Notes

For the Muzinich Funds Prospectus and Key Investor Information Document (KIID) or Key Investor Document (KID) go to www.muzinich.com.

All data as of 31/03/2024. All calculations in Fund Characteristics are based on internal Muzinich & Co. calculations. SI = since inception. YTD = year to date.

Ratings shown reflect a blend of Moody's, Fitch and S&P or, where such is unavailable, Muzinich assigned rating but may not reflect the ratings regime used for the account's official guideline compliance calculations. Duration Distribution, Credit Breakdown, 10 Largest Industries, Geographic Diversification, Currency Breakdown and Fund Information includes securities portfolio only, excluding cash. Cash position is shown on a trade date basis.

Note on currency hedging: Currency exposure can introduce significant risk to an international bond allocation; hedging that risk can reduce that volatility over time. Hedging currency, however, produces a return - positive or negative - that is distinct from currency return and the return of an investment's underlying bonds. This "hedged return" is part of the investor's total return, and it effectively replaces the currency return. The hedged yield may therefore differ materially from the local currency yield.
