

## db x-trackers JPX-Nikkei 400 UCITS ETF (DR)

Share Class: 2D - GBP Hedged (ISIN: IE00BPVLQF37), (WKN: A119J3), (Currency: GBP)

a sub fund of Concept Fund Solutions plc.

### Objectives & Investment Policy

The aim is for your investment to reflect the performance of the total return version of the JPX-Nikkei Index 400 (Index). The Index is designed to reflect the performance of the shares of certain Japanese companies, namely those which trade on the JASDAQ stock exchange and the following sections of the Tokyo Stock Exchange: the first section (for large companies), the second section (for middle-sized companies) and the Mothers (market for high-growth and emerging stocks).

The Index comprises of shares in 400 companies. Companies are only eligible for selection if for the past 3 (fiscal) years (1) they were listed; (2) had more assets than liabilities; and (3) have no operating or overall deficit; and (4) they are not marked for delisting.

Companies are ranked according to (1) their trading value over three years and (2) their size (as of the Index base date). This ranking is then adjusted by looking at the company's return on equity, its 3 year operating profits and its size, and certain qualitative criteria such as the appointment of independent outside directors and reporting and disclosure standards.

The Index is calculated on a total return basis. This means that all dividends and distributions by the companies are reinvested in the shares. The Index is reviewed and rebalanced annually.

To achieve the aim, the Fund will attempt to replicate the Index, before fees and expenses, by buying all, or a substantial number, of the shares in the Index in the same proportion as the Index, as determined by the Sub-Portfolio Manager of the Fund which is Deutsche Asset Management (UK) Limited.

The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.

The Fund has entered into currency hedging transactions in relation to the share class as described in the Risk and Reward Profile section below.

Dividends may be declared on your shares on a quarterly basis. You may redeem your investment on demand on a daily basis.

### Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 7 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will attempt to replicate the Index. However, exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the Fund's performance to be substantially different from the performance of the Index.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as distributor, securities lending agent and investment manager which may involve conflicts of interest.

The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.

The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.

The Fund follows a rules-based strategy which will deviate from how the overall market or parent Index performs. Your investment is likely to be less diversified and there is no guarantee that the Index's 'rules-based' strategy will be achieved.

The Index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances.

The Fund may use derivatives to i) try to manage its investments more efficiently; and ii) try to reduce movements in currency exchange rates between the currency of the Fund's assets and the currency of the Fund's shares. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor. <sup>†</sup>
Entry charge*	3.00%	
Exit charge	3.00%	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		The ongoing charges figure is based on expenses for the year ending October 2016. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.
Charges taken from the Fund over a year		
Ongoing charges	0.30%	
Charges taken from the Fund under certain specific conditions		More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
Performance fee	None	
		* or GBP 20,000 whichever is the higher.

<sup>†</sup>Entry and exit charges will only apply when shares are subscribed or redeemed directly from the Fund, and will not apply when investors buy or sell such shares on stock exchanges. Investors dealing on exchange will pay fees charged by their stock brokers. Such charges can be obtained from stock brokers. Authorised participants dealing directly with the Fund will pay related transaction costs.

To the extent the Fund undertakes securities lending to reduce costs, the Fund will ultimately be allocated 70% of the associated revenue generated, Deutsche Asset Management (UK) Limited, as Sub-Portfolio Manager, will be allocated 15%, and Deutsche Bank AG, as securities lending agent, will be allocated 15%. To facilitate this, the Fund will initially receive 85% of the associated revenue generated from which Deutsche Asset Management (UK) Limited will receive its allocation. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

## Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2015 and the share class was launched in 2015.

Past performance has been calculated in GBP.
