

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Europe Opportunities, a compartment of Indosuez Funds Unit: P (Accumulation) LU1073901628; Unit: PX (Distribution) LU1073901891

This document may be representative of the distribution and accumulation unit, as indicated in the "Practical information" section
This SICAV is managed by CA Indosuez Wealth (Asset Management)

OBJECTIVES AND INVESTMENT POLICY

The objective of the compartment (hereinafter, the "Fund") is to achieve a return and/or a long-term capital gain through the management of a portfolio investing at least 75% of its assets in equities of European companies, irrespective of size or industry.

The net assets of the Fund will be invested primarily in equities or other securities providing access to corporate capital, in warrants, options, and in debt securities. It may invest up to 10% of net assets in UCITS, particularly ETFs.

Within the limits of the investment restrictions as described in Chapter 4 of the prospectus, the Fund may make use of futures or options contracts on equities or stock market indices, either for hedging or asset exposure purposes.

For each Share Class, the Fund is authorised to hedge exchange rate risk as part of its asset management approach.

The Fund aims to outperform its benchmark index, i.e. the MSCI Europe Net Return EUR Index (M7EU). The Fund is actively managed, meaning that it may significantly differ from the benchmark index in terms of its composition and that there is no restriction regarding the extent to which the Fund's portfolio may deviate from the index. The investment scope is not limited to the benchmark index; the manager may purchase securities or invest in sectors which are not cited, for example in order to benefit from specific circumstances or to adapt to market conditions.

The Fund promotes, among other characteristics, environmental and/or social characteristics. The analysis of ESG characteristics covers at least 90% of the portfolio. The Manager undertakes to ensure that the portfolio's average ESG rating is higher than that of its initial investment universe, which is defined by the benchmark index—the MSCI Europe Net Return EUR Index.

Lack of availability of ESG data or potential inconsistencies therein, particularly when provided by an external provider, are methodological limits of the ESG rating process used. These are detailed in the prospectus.

The base currency for the Fund is the Euro.

The investor may purchase or sell units of the Fund on a daily basis (full banking days in Luxembourg).

All the Fund's income is reinvested.

RISK AND REWARD PROFILE

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk category 6 reflects a very high potential gain and/or loss in the portfolio's value. This is achieved through investments in equities, bonds, securities or participation rights on the European market.

Historical data, such as that used to calculate the synthetic indicator, cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time. The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Concentration risk: To the extent that the Fund's investments are concentrated in one particular country, market, industry or asset class, it could suffer losses due to adverse occurrences affecting that country, market, industry or asset class.

Risk linked to the use of derivatives: The Fund may use derivatives, i.e. financial instruments whose value depends on that of an underlying asset. However, even minor fluctuations in the price of the underlying asset may cause significant changes in the price of the corresponding derivative. The use of over-the-counter derivatives exposes the Fund to a risk that the counterparty will fully or partially fail to honour its contractual obligations. This may result in a financial loss for the Fund.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to trade at advantageous times or prices. This may result from events of unprecedented intensity and severity, such as pandemics or natural disasters.

CHARGES

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	1.00%
Conversion charge	1.00%
The percentage shown is the maximum amount that can be paid out of your investment. You may find out the actual entry and exit charges from your financial advisor or distributor.	
Charges taken from the Fund over a year	
Ongoing charges	1.88%
Charges taken from the Fund under specific conditions	
Performance charge	No performance fee for the previous year.
A maximum of 20% of the net outperformance of the MSCI Europe Net Return EUR Index (M7EU). Please note that performance fees may be charged in the event of absolute negative performance of the Fund.	

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

The ongoing charges figure is based on charges for the previous year, ended 31 December 2021. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

For more information on the charges taken by the Fund and the workings of the performance fee mechanism respectively, please see the chapter entitled "Charges borne by the company" and the section entitled "Performance fee" in the prospectus, available on request at www.fundsquare.net and www.ca-indosuez-am.com.

PAST PERFORMANCE

The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund.

Date of creation of the Fund: 5 September 2014

Date of creation of the unit class: 5 September 2014

Base currency: Euro

Benchmark: MSCI Europe Net Return EUR Index (M7EU).
