Who We Are

Founded in 1964, Alger is recognized as a pioneer of growth-style investment management. Privately-owned and headquartered in New York City, Alger can help "Unlock Your Growth Potential" through a suite of growth equity separate accounts, mutual funds, ETFs, and privately offered investment vehicles. Alger's investment philosophy, discovering companies undergoing Positive Dynamic Change, has been in place for 60 years.

Multi-Manager Approach

Investors can access two premier growth equity managers through this multi-manager approach. These are proven teams with complementary approaches combined into a single strategy.

ALGER

- Founded in 1964
- Growth equity pioneer
- Investing in dynamic change

WEATHERBIE CAPITAL

- Growth equity specialists
- Investing in Smaller Companies

Process

RESEARCH

Our fundamental, bottom-up research incorporates detailed financial analysis and field research as the Investment Teams proactively look for new investment ideas.

DIALOGUE

Before ideas enter into a portfolio, Portfolio Managers test the conviction of the Analyst to ensure the new idea is worthy of a place in the portfolio. This dialogue continues if additional research is needed.

PORTFOLIO CONSTRUCTION

Each discrete portfolio management team constructs a portfolio of the best growth-oriented long and short ideas in their respective universe. The combined portfolio is a diversified portfolio of long/short equities up and down the market cap spectrum.

MONITORING

The Portfolio Managers regularly discuss the overall portfolio, optimal gross and net exposures, individual positions and allocation of portfolio assets.

RISK MANAGEMENT

Risk Management is a critical component to the success of a long/short strategy. We continuously monitor and manage risk at the industry, sector and overall portfolio level using qualitative and quantitative methods.

Risk Disclosures - Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Local, regional or global events such as environmental or natural disasters, war, terrorism, pandemics, outbreaks of infectious diseases and similar public health threats, recessions, or other events could have a significant impact on investments. A significant portion of assets may be invested in securities of companies in related sectors, and may be similarly affected by economic, political, or market events and conditions and may be more vulnerable to unfavorable sector developments. Options and short exposure, gained through Total Return Swaps (TRS), could increase market exposure, magnifying losses and increasing volatility. Issuers of convertible securities may be more sensitive to economic changes. Investing in companies of small capitalizations involves the risk that such issuers may have limited product lines or financial resources, lack management depth, or have limited liquidity. Leverage increases volatility in both up and down markets and its costs may exceed the returns of borrowed securities. Foreign securities involve special risks including currency fluctuations, inefficient trading, political and economic instability, and increased volatility. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment. At times, cash may be a larger position in the portfolio and may underperform relative to equity securities. Class G Shares are offered only to investors in the U.K. and are not subject to sales charges. Class G Shares are not subject to distribution or service fees. This material is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

Alger pays compensation to third party marketers to sell various strategies to prospective investors. Market capitalization and sector allocation are inclusive of cash but cash is not displayed in the chart. Top holdings are inclusive of cash but cash is not displayed as a top holding.

Risk metrics are statistical measures designed to show the expected risk for a portfolio and are not a measure of performance. Risk Metrics are sourced from Morningstar, an independent source, and include the impact of cash. Fred Alger Management, LLC, makes no representation that Morningstar is complete, reliable, or accurate.

ROE takes the weighted median of the holdings' return on equity which is calculated as net income divided by shareholders' equity. **R-Squared** reflects the percentage of a portfolio's movements that can be explained by movements in its benchmark. **Sharpe Ratio** was calculated as the portfolio's rate of return less the 3 month T-Bill's rate of return relative to the portfolio's standard deviation less the 3 month T-Bill's standard deviation for the period. Certain products may be subject to restrictions with regard to certain persons or in certain countries under national regulations applicable to such persons or countries. **NOTABLY, THIS INFORMATION IS EXCLUSIVELY INTENDED FOR PERSONS WHO ARE NOT U.S. PERSONS, AS SUCH TERM IS DEFINED IN REGULATIONS OF THE U.S. SECURITIES ACT OF 1933, AS AMENDED AND WHO ARE NOT PHYSICALLY PRESENT IN THE UNITED STATES.** See the country specific disclosures for information regarding the Funds registration and the availability of the prospectus containing all necessary information about the product, the costs, and the risks which may occur. Characteristics are sourced from FactSet, an independent source, using all available data. Fred Alger Management, LLC, makes no representation that FactSet is complete, reliable, or accurate. With the exception of active share, the calculation excludes cash. Equity Holdings for the referenced product represents individual securities held, excluding private placements, private equity, rights, warrants, options, other derivatives, cash or cash equivalents and securities where the total market value in the portfolio is less than one dollar. A list of all holdings can be found at www.alger.com for the applicable fund or composite. P/E Ratios were calculated using a weighted harmonic average, excluding companies with negative earnings. Sales Growth and EPS Growth rates were calculated using a weighted median. **Earnings per share (EPS)** is the portion of a company's earnings or profit allocated to each share of common stock. **Sales Growth** is a measure of the estimated sales growth rate of a company over the next 12-months.

Gross exposure equals the value of both a fund's long positions and short positions. **Net exposure** equals the value of the long positions less its short positions. Fred Alger Management, LLC has changed its methodology as of May 31, 2019 for classifying long put positions as short positions. Previously, such option positions had been treated as long positions. For purposes of calculating Exposure, an option's delta adjusted exposure will be used. Delta adjusted exposure represents the expected amount an option price will change if an option's underlying reference security changed by \$1. The formula for calculating delta adjusted exposure is the number option contracts multiplied by 100 (option multiplier) and multiplied by both the underlying security price and the option's delta (ranges from -1 to 0 for put options and 0 to 1 for call options based on whether option is in- or out-of-the-money). The prospectus, the key information documents or the key investor information documents, the fund regulation or the articles of association as well as the annual and semi-annual reports may be obtained free of charge from the representative. Past performance is no indication of current or future performance. The performance data do not take account of the commissions and costs incurred on the issue and redemption of units. Any of the Fund's short exposure ordinarily would be expressed through a total return swap ("TRS"), which might significantly affect the Fund's performance. Note that in addition to market risk, a TRS subjects the Fund to counterparty risk. For a more detailed description of risks that a TRS poses to the Fund, please refer to the Prospectus. Class A US shares are subject to a maximum front-end sales charge of up to 6.00%. Effective June 13, 2022, the secondary benchmark displayed was changed from the HFRI Equity Hedge (Total) Index – EUR to the HFRI Equity Hedge (Total) Index. No shares in the Alger SICAV or its sub-funds may be offered or sold to U.S. persons or in jurisdictions where such offering or sale is prohibited. The Alger SICAV is authorized by the Luxembourg Supervisory Authority as a UCITS and has only been authorized for public distribution in certain jurisdictions. This material does not form part of the prospectus of the Alger SICAV and is not, and should not be construed as, an offer, invitation or solicitation to subscribe for the shares in the Fund or other sub funds of the Alger SICAV. The Alger SICAV is authorized by the Luxembourg Supervisory Authority as a UCITS and has only been authorized for public distribution in certain jurisdictions. It is the responsibility of any person in possession of this presentation to observe all applicable laws and regulations of any relevant jurisdiction with regard to sales and investment in the Fund or other sub funds of the Alger SICAV. This material is authorized for distribution only when accompanied or preceded by a current prospectus of the Alger SICAV, which contains more information about investment objective, risks, charges, and expenses. Please read the prospectus carefully before investing. Sales of shares in the Alger SICAV, the subject of this fact sheet, are made on the basis of the prospectus only and this fact sheet does not constitute an offer of shares in the Fund or other sub-funds of the Alger SICAV. An investment in the Alger SICAV entails risks, which are described in the prospectus. Investors may not get back the full amount invested and the net asset value of the Alger SICAV will fluctuate with market conditions. Exchange rate fluctuations and Fund charges also affect the return to the investor. The holdings are subject to change. There is no assurance that the Alger SICAV's objectives will be achieved.

Fred Alger Management, LLC uses the Global Industry Classification Standard (GICS®) for categorizing companies into sectors and industries. GICS® is used for all portfolio characteristics involving sector and industry data such as benchmark, active and relative weights and attribution. The Global Industry Classification Standard (GICS®) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's Financial Services, LLC (S&P). Neither MSCI, S&P, their affiliates, nor any of their third party providers ("GICS Parties") makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including warranties of accuracy, completeness, merchantability and fitness for a particular purpose. The GICS Parties shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of such damages. Sector and industry classifications are sourced from GICS. Historical classifications use GICS categories available as of the date of this presentation. Portfolio holdings may change and stocks of companies noted may or may not be held by one or more Alger portfolios from time to time. Investors should not consider references to individual securities as an endorsement or recommendation to purchase or sell such securities. Transactions in such securities may be made which seemingly contradict the references to them for a variety of reasons, including but not limited to, liquidity to meet redemptions or overall portfolio rebalancing.

S&P 500® GBP: An index of large company stocks considered to be representative of the U.S. stock market. Performance is reported in GBP. **S&P 500® GBP Index** performance does not reflect deductions for fees or expenses. **S&P 500®:** An index of large company stocks considered to be representative of the U.S. stock market. **S&P 500 Index** performance does not reflect deductions for fees or expenses. The HFRI Equity Hedge (Total) Index ("HFRI") publishes equally weighted monthly performance based on a number of hedge funds reporting to create a composite, net of fees. HFRI constituents may change without notice. HFRI, therefore, may have possibly lower risk, and differ in asset allocation, portfolio structure, and holdings. Unlike asset-weighting, the equal-weighting of HFRI presents a more general picture of performance of the hedge fund industry. Any bias towards the larger funds potentially created by alternative weightings is greatly reduced, especially for strategies that encompass a small number of funds. HFRI returns are as of the date shown based on the initial provided information and are subject to change. Please visit www.alger.com for the most recent return information. Performance data for the HFRI Equity Hedge (Total) Index is only available on a month-end basis. As a result, since inception performance data for the index is as of the month end prior to the Fund's inception date if the Fund's inception date is on or prior to the 15th or is as of the Fund's inception month end if the Fund's inception date is after the 15th of the month. Investors cannot invest directly in any index. Index performance does not reflect deductions for taxes. **The performance data quoted represents past performance, which is not an indication or a guarantee of future results.**
