

WisdomTree

Short USD Long EUR 5x Daily

Investment Objective

WisdomTree Short USD Long EUR 5x Daily is designed to provide investors with a 'leveraged short' exposure to US Dollars ("USD") relative to Euro ("EUR") by tracking the MSFX 5x Short US Dollar/Euro Index (TR) (the "Index"), which aims to reflect five times the performance of a position in forward contracts which are rolled on a daily basis.

WisdomTree Short USD Long EUR 5x Daily is an exchange traded currency ("ETC"). Its securities can be created and redeemed on demand by authorised participants and traded on exchange just like shares in a company.

The ETC obtains exposure to the Index by entering into unfunded swaps with a counterparty. There is no upfront cash payment by the Issuer to the counterparty when an unfunded swap is created. However, daily cash payments are made between the Issuer and the counterparty to reflect the movements in the value of the Index.

Separately, the Issuer uses the cash it holds to purchase eligible collateral from the counterparty under a daily reverse repurchase agreement ("reverse repo"), an agreement whereby the counterparty agrees to repurchase such eligible collateral from the Issuer the following day. The eligible collateral is held by the custodian in a custody account.

Index Description

The Index provides a 5x leveraged 'short' exposure to: (i) USD relative to EUR. For example, if USD were to rise in value relative to EUR, the Index (tracked by the ETC) would decrease in value by five times the same amount.

Conversely if USD were to decrease in value relative to EUR, the Index would increase in value by five times the same amount; and (ii) an interest rate differential reflecting the difference between the USD and the EUR exchange rates.

The Index is a total return index, which means that it also provides a collateral yield.

Potential Risks

General investment risk: An investment in an ETC involves a significant degree of risk. Any decision to invest should be based on the information contained in the relevant prospectus. Prospective investors should obtain independent accounting, tax and legal advice and should consult their professional advisers to ascertain the suitability of this ETC as an investment to their own circumstances. The value of securities in this ETC is directly affected by increases and decreases in the value of the Index. Accordingly, the value of a security may go up or down and a security holder may lose some or all of the amount invested.

Currency exchange rate risks: Currency exchange rates can be extremely volatile and such volatility may adversely impact the returns on an investment in the ETC.

Leveraged risks: You should understand that investments in leveraged ETCs held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor.

Investing in collateralised currency securities which track a leveraged currency index is riskier since leveraged currency indices adjust by two, three or five times the exposure of corresponding non leveraged currency indices.

Potential losses in leveraged ETCs may be magnified in comparison to investments that do not incorporate these strategies.

Leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with leveraged exposure and who intend to invest on a short-term basis. Any investment in leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy.

Liquidity risk: There can be no certainty that securities can always be bought or sold on a stock exchange or that the market price at which the securities may be traded on a stock exchange will always accurately reflect the performance of the Index.

Counterparty risk: The Issuer is reliant on there being counterparties available to enter into swap agreements with on a continuing basis and, if no counterparties are willing to do so, the ETC will not be able to achieve its investment policy of tracking the performance of the Index.

Credit risk: The Issuer is subject to the risk that third party service providers may fail to return property belonging to the Issuer or pay money due to the Issuer.

Product Information

Asset Class	Currencies
ISIN	JE00BMM1XD84
Base Currency	EUR
Inception Date	25/09/2014
Currency Hedged	No
Management Fee	0.98%
Daily Swap Rate	0.002466%

Glossary

Authorised participant Banks or other financial institutions that act as intermediaries between issuers of securities and other investors or intermediaries. Authorised participants subscribe for and redeem securities directly with the Issuer and buy and sell those securities to investors/intermediaries either directly or via stock exchanges. **Eligible Collateral** Cash from creations is used by the Issuer to purchase securities that meet certain eligibility criteria from the counterparty under a reverse repo. Such eligible collateral is held by the Issuer in an account in its name with the custodian. **Collateral yield** The collateral yield is the hypothetical interest that an investor would have received on cash equal in value to the underlying futures contracts. **Counterparty** A Counterparty is a bank or financial institution with whom the Issuer enters into swaps or other similar transactions. **Forward Contract** A currency forward contract is an agreement to purchase an amount of one currency with another currency at a certain date in the future ("maturity"). At maturity, a new currency forward contract is purchased with the cash proceeds from the last contract (a process known as 'rolling') so that continuous exposure to the exchange rate is maintained. **Swap or swap agreement** This is where the Issuer enters into contracts with one or more swap counterparties whereby the Issuer receives payments from a swap counterparty when the Index (tracked by the relevant ETC) goes up and the Issuer makes payments to the swap counterparty when the Index goes down. By using swaps, the ETC can efficiently track the upward or downward performance of the Index without having to actually own the underlying constituent(s) which make up the Index. **Unfunded swap** This is a swap whereby the cash from investors is not transferred by the Issuer to the swap counterparties but is retained by the Issuer for use as collateral.

WisdomTree strongly recommends that you do not place undue reliance on these forward-looking statements.

Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor. Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. Please refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in short and/or leveraged exchange-traded products. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.

The products discussed in this document are issued by WisdomTree Foreign Exchange Limited (the "Issuer"). The Issuer is regulated by the Jersey Financial Services Commission. Investors should read the prospectus of the Issuer before investing and should refer to the section of the prospectus entitled 'Risk Factors' for further details of risks associated with an investment in the securities offered by the Issuer.

Securities issued by the Issuer are direct, limited recourse obligations of the Issuer alone and are not obligations of or guaranteed by any of Morgan Stanley & Co International plc, Morgan Stanley & Co. Incorporated, any of their affiliates or anyone else or any of their affiliates. Each of Morgan Stanley & Co International plc and Morgan Stanley & Co. Incorporated disclaims all and any liability whether arising in tort, contract or otherwise (save as referred to above) which it might have in respect of this document or its contents otherwise arising in connection herewith.

The Morgan Stanley Indices are the exclusive property of Morgan Stanley & Co. Incorporated ("Morgan Stanley"). Morgan Stanley and the Morgan Stanley index names are service mark(s) of Morgan Stanley or its affiliates and have been licensed for use for certain purposes by WisdomTree Management Jersey Limited in respect of the securities issued by Issuer. The securities issued by Issuer are not sponsored, endorsed, or promoted by Morgan Stanley, and Morgan Stanley bears no liability with respect to any such financial securities. The prospectus of Issuer contains a more detailed description of the limited relationship Morgan Stanley has with Issuer and any related financial securities. No purchaser, seller or holder of securities issued by Issuer, or any other person or entity, should use or refer to any Morgan Stanley trade name, trademark or service mark to sponsor, endorse, market or promote this product without first contacting Morgan Stanley to determine whether Morgan Stanley's permission is required. Under no circumstances may any person or entity claim any affiliation with Morgan Stanley without the prior written permission of Morgan Stanley.
