a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve the highest possible capital growth. It is categorized as Article 8 SFDR.

- It mainly invests in equities and equity-like securities. It may invest up to 35% via Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect in China A-Shares. It may also hold cash.
- The sub-fund invests in a portfolio of stocks in companies with high profit growth and high profitability that are based and/or conduct the majority of their business activity in emerging markets. Emerging markets are, among others, countries included in the MSCI Emerging Markets Index.
- The sub-fund may use derivatives for hedging purposes.
- The currency of this class is NOT hedged against the sub-fund's main currency. The investor consequently bears the full currency risk.

- The sub-fund is managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- I shares are exclusively reserved for institutional investors.
- Other information: environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors,

legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales prospectus. The following risks have no direct influence on this category, but may still be important:

- Investments in China A-Shares are subject to changes in political, economic and social conditions in China as well as changes in the policies of the PRC government, laws and regulations.
- A company's stock price may be adversely affected by changes in the company, its industry or economic environment and prices can change quickly. Equities typically involve higher risks than bonds and money market instruments.
- Investments in emerging markets entail increased liquidity and operational risks as these markets tend to be underdeveloped and more exposed to political, legal, tax and foreign exchange control risks.
- This share class is issued in a currency different from the sub-fund currency. The investor is therefore exposed to the full currency risk when investing in the sub-fund.
