Portfolio profile

The objective of the Global Flexible Fund is to provide investors with long-term capital growth through investment in a diversified range of global asset classes and currencies. The fund aims to produce an equity-like return over the long-term but with less risk than equity markets; its broad mandate allows it to invest across asset classes and the capital structure, in a variety of market caps, geographies and sectors.

Investor profile

The portfolio is suitable for investors seeking global exposure to developed financial markets as part of their overall investment strategy, with maximum capital appreciation as their primary goal and who do not wish to make complex asset allocation decisions between equities, cash and bonds in global markets. Investors should have a high tolerance for short-term market volatility in order to achieve long-term objectives.
