KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

U ACCESS (IRL) Trend Macro (the "Fund")

Class: D USD (Capitalisation) IE00BMBMMC48

U ACCESS (Ireland) UCITS P.L.C. is managed by Carne Global Fund Managers (Ireland) Limited

Objectives and investment policy

The Fund seeks to achieve a consistent absolute return performance by investing in 3 asset classes, fixed income, currencies and equity.

The Fund is actively managed and not with reference to a benchmark.

The Fund will employ a long/short approach to achieve its objective. A long investment is an investment where the Portfolio Manager expects the value of the investment to go up. A short investment is an investment where the Portfolio Manager expects the value of the investment to go down.

The Fund will gain exposure to fixed income by investing directly in debt and debt-related securities (which will be either fixed or floating rate, issued by governments, governmental authorities or corporations either rated or unrated with a minimum credit rating at the time of purchase of CCC as rated by S&P (or equivalent by another rating agency) and by using interest rate futures, bond forwards, swaps, options and Exchange Traded Funds (ETFs). In addition, the Fund may invest in Contingent Convertible bonds (CoCos). A CoCo is a debt security that is intended to either convert into equity or have its principal written down upon the occurrence of certain triggers.

The Fund will gain exposure to currencies by investing directly in currencies and by using forwards, swaps, futures and options.

The Fund will gain exposure to equity (including equity indices) by investing directly in shares and by using ETFs, futures, options, Contracts For Difference (CFDs) and swaps.

The Fund shall not exceed in aggregate 10% of its NAV in investments in eligible Collective Investment Schemes (CIS).

The Fund may gain exposure to financial indices compliant with the UCITS Regulations indirectly through the use of FDIs.

The Fund will invest in FDIs for investment, hedging and/or efficient portfolio management purposes. It may also invest in cash and/or cash equivalent instruments.

The Fund's base currency is USD.

The share currency risk in relation to the Fund's base currency is mainly hedged.

The Fund is suitable for investors seeking a long-term investment who are willing to accept a high volatility due to the Fund's investment policy. Investors should note that holding a substantial proportion of their investment portfolio in the Fund may not be appropriate.

The recommended holding period is minimum 3 years.

The dealing Net Asset Value (NAV) is weekly, dated each Wednesday being a full bank business day in Ireland or in New-York (each a Business Day). In other cases, the NAV will be set on the next Business Day. Redemptions are possible on each NAV date as described above. All redemption requests must be received in good order by the registrar and transfer agent prior to 23:59 (Ireland time) two (2) Business Days prior to the NAV Date. Redemption proceeds shall be paid within four (4) Business Days following the NAV Date.

Any income received by the Fund is reinvested (capitalisation share class).

For further information, please refer to the section entitled "Funds – Investment Objective and Policies" in the Prospectus and the sections entitled "Investment Objective" and "Investment Policies" in the Supplement for the Fund.

Risk and reward profile

The indicator above illustrates the position of this Fund on a standard Risk/Reward category scale. The category is chosen based on the volatility of returns.

The category shown is not guaranteed to remain unchanged and may vary over time. Historical data is used in calculating the synthetic risk and reward indicator and may not be a reliable indication of the future risk profile of the Fund. The Fund does not provide its investors with any capital guarantee on performance, nor the monies invested in it, so investors can lose the whole of their investment.

A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 fund is not twice as risky as a category 1 fund.

Risks materially relevant to the Fund which are not captured by the Indicator:

Emerging and Developing Markets Risk: Investing in emerging and developing markets involves additional risks not typically associated with investing in more established economies and markets. Such risks may include greater social, economic and political uncertainty.

Operational Risk: Local custody services remain underdeveloped in many emerging market countries and in certain circumstances the Fund may not be able to recover some of its assets.

Derivatives Risk: The Fund will enter into various financial contracts (derivatives and SFTs) with other parties. There is a risk that the other party to a derivative or SFT will become insolvent or fail to make its payments which may result in the Fund and your investment suffering a loss. Investments in a derivative will not necessarily generate the same return as a direct investment in the underlying asset on which the derivative is based.

Leverage Risk: The Fund implements a high use of leverage. Leverage presents opportunities for increasing both returns and losses because any event which affects the value of an investment is magnified to the extent leverage is employed.

Liquidity Risk: The Fund can from time to time be invested in financial instruments that may have low levels of liquidity.

Currency Risk: The Fund has exposure to securities that are issued in currencies other than the base currency of the Fund. As a result the Fund is subject to currency risk, which arises from changes in the exchange rates.

For more information on risks, please see the section entitled "Risk Factors" in the Prospectus of the Company and the section entitled "Risk Factors" in the Supplement for the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
