Market Risk: the investments of the Fund are subject to normal market fluctuations and the risk inherent in investment in equity securities and similar instruments and there can be no assurances that appreciation will occur.

Equity Risk: The value of equities may fall as well as rise and as a class of investment, equities are typically more volatile than other common investment types such as bonds or cash.

Currency Risk: the fund invests in international securities which are denominated in foreign currencies whose fluctuations may increase the fund's volatility and losses. Some share classes may be designated in a currency other than the base currency (GBP).
