#### Investment objective

The PowerShares Global Buyback Achievers UCITS ETF aims to provide investors with investment results which, before expenses, correspond to the price and yield performance of the NASDAQ Global Buyback Achievers Net Total Return Index (a float modified market capitalisation weighted index) in US dollar terms by holding, as far as practicable, all of the Index's constituents in their respective weighting. The portfolio follows the index's semi-annual evaluation and quarterly rebalance.

### Benchmark index description

The NASDAQ Global Buyback Achievers<sup>™</sup> Index is comprised of securities from the NASDAQ US Buyback Achievers<sup>™</sup> Index (comprised of corporations that have effected a net reduction in shares outstanding of 5% or more in the trailing twelve months) and from the NASDAQ International BuyBack Achievers<sup>™</sup> Index (comprised of corporations that have effected a net reduction in shares outstanding of 5% or more in their latest fiscal year).

ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions.

not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting.

### **Risk warnings**

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

When making an investment in an ETF you are buying shares in a company that is listed on a stock exchange.

It is expected that the shares of the ETF will trade closely to its Net Asset Value (NAV), and because of the exchange-traded fund structure, that a significant discount or premium to the NAV will not be sustained over the long term. However, supply of, and demand for, the shares on the relevant exchange together with any disruptions to creations and redemptions of units in the underlying fund may result in share prices that differ significantly from the NAV and there can be no certainty that there will be liquidity in the shares on any exchange. Only Authorised Participants, as defined in the Prospectus of the ETF, can request the Manager to create and redeem units in the underlying fund.

### Important information

<sup>1</sup> The ongoing charges figure is based on annualised expenses. It excludes portfolio transaction costs.

<sup>2</sup> The ETF will, as far as practicable, hold all the securities in the index in their respective weightings.

<sup>3</sup> The Historic Yield reflects the distributions declared over the past twelve months as a percentage of the NAV at the beginning of the next period. Investors may be subject to tax on their distributions.
