
Maximum VaR %	5.01
Minimum VaR %	2.32
Average VaR %	3.01

The purpose of a VaR model is the quantification of the maximum potential loss which might be generated by a Sub-Fund's portfolio in normal market conditions. This loss is estimated on the basis of a given holding period and a certain confidence interval. The Nomura Funds Ireland uses a Monte Carlo methodology for VaR calculation. The Monte Carlo simulation approach is used to model the probability of different outcomes in a process in which there are interventions of random variables and refers to any method that randomly generates trials. The holding period of VaR analysis used for the Nomura Funds Ireland - Global Dynamic Bond Fund and the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund is 1 day, for the American Century Emerging Markets Debt Total Return Fund is 20 days, the length of the historical data window period is 250 days based on the full revaluation approach.

20. Soft commissions

In accordance with its obligations under MiFID, the Investment Manager shall return to the relevant Sub-Fund any fees, commissions or other monetary benefits paid or provided by a third party in relation to the investment management services provided by the Investment Manager to the Fund as soon as reasonably possible after receipt.

In particular, where the Investment Manager successfully negotiates the recapture of a portion of the commissions charged by brokers or dealers in connection with the purchase and/or sale of securities, permitted derivative instruments or techniques and instruments for the Fund or a Sub-Fund, the rebated commission shall be paid to the Fund or the relevant Sub-Fund as the case may be.

The Investment Manager shall however be permitted to retain minor non-monetary benefits received from third parties where the benefits are such that they could not impair the Investment Manager from complying with its obligation to act in the best interests of the Fund, provided they are disclosed to the Fund prior to the provisions of investment management services by that entity. A list of acceptable "minor non-monetary" benefits is set out in the Commission Delegated Directive (EU) 2017/593.

The Investment Manager may only receive third-party investment research, provided it is received on such basis that it does not contravene MiFID.

Investment research will not constitute an inducement under MiFID where it is paid for by the Investment Manager itself out of its own resources or out of a research payment account funded by a specific research charge to the applicable Sub-Fund.

In this regard, the Investment Manager may discharge the charges relating to investment research which is or may be used by the Investment Manager in managing the assets of the Fund out of its own resources or out of a research payment account funded by a specific research charge to the applicable Sub-Fund.

There were no soft commission arrangements entered into by the Investment Manager or its delegate, on behalf of the Fund during the year ended 31st December, 2022 (31st December, 2021: none).

21. Dividends

Details of dividends declared and paid on the Class AD Shares, Class ID Shares and Class RD Shares of the Nomura Funds Ireland - Japan Strategic Value Fund, on the Class AD Shares, Class BD Shares, Class D Shares, Class ID Shares, Class TD Shares and Class TID Shares of the Nomura Funds Ireland - US High Yield Bond Fund, on the Class FD Shares and Class ID Shares of the Nomura Funds Ireland - Global Sustainable High Yield Bond Fund, on the Class AD Shares, Class AD Shares, Class AD Shares, Class BD Shares, Class BD Shares, Class CD Shares, Class FD Shares, Class ID Shares of the Nomura Funds Ireland - Global Dynamic Bond Fund, on the Class FD Shares, Class ID Shares and Class SD Shares of the Nomura Funds Ireland - Emerging Market Local Currency Debt Fund, on the Class SD Shares of the Nomura Funds Ireland - Asia High Yield Bond Fund, on the Class SD Shares of the Nomura Funds Ireland - Asia High Yield Bond Fund, on the Class SD Shares of the Nomura Funds Ireland - Asia Investment Grade Bond Fund and on the Class SD Shares of the Nomura Funds Ireland - European High Yield Bond Fund for the year ended 31st December, 2022 and 31st December, 2021 are included in the table below.

23. Notional foreign exchange adjustment

For the purposes of reporting the combined results of the Fund at 31st December, 2022, the results of the Nomura Funds Ireland - Japan Strategic Value Fund, the Nomura Funds Ireland - Japan High Conviction Fund, the Nomura Funds Ireland -Japan Small Cap Equity Fund, the Nomura Funds Ireland - Japan Sustainable Equity Growth Fund and the Nomura Funds Ireland - Japan Sustainable Equity Core Fund have been translated into US Dollars at the closing rate at the year end date 1 USD = 131.8350 JPY (31st December, 2021: 1 USD = 115.0950 JPY) for Statement of Financial Position items and the average rate for the year from 1st January, 2022 to 31st December, 2022 1 USD = 130.6848 JPY (2021: 1 USD = 109.7695 JPY) for the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. The results of the Nomura Funds Ireland - European High Yield Bond Fund have been translated into US Dollars at the closing rate at the year end date 1 USD = 0.9358 EUR (31st December, 2021: 1 USD = 0.8817 EUR) for Statement of Financial Position items and the average rate for the year from 1st January, 2022 to 31st December, 2022 1 USD = 0.9494 EUR (2021: 1 USD = 0.8455 EUR) for the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. A notional currency adjustment of USD (252,494,837) (31st December, 2021: USD (188,024,372)) arises from the translation of the opening net assets, the Statement of Comprehensive Income and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. The method of translation has no effect on the value of net assets allocated to the individual Sub-Funds.

24. Events during the year

In February 2022 Russia invaded Ukraine and global financial markets have experienced and may continue to experience significant volatility. Russian, Ukrainian and Belarusian assets held within a number of Sub-Funds may be impaired or written off and interest and dividend income due may not be received by the relevant Sub-Funds due to sanctions imposed on Russia and the ongoing war and this may negatively impact the Sub-Fund's performance.

In accordance with the UCITS Regulations, the annual report documents material changes that have occurred in the disposition of the assets of the Company during the financial year. A material change is defined as aggregate purchase of a security exceeding 1 percent of the total value of purchased for the financial year and/or aggregate disposals greater then 1 percent of the total value of sales for the financial year. If there are fewer than 20 purchases/sales that meet the material change definition, the Company shall disclose those purchase/sales and such number of the next largest purchases/sales so at least 20 purchases/sales are disclosed.

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- · securities or commodities lending and securities or commodities borrowing
- · a buy-sell back transaction or sell-buy back transaction, or
- · a margin lending transaction

As at 31st December, 2022 the Funds held securities lending as types of instruments under the scope of the SFTs.

The following tables are presented in USD as all of the collateral referred to is USD denominated.

Global Data

The amount of assets across all SFTs as at 31st December, 2022 is as follows:

Nomura Funds Ireland - Japan Strategic Value Fund

Type of asset	Amount*	% of NAV	% of lendable assets
Securities lending	USD 52,181,900	7.32%	7.71%

APPENDIX 2 (UNAUDITED) - REMUNERATION DISCLOSURE

The below disclosure is made in respect of the remuneration policies of MJ Hudson Fund Management (Ireland) Limited ("Manager") in accordance with the European Union Directive 2014/91/EU as implemented in Ireland by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016. This requires UCITS management companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

The Manager has designated the following persons as Identified Staff:

- Executive and Non-Executive members of the management body of the Manager e.g. CEO, Directors, Executive and Non-Executive partners;
- Senior management;
- Risk takers staff who can exert material influence on the Manager or on the UCITS or AIFs it manages;
- Those in control functions: Operations, HR, Compliance, Finance where applicable;
- Staff whose total remuneration takes them into the bracket of senior management and risk takers, whose professional activities have a material impact on the Manager's risk position or those of the UCITS and/or AIFs it manages; and
- Categories of staff of the entities to which portfolio management or risk management activities have been delegated whose professional activities have a material impact on the Manager's risk position or those of the UCITS and/or AIFs it manages.

The Remuneration Policy is designed to discourage risk taking that is inconsistent with the risk profile of the UCITS and the Manager is not incentivised or rewarded for taking excessive risk.

The Manager is required under UCITS regulations to make quantitative disclosures of remuneration. Disclosures are provided in relation to Identified Staff who are employed directly by the Manager and Identified Staff who have the ability to materially impact the risk profile of the UCITS including individuals who, although not directly employed by the Manager, are assigned by their employer to carry out services directly by the Manager.

All remuneration paid to Identified Staff can be divided into:

- · Fixed remuneration (payments or benefits without consideration of any performance criteria); and
- Variable remuneration (additional payments or benefits depending on performance or, in certain cases, other contractual criteria) which is not based on the performance of the UCITS.

Remuneration details for the Manager are disclosed below:

Description	Number of	Total	Fixed	Variable
	beneficiaries	remuneration paid	remuneration paid	remuneration paid
Total Staff Remuneration	45	€3,339,320	€2,927,820	€411,500
Senior Management (including				
executives), risk takers and other	8	€1,208,015	€946,015	€262,000
identified staff				

Details of the Remuneration Policy, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits is available at the following website: https://bridgefundmanagement.mjhudson.com/

ANNEX

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

Product name: Nomura Funds Ireland – Japan Strategic Value Fund

Legal entity identifier: 549300PEL817FAJZZS61

Environmental and/or social characteristics

Did	Did this financial product have a sustainable investment objective?					
••	Yes	• No				
•	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
	It made sustainable investments with a social objective:%	★ It promoted E/S characteristics, but did not make any sustainable investments				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued through focusing on issuers working towards achieving net zero GHG emissions by 2050 or sooner. Within its investment process, the Investment Manager has monitored and taken into account companies' current and future emissions in comparison to the carbon budgets for the International Energy Agency (IEA) Sustainable Development Scenario (SDS).

The social characteristic was pursued mainly through the exclusions applied for the Sub-Fund which limited the Sub-Fund's exposure in certain businesses and sectors such as gambling, thermal coal, tobacco and controversial weapons as well as compliance with the UN Global Compact principles.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

Contribution to reduction of greenhouse gas emissions:

GHG emissions per unit revenue: The weighted average scope 1 and 2 GHG intensity (scope 1 & 2 emissions per USD1 million of revenue) was 81.04 tonnes, whereas that of the TOPIX index (the "Index") was 92.90 tonnes.

Sustainable, fair and inclusive business practices:

- Women in senior management: The percentage of female directors was 16.99% as opposed to 16.76% of the companies in the Index.
- Compliance with UN Global Compact: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. In addition, the Sub-Fund has been recategorised from a fund that did not come within the scope of Article 8 or Article 9 of SFDR to an Article 8 fund within the meaning of SFDR in November 2022. Therefore, the indicators above have been calculated using the weights of holdings held in the Sub-Fund as of the end of December 2022 and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used the data provided by third-party data providers, ISS-ESG and MSCI, as well as research conducted by in-house analysts.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable - The Sub-Fund did not make any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Not applicable - The Sub-Fund did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable - The Sub-Fund did not make any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable - The Sub-Fund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies

- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	18,510.27	99.98	41,477.96	99.16
1.1.2	Scope 2 GHG emissions	14,509.99	99.98	16,067.66	99.16
1.1.3	Scope 3 GHG emissions	451,128.97	99.98	457,691.83	98.11

1.14	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	0.00	98.80

The Sub-Fund reported the PAI data above using the weights of holdings held in the Sub-Fund, enterprise values and the Sub-Fund's net assets as of the end of December 2022

and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

- #1.3 (GHG intensity of investee companies): With regard to the GHG intensity, the Sub-Fund's emissions were higher than those of the Index. Currently, company-reported scope 3 GHG emission data is limited and available data includes estimates. For companies with higher emissions, the Investment Manager will continue to evaluate the data obtained from Data Providers and engage with the companies to encourage improvement.
- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 7.35% for this PAI which was slightly lower than 8.09% for the Index. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies with diverse businesses that include small proportion of fossil fuel-related activities and an energy company with its GHG reduction targets certified by the SBTi (Science Based Targets initiative). These companies either contribute to transition to renewable energy through their access to resources or in the process of transitioning from fossil fuel businesses.
- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported as 0% for both the Sub-Fund and the Index with the data coverage being close to 100%. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to find companies' disclosures on biodiversity impact or not and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.
- #1.13 (Board gender diversiry): The Investment Manager has focused on companies
 that emphasise the importance of diversity which resulted in the Sub-Fund's
 outperformance on the board gender diversity (16.99%) against the Index (16.76%).
 The Investment Manager will continue to engage with companies to encourage further
 improvement.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country
Nippon Telegraph and Telephone Corporation	Communication Services	5.03	Japan
Sony Group Corporation	Consumer Discretionary	4.82	Japan
Mitsubishi UFJ Financial Group, Inc.	Financials	4.71	Japan
Sumitomo Mitsui Financial Group, Inc.	Financials	3.42	Japan
Chiba Bank, Ltd.	Financials	3.22	Japan
FUJIFILM Holdings Corp	Information Technology	2.73	Japan
Shin-Etsu Chemical Co Ltd	Materials	2.52	Japan
Mitsubishi Estate Company, Limited	Real Estate	2.38	Japan
Daiwa House Industry Co., Ltd.	Real Estate	2.26	Japan
SCREEN Holdings Co., Ltd	Information Technology	2.22	Japan
Honda Motor Co., Ltd.	Consumer Discretionary	2.15	Japan
Nintendo Co., Ltd.	Communication Services	2.11	Japan
Toyota Industries Corp.	Industrials	2.11	Japan
DENSO CORPORATION	Consumer Discretionary	2.06	Japan
Chugai Pharmaceutical Co., Ltd.	Health Care	1.99	Japan

^{*} Top investments above were calculated based on the weights of holdings in the Sub-Fund as of the end of December 2022. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

Asset allocation describes the share of investments in

specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics

The Sub-Fund invested 98.4% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

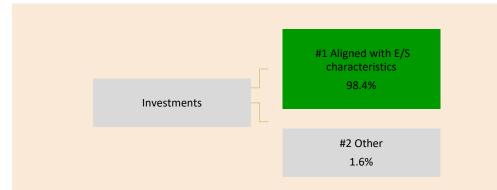

In addition, 64.8% of the Sub-Fund's assets have positively contributed to the reduction of GHG emissions, which was calculated as the aggregate weight of the companies whose projected GHG emissions in 2050 were lower in comparison to the carbon budgets for the IEA (International Energy Agency) SDS (Sustainable Development Scenario) by using data from a third party data provider, ISS-ESG.

The Sub-Fund did not make any sustainable investments at this time.

#2 Other

The remaining 1.6% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the weights of holdings held in the Sub-Fund as of the end of December 2022 to calculate the allocations above.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	2.78
Communication Services	Telecommunication Services	5.03
Consumer Discretionary	Automobiles & Components	4.92
Consumer Discretionary	Consumer Discretionary Distrib	3.77
Consumer Discretionary	Consumer Durables & Apparel	9.08
Consumer Staples	Consumer Staples Distribution	1.58
Consumer Staples	Food, Beverage & Tobacco	0.07
Energy	Energy	1.41
Financials	Banks	12.79
Financials	Financial Services	1.13
Financials	Insurance	3.33
Health Care	Pharmaceuticals, Biotechnology	5.30
Industrials	Capital Goods	14.63
Industrials	Transportation	5.20
Information Technology	Semiconductors & Semiconductor	7.01
Information Technology	Software & Services	3.09
Information Technology	Technology Hardware & Equipmen	4.89
Materials	Materials	5.48
Real Estate	Real Estate Management & Devel	6.95

^{*}The proportion above was calculated based on the weights of holdings in the Sub-Fund as of the end of December 2022. The denominator includes cash held as ancillary liquidity.

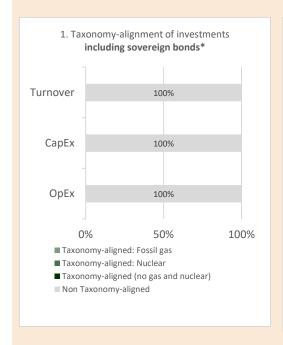

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

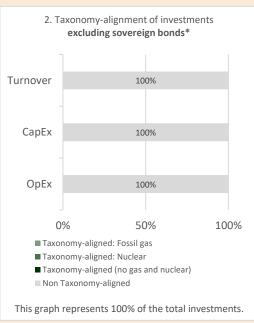

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable - The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

Not applicable - The Sub-Fund did not make any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was recategorised as an Article 8 fund within the meaning of SFDR in November 2022 and, as part of its transition, the Investment Manager has made some changes to the Sub-Fund's portfolio. The Sub-Fund disposed of companies with high GHG emissions such as auto manufacturers, auto component manufacturers, energy company, steel manufacturer, shipping company and companies that are lagging in gender diversity with no outlook for improvement.

One of the Sub-Fund's holdings is a consumer discretionary company which is a leading company in gender diversity among its peers but has not yet signed up to the UNGC. Through its direct engagement with the company, the Investment Manager has learned that the company believed it was operating in compliance with the UNGC while it is not a signatory. The Investment Manager has presented its view on the importance of becoming a signatory with the formal disclosure obligations and monitoring processes in place. Through the engagement, the Investment Manager is of the view that the company will become a signatory to the UNGC in the near future and will keep monitoring the development of the company.

The Investment Manager has assigned a "Watchlist" rating to a financial institution due to deterioration in its proprietary ESG score stemming from the relatively low commitment from the company's management on social and governance issues. The Investment Manager has engaged with the company and will keep monitoring the company to assess whether the company has an intention to improve its social and governance commitment.

ANNEX

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Product name: Nomura Funds Ireland – Japan High Conviction Fund

Legal entity identifier: 549300J9GYEF5XW0TG70

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
• • Yes	• No				
investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
It made sustainable investments with a social objective:%	★ It promoted E/S characteristics, but did not make any sustainable investments				

To what extent were the environmental and/or social characteristics promoted by this financial product met

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics.

The environmental characteristic was pursued through focusing on issuers working towards achieving net zero GHG emissions by 2050 or sooner. Within its investment process, the Investment Manager has monitored and taken into account companies' current and future emissions in comparison to the carbon budgets for the International Energy Agency (IEA) Sustainable Development Scenario (SDS).

The social characteristic was pursued mainly through the exclusions applied for the Sub-Fund which limited the Sub-Fund's exposure in certain businesses and sectors such as alcohol, adult entertainment, gambling, nuclear weapons, thermal coal, tobacco and controversial weapons as well as compliance with the UN Global Compact principles.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

Contribution to reduction of greenhouse gas emissions:

GHG emissions per unit revenue: The weighted average scope 1 and 2 GHG intensity (scope 1 & 2 emissions per USD1 million of revenue) was 45.3 tonnes, whereas that of the TOPIX index (the "Index") was 91.82 tonnes.

Sustainable, fair and inclusive business practices:

- Management remuneration: 58.5% of the investee companies have disclosed their remuneration policies with emphasis on the relationship between remuneration and the effectiveness of management as opposed to 29.6% of the companies in the Index.
- Percent women on the corporate board: The percentage of female directors was 16.21% as opposed to 16.76% of the companies in the Index.
- Compliance with UN Global Compact: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2022 and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used the data provided by third-party data providers, ISS-ESG and MSCI, as well as research conducted by in-house analysts.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable - The Sub-Fund did not make any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable - The Sub-Fund did not make any sustainable investments.

Sustainability indicators measure

environmental or

social characteristics promoted by the

financial product are

how the

attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable - The Sub-Fund did not make any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable - The Sub-Fund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies

- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	1,827.64	100.00	27,907.02	99.35
1.1.2	Scope 2 GHG emissions	4,317.01	100.00	11,168.48	99.35
1.1.3	Scope 3 GHG emissions	91,940.58	100.00	315,607.34	98.41

1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.01	75.53	0.14	89.94
1.6.8	NACE Code H (Transportation and Storage)	N/A	75.53	5.08	89.94
1.6.9	NACE Code L (Real Estate Activities)	N/A	75.53	0.14	89.94
1.7	Activities negatively affecting biodiversity- sensitive areas	0.00	100.00	0.00	99.02
1.8	Emissions to water	7.31	22.13	5.16	32.57
1.9	Hazardous waste ratio	0.00	10.79	10.17	28.05
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.15	98.96
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	66.27	100.00	47.17	97.65
1.12	Unadjusted gender pay gap	19.20	5.32	24.41	3.64
1.13	Board gender diversity	16.82	100.00	16.76	98.96
1.14	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	99.02

The Sub-Fund reported the PAI data above using the quarter-end average weights of holdings held in the Sub-Fund in 2022, the Sub-Fund's net assets as of the end of December, and enterprise values and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported as 0% for both the Sub-Fund and the Index with the data coverage being approximately 100%. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to find companies' disclosures on biodiversity impact or not and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.
- #1.8 (Emissions to water): Based on the Data Provider's data, the Sub-Fund's weighed average emissions to water per EUR1 million invested were 7.31 tonnes and higher than those of the Index, 5.16 tonnes. The data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The major contributor to the higher emissions of the Sub-Fund was a chemical company and there was a discrepancy between the company reported emission figure and the data used by the Data Provider for this calculation. The Investment Manager will engage with both the company and the Data Provider to understand the appropriate impact of the Sub-Fund's emissions to water.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): The Investment Manager will engage with those companies that lack in processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines.
- #1.13 (Board gender diversity): The Investment Manager has amended its proxy
 voting standards whereby the Investment Manager will in principle vote against the reelection of the director who has been in the position of chairperson and president, etc.,
 if there is no female director in board members.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

What was the asset allocation?

#1 Aligned with E/S characteristics

The Sub-Fund invested 96.9% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

In addition, 62.7% of the Sub-Fund's assets have positively contributed to the reduction of GHG emissions, which was calculated as the aggregate weight of the companies whose projected GHG emissions in 2050 were lower in comparison to the carbon budgets for the IEA (International Energy Agency) SDS (Sustainable Development Scenario) by using data from a third party data provider, ISS-ESG.

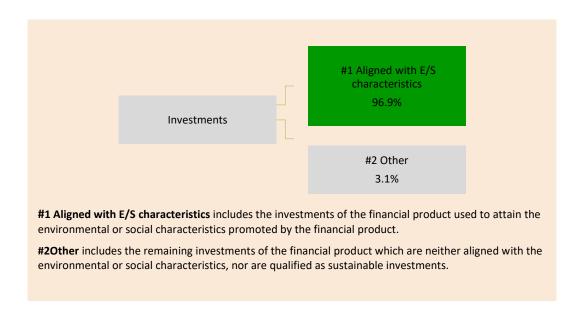

The Sub-Fund did not make any sustainable investments at this time.

#2 Other

The remaining 3.1% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

Asset allocation describes the share of investments in specific assets.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	0.26
Communication Services	Telecommunication Services	0.64
Consumer Discretionary	Automobiles & Components	3.03
Consumer Discretionary	Consumer Durables & Apparel	2.90
Consumer Discretionary	Retailing	4.89
Consumer Staples	Food & Staples Retailing	1.45
Consumer Staples	Household & Personal Products	9.42
Financials	Diversified Financials	0.98
Health Care	Health Care Equipment & Services	14.27
Health Care	Pharmaceuticals, Biotechnology	5.12
Industrials	Capital Goods	18.33
Industrials	Commercial & Professional Services	9.38
Information Technology	Semiconductors & Semiconductor Equipment	1.95
Information Technology	Software & Services	8.61
Information Technology	Technology Hardware & Equipment	7.82
Materials	Materials	5.84
Real Estate	Real Estate	1.97

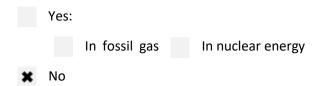

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

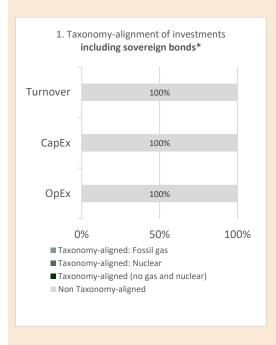

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

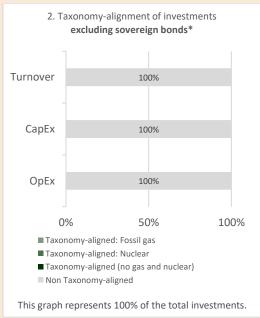

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

-

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable - The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

Not applicable - The Sub-Fund did not make any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To achieve the target of carbon neutral in 2050 worldwoide, the Investment Manager believes that it is important to further accelerate the reduction of GHG emissions among companies that are already deemed to be contributing to the environmental characteristics. Based on this belief, the Investment Manager seeks to understand each company's carbon neutral targets and engage with them to encourage Science Based Targets (SBT) accreditation. One of the Sub-Fund's holdings is a medical device manufacturer and previously it had only set a target of reducing its GHG emissions by 50% by 2025 without a carbon-neutral target or target alignd with SBT. Through the engagement with the company since 2021, the Investment Manager had asked the company to demonstrate its commitment to become carbon neutral. In 2022, the Investment Manager has confirmed that the company has disclosed its target to become carbon neutral by 2040 in its latest annual report, and also that a commitment to SBT certification has been submitted and a review application would be filed in March 2024.

The Investment Manager believes that diversity is key to create a welcoming and efficient working environment for everyone and to make effective decisions to meet diverse customer needs and expand demand over the medium to long term. During the reference period, the Investment Manager has introduced a new standard in its proxy voting standards to vote against a proposal for re-electing the director who has been in the position of chairperson and president, etc., if there is no female director in board members. One of the Sub-Fund's holdings is an outdoor and sports equipment manufacturer. The Investment Manager has engaged with the company on multiple ESG topics but has particularly focused on the board diversity, which has been one of the main reasons for its rating of "Investible with Engagement", within its engagement since 2022. Although there are currently no women on the company's board of directors, the Investment Manager has confirmed through its dialogue with the company that the company is in the process of electing a female director.

One of the Sub-Fund's holdings is a world-leading manufacturer of electric motors used in hard-disk drives, electric appliances, automobiles and commercial and manufacturing equipment. Due to the nature of the company as a family business, its governance structure has been less effective. Although the company's board has a relatively high female ratio, none of its independent directors has experience of managing a company and the Investment Manager has questioned the board's ability to effectively navigate the company. The company has also struggled to develop successors after its founder. The Investment Manager has engaged with the company to address the issues above. Through engagements, the Investment Manager had previously assessed that the company was making appropriate efforts to solve these issues but the speed and the extent of the progress have not been favourable and, therefore, the Investment Manager will keep monitoring the developments closely.

Disclaimer

Sustainable investment objective

Did this financial product have a sustainable investment objective?			
•• X Yes	• No		
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of		
It made sustainable investments with a social objective: 11.9%	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund has sustainable investment as its investment objective. In order to achieve its sustainable investment objective, the Sub-Fund invested in securities of issuers that the Investment Manager viewed as contributing to environmental and/or social objectives. The environmental and social objectives of the Sub-Fund are to contribute to:

Environmental objectives:

- Climate Mitigation Own Operations
- Climate Mitigation Enabling Activities
- Climate Adaptation
- Efficient use of raw materials
- · Sustainable use of water and land
- · Minimizing waste production
- Mitigating impact on biodiversity
- Support the cicular economy

Social objectves:

- Tackling inequality
- Fosters social cohesion
- Encourages social integration
- Investment in human capital
- Investment in economically or socially disadvantaged communities

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the above environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding strategies are further described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

The summary of the sustainable investments made by the Sub-Fund aligned with the above environmental and/or social objectives is below:

Environmental objectives:

- Climate Mitigation Own Operations
 - Sustainable investments in this objective have made commitments to reduce GHG emissions, which in most cases are either SBTi approved or in line with the commitments of the Paris Agreement. Companies invested have made medium and long term commitments to GHG reductions, track their GHG emissions on a yearly basis and have concrete plans towards their planned targets.
- Climate Mitigation Enabling Activities
 - Sustainable investments in this objective have offered as their economic activity products or services that helped their customers reduce their GHG emission profile. The largest exposure in this objective was in renewable power companies that generate a majority of their electricity through wind or solar generating capacity.
- · Efficient use of raw materials
 - Sustainable investments in this objective have industry leading processes to reduce raw materials used in their production process.
- Sustainable use of water and land
 - Sustainable investments in this objective manufacture products that help consumers reduce water usage, such as the installation of water saving fixtures in the home.
- Minimizing waste production
 - Sustainable investments in this objective reduced [significant amount of] waste production in their own operations. For example, reducing food waste in a food service distribution.
- Support the cicular economy
 - Sustainable investments in this obejctive are committing to increasing the amount of recycled or recyclable materials in their products.

Social objectves:

- Tackling inequality
 - Sustainable investments in this objective have had strong commitments and measurable targets to equality, diversity and inclusion within their employee base.
- Fosters social cohesion
 - Sustainable investments in this objective have provided services such as basic internet access in underserved areas.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- Encourages social integration
 - Sustainable investments in this objective provided services to inform and engage minority populations where their native language services were not otherwise available.
- Investment in human capital
 - Sustainable investments in this objective contributed to the development, training and education of society.
- Investment in economically or socially disadvantaged communities
 - Sustainable investments in this objective provided services such as financing, healthcare, internet service to economic or socially disadvantaged communities.

The extent of the Sub-Fund's sustainability outcome and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as below:

- Greenhouse gas (GHG) emissions: The weighted average scope 1 and 2 GHG emissions was 2,346,761 tonnes.
- GHG intensity: The weighted average scope 1 & 2 GHG intensity (scope 1 and 2 GHG emissions per USD1 million of revenue) was 359.6 tonnes.
- Uncompensated health care provided to low income communities*: The uncompensated health care per USD1 million revenue was USD36,957. Uncompensated health care are health care sercives provided for free to those who cannot afford these services otherwise. The calculation uses aggregate uncompensated health care for 2022 and revenue figures as of the end of December 2022. The Investment Manager calculated the weighted average of the uncompensated health care for the three issuers that align with this objective as of the end of December 2022.

*Although the Sub-Fund has described to use "discounted health care provided to low income communities" as one of the sustainability indicators in Annex 1 attached to the Sub-Fund's Supplement, what is reported by investee companies is the amount of uncompensated health care provided to low income communities. Therefore, the Investment Manager is using uncompensated health care provided instead of discounted health care provided in this report.

Please note that the sustainability indicator data generally becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. Unless otherwise stated, the data has been calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2022, and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports as well as data provided by a third-party data provider, Sustainalytics.

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account reported data and data provided by a third party data provider, Sustainalytics, where available.

How were the indicators for adverse impacts on sustainability factors taken into account?

The following principal adverse impact (PAI) indicators were taken into account as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) as assessed by the Investment Manager using inputs from third-party providers (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Board gender diversity

The Investment Manager has also taken into account other relevant indicators depending on the business activities and behaviours of a company. The Investment Manager has monitored the availability of data to identify companies the Investment Manager would engage with. These engagements include requesting disclosure and robust procedures to mitigate PAIs and take place on an ongoing basis.

Please note that data from the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines as assessed by the Investment Manager using inputs from third-party data providers (threshold 0%)

For the following PAI indicators, the Investment Manager's analysts consider the PAI for each investment of the Sub-Fund to understand and mitigate the impacts. Where quantitative data was available, the Investment Manager sought to invest in companies with lower negative impacts when other characteristics (such as contribution to environmental or social objectives) were similar. However, data continues to be limited for PAIs, particularly for US based investee companies. In these situations, the Investment Manager analysed the company's goals, policies and activities to judge the company's impact on PAIs qualitatively. Where there are concerns, the Investment Manager's analysts document how the company plans on mitigating or the company's initiatives to confirm if the investments still qualify as sustainable investments. The Investment Manager used sources such as company sustainability reports and filing, as well as a third party provider, Sustainalytics, to perform this analysis.

- GHG emissions (Scope 1 GHG emissions, and Scope 2 GHG emissions, Scope 1&2 GHG emissions)
- Scope 1&2 Carbon footprint
- Scope 1&2 GHG intensity of investee companies

- Exposure to companies active in the fossil fuel sector
- Board gender diversity
- Share of securities not issued under Union legislation on environmentally sustainable bonds
- Number of days lost to injuries, accidents, fatalities or illness

Please note that data from the third party provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

The list includes the

investments constituting the greatest proportion of investments of the financial product during the reference period

which is:

1st January 2022 to 31st December 2022.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Cash	N/A	7.01	N/A
CLEARWAY ENERGY 4.75% 03/15/28	Utility	1.68	USA
NEXTERA ENERGY 3.875% 10/15/26	Utility	1.66	USA
PATTERN ENERGY O 4.5% 08/15/28	Utility	1.54	USA
ATLANTICA SUST 4.125% 06/15/28	Utility	1.51	USA
TERRAFORM POWER 4.75% 01/15/30	Utility	1.45	USA
BIG RIVER STEE 6.625% 01/31/29	Basic Industry	1.44	USA
SUNNOVA ENERGY 5.875% 09/01/26	Utility	1.43	USA
LEEWARD RENEWAB 4.25% 07/01/29	Utility	1.26	USA
HCA INC 5.375% 09/01/26	Healthcare	1.25	USA
DCP MIDSTREAM 5.125% 05/15/29	Energy	0.94	USA
CCO HLDGS LLC/CA 4.5% 08/15/30	Media	0.94	USA
CONSTELLIUM SE 3.75% 04/15/29	Basic Industry	0.90	USA
SPRINT CAPITAL 8.75% 03/15/32	Telecommunications	0.84	USA
TENET HEALTHCA 5.125% 11/01/27	Healthcare	0.83	USA

*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity. The Sub-Fund had a large inflow during a period of high market volatility in Q1 of the reference period, which resulted in a high cash position on a quarter-end average basis, as set out in the table above.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

#1 Sustainable

The Investment Manager has invested 92.6% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

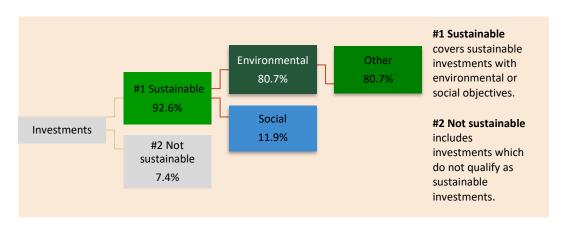

#2 Not sustainable

Asset allocation describes the share of investments in specific assets.

The remaining 7.4% of investments were primarily cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

Within this 7.4%, a small proportion constitutes certain legacy debt instruments held by the Sub-Fund from the time prior to the recategorisation of the Sub-Fund as an Article 9 fund within the meaning of SFDR in November, 2021. The Investment Manager continues to seek to divest such legacy debt instruments and has not written off such holdings taking into account the best interest of shareholders and potential future increase in liquidity. The proportion of legacy debt instruments account for 0.40% of the Sub-Fund using the quarter-end average weights of Sub-Fund holdings, however, as at the end of December 2022, the proportion of such legacy debt instruments amounted to 0.24%.of the Sub-Fund. These holdings did not affect the delivery of the sustainable investment objective in the reference period due to the limited proportion.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Automotive	Auto Loans	1.72
Automotive	Auto Parts & Equipment	3.13

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

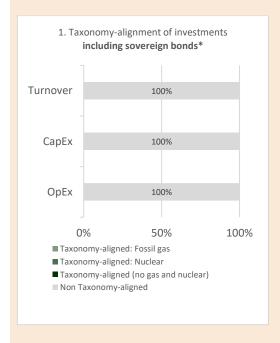

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

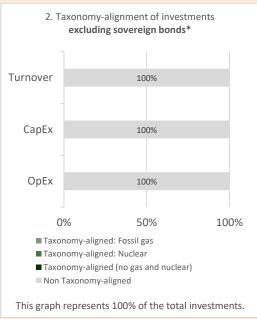

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 80.7%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 11.9%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were primarily cash held as ancillary liquidity, along with a small proportion of certain legacy debt instruments as further detailed under the section "What was the proportion of sustainability-related investments?". They did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and/or the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager conducts deep dive engagements to address particular sustainability-related issues. For example, initiatives and timelines for climate change mitigation plans were discussed to ascertain how committed companies were to their GHG emission reduction goals and their ability to achieve those goals. The Investment Manager conduted 12 engagements in the first half of the year and 13 in the second half of the year.

In Q4 2022, the Sub-Fund started investing in a company that is a provider of food, facilities and other services. As a food services provider, food waste is one of the key issues for the company, and the Investment Manager assessed that the company was making significant progress in contributing to the objective of minimizing waste production, which is one of the environmental objectives of the Sub-Fund. Reducing food waste contributes to the goal of responsible consumption and production, and consequently reduces GHG emissions from the production of food. The company has set a goal of reducing food loss and waste in its US operations by 50% by 2030 from its 2015 baseline (approximately 48 million pounds). In 2021, the company's measured food waste in the US was 15.5 million pounds. Although the Investment Manager expects that a significant portion of this improvement was due to the reduction in business activity due to the COVID-19 pandemic, the company was already ahead of its goal prior to the pandemic. The Investment Manager expects the company to make continued progress and contribution in this area.

The Sub-Fund has reduced and eventually eliminated its position in a gaming and hospitality company in 2022. The Investment Manager had initially assessed the

company as a sustainable investment contributing to climate change mitigation by reducing GHG emissions through it's business operations. However, through further engagement with the company, the Investment Manager has determined that there was limited improvement in sustainability-related disclosures and a lack of process to track the progress of its GHG emission reduction, which were unlikely to improve in the near future given the level of the company's commitment on ESG issues. The Investment Manager has determined that the company is no longer meeting the sustainable investment criteria based on its contribution assessment. As a result, the Investment Manager has divested its position in the issuer.

ANNEX

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

Yes	• No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted contribution to reduction of greenhouse gas (GHG) emissions and sustainable, fair and inclusive business practices as its environmental and social characteristics. The Sub-Fund particularly focused on the areas covered by the following six "Impact Goals".

Impact Goals:

- 1. Mitigate Climate Change
- 2. Mitigate Natural Capital Depletion
- 3. Eliminate Communicable Disease
- 4. Mitigate the Obesity Epidemic
- 5. Global Access to Basic Financial Services
- 6. Global Access to Clean Drinking Water

The environmental characteristic, mainly represented by Impact Goals 1 and 2 above, was pursued as explained below:

- 1. Mitigate Climate Change The Sub-Fund has:
 - Consistently shown forecast compliance with the International Energy Agency (IEA) Sustainable Development Scenario (SDS) for climate change (according to ISS-ESG), that is global warming kept well below 2 degrees centigrade. While the Sub-Fund's emissions are low, the investments have also included companies whose activities actively reduce the emissions of others through product efficiency improvement or the stimulation of investment in low carbon power generation.
 - Invested in companies that offer products to improve the efficiency of buildings (heating and cooling) which account for 30-40% of carbon emissions globally.
 - Invested in a leading operator of renewable power generation in the USA and several very low carbon emissions companies including one that has committed to ultimately mitigating all the carbon emissions it has produced in its history.
 - The Investment Manager has also engaged with several companies to encourage them to set Science Based Targets (SBTs) for GHG emission reduction.
- 2. Mitigate Natural Capital Depletion The Sub-Fund has:
 - Engaged with a company that consumes palm oil to ensure that the impact of palm oil production on deforestation is appropriately monitored and mitigated.

The social characteristic, mainly represented by Impact Goals 3, 4, 5 and 6 above, was pursued as explained below:

- 3. Eliminate Communicable Disease The Sub-Fund has:
 - Invested in a leading Covid-19 vaccine company and a company that supplies
 equipment and consumables to the pharmaceutical industry including for Covid-19
 testing. The Sub-Fund also invested in a health insurance company that helps
 support the public health primarily in the USA.
- 4. Mitigate the Obesity Epidemic The Sub-Fund has:
 - Invested in a company that produces insulin and other diabetes related treatments as well as a drug to help people lose weight because diabetes is often a consequence of obesity.
- 5. Global Access to Basic Financial Services The Sub-Fund has:
 - Invested in a company that supports payments infrastructure worldwide.
- 6. Global Access to Clean Drinking Water The Sub-Fund did not invest in companies specifically addressing this Impact Goal during the reference period.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

Contribution to reduction of greenhouse gas emissions:

of HG emissions per unit revenue: The weighted average scope 1 and 2 GHG intensity (scope 1 and 2 GHG emissions per USD1 million of revenue) was 44.25 tonnes. The highest emitting companies in the MSCI All Country World Index (the "Index") have the GHG intensity of approximately 20,000 tonnes and the average GHG intensity for the Index was 151 tonnes. The Sub-Fund's highest emitting company had the GHG intensity of 2,480 tonnes but the company is also a very large generator of renewable power.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable, fair and inclusive business practices:

- Management remuneration: The weighted average annual total compensation for the Sub-Fund's holdings' CEOs (or equivalent) was USD28.9 million including stock awards of USD20 million. This compares to USD24.5 million in total compensation and USD15.4 million in stock awards for the Index companies. Many companies in the Index do not provide this remuneration data, with transparency typically limited in emerging markets. Therefore, the Index averages reflect largely developed market companies.
- Percent women on the corporate board: The weighted average percent of female directors is 25% for the Sub-fund compared to 25% for the Index. While the Sub-Fund has remained roughly unchanged on this metric since the previous period, the Index average has improved by around 5%.
- Compliance with UN norms: No holdings fell outside compliance with UN Global Compact through the year.
- Exposure to controversial weapons: No holdings had exposure to controversial weapons through the year.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2022, and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and a third-party data provider, MSCI.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable - The Sub-Fund did not make any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable - The Sub-Fund did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable - The Sub-Fund did not make any sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable - The Sub-Fund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- · Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- · Activities negatively affecting biodiversity-sensitive areas
- Emissions to water

- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	362.05	100.00	4,323.82	99.72
1.1.2	Scope 2 GHG emissions	255.67	100.00	895.61	99.72

1.6.3	NACE Code C (Manufacturing)	0.15	97.96	0.95	89.91
1.6.4	NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply)	12.62	97.96	8.58	89.91
1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	N/A	97.96	1.02	89.91
1.6.6	NACE Code F (Construction)	0.03	97.96	0.20	89.91
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.06	97.96	0.61	89.91
1.6.8	NACE Code H (Transportation and Storage)	N/A	97.96	2.02	89.91
1.6.9	NACE Code L (Real Estate Activities)	N/A	97.96	0.44	89.91
1.7	Activities negatively affecting biodiversity- sensitive areas	0.00	100.00	0.18	99.82
1.8	Emissions to water	0.15	7.56	2.57	11.27
1.9	Hazardous waste ratio	0.02	30.63	336.24	36.60
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.73	99.82
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	45.44	100.00	60.46	99.26
1.12	Unadjusted gender pay gap	9.26	42.66	11.62	24.38
1.13	Board gender diversity	32.57	100.00	32.02	99.80
1.14	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.40	99.82

The Sub-Fund reported the PAI data above using the quarter-end average weights of holdings held in the Sub-Fund in 2022, the Sub-Fund's net assets as of the end of December, and enterprise values and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

#1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 0.88% for this PAI which was much lower than that of the Index. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies heavily involved in the renewable energy transition.

- #1.6.4 (NACE Code D): Regarding NACE Code D (Electricity, Gas, Steam and Air Conditioning Supply), the Sub-Fund is invested in a company that makes air conditioning equipment, which has resulted in the PAI being slightly higher than the index. However, this company contributes to improve the emissions from buildings by supplying high efficiency air conditioning equipment. Therefore, the Investment Manager views the company as contributing to the reduction of GHG emissions.
- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported approximately 0% for both the Sub-Fund and the Index with the data coverage being approximately 100%. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to find companies' disclosures on biodiversity impact or not and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): While the Sub-Fund showed the favourable impact compared to the Index, the Investment Manager sees this as an area for improvement and will keep engaging with issuers without a process and compliance mechanisms.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impact of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the Sub-Fund. The Index is a broad market index and not consistent with the environmental and social characteristics promoted by the Sub-Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	7.15	USA
Apple Inc.	Information Technology	6.61	USA
Thermo Fisher Scientific Inc.	Health Care	5.23	USA

Ross Stores, Inc.	Consumer Discretionary	3.75	USA
Cigna Corporation	Health Care	3.74	USA
Amazon.com, Inc.	Consumer Discretionary	3.16	USA

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

What was the asset allocation?

#1 Aligned with E/S characteristics

The Sub-Fund invested 94.5% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

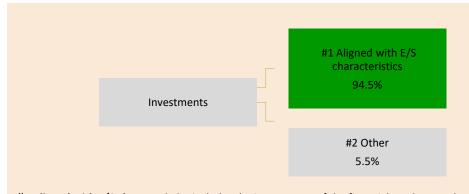

In addition, 78.5% of the Sub-Fund's assets have positively contributed to the reduction of GHG emissions, which was calculated as the aggregate weight of the companies whose projected GHG emissions in 2050 were lower in comparison to the carbon budgets for the IEA (International Energy Agency) SDS (Sustainable Development Scenario) by using data from a third party data provider, ISS-ESG.

The Sub-Fund did not make any sustainable investments at this time.

#2 Other

The remaining 5.5% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Asset allocation describes the

investments in specific assets.

share of

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	8.75
Consumer Discretionary	Consumer Durables & Apparel	9.60

Financials	Diversified Financials	3.94
Financials	Insurance	7.18
Health Care	Health Care Equipment & Services	4.75
Health Care	Pharmaceuticals, Biotechnology	11.53
Industrials	Capital Goods	10.10
Information Technology	Semiconductors & Semiconductor Equipment	4.08
Information Technology	Software & Services	12.69
Information Technology	Technology Hardware & Equipment	6.61
Utilities	Utilities	0.83

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

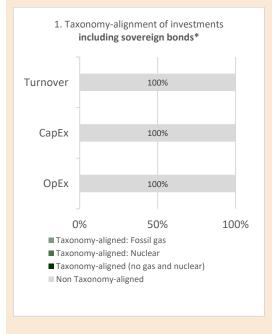

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

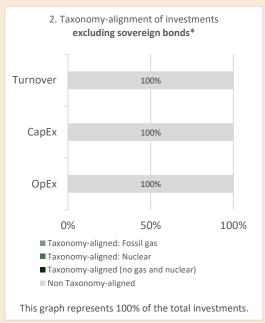

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable - The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

Not applicable - The Sub-Fund did not make any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager undertook a total of 51 engagements with portfolio companies during the reference period. There were 14 in Europe, 27 in North America, 10 in Asia ex Japan, none in Africa and none in Japan. This broadly reflects the location of the headquarters of the investee companies held by the Sub-Fund during the period. 20 of the engagements included issues relating to the environment and 27 included issues relating to social considerations. As further described in Annex 1 attached to the Sub-Fund's Supplement, the Investment Manager particularly focuses on the areas covered by its six Impact Goals to promote the environmental and social characteristics of the Sub-Fund. Among the engagements undertaken, 11 related to Mitigate Climate Change, 2 related to Mitigate Natural Capital Depletion, 2 related to Eliminate Communicable Disease, 1 related to Mitigate the Obesity Epidemic, 2 related to Global Access to Basic Financial Services and 1 related to Global Access to Clean Drinking Water. The total number of Impact Goal-related engagements was 19, fewer than the total number of engagements as the Impact Goals relate to a narrower set of engagement topics than the broader subjects tackled by the Investment Manager's engagement activity.

The Sub-Fund has kept portfolio-level carbon emissions below those required to limit the potential global temperature increase to the target of the IEA (International Energy Agency) SDS (Sustainable Development Scenario). The portfolio is estimated to be approximately 33% better than the necessary SDS emissions budget by 2050, which means that the Sub-Fund is well within the necessary emissions to achieve a potential temperature increase of 1.5 degrees centigrade. These estimates were calculated using the analysis by a third-party data provider (source: ISS-ESG) and the portfolio based on average holding weights for the year.

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

The **EU Taxonomy** is a classification

ANNEX

Product name: Nomura Funds Ireland – Global Sustainable Equity Fund Legal entity identifier: 213800J5LRHOLZRU5724

Sustainable investment objective

Did this financial product have a sustainable investment objective?				
•• X Yes	• No			
It made sustainable investments with an environmental objective: 50.5% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
★ It made sustainable investments with a social objective: 48.6%	It promoted E/S characteristics, but did not make any sustainable investments			

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive impact on society (meaning the environment, society, customers, suppliers, employees and investors). Based on the sustainable investment objective above, the Investment Manager sought to invest in companies with the greatest total positive impact on all stakeholders by mainly focusing on the following six UN Sustainable Development Goals ("SDGs") aligned "Impact Goals":

- 1. Mitigate Climate Change
- 2. Mitigate Natural Capital Depletion
- 3. Eliminate Communicable Disease
- 4. Mitigate the Obesity Epidemic
- 5. Global Access to Basic Financial Services
- 6. Global Access to Clean Drinking Water

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG ratings, exclusions, SDGs assessment, contribution assessment and proprietary total stakeholder impact assessment, and categorised into the appropriate contribution category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding strategies are further described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

As further described under the section "How did the sustainability indicators perform?", the Investment Manager has measured the impact of the Sub-Fund's investments through the metric of impact of the underlying holdings per USD 1 million invested in the Sub-Fund. The Investment Manager has observed positive contribution across all six Impact Goals particularly in the social Impact Goals of 3) Eliminate Communicable Disease and 4) Mitigate the Obesity Epidemic.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as below (impact of the underlying holdings per USD 1 million invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company's products and services: 157 tonnes relative to the MSCI All Country World Index (the "Index")
- Number of low income patients reached with drugs and treatments through company's access strategies: 24 patients
- Number of people reached with financial services that were previously unbanked: 114
- Litres of clean drinking water provided as a result of a company's technology: 1532 litres

The following indicators were not included as the sustainability indicators indicated within Annex 1 attached to the Sub-Fund's Supplement but have been added in this report to provide shareholders and potential investors with better understanding of the impact of the Sub-Fund's investments during the reference period. Some or all of the following indicators may not be relevant for future reference periods because of the idiosyncratic nature of the indicators that reflect certain particular investments held by the Sub-Fund during the current reference period.

- Number of diabetes patients treated: 5 patients
- Amount of industrial and precious metal recycled: 722 tonnes
- Financial amount of mortgages provided to low income and economically deprived population: USD 976.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2022, market capitalisation data as of 2022 December-end and the fiscal year-end impact data for 2021. Sustainability indicators above do not take

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports.

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

How were the indicators for adverse impacts on sustainability factors taken into account?

The following principal adverse impact (PAI) indicators were taken into account as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violations of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

The Investment Manager has also taken into account other relevant indicators depending on the business activities and behaviours of a company. The Investment Manager has monitored the availability of data to identify companies the Investment Manager would engage with. These engagements include requesting disclosure and robust procedures to mitigate PAIs and take place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water

- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	360.25	100.00	1,570.09	99.72

1.6.5	NACE Code E (Water Supply; Sewerage, Waste Management and Remediation Activities)	N/A	98.02	1.02	89.91
1.6.6	NACE Code F (Construction)	N/A	98.02	0.20	89.91
1.6.7	NACE Code G (Wholesale and Retail Trade; Repair of Motor Vehicles and Motorcycles)	0.02	98.02	0.61	89.91
1.6.8	NACE Code H (Transportation and Storage)	N/A	98.02	2.02	89.91
1.6.9	NACE Code L (Real Estate Activities)	N/A	98.02	0.44	89.91
1.7	Activities negatively affecting biodiversity- sensitive areas	0.00	100.00	0.18	99.82
1.8	Emissions to water	0.08	8.65	2.57	11.27
1.9	Hazardous waste ratio	0.09	33.81	336.24	36.60
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.73	99.82
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	43.39	100.00	60.46	99.26
1.12	Unadjusted gender pay gap	10.58	28.74	11.62	24.38
1.13	Board gender diversity	33.56	100.00	32.02	99.80
1.14	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.40	99.82

The Sub-Fund reported the PAI data above using the quarter-end average weights of holdings held in the Sub-Fund in 2022, the Sub-Fund's net assets as of the end of December, and enterprise values and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

#1.1.1 to 1.3 (GHG emissions, Carbon footprint and GHG intensity): All of these
PAls were significantly lower than those of the Index due to the Sub-Fund's focus
on the companies that have both lower operational GHG emissions and contribute
to reducing emissions through their products and services. GHG scope 3
emissions may become higher once the estimates are replaced by investee
companies' reported data.

- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 7.62% for this PAI which was lower than that of the Index. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies heavily involved in the renewable energy transition.
- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported as 0% or very minimum for the Sub-Fund and the Index with the data coverage being approximately 100%. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to find companies' disclosures on biodiversity impact or not, and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): While the Sub-Fund showed the favourable impact compared to the Index, the Investment Manager sees this as an area for improvement and will keep engaging with issuers without a process and compliance mechanisms.
- #1.12 & 1.13 (Unadjusted gender pay gap & Board gender diversity): While the Sub-Fund showed the favourable impacts compared to the Index, the Investment Manager sees these PAIs as areas for improvement. The Investment Manager will keep engaging with issuers to encourage further improvement.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country
Thermo Fisher Scientific Inc.	Health Care	4.14	USA
NextEra Energy, Inc.	Utilities	3.94	USA
Johnson Controls International plc	Industrials	3.89	Ireland
Mastercard Incorporated Class A	Information Technology	3.85	USA
Novo Nordisk A/S Class B	Health Care	3.85	Denmark
Microsoft Corporation	Information Technology	3.83	USA
Alphabet Inc. Class A	Communication Services	3.40	USA
Becton, Dickinson and Company	Health Care	3.28	USA
Cisco Systems, Inc.	Information Technology	3.24	USA
AIA Group Limited	Financials	3.04	Hong Kong

Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	3.04	Taiwan
AstraZeneca PLC	Health Care	2.85	UK
CVS Health Corporation	Health Care	2.68	USA
Medtronic Plc	Health Care	2.61	Ireland
Visa Inc. Class A	Information Technology	2.61	USA

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

What was the asset allocation?

#1 Sustainable

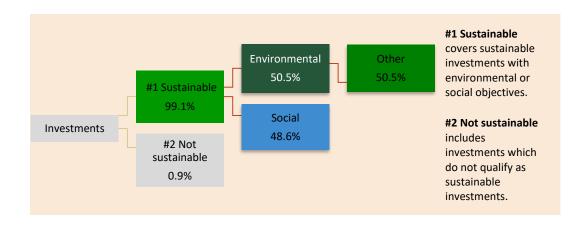

The Investment Manager has invested 99.1% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#2 Not sustainable

The remaining 0.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	3.40
Communication Services	Telecommunication Services	2.33
Consumer Discretionary	Automobiles & Components	0.73
Consumer Staples	Food, Beverage & Tobacco	2.21
Consumer Staples	Household & Personal Products	1.62
Financials	Banks	1.82
Financials	Diversified Financials	1.96

Asset allocation describes the share of investments in specific assets.

Financials	Insurance	7.77
Health Care	Health Care Equipment & Services	11.51
Health Care	Pharmaceuticals, Biotechnology	14.97
Industrials	Capital Goods	13.56
Information Technology	Semiconductors & Semiconductor Equipment	5.44
Information Technology	Software & Services	16.50
Information Technology	Technology Hardware & Equipment	3.99
Materials	Materials	3.72
Utilities	Utilities	7.54

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

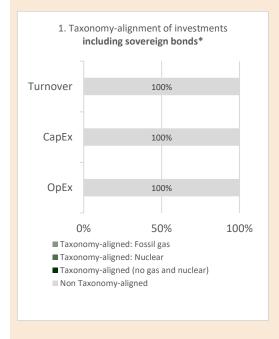

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

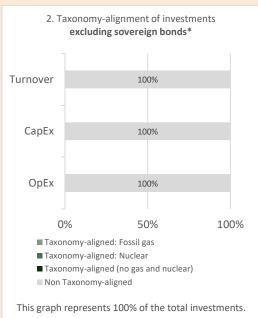

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:			
		In fossil gas	In	nuclear energy
×	No			

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 50.5%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 48.6%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager has taken following actions in each quarter from Q1 to Q4:

- 1. The Investment Manager undertook 41 engagements for impact with portfolio companies over the period. Of these, breakdown of engagements and the targeted Impact Goals are following: 6 were focused on Mitigate Climate Change, 3 were on Eliminate Communicable Disease, and 32 were on other sustainability matters. Other sustainability matters were related almost exclusively to the ongoing diversity & inclusion project where the Investment Manager surveyed all the companies it invests in on a range of metrics identified as being important with regard to diversity and inclusion.
- 2. The Investment Manager undertook 15 engagements for impact with portfolio companies over the period. Of these, breakdown of engagements and the targeted Impact Goals are following: 6 were focused on Mitigate Climate Change, 2 were on Eliminate Communicable Disease, 2 were on Global Access to Clean Drinking Water, 2 were on Mitigate Natural Capital Depletion, 1 was on Global Access to Basic Financial Services and 2 were on other sustainability matters.
- 3. The Investment Manager undertook 15 engagements for impact with portfolio companies over the period. Of these, breakdown of engagements and the targeted Impact Goals are following: 5 were focused on Mitigate Climate Change, 1 was on Mitigate the Obesity Epidemic and 9 were on other sustainability matters.
- 4. The Investment Manager undertook 12 engagements for impact with portfolio companies over the period. Of these, breakdown of engagements and the targeted Impact Goals are following: 4 were focused on Eliminate Communicable Disease, 3 Mitigate Climate Change, 1 was on Global Access to Basic Financial Services and 4 were on other sustainability matters.

During the reference period, the Sub-Fund divested from one holding which was no longer deemed to meet the criteria with regards to being a sustainable investment. The Sub-Fund had held a material position in a US pharmaceutical since its inception. While the company has suffered controversies in the past in relation to legacy operations and its MedTech business, the Investment Manager had viewed the company as a sustainable investment in the context of total impact of the company given its size and commitment to corporate social responsibility and its efforts to develop and distribute a COVID vaccine. However, the Investment Manager has determined that the actions taken by the company in the ongoing litigation (ringfencing by transferring the tort liabilities to a newly created subsidiary and subsequently pursue bankrupcy for the subsidiary) resulted in the company no longer meeting the criteria set for the Investment Manager's proprietary Total Stakeholder Impact Framework. Furthermore, the Investment Manager has confirmed its view of the company not meeting the criteria for the Total Stakeholder Impact Framework through engagements with the company's management on both this matter and supporting access to its COVID vaccine.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: American Century Global Small Cap Equity Fund

Legal entity identifier: 213800ZBE2LLV7F4VR97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
Yes	• × No		
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- Exclusions The Investment Manager has excluded companies that did not meet
 fundamental responsibilities in the areas of human rights, labour, environment, and
 anti-corruption as well as avoiding companies with exposure to controversial
 weapons, tobacco production, and thermal coal extraction.
- ESG Assessment The Investment Manager has taken into account material environmental, social and/or governance factors of each issuer in the investment decision-making process. The Sub-Fund systematically integrated material ESG factors in a disciplined investment process using a proprietary ESG research framework. The Investment Manager utilised the proprietary ESG assessment, comprised of an ESG score and trend signal, and invested in companies with ESG scores in the top 75% of each's respective universe or exhibit a positive trend signal

toward more sustainable business practices as assessed by the Investment Manager.

 Engagement – The Investment Manager has also, to a limited extent, invested in companies with an ESG score in the bottom 25% of each's respective universe based on the Investment Manager's assessment that the companies were transitioning to more sustainable business practices. The Investment Manager has actively engaged with these transitioning investee companies. The Investment Manager, based on its assessment, did not identify any investee companies assessed to have newly identified severe controversies as determined by a thirdparty data provider.

The extent of the Sub-Fund's compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund's Supplement is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

- Exclusions No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anticorruption nor to companies with exposure to controversial weapons, tobacco production or thermal coal extraction.
- ESG Assessment The proportion of the portfolio, excluding cash, short-term debt instruments, and collective investment schemes ("Excluded Investments"), invested in companies with ESG scores in the top 75% of each's respective universe was 92%. The proportion of companies with ESG scores in the bottom 25% of each's respective universe was 8%. These proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund during the reference period.
- Engagement As at the end of December 2022, the aggregate number of
 companies engaged with, as a result of the Investment Manager's ESG
 assessment, was 35. This includes those investee companies assessed by
 the Investment Manager as having ESG scores in the bottom 25% of each's
 respective universe. No investee companies were assessed as having a
 newly identified severe controversy in the reference period.

For the sustainability indicators above, the Investment Manager has used the Investment Manager's proprietary data, as well as data provided by third party providers such as FactSet and MSCI.

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable - The Sub-Fund did not make any sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable - The Sub-Fund did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable - The Sub-Fund did not make any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable - The Sub-Fund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) as assessed by the Investment Manager with inputs from third-party data providers (threshold 0%)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

Asset allocation describes the share of investments in

specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics

The Sub-Fund invested 98.5% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

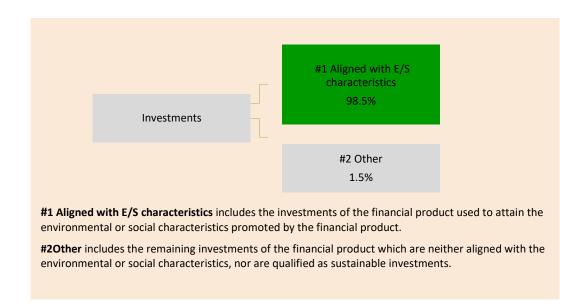

In addition, 90.6% of the Sub-Fund's assets have positively contributed to the environmental and/or social characteristics, which reflects the proportion of the portfolio invested in investee companies with ESG scores in the top 75% of each's respective universe.

The Sub-Fund did not make any sustainable investments at this time.

#2 Other

The remaining 1.5% of investments were unscreened investments for efficient portfolio management purposes, or cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

In which economic sectors were the investments made?

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

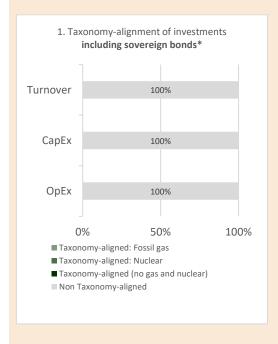

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

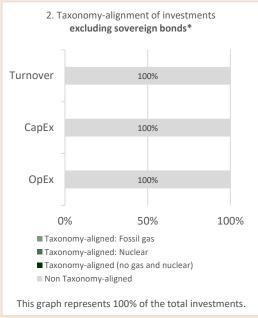

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable - The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

Not applicable - The Sub-Fund did not make any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Sub-Fund were unscreened investments for efficient portfolio management purposes, or cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, in the portfolio the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar, wind and geothermal power, recycling, and carbon capture. The Investment Manager has also identified companies held by the portfolio that contribute to healthcare innovation and pharmaceuticals, such as investments in companies engaged in the discovery, development and manufacture of treatments for rare conditions.

The Investment Manager engaged with 35 companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material ESG-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2022, the Investment Manager engaged with the management of investee companies on 21 different topics. The five topics most frequently addressed in engagements during

the period were climate change, human capital, labor practices and supply chain management, general governance and product quality and safety.

In most situations, engagement resulted in a better understanding of the sustainability risks facing the company and, more importantly, how company management is addressing those risks. For 18 engagements, the Investment Manager identified situations where further follow up is warranted. Pursuant to its policy, the Investment Manager will revisit and reengage with management on those situations.

- Exclusions The Investment Manager has excluded companies that did not meet
 fundamental responsibilities in the areas of human rights, labour, environment, and
 anti-corruption as well as avoiding companies with exposure to controversial
 weapons, tobacco production, and thermal coal extraction.
- ESG Assessment The Investment Manager has taken into account material environmental, social and/or governance factors of each issuer in the investment decision-making process. The Sub-Fund systematically integrated material ESG factors in a disciplined investment process using a proprietary ESG research framework. The Investment Manager utilised the proprietary ESG assessment, comprised of an ESG score and trend signal, and invested in companies with ESG scores in the top 75% of each's respective universe or exhibit a positive trend signal

toward more sustainable business practices as assessed by the Investment Manager.

 Engagement – The Investment Manager has also, to a limited extent, invested in companies with an ESG score in the bottom 25% of each's respective universe based on the Investment Manager's assessment that the companies were transitioning to more sustainable business practices. The Investment Manager has actively engaged with these transitioning investee companies. The Investment Manager has also engaged with investee companies that have newly identified severe controversies as determined by a third-party data provider.

The extent of the Sub-Fund's compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund's Supplement is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

- Exclusions No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with exposure to controversial weapons, tobacco production or thermal coal extraction.
- ESG Assessment The proportion of the portfolio, excluding cash, short-term debt instruments, and collective investment schemes ("Excluded Investments"), invested in companies with ESG scores in the top 75% of each's respective universe was 98%. The proportion of companies with ESG scores in the bottom 25% of each's respective universe was 2%. These proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund during the reference period.
- Engagement As at the end of December 2022, the aggregate number of companies engaged with, as a result of the Investment Manager's ESG assessment, was 35. This includes those investee companies assessed by the Investment Manager as having ESG scores in the bottom 25% of each's respective universe and one investee company assessed as having a newly identified severe controversy.

For the sustainability indicators above, the Investment Manager has used the Investment Manager's proprietary data, as well as data provided by third party providers such as FactSet and MSCI.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable - The Sub-Fund did not make any sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable - The Sub-Fund did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable - The Sub-Fund did not make any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable - The Sub-Fund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) as assessed by the Investment Manager with inputs from third-party data providers (threshold 0%)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics

The Sub-Fund invested 98.3% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

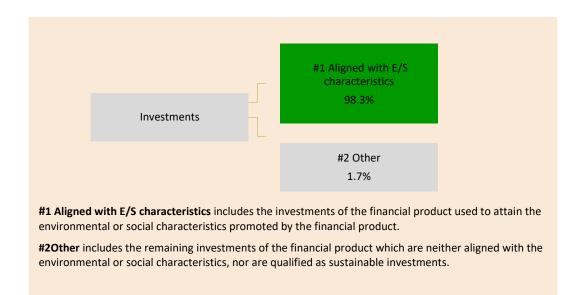

In addition, 96.3% of the Sub-Fund's assets have positively contributed to the environmental and/or social characteristics, which reflects the proportion of the portfolio invested in investee companies with ESG scores in the top 75% of each's respective universe.

The Sub-Fund did not make any sustainable investments at this time.

#2 Other

The remaining 1.7% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

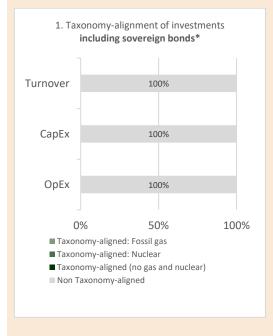

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

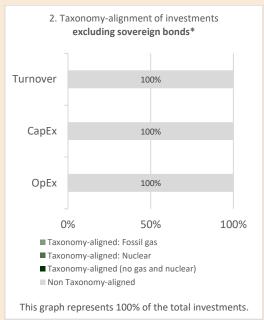

Did	the	financial	product	invest	in	fossil	gas	and/or	nuclear	energy	related
activ	vities	complyir	ng with th	ne EU Ta	axo	nomy	?				

	Yes:		
		In fossil gas	In nuclear energy
×	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable - The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

Not applicable - The Sub-Fund did not make any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, in the portfolio the Sub-Fund invested in companies that provide innovative and important solutions supporting alternative energy sources (e.g., blue hydrogen), energy efficiency in buildings, vehicle electrification, and others. The Investment Manager has also identified companies held by the portfolio that contribute to health and wellness, such as investment in companies focused on increasing access to preventive health screening and vaccinations.

The Investment Manager engaged with 35 companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material ESG-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2022, the Investment Manager engaged with the management of investee companies on 26 different topics. The five topics most frequently addressed in engagements during the period were climate change, human capital, ESG controversies, general governance and general ESG risk management.

In most situations, engagement resulted in a better understanding of the sustainability risks facing the company, and more importantly, how company management is addressing those risks. For 21 engagements, the Investment Manager identified situations where further follow up is warranted. Pursuant to its policy, the Investment Manager will revisit and reengage with management on those situations.

•

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?							
Yes	• × No						
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective						
It made sustainable investments with a social objective:%	■ It promoted E/S characteristics, but did not make any sustainable investments ■ The promoted E/S characteristics and not make any sustainable investments						

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager has promoted sustainable practices in the areas of the environment and society as its environmental and social characteristics through:

- Exclusions The Investment Manager has excluded companies that did not meet
 fundamental responsibilities in the areas of human rights, labour, environment, and
 anti-corruption as well as avoiding companies with exposure to controversial
 weapons, tobacco production, and thermal coal extraction.
- ESG Assessment The Investment Manager has taken into account material environmental, social and/or governance factors of each issuer in the investment decision-making process. The Sub-Fund systematically integrated material ESG factors in a disciplined investment process using a proprietary ESG research framework. The Investment Manager utilised the proprietary ESG assessment, comprised of an ESG score and trend signal, and invested in companies with ESG scores in the top 75% of each's respective universe as assessed by the Investment Manager.

• Engagement – For the current reference period, the Investment Manager, based on its assessment, did not invest in companies with an ESG score in the bottom 25% of each's respective universe. To the extent the Investment Manager invests in companies assessed to be in the bottom 25% of each's respective universe in future reference periods, it will actively engage with these transitioning investee companies. The Investment Manager has actively engaged with an investee company assessed to have a newly identified severe controversy, as determined by a third-party data provider.

The extent of the Sub-Fund's compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund's Supplement is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

- Exclusions No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anticorruption nor to companies with exposure to controversial weapons, tobacco production or thermal coal extraction.
- **ESG Assessment** The proportion of the portfolio, excluding cash, short-term debt instruments, and collective investment schemes ("Excluded Investments"), invested in companies with ESG scores in the top 75% of each's respective universe was 100%. The proportion of companies with ESG scores in the bottom 25% of each's respective universe was 0%. These proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund during the reference period.
- Engagement As at the end of December 2022, the aggregate number of companies engaged with, as a result of the Investment Manager's ESG assessment, was 15. There were no engagements resulting from investee companies with ESG scores in the bottom 25% of each's respective universe. The Investment Manager engaged with 1 investee company assessed by the Investment Manager as having a newly identified severe controversy.

For the sustainability indicators above, the Investment Manager has used the Investment Manager's proprietary data, as well as data provided by third party providers such as FactSet and MSCI.

The Sub-Fund systematically integrated material ESG factors in a disciplined investment process using a proprietary ESG research framework. The Investment Manager utilised the proprietary ESG assessment, comprised of an ESG score and trend signal, and invested in companies with ESG scores in the top 75% of each's respective universe as assessed by the Investment Manager.

• Engagement – For the current reference period, the Investment Manager, based on its assessment, did not invest in companies with an ESG score in the bottom 25% of each's respective universe. To the extent the Investment Manager invests in companies assessed to be in the bottom 25% of each's respective universe in future reference periods, it will actively engage with these transitioning investee companies. The Investment Manager, based on its assessment, also did not identify any investee companies assessed to have newly identified severe controveries during the reference period.

The extent of the Sub-Fund's compliance with the binding requirements set out in Annex 1 attached to the Sub-Fund's Supplement is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was aligned with the environmental and social characteristics is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

- **Exclusions** No exposure to companies that did not meet fundamental responsibilities in the areas of human rights, labour, environment, and anti-corruption nor to companies with exposure to controversial weapons, tobacco production or thermal coal extraction.
- ESG Assessment The proportion of the portfolio, excluding cash, short-term debt instruments, and collective investment schemes ("Excluded Investments"), invested in companies with ESG scores in the top 75% of each's respective universe was 100%. The proportion of companies with ESG scores in the bottom 25% of each's respective universe was 0%. These proportions were calculated based on the quarter-end average weights of holdings held in the Sub-Fund during the reference period.
- Engagement As at the end of December 2022, the aggregate number of companies engaged with, as a result of the Investment Manager's ESG assessment, was 19. There were no engagements resulting from investee companies with ESG scores in the bottom 25% of each's respective universe or for investee companies assessed by the Investment Manager as having a newly identified severe controversy.

For the sustainability indicators above, the Investment Manager has used the Investment Manager's proprietary data, as well as data provided by third party providers such as FactSet and MSCI.

... and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable - The Sub-Fund did not make any sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable - The Sub-Fund did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable - The Sub-Fund did not make any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable - The Sub-Fund did not make any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following principal adverse impact (PAI) indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) as assessed by the Investment Manager with inputs from third-party data providers (threshold 0%)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd. Sponsored ADR	Information Technology	7.60	Taiwan

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which promoted environmental and social characteristics during the reference period is provided below.

What was the asset allocation?

#1 Aligned with E/S characteristics

The Sub-Fund invested 98.0% of the Sub-Fund's assets in investments which are aligned with the environmental and social characteristics promoted by the Sub-Fund. The proportion was calculated as the proportion of the portfolio which was subject to the binding criteria which were used to attain the Sub-Fund's environmental and social characteristics as set out in Annex 1 attached to the Sub-Fund's Supplement.

In addition, 98% of the Sub-Fund's assets have positively contributed to the environmental and/or social characteristics, which reflects the proportion of the portfolio invested in investee companies with ESG scores in the top 75% of each's respective universe.

The Sub-Fund did not make any sustainable investments at this time.

#2 Other

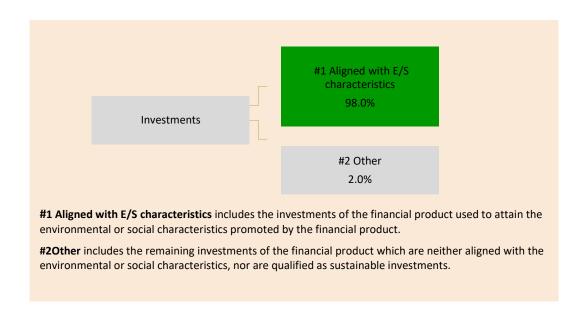

The remaining 2.0% of investments were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

Asset allocation describes the share of

investments in

specific assets.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

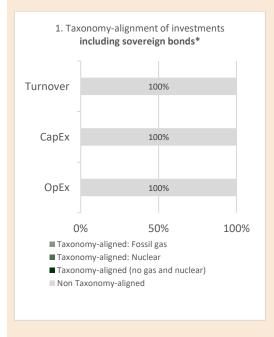

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

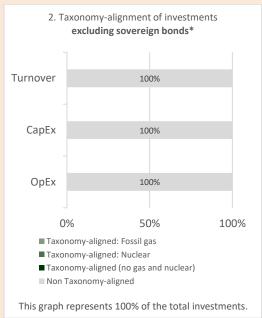

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable - The Sub-Fund did not make any sustainable investments.

What was the share of socially sustainable investments?

Not applicable - The Sub-Fund did not make any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Other" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2022, the Sub-Fund excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies are promoting certain environmental and social characteristics. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, in the portfolio the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar and wind power, and alternative fuels. The Investment Manager has also identified companies held by the portfolio that contribute to healthcare innovation and pharmaceuticals, such as the Sub-Fund's investment in companies engaged in the discovery, development and manufacture of biologics services. The Sub-Fund has also invested in companies tied to financial inclusion, such as innovative companies that help provide access to financial services to the underbanked and underprivileged sections of the rural population.

The Investment Manager engaged with 19 companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material ESG-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the team believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2022, the Investment Manager engaged with the management of investee companies on 19 different topics. The five topics most frequently addressed in engagements during the period were labour practices and supply chain management, human capital, general environmental risk management, general ESG risk management, and general social risk management.

In most situations, engagement resulted in a better understanding of the sustainability risks facing the company, and more importantly, how company management is addressing those risks. For four engagements, the Investment Manager identified situations where further follow up is warranted. Pursuant to its policy, the Investment Manager will revisit and reengage with management on those situations.

Sustainable investment objective

Did this financial product have a sustainable investment objective? Yes It made **sustainable** It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: 17.6% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** with a social objective: 81.5% make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The sustainable investment objective of the Sub-Fund is to create a positive societal and/or environmental impact through investment in an actively managed portfolio of emerging markets equity securities. Based on the sustainable investment objective above, the Investment Manager sought to invest in companies that create a positive, measurable social and/or environmental impact (a "sustainable impact"), as demonstrated by their contribution to at least one or more of five sustainable investment themes: 1) Health Care, 2) Empowerment, 3) Sustainable Living, 4) Climate, and 5) Technological Advancement. Each of these sustainability themes were guided by sub-themes which are aligned with the UN Sustainable Development Goals ("SDGs").

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the SDGs above. Each sustainable investment was assessed against the exclusions, contribution assessment and SDGs alignment assessment, and categorised into the appropriate contribution category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding strategies are further described under "What investment

strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as described below:

- Seven percent* of the portfolio's revenue is derived from investee companies offering products and/or services that improve access to health care or sustainable living for lower-income populations;
 - * Note that investee companies may derive revenue from multiple business lines not associated with improving access to health care and/or sustainable living for lower-income populations. Those investee companies assessed as having at least 20% of their revenue (latest available) aligned with these primary themes are considered to be contributing to improving access to health care or sustainable living for lower-income populations. It should also be noted that as data availability and quality continue to evolve, the Investment Manager will seek to improve upon the quality of this reporting one potential impact may be decreases in future datapoints as accuracy and precision improve.
- Innovation and technological advancement as measured by capital expenditures resulted in EUR11,801 per EUR1 million invested in the Sub-Fund in calendar year 2021, which is the most recent data available at the time of this report;
- The carbon footprint of the portfolio based on the weighted average measurement of greenhouse gas (GHG) emissions was 177 tonnes of CO2e per EUR 1 million invested.
- Over the reference period, 25% of the Sub-Fund's assets were in companies with gender diverse boards as assessed by the Investment Manager.
- Over the reference period, 51% of the Sub-Fund's assets were in companies with independent board of directors.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report. Unless otherwise stated, the data has been calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2022, enterprise values data as of 2022 December-end and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports, the Investment Manager's proprietary data, Factset, and MSCI.

...and compared to previous periods?

Not applicable.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has considered certain indicators for adverse impacts on sustainability factors, as described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account data provided by a third party data provider, MSCI, where available.

How were the indicators for adverse impacts on sustainability factors taken into account?

The following principal adverse impact (PAI) indicators were taken into account as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines), as assessed by the Investment Manager using inputs from third-party providers (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

The Investment Manager has also considered other relevant indicators depending on the business activities and behaviours of the respective company. The

Investment Manager has monitored the availability of data regarding investee companies and engaged with those companies that the Investment Manager has determined have insufficient data to make a credible assessment of the company's impact on sustainability factors. These engagements, which include requesting disclosure and implementation of procedures to mitigate PAIs, take place on an ongoing basis.

Please note that data from the the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments were aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights because companies that the Investment Manager deemed to be in violation of UNGC and OECD Guidelines were excluded from the portfolio.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines as assessed by the Investment Manager using inputs from third-party data providers (threshold 0%)

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Sustainable

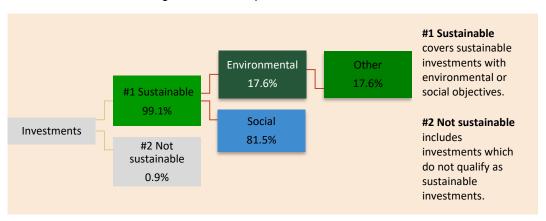

The Investment Manager has invested 99.1% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#2 Not sustainable

The remaining 0.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

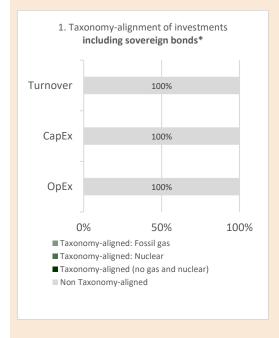

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

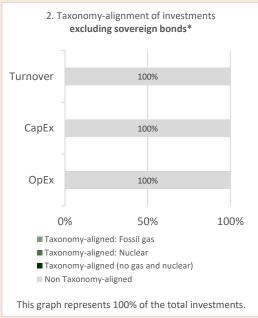

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
×	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 17.6%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 81.5%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, the Sub-Fund sought to enable the growth of companies with opportunities for current or projected net-positive growth by specifically investing in companies the Investment Manager believed to be aligned with at least one or more of five sustainable investment themes: 1) Health Care, 2) Empowerment, 3) Sustainable Living, 4) Climate, and 5) Technological Advancement. Each of these sustainability themes were guided by sub-themes which are aligned with the SDGs.

The Sub-Fund also excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies do not cause significant harm to any environmental or social sustainable investment objective. For example, the Sub-Fund did not invest in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC principles.

The Investment Manager's analysis of sustainability risks and opportunities led to investment opportunities that support several sustainability themes such as digitalization, energy transition and decarbonization. For example, in the portfolio the Sub-Fund invested in companies that provide innovative and important solutions supporting vehicle electrification, solar and wind power, and alternative fuels. The Investment Manager has also identified and invested in companies that contribute to healthcare innovation and pharmaceuticals, such as companies engaged in the discovery, development, and manufacture of biologics services. The Sub-Fund also invested in companies tied to financial inclusion, such as innovative companies that help provide access to financial services to the underbanked and underprivileged sections of the rural population.

The Investment Manager engaged with 13 companies during the reference period, pursuant to its engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material ESG-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the Investment Manager believes will promote a more sustainable economy. Engagement activities, which may include in-person meetings, written communication, and industry forums, summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2022, the Investment Manager engaged with the management of investee companies on 18 different topics. The five topics that were the most frequently engaged during the period were human capital, labour practices and supply chain management, general environmental risk management, general social risk management, and cyber security.

In most situations, engagement resulted in a better understanding of the sustainability risks the company is facing and, more importantly how company management is addressing those risks. For five engagements, the Investment Manager identified situations where further follow up is warranted. Pursuant to the Investment Manager's policy, it will revisit and reengage with management on those situations.

Sustainable investment objective

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: 0% sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: 98.0%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to create a positive societal impact through investment in an actively managed portfolio of equity securities of companies engaged in the health care sector. Based on the sustainable investment objective above, the Investment Manager sought to invest in companies that create a positive, measurable social impact (a "sustainable impact") through advancing the UN Sustainable Development Goals ("SDGs"), particularly Goal 3, (Good Health and Well-Being ("SDG 3")).

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the SDGs, in particular the SDG 3. Each sustainable investment was assessed against the exclusions, contribution assessment and SDGs alignment assessment, and categorised into the appropriate contribution category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding strategies are further described under

"What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as described below:

- R&D dollars invested by investee companies: \$89 billion (aggregated)
- Number of investee companies' clinical trials that are ongoing: 2,280 as of 12/31/2022 (snapshot)
- Number of investee companies' patents filed and/or approved in the U.S.:
 4,813 in 2022 (aggregated)
- Number of medicines in investee companyies' R&D pipeline that were disclosed: 443 as of 12/31/2022 (snapshot)
- Number of investee companies' medicines and/or devices approved: 18 in 2022 (aggregated)

The sustainability indicators above have been calculated based on the aggregated data for the reporting period (2022 calendar year) or snapshot data as of Decemberend 2022 of the companies held within the Sub-Fund as of December-end 2022. The sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports and government agencies.

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors, as described below.

Within this assessment, the Investment Manager used in-house research and analysis taking into account data provided by a third party data provider, MSCI, where available.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The following principal adverse impact (PAI) indicators were as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (threshold 0%)
- Exposure to those companies deemed in violation of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) as assessed by the Investment Manager using inputs from third-party providers (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

The Investment Manager has also considered other relevant indicators depending on the business activities and behaviours of the respective company. The Investment Manager has monitored the availability of data regarding investee companies and engaged with those companies that the Investment Manager has determined have insufficient data to make a credible assessment of the company's impact on sustainability factors, These engagements, which include requesting disclosure and implementation of procedures to mitigate PAIs, take place on an ongoing basis.

Please note that data from the the third party data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Sustainable investments were aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights because companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines were excluded from the portfolio.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons) (threshold 0%)
- Exposure to companies deemed to be in violation of UNGC and OECD Guidelines as assessed by the Investment Manager using inputs from third-party data providers (threshold 0%)

What were the top investments of this financial product?

*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

1st January 2022 to 31st December 2022.

which is:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

What was the asset allocation?

#1 Sustainable

The Investment Manager has invested 98.0% of the Sub-Fund's assets in sustainable investments.

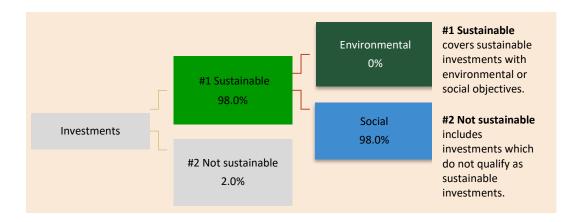

Asset allocation describes the share of investments in specific assets.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#2 Not sustainable

The remaining 2.0% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals	31.29
Health Care	Health Care Equipment & Supplies	21.47
Health Care	Biotechnology	19.20
Health Care	Health Care Providers & Services	14.58
Health Care	Life Sciences Tools & Services	9.04
Health Care	Health Care Technology	2.37

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 98.0%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, the Sub-Fund sought to enable the growth of companies with opportunities for current or projected net-positive growth by specifically investing in companies the Investment Manager believed created a sustainable impact through advancing the SDGs, particularly Goal 3, (Good Health and Well-Being (SDG 3)).

The Sub-Fund also excluded companies that violated the mandated product and norms-based criteria from its investment universe to ensure investee companies do not cause significant harm to any environmental or social sustainable investment objective. For example, no investments were in companies involved in the manufacture of controversial weapons or companies not in compliance with UNGC principles.

The strategy is constructed along two dimensions: investing in companies with above-average growth and those with a positive societal value. The two are not exclusive within the Investment Manager's framework and may overlap. The Sub-Fund aligns with the sustainable investment objective, in particular SDG 3, as sustainable investments held in the Sub-Fund address significant unmet medical needs through new treatments for diseases, enhancing productivity of medical equipment and services, promoting access to medicines and services, and creating new solutions for lowering health care costs.

The Investment Manager engaged with 15 companies during the reference period, pursuant to the Investment Manager's engagement policy and procedures. In general, engagement is conducted by the Investment Manager's Sustainable Research team, in partnership with investment teams, and is focused on material ESG-related issues that the Investment Manager believes could potentially impact the value of the company. The Sustainable Research team may also engage with companies on key themes that the Investment Manager believes will promote a sustainable economy. Engagement activities, which may include in-person meetings, written communication and industry forums, are summarized and shared in the Investment Manager's investment research platform. Engagement summaries catalogue objectives, record a company's progress, and document outcomes.

In 2022, the Investment Manager engaged with the management of investee companies on 16 different topics. The five topics most frequently addressed in engagements during the period were general ESG risk management, product quality and safety, SDG alignment, human capital, and ESG controversies.

In most situations, engagement resulted in a better understanding of the sustainability risks the company is facing and, more importantly, how company management is addressing those risks. For ten engagements, the Investment Manager identified situations where further follow up is warranted. Pursuant to the Investment Manager's policy, it will revisit and reengage with management on those situations.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and

that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX

Product name: Nomura Funds Ireland – Japan Sustainable Equity Growth Fund Legal entity identifier: 213800Q2NXQGYA2F3N25

Sustainable investment objective

Did	Did this financial product have a sustainable investment objective?				
••	×	Yes	••	No	
*	inve	in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
×		de sustainable investments a social objective: 74.2%		It promoted E/S characteristics, but did not make any sustainable investments	

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following five UN Sustainable Development Goals ("SDGs") aligned "Impact Goals":

- 1. Mitigate Climate Change
- 2. Mitigate Natural Capital Depletion
- 3. Promote Good Health and Well-Being
- 4. Improve Quality of Life
- 5. Promote Sustainable Industrialisation and Foster Innovation

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding

strategies are further described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

As further described under the section "How did the sustainability indicators perform?", the Investment Manager has measured the impact of the Sub-Fund's investments through the metric of impact of the underlying holdings per JPY100 millions invested in the Sub-Fund.

The Investment Manager has particularly focused on the following sustainable investments in relation to the above environmental and social objectives:

- Mitigate Climate Change: Sustainable investments in this objective have contributed to reducing GHG emissions through their products with lower GHG emissions. For example, one of the Sub-Fund's holdings measures the amount of GHG emissions avoided through the use of its high efficiency air conditioning equipment, which produces lower GHG emissions.
- Mitigate Natural Capital Depletion: Sustainable investments in this objective have contributed to the conservation of natural capital mainly through recycling and sustainable sourcing of materials. For example, one of the Sub-Fund's holdings measures the impact of recycling by the number of plastic bottles recycled into carpet materials they produce.
- 3. Promote Good Health and Well-Being: Sustainable investments in this objective have contributed to improving health and well-being in both developed and emerging countries mainly through the provision of drugs and medical devices. The Investment Manager measures the impact through the number of patients treated with drugs and medical devices provided by investee companies. However, the Investment Manager have also used the amount of R&D investments spent by investee companies on the development of new drugs and medical devices as an alternative way to measure the impact in order to supplement lack of disclosure by investee companies.
- 4. Improve Quality of Life: A sustainable investment in this objective has contributed particularly to the improvement of sanitation and education. The company provides education to women on topics such as menstruation and financial independence to support independence for women in emerging countries. The Sub-Fund measured the impact through the number of education projects provided by the investee company.
- 5. Promote Sustainable Industrialisation and Foster Innovation: A sustainable investment in this objective has contributed to the conservation of industries and social capital, as well as improving productivity through the provision of products and services. This company provides M&A advisory services including rescuing Japanese mid-to-small sized businesses from going out of business through offering succeeding business partners. The Sub-Fund measured the impact through the number of business successions assisted by the investee company.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as below (impact of the underlying holdings per JPY 100 million invested in the Sub-Fund):

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- Tonnes of carbon avoided as a result of an investee company's products and services: 46.8 tonnes
- Number of low income patients reached with drugs and treatments through company's access strategies: 4 patients
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: JPY 340,851
- Level of economic loss avoided by successful business succession of small to mid-sized companies: JPY 877,704

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2022, market capitalisation data as of 2022 December-end and the fiscal year-end impact data for 2021. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports.

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

How were the indicators for adverse impacts on sustainability factors taken into account?

The following principal adverse impact (PAI) indicators were taken into account as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violations of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

The Investment Manager has also taken into account other relevant indicators depending on the business activities and behaviours of a company. The Investment Manager has monitored the availability of data to identify companies the Investment Manager would engage with. These engagements include requesting disclosure and robust procedures to mitigate PAIs and take place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)

1.7	Activities negatively affecting biodiversity- sensitive areas	0.00	100.00	0.00	99.02
1.8	Emissions to water	20.58	46.17	5.16	32.57
1.9	Hazardous waste ratio	0.03	24.59	10.17	28.05
1.10	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	0.15	98.96
1.11	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	46.61	97.42	47.17	97.65

1.12	Unadjusted gender pay gap	19.20	4.61	24.41	3.64
1.13	Board gender diversity	16.97	100.00	16.76	98.96
1.14	Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	99.02

The Sub-Fund reported the PAI data above using the quarter-end average weights of holdings held in the Sub-Fund in 2022, the Sub-Fund's net assets as of the end of December, and enterprise values and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 5.27% for this PAI which was lower than that of the TOPIX index (the "Index"). The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies with diverse businesses that include small proportion of fossil fuel-related activities. These companies are heavily involved in the renewable energy transition.
- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported as 0% for both the Sub-Fund and the Index with the data coverage being approximately 100% for the Sub-Fund. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to find companies' disclosures on biodiversity impact or not and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.
- #1.8 (Emissions to water): Based on the Data Provider's data, the Sub-Fund's weighted average emissions to water per EUR1 million invested were 20.58 tonnes and higher than those of the Index, 5.16 tonnes. The data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. However, the Investment Manager has identified discrepancies between company-reported emission figures and the data used by the Data Provider for this impact. The Investment Manager will engage with both companies and the Data Provider to understand the appropriate impact of the Sub-Fund's emissions to water.
- #1.11 (Lack of processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines): The Investment Manager will engage with those companies that lack in processes and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the Index in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Assets	Country
Shin-Etsu Chemical Co Ltd	Materials	5.22	Japan

Real Estate	Real Estate	4.00

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

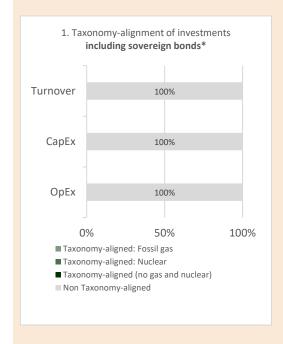

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

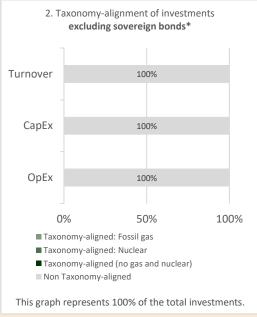

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24.0%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 74.2%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

To achieve the target of carbon neutral in 2050 worldwoide, the Investment Manager believes that it is also important to further accelerate the reduction of GHG emissions among companies that are already deemed to be contributing to climate change mitigation. Based on this belief, the Investment Manager seeks to understand each company's carbon neutral targets and engage with them to encourage Science Based Targets (SBT) accreditation. One of the Sub-Fund's holdings is a medical device manufacturer that the Investment Manager deems to contribute to the Sub-Fund's Impact Goal of Promote Good Health and Well-Being. The company previously had only set a target of reducing its GHG emissions by 50% by 2025 without a carbon-neutral target or target alignd with SBT. Through the engagement with the company since 2021, the Investment Manager had asked the company to demonstrate its commitment to become carbon neutral. In 2022, the Investment Manager has confirmed that the company has disclosed its target to become carbon neutral by 2040 in its latest annual report, and also that a commitment to SBT certification has been submitted and a review application would be filed in March 2024. The Investment Manager has also engaged with the company to encourage disclosure of impact indicators such as the number of patients provided with the company's medical devices and testing kits.

The Investment Manager believes that diversity is key to create a welcoming and efficient working environment for everyone and to make effective decisions to meet diverse customer needs and expand demand over the medium to long term. During the reference period, the Investment Manager has introduced a new standard in its proxy voting standards to vote against a proposal for re-electing the director who has been in the position of chairperson and president, etc., if there is no female director in board members. One of the Sub-Fund's holdings is an outdoor and sports equipment manufacturer which the Investment Manager deems to contribute to the Sub-Fund's Impact Goal of Promote Good

Health and Well-Being. The Investment Manager has engaged with the company on multiple ESG topics but has particularly focused on the board diversity within its engagement since 2022. Although there are currently no women on the company's board of directors, the Investment Manager has confirmed within its dialogue with the company that the company is in the process of electing a female director.

One of the portfolio holdings is a company that provides M&A advisory services including rescuing Japanese mid-to-small sized businesses from going out of business through offering succeeding business partners. The Investment Manager believes the company is contributing to the Sub-Fund's Impact Goal of Promote Sustainable Industrialisation and Foster Innovation. At the end of 2021, the company reported that there was a misalignment between revenue and sales in each quarter in 2021 due to sales having been recorded at the time of employees closing deals instead of when projects have been completed. This was driven by the company's culture that incentivised higher sales in shorter term. Since the report of the issue, the Investment Manager has reduced the Sub-Fund's holding weight in the company and engaged with the company to understand the underlying issues and request robust actions to be taken to actively mitigate issues similar to this. In 2022, no similar misalignments were identified and the Investment Manager understands the company has taken appropriate measures to rectify the situation. The Investment Manager will continue to monitor the company closely.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee

companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

ANNEX

Product name: Nomura Funds Ireland – Japan Sustainable Equity Core Fund Legal entity identifier: 213800OZBIQ3K5QR5E90

Sustainable investment objective

Did this financial product have a sustainable investment objective?				
•• X Yes	• No			
investments with an environmental objective: 75.9% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
■ It made sustainable investments with a social objective: 23.0%	It promoted E/S characteristics, but did not make any sustainable investments			

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following three UN Sustainable Development Goals ("SDGs") aligned "Impact Goals":

- 1. Mitigate Climate Change
- 2. Mitigate Natural Capital Depletion
- 3. Promote Good Health and Well-Being

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions and contribution assessment, and categorised into the appropriate contribution category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding strategies are further described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

Investment Manager has measured the impact of the Sub-Fund's investments through the metric of impact of the underlying holdings per JPY100 million invested in the Sub-Fund.

The Investment Manager has particularly focused on the following sustainable investments

As further described under the section "How did the sustainability indicators perform?", the

The Investment Manager has particularly focused on the following sustainable investments in relation to the above environmental and social objectives:

- 1. Mitigate Climate Change: Sustainable investments in this objective have offered products and/or services that enables others to reduce their energy emissions, or produced energy through renewable sources such as wind and solar power.
- Mitigate Natural Capital Depletion: Sustainable investments in this objective have reduced their wastes through recycling, or offered products and/or services that are more resource-efficient to reduce environmental impact.
- 3. Promote Good Health and Well-Being: Sustainble investments in this objective have provided medical care and products, high quality education or basic infrastructures for healthy life in developed and/or emerging countries.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as below (impact of the underlying holdings per JPY100 million invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company's products and services: 374 tonnes, The amount of carbon avoided was calculated using the quarter-end average weights of holdings held in the Sub-Fund in 2022, market capitalisation data as of the end of December 2022 and fiscal year-end impact data for 2021.
- Amount of natural resources avoided in manufacturing and servicing of an investee company's products: Water consumption avoided was 17.2m3. Energy consumption avoided was 44.0MWh. The water and energy consumption avoided were the amount of consumption reduced on a year on year basis within the manufacturing and servicing process of investee companies' products between the fiscal year 2019 and 2020. These indicators were calculated based on the quarter-end average weights of holdings held in the Sub-Fund in 2022 and market capitalisation data as of the end of December 2022.
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: JPY0.44 million. This is the aggregate financial amount of R&D investment spent during the reference period.

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the fiscal year (the end of March for most of Japanese companies). Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report as indicated above. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports as well as data obtained by a third-party data provider, MSCI.

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

How were the indicators for adverse impacts on sustainability factors taken into account?

The following principal adverse impact (PAI) indicators were taken into account as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violations of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

The Investment Manager has also taken into account other relevant indicators depending on the business activities and behaviours of a company. The Investment Manager has monitored the availability of data to identify companies the Investment Manager would engage with. These engagements include requesting disclosure and robust procedures to mitigate PAIs and take place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- · Emissions to water
- Hazardous waste and radioactive waste ratio

- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)

1.13	Board gender diversity	18.03	100.00	16.76	98.96
1.14	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	0.00	99.02

The Sub-Fund reported the PAI data above using the quarter-end average weights of holdings held in the Sub-Fund in 2022, the Sub-Fund's net assets as of the end of December, and enterprise values and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

#1.1.1 to 1.3 (GHG emissions, Carbon footprint and GHG intensity): Under the Sub-Fund's proprietery ESG scoring system, companies with the bottom 20% environmental risk scores within the same industry have been excluded. Consequently, the Sub-Fund has excluded major Japanese trading companies who have been heavily involved in fossil fuel businesses. Higher GHG-related impacts have been perceived due to investments in compaines such as steel manufacturers that provide carbon neutral steel and auto component suppliers that have contributed

to improve fuel efficiency and electrification. However, GHG-related PAIs of the Sub-Fund have dropped to below those of the Index as at the end of December 2022 due to the adjustments to the overweight position in the auto component manufacturers.

- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported as 0% for both the Sub-Fund and the Index with the data coverage being approximately 100%. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to find companies' disclosures on biodiversity impact or not, and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.
- #1.8 (Emissions to water): Based on the Data Provider's data, the Sub-Fund's weighted average emissions to water per EUR1 million invested were 21.12 tonnes and higher than those of the Index, 5.16 tonnes. The data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The major contributor to the higher emissions of the Sub-Fund was an information technology company which the Investment Manager deems to contribute to the Sub-Fund's Impact Goal of Mitigate Climate Change through its products promoting clean energy and technology. Althought the negative impact of the company on this PAI has not been significant, the Investment Manager will keep monitoring the impact as well as the data coverage to appropriately assess and mitigate the Sub-Fund's negative impact of emissions to water.
- #1.9 (Hazardous waste and radioactive waste ratio): Based on the Data Provider's data, the Sub-Fund's weighted average hazardous waste and radioactive waste per EUR1 million invested were 24.96 tonnes and higher than those of the Index, 10.17 tonnes. The data coverage of this particular indicator for both the Sub-Fund and the Index is currently limited. The largest contributor to the higher waste ratio of the Sub-Fund was a material manufacturer but there was an unusual hike in the emission figure for this company so the data may not be reliable. Other contributors include an auto component supplier and a food producer. Although the negative impacts of these companies on this PAI have not been significant, the Investment Manager will keep monitoring the impacts as well as the data coverage to appropriately assess and mitigate the Sub-Fund's negative impacts of hazardous/radioactive waste.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the TOPIX (the "Index") in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Largest investments	Sector	% Asets	Country
Nippon Telegraph and Telephone Corporation	Communication Services	5.13	Japan
Sony Group Corporation	Consumer Discretionary	4.36	Japan
Daiichi Sankyo Company, Limited	Health Care	4.07	Japan
Astellas Pharma Inc.	Health Care	3.95	Japan
ORIX Corporation	Financials	3.78	Japan
BIPROGY Inc.	Information Technology	3.31	Japan
Fujitsu Limited	Information Technology	3.18	Japan

Aisin Corporation	Consumer Discretionary	2.51	Japan
Recruit Holdings Co., Ltd.	Industrials	2.47	Japan
NEC Corp.	Information Technology	2.37	Japan

^{*}Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Sustainable

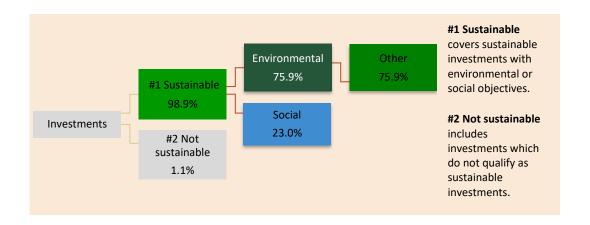

The Investment Manager has invested 98.9% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#2 Not sustainable

The remaining 1.1% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Telecommunication Services	5.13
Consumer Discretionary	Automobiles & Components	2.68
Consumer Discretionary	Automobiles & Components	9.69
Consumer Discretionary	Consumer Durables & Apparel	8.75
Consumer Discretionary	Consumer Services	1.00
Consumer Staples	Food, Beverage & Tobacco	0.85
Financials	Banks	2.52
Financials	Diversified Financials	5.67
Financials	Insurance	4.97
Health Care	Pharmaceuticals, Biotechnology	8.78
Industrials	Capital Goods	4.12
Industrials	Commercial & Professional Services	2.47
Information Technology	Semiconductors & Semiconductor	1.88
Information Technology	Software & Services	10.02
Information Technology	Technology Hardware & Equipment	10.70
Materials	Materials	15.83
Real Estate	Real Estate	3.84

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

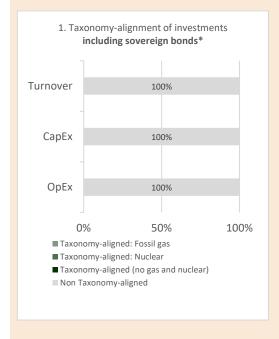

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

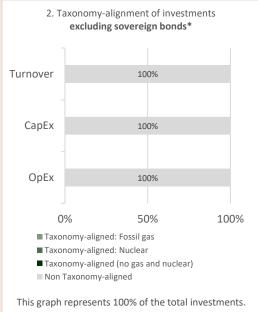

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

^{*} Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 75.9%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 23.0%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

One of the Sub-Fund's holdings is a steel manufacturer. While GHG emissions of the company is often regarded as significant because of the nature of its business as a steel manufacturer, the company's emissions by its electric arc furnace process have remained at a relatively low level compared to the equivalent by blast furnace process. In 2022, the Swedish subsidiary of the company has achieved carbon neutral production of steel and contributed to the company's competitive advantage within the sector. The Investment Manager views the company as a sustainable investment with its contribution and potential to further reduce environmental impacts within the industry. On the other hand, the Investment Manager has engaged with the company to address lack of disclosures on its non-financial information. Although there have been some improvements in the company's disclosures and external communication, the Investment Manager will keep engaging with the company to encourage further disclosure on their activities and quantitative impacts.

The Investment Manager has invested in an advanced semiconductor manufacturer based on the company's contribution to the Sub-Fund's Impact Goal of Mitigate Climate Change by enabling others to reduce environmental impacts through its products such as analog semiconductors and microcontrollers. The Investment Manager had previously identified lack of disclosures as one factor influencing the company's undervaluation and relatively low recognition as a company contributing to ESG compared to its peers. Since before the Sub-Fund's investment in the company, the Investment Manager have engaged with the company to further enhance its commitment to GHG emission reduction goals as well as improving disclosures on the company's efforts in reducing GHG emissions. In August 2022, the company has announced that its targets to reduce GHG emissions by 2030 have

been certified by the Science Based Targets initiative ("SBTi"). The company commits to reduce absolute scope 1 and 2 GHG emissions by 38% by 2030 from the 2021 levels. For scope 3 GHG emissions, the company has committed that 70% of its suppliers (based on emissions covering purcased goods and services) will set science-based targets by 2026.

Did this financial product have a sustainable investment objective?					
•• X Yes	• No				
investments with an environmental objective: 90.0% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective				
with a social objective: 6.1%	It promoted E/S characteristics, but did not make any sustainable investments				

The sustainable investment objective of the Sub-Fund is to invest in companies with a high overall positive environmental and/or societal impact. Based on the sustainable investment objective above, the Sub-Fund has mainly focused on the following six UN Sustainable Development Goals ("SDGs") aligned "Impact Goals":

- 1. Mitigate Climate Change
- 2. Mitigate Natural Capital Depletion
- 3. Global Access to Basic Financial Services
- 4. Global Access to Clean Drinking Water
- 5. Eliminate Communicable Disease
- 6. Mitigate the Obesity Epidemic

The Investment Manager has sought to achieve the sustainable investment objective through investment in sustainable investments that are aligned with the Impact Goals or other environmental or social objectives. Each sustainable investment was assessed against the proprietary ESG scores, exclusions, contribution assessment and proprietary total stakeholder impact assessment, and categorised into the appropriate contribution

category of "direct contribution", "indirect contribution" or "transition". The details of the contribution categories and the binding strategies are further described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

For Mitigate Climate Change and Mitigate Natural Capital Depletion, the Investment Manager has mainly invested in companies that make "direct contribution" to these Impact Goals through their products (for example, electric vehicle (EV) manufacturers, EV battery manufacturers, renewable utilities) and services (for example, providing financing for emerging technologies). For Global Access to Basic Financial Services, the Sub-Fund has mainly invested in financial institutions that provide their financial services in rural areas or focus on providing finance to small and medium-sized enterprises in emerging countries. For Global Access to Clean Drinking water, the Investment Manager invested in a company that makes "indirect contribution" through their project focusing on providing safe and clean water to wide community in Malaysia, as well as companies focused on 3Rs (reduce, reuse and recycle) for optimal water consumption. The Investment Manager also invested in companies that make "direct contribution" to Eliminate Communicable Disease and Mitigate the Obesity Epidemic through innovative research for development of new drugs and medical devices.

As further described under the section "How did the sustainability indicators perform?", the Investment Manager has measured the impact of the Sub-Fund's investments through the metric of impact of the underlying holdings per USD 1 million invested in the Sub-Fund.

The extent of the Sub-Fund's impact and/or contribution is further described in the section "How did the sustainability indicators perform" and "How did this financial product consider principal adverse impacts on sustainability factors?" below. The proportion of the Sub-Fund that was invested in sustainable investments is disclosed under the section "What was the proportion of sustainability-related investments?" below.

How did the sustainability indicators perform?

The Sub-Fund's sustainability indicators performed as below (impact per USDmn invested in the Sub-Fund):

- Tonnes of carbon avoided as a result of an investee company's products and services: 142.17 tonnes
- Amount of investment that financed sustainable projects and deprived or underprivileded communities: the amount of green finance (loans to renewable projects) was USD 42,162.24 and the amount of loans provided to low income population was USD 2,394.60.
- Amount of R&D investment spent on promoting the development of new drugs and medical equipment: USD 5,206.34
- Total amount of water saved by water recycling: 13.95 tonnes

Please note that the sustainability indicator data becomes available on an annual basis in the following months post the end of the year. Therefore, the sustainability indicators provided above have been calculated based on the data available at the time of this periodic report, using the quarter-end average weights of holdings held in the Sub-Fund in 2022, market capitalisation data as of 2022 December-end and the latest available impact data. Sustainability indicators above do not take into account companies without relevant data and/or companies whose activities are not relevant to the particular sustainability indicator(s).

For the sustainability indicators above, the Investment Manager has used data provided by companies in annual sustainability reports.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

...and compared to previous periods?

Not applicable.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In order to ensure that the sustainable investments of the Sub-Fund do not cause significant harm to any environmental or social sustainable investment objective, the Sub-Fund has taken into account certain indicators for adverse impacts on sustainability factors. Details on how the indicators have been considered is described below.

Within this assessment, the Investment Manager used the data available from a third-party data provider, MSCI which was based on the latest available impact data as well as in-house research and analysis provided by the Investment Manager.

How were the indicators for adverse impacts on sustainability factors taken into account?

The following principal adverse impact (PAI) indicators were taken into account as part of the exclusions and the Sub-Fund complied with these exclusions based on the assessment of the Investment Manager:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violations of UN Global Compact principles (UNGC) and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises (OECD Guidelines) (threshold 0%)

For the following PAI indicators, the Investment Manager has assessed and monitored the impact of each sustainable investment on sustainability factors to ensure that sustainable investments did not cause significant harm to any environmental or social objectives. Within this assessment, the Investment Manager used thresholds appropriate to business activities, sectors and countries.

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- · Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

The Investment Manager has also taken into account other relevant indicators depending on the business activities and behaviours of a company. The Investment Manager has monitored the availability of data to identify companies the Investment Manager would engage with. These engagements include requesting disclosure and robust procedures to mitigate PAIs and take place on an ongoing basis.

Please note that data from the data provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments have aligned with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights by excluding companies that the Investment Manager deemed in violation of UNGC and OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAI indicators as part of its broader exclusions which include other exclusion criteria as further described in Annex 1 to the Sub-Fund's Supplement. The Sub-Fund complied with these exclusions based on the assessment of the Investment Manager.

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (threshold 0%)
- Violation of UNGC and OECD Guidelines (threshold 0%)

The Sub-Fund also considered following PAI indicators:

- GHG emissions (Scope 1 GHG emissions, Scope 2 GHG emissions, Scope 3 GHG emissions and Total GHG emissions)
- Carbon footprint
- GHG intensity of investee companies
- · Exposure to companies active in the fossil fuel sector
- Share of non-renewable energy consumption and production
- Energy consumption intensity per high impact climate sector
- Activities negatively affecting biodiversity-sensitive areas
- · Emissions to water
- Hazardous waste and radioactive waste ratio
- Lack of process and compliance mechanisms to monitor compliance with UNGC and OECD Guidelines
- Unadjusted gender pay gap
- Board gender diversity

	Impact	Portfolio	Data coverage (%)	Index	Data coverage (%)
1.1.1	Scope 1 GHG emissions	334.67	96.64	386.79	99.10

1.11	· · · · · · · · · · · · · · · · · · ·		4.25		
1.12	Unadjusted gender pay gap	24.68 19.97	98.62	19.04 20.55	7.26 99.28
1.13	Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.62	0.34	99.28

The Sub-Fund reported the PAI data above using the quarter-end average weights of holdings held in the Sub-Fund in 2022, the Sub-Fund's net assets as of the end of December, and enterprise values and the latest available impact data as of the end of December 2022 obtained from MSCI (the "Data Provider") at the time of this periodic report.

- #1.4 (Exposure to companies active in the fossil fuel sector): The Sub-Fund reported 9.55% for this PAI which was lower than that of the Index. The exposure calculates the proportion of the Sub-Fund invested in companies that derive any revenue from fossil fuel-related activities. The Sub-Fund's holdings flagged for this PAI are companies heavily involved in the renewable energy transition.
- #1.7 (Activities negatively affecting biodiversity-sensitive areas): Based on the Data Provider's data, the PAI is reported as 0% or very minimum for the Sub-Fund and the Index with the data coverage being close to 100%. Within the Data Provider's methodology, the data coverage is based on whether the Data Provider has sought to

find companies' disclosures on biodiversity impact or not, and if there is no disclosure relating to biodiversity impact, the impact has been calculated as 0. However, the Investment Manager sees that no disclosure does not mean no impact. The Investment Manager will keep monitoring the development on corporate sustainability disclosures and seek to mitigate the impact when the investee companies' reported data becomes available.

- #1.12 (Unadjusted gender pay gap): The Sub-Fund has reported 24.68% for this PAI and was higher than that of the Index. For this PAI, the data coverage is less than 10% for both the Sub-Fund and the Index and the data only represents two holdings of the Sub-Fund. The Investment Manager will keep engaging with issuers to encourage further improvement and monitor the data coverage.
- #1.13 (Board gender diversity): The Sub-Fund has reported 19.97% for this PAI and
 was lower than 20.55% reported for the Index. The main contributors for the lower
 board gender diversity were investee companies in China. The Investment Manager
 will keep engaging with issuers to encourage further improvement.

Please note that data from the Data Provider may be incomplete, inaccurate or unavailable. As a result, there is a risk that the Investment Manager may incorrectly assess the PAIs of a security or issuer in the Sub-Fund or the Index.

The Sub-Fund uses the MSCI All Countries Asia Pacific ex Japan Index (the "Index") in the way that the PAIs of the Sub-Fund are compared against the PAIs of the Index, with the aim being to limit such portfolio average adverse impacts (weighted average adverse impacts of the companies held by the Sub-Fund) to be lower than that of the Index. However, the Index is not used to define the portfolio composition of the Sub-Fund and is not used for the purpose of determining the attainment of the sustainable investment objective of the Sub-Fund. The Index is a broad market index and not consistent with the sustainable investment objective of the Sub-Fund.

*Top investments above were calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

1st January 2022 to 31st December 2022.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Information on the proportion of the Sub-Fund which was invested in sustainable investments during the reference period is provided below.

What was the asset allocation?

#1 Sustainable

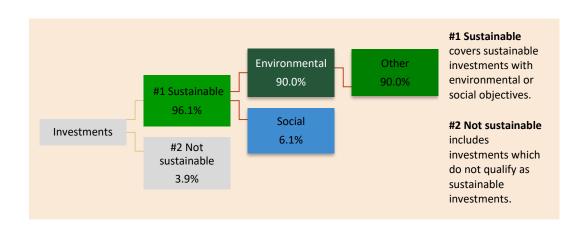

The Investment Manager has invested 96.1% of the Sub-Fund's assets in sustainable investments.

Further details on how the Investment Manager identifies sustainable investments are described under "What investment strategy does this financial product follow?" in Annex 1 attached to the Sub-Fund's Supplement.

#2 Not sustainable

The remaining 3.9% of investments were cash held as ancillary liquidity.

The Investment Manager used the quarter-end average weights of holdings held in the Sub-Fund during the reference period to calculate the allocations above.

In which economic sectors were the investments made?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	6.47%
Communication Services	Telecommunication Services	1.86%
Consumer Discretionary	Automobiles & Components	9.31%
Consumer Discretionary	Consumer Durables & Apparel	1.87%
Consumer Discretionary	Consumer Services	1.17%
Energy	Energy	3.98%
Financials	Banks	20.11%
Financials	Diversified Financials	3.71%
Financials	Insurance	4.41%
Health Care	Pharmaceuticals, Biotechnology	4.82%
Industrials	Capital Goods	4.26%
Information Technology	Semiconductors & Semiconductor Equipment	11.81%
Information Technology	Software & Services	1.61%

Information Technology	Technology Hardware & Equipment	8.93%
Real Estate	Real Estate	2.86%
Utilities	Utilities	8.95%

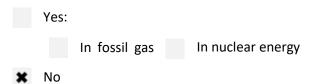

^{*}The proportion above was calculated based on the average of quarter-end weights of holdings in the Sub-Fund during the reference period. The denominator includes cash held as ancillary liquidity.

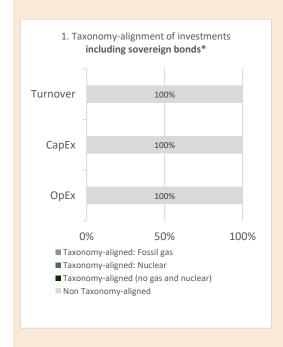

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

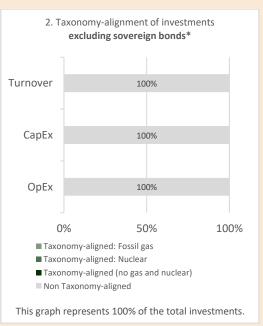

For the reference period, the proportion of investments of the Sub-Fund in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) was 0% of the net assets of the Sub-Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

792

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities was 0% respectively.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 90.0%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 6.1%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The "#2 Not sustainable" investments made by the Sub-Fund were cash held as ancillary liquidity and they did not follow any minimum environmental or social safeguards. The proportion and use of such "#2 Not sustainable" investments did not affect the delivery of the sustainable investment objective in the reference period due to the limited use and the nature of those instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the Investment Manager conducted 19 engagements with investee companies on various issues such as carbon reduction strategies, management's KPIs related to ESG, clean energy generation/usage strategies, water recycling technologies, gender diversity of corporate board of directors/employees.

Within the above engagements, the Investment Manager engaged with an oil and gas refinery company, which also owns an electric vehicle battery business, on topics such as its plans for GHG reduction and avoided emissions. The company is committed to reduce GHG emissions within its own operations and portfolio by 50% by 2030 and achieve Net Zero before 2050 as well as contributing to avoided emissions through its products and

services such as batteries, plastic recycling and battery metal recycling. Since 2022, the Net Zero related KPIs for the CEO and the company have become stricter to measure the actual performance against its Net Zero and climate change mitigation plans. The Investment Manager has confirmed that the company meets the criteria for sustainable investments based on its direct dialogue.
