

BGF Global Multi-Asset Income Fund Class D2

Hedged EUR

MAY 2016 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2016. All other data as at 14-Jun-2016.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to generate an above average level of income on your investment as well as maintain long term capital growth. The Fund invests globally in shares, fixed income securities, funds, cash, deposits and money market instruments. The asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the Portfolio Manager's discretion.

GROWTH OF HYPOTHETICAL 10,000

Share Class performance displayed in Euro. Source: BlackRock. Performance is shown on a net asset value basis, with gross income reinvested. Past performance is not a guide to future performance

CUMULATIVE & ANNUALISED PERFORMANCE

	Cumulative (%)					Annualised (% p.a.)		
	1m	3m	6m	YTD	1 Year	3 Years	5 Years	Since Inception
Share Class	0.70%	4.89%	0.70%	2.02%	-2.04%	N/A	N/A	0.39%
Quartile Rank	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

12 MONTH PERFORMANCE PERIODS - TO LAST QUARTER END

	31/3/2011- 31/3/2012	31/3/2012- 31/3/2013	31/3/2013- 31/3/2014	31/3/2014- 31/3/2015	31/3/2015- 31/3/2016	2015 Calendar Year
Share Class	N/A	N/A	N/A	N/A	-3.23%	-2.08%

Share Class performance is calculated on a Net Asset Value (NAV) basis, with income reinvested, in Euro, net of fees. Benchmark performance displayed in EUR.

Key Risks: All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. Investors in this Fund should understand that capital growth is not a priority and values may fluctuate and the level of income may vary from time to time and is not guaranteed. The fund(s) may invest in structured credit products such as asset backed securities ('ABS') which pool together mortgages and other debts into single or multiple series credit products which are then passed on to investors, normally in return for interest payments based on the cash flows from the underlying assets. These securities have similar characteristics to corporate bonds but carry greater risk as the details of the underlying loans is unknown, although loans with similar terms are typically packaged together. The stability of returns from ABS are not only dependent on changes in interest-rates but also changes in the repayments of the underlying loans as a result of changes in economic conditions or the circumstances of the holder of the loan. These securities can therefore be more sensitive to economic events, may be subject to severe price movements and can be more difficult and/or more expensive to sell in difficult markets.

Key Risks Continued: The fund may make distributions from capital as well as income or pursue certain investment strategies in order to generate income. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital and the potential for long-term capital growth.

DEALING INFORMATION

Settlement	Trade date + 3 days
Dealing Frequency	Daily, forward pricing basis

FIXED INCOME CREDIT RATINGS (%)

REGIONAL EXPOSURE (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the country where the issuer of the securities carries out much of their business.

GLOSSARY

Ongoing Charge: is a figure representing all annual charges and other payments taken from the fund.

Quartile Rank: categorises a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.

SRRI: is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the Fund.

Nominal Weighted Average Life (WAL): A bond's maturity is the length of time until the principal amount of the bond is to be repaid. WAL of the fund is calculated as the average of the underlying bonds' maturities, adjusted to take account of their relative weight (size) within the fund.

Yield To Worst: The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions are used by the issuer.

Standard Deviation: Standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

Performance Fee: is charged on any returns that, subject to a High Water Mark, the Fund achieves above its performance fee benchmark. Please refer to the Prospectus for further information.
