

Institutional Euro Government Liquidity Fund

A sub-fund of Institutional Cash Series plc

Class Premier Distributing EUR

ISIN: IE00B41N0724

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to generate a moderate level of income on your investment consistent with maintaining capital and ensuring that the Fund's underlying assets can easily be bought or sold in the market (in normal market conditions).
- ▶ The Fund invests in a broad range of fixed income securities (such as bonds) and money market instruments (MMIs) (i.e. debt securities with short term maturities). It may also invest in deposits with credit institutions (e.g. banks).
- ▶ The Fund's assets will be issued or guaranteed by the governments of countries which were members of the Euro at the time of purchase and shall always be denominated in Euro. They will be rated high quality (i.e. meet a specified level of credit worthiness) at the time of purchase.
- ▶ The Fund will limit its investment to assets which have 397 days or less remaining until the full principal must be repaid. The average time to the date that the full principal must be repaid, or if earlier in the case of floating rate securities, the date of the next interest rate reset of all the Fund's assets will be up to 60 days. The average time until the full principal must be repaid on all the Fund's assets will be up to 120 days. To calculate these averages, figures are adjusted to reflect the relative holdings of each of the Fund's assets.
- ▶ The Fund may also enter into reverse repurchase agreements on a short term basis to generate additional income. Through these, the Fund agrees to purchase government securities from certain eligible third parties for cash and that the seller can buy these back at an agreed time and price.
- ▶ The Fund is a "Short Term Money Market Fund" as defined by the European Securities and Markets Authority. The Fund has an Aaa-mf rating from Moody's and an AAAM rating from Standard & Poor's.
- ▶ The investment manager has discretion to select the Fund's investments.
- ▶ Recommendation: This Fund may not be suitable for investors who seek long-term capital growth.
- ▶ Your shares will be distributing shares (i.e. dividend income will be reinvested daily or paid on the shares monthly where the net return of the Fund (i.e. the return less fees and expenses) is positive). For further information on the dividend policy please refer to the prospectus.
- ▶ The share class seeks to maintain a stable net asset value per share however this is not guaranteed.
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ On any day where the net return of the Fund (i.e. the return less fees and expenses) is negative the Directors may determine to redeem a number of shares equivalent to the amount required to maintain a stable NAV per share. This will take place by way of an automatic share redemption which will reduce the number of shares held by each investor on a pro rata basis. The redeemed shares will be cancelled and the value attributable to those shares will be retained by the Fund to offset the negative return, resulting in a loss of capital to investors
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is €1,000,000,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated one due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- 'Credit Risk' and/or changes to interest rates will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of perceived risk.
- Short Term Money Market Funds do not generally experience extreme price variations. Changes in interest rates will impact the Fund.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

For more information on risks, please see the Fund's prospectus, which is available at www.blackrock.com.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charges figure is based on expenses for the twelve month period ending 31 October 2014. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

For more information on charges, please see the Fund's prospectus, which is available at www.blackrock.com.
