## Risk considerations

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Compartment offers no capital guarantee or asset protection measures. The Compartment may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.

- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Investments in emerging markets** are generally more sensitive to risk events, such as changes in the economic, political, fiscal and legal environment, as well as fraud.
- **Contingent Convertible ("CoCo") investments** may result in losses when regulatory or issuer-motivated triggering events cause a total loss of the investment or a conversion to equity.

- **Investments in Mainland China** may be subject to capital restrictions and trading quotas (e.g. QFII and RQFII regimes). The Compartment may encounter difficulties or delays in enforcing its rights in the event of disputes.
- **RMB currency risk:** the RMB is not currently a freely convertible currency and is subject to exchange control policies and restrictions.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.

Further information can be found in the prospectus.
