

MARKET VECTORS® UCITS ETFs plc

**Supplement dated 12 May 2015
for
Market Vectors® Gold Miners UCITS ETF**

This Supplement contains specific information in relation to the **Market Vectors® Gold Miners UCITS ETF** (the **Fund**), a sub-fund of **Market Vectors® UCITS ETFs plc** (the **Company**), an umbrella fund with segregated liability between sub-funds and authorised by the Central Bank pursuant to the Regulations.

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the Prospectus of the Company dated 8 December 2014, as may be amended, supplemented or modified from time to time), and should be read in conjunction with the Prospectus for the Company.

THIS DOCUMENT IS IMPORTANT. YOU SHOULD NOT PURCHASE SHARES IN THE FUND DESCRIBED IN THIS SUPPLEMENT UNLESS YOU HAVE ENSURED THAT YOU FULLY UNDERSTAND THE NATURE OF SUCH AN INVESTMENT AND THE RISKS INVOLVED AND ARE SATISFIED THAT THE INVESTMENT IS SUITED TO YOUR CIRCUMSTANCES AND OBJECTIVES, THE RISKS INVOLVED AND YOUR OWN PERSONAL CIRCUMSTANCES. IF YOU ARE IN ANY DOUBT ABOUT THE CONTENTS OF THIS SUPPLEMENT YOU SHOULD TAKE ADVICE FROM AN APPROPRIATELY QUALIFIED ADVISOR.

The Directors of the Company whose names appear in the section entitled **Directors of the Company** in the Prospectus accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

Shares purchased on the secondary market cannot usually be sold directly back to the Fund. Investors must buy and sell Shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value when buying Shares and may receive less than the current Net Asset Value per Share when selling them.

Certain risks attached to investments in the Fund are set out in the Prospectus in the section entitled **Risk Factors**.

1. **IMPORTANT INFORMATION**

Profile of a typical investor

A typical investor is expected to be an informed investor who has taken professional advice, is able to bear capital and income risk, and should view investment in the Fund as a medium to long term investment.

General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the Company and provides general information about offers of shares in the Company. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

An application has been made to The Irish Stock Exchange plc for the Shares of the Fund issued and available for issue, to be admitted to listing on the Official List and trading on the Main Securities Market of the Irish Stock Exchange plc. It is expected that admission will become effective on or about the date of this Supplement. The Prospectus and this Supplement, which includes all information required to be disclosed by the ISE listing requirements, comprises listing particulars for the purpose of the listing of such shares on the Irish Stock Exchange plc.

Neither the admission of Shares of the Fund to listing on the official list and to trading on the Main Securities Market of the Irish Stock Exchange plc nor the approval of the Prospectus pursuant to the listing requirements of the Irish Stock Exchange plc shall constitute a warranty or representation by the Irish Stock Exchange plc as to the competence of service providers to or any other party connected with the Fund, the adequacy of information contained in the Prospectus or the suitability of the Fund for investment purposes

As of the date of this Supplement, the Company does not have any loan capital (including term loans) outstanding or created but unissued and no outstanding mortgages, charges or other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances or acceptance credits, hire purchase or finance lease commitments, guarantees or other contingent liabilities.

Suitability of Investment

You should inform yourself as to (a) the possible tax consequences, (b) the legal and regulatory requirements, (c) any foreign exchange restrictions or exchange control requirements and (d) any other requisite governmental or other consents or formalities which you might encounter under the laws of the country of your citizenship, residence or domicile and which might be relevant to your purchase, holding or disposal of the Shares.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section entitled Risk Factors of the Prospectus and the section entitled Risk Factors of this Supplement for a discussion of certain risks that should be considered by you.

An investment in the Shares is only suitable for you if you are a sophisticated investor and (either alone or with the help of an appropriate financial or other advisor) are able to assess the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment. The contents of this document are not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters.

Distribution of this Supplement and Selling Restrictions

Distribution of this Supplement is not authorised unless accompanied by a copy of the Prospectus and is not authorised in any jurisdiction after publication of the audited annual report of the Company unless a copy of the then latest annual report and, if distributed after the semi-annual report has been

produced, a copy of the then latest published semi-annual report and unaudited accounts is made available in conjunction with the Prospectus and this Supplement. The distribution of this Supplement and the offering or purchase of the Shares may be restricted in certain jurisdictions. If you receive a copy of this Supplement and/or the Prospectus you may not treat such document(s) as constituting an offer, invitation or solicitation to you to subscribe for any Shares unless, in the relevant jurisdiction, such an offer, invitation or solicitation could lawfully be made to you without compliance with any registration or other legal requirement other than those with which the Company has already complied. If you wish to apply for the opportunity to purchase any Shares it is your duty to inform yourself of, and to observe, all applicable laws and regulations of any relevant jurisdiction. In particular, you should inform yourself as to the legal requirements of so applying, and any applicable exchange control regulations and taxes in the countries of your respective citizenship, residence or domicile.

2. **INVESTMENT OBJECTIVE AND POLICIES**

2.1. **Investment Objective**

The Fund's investment objective is to track, before fees and expenses, the price and yield performance of the NYSE Arca Gold Miners Index (the **Index**). For a further description of the Index see the section entitled **Information on the Index** below.

2.2. **Investment Policy**

In order to seek to achieve its investment objective, the Investment Manager will normally use a replication strategy by investing directly in the underlying equity securities of the Index, which currently includes common stocks, ADRs and GDRs of selected companies that are involved in mining for gold and silver and that are listed for trading and electronically quoted on a major stock market that is accessible by foreign investors. In so doing, the Fund may invest up to 20% of its Net Asset Value in securities issued by the same body. This limit may be raised to 35% for a single issuer when exceptional market conditions apply which may include the dominance of a particular issuer in the relevant market.

Where it is not practical or cost efficient for the Fund to fully replicate its Index, the Investment Manager may utilise an optimised sampling methodology. Further detail in respect of this approach is set out in the section entitled **Investment Approach** below.

The Fund may also (or alternatively) invest in financial derivative instruments (**FDIs**) which relate to the Index or constituents of the Index. The FDIs which the Fund may use are futures, swaps, contracts for difference (**CFDs**), currency forwards and non-deliverable forwards (**NDFs**). Futures and CFDs may be used in order to equitise cash balances pending investment of subscription proceeds or other cash balances held by the Fund to seek to reduce tracking error. Currency forwards and NDFs may be used to hedge currency exposures. The Fund may use FDIs as an alternative to direct investment in the constituents of the Index in order to avail of the related cost or liquidity advantages of FDIs which may, in certain circumstances, be available over the direct investment in the constituents of the Index. The Fund may also use American depository receipts (**ADRs**), global depository receipts (**GDRs**) or participation notes (**P Notes**) to gain exposure to equity securities instead of using physical securities in circumstances where, due to local restrictions or quota limitations, it is not possible to hold these directly or where it is otherwise advantageous to the Fund to do so.

The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depository receipts, certificates of deposit, fixed or floating rate instruments, commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short term basis and in anticipation of participation in a rights offering.

2.3. Efficient Portfolio Management

Investors should note that the Fund may also invest in FDIs for efficient portfolio management or hedging purposes. The Fund may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the Fund. This may on occasions lead to an increase in risk profile of the Fund or result in a fluctuation in the expected level of volatility. Please see the section entitled **Risk Factors** in the Prospectus in relation to such risks.

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage would not be expected to be in excess of 100% of the Fund's Net Asset Value.

Investment in FDIs is subject to the conditions and limits contained in the Notices issued by the Central Bank. Subject to these limits, the Fund may invest in FDIs dealt on any of the regulated markets set out in the list of Markets in Appendix II to the Prospectus (and/or over the counter FDIs (OTCs)) which will be used for investment, efficient portfolio management and/or for hedging purposes.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the various risks associated with FDIs and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments. The Fund will only invest in FDIs in accordance with the risk management policy filed with and cleared by the Central Bank

A Fund may invest in FDIs dealt over-the-counter provided that the counterparties to over-the-counter transactions are institutions subject to prudential supervision and belonging to categories approved by the Central Bank.

Position exposure to the underlying assets of FDIs, including embedded FDIs in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the Central Bank's Notices.

In addition, the Fund may enter into stocklending, repurchase and reverse repurchase agreements for efficient portfolio management purposes only subject to the conditions and the limits set out in the Central Bank's Notices. Investors are referred to the section entitled **Use of Financial Derivative Instruments and Efficient Portfolio Management** in the Prospectus.

3. INVESTMENT APPROACH

In order to seek to achieve its investment objective, the investment policy of the Fund is to invest in a portfolio of equity securities that as far as possible and practicable consists of the component securities of the Index. However, under various circumstances, it may not be practicable and possible to invest in such equity securities in proportion to their weightings in the Index. It is not expected that the Fund would invest in securities outside the Index under normal circumstances. In these circumstances, the Fund may use such other techniques including, but not limited to, representative or "optimised" sampling to gain access to stocks which provide economic characteristics similar to the security in the Index. There also may be instances, for example if one or more securities are suspended from trading or in situations where the Fund is forced to liquidate particular securities, in which the Investment Manager may choose to overweight a security in the Index, purchase securities not in the Index which the Investment Manager believes are appropriate to substitute for certain securities in the Index or utilise other investment techniques in seeking to track, before fees and expenses, the price and yield performance of the Index. The Fund may sell securities that are represented in the Index in anticipation of their removal from the Index or purchase securities not represented in the Index in anticipation of their addition to the Index.

Anticipated tracking error is based on the expected volatility of differences between the returns of the relevant fund and the returns of its benchmark index. For a physically replicating ETF, one of the primary drivers of tracking error is the difference between a Fund's holdings and index constituents. Cash management, trading costs from rebalancing and withholding tax suffered by the Fund on any income received from its Investments can also have an impact on tracking error as well as the return differential between the ETF and the benchmark index. The impact can be either positive or negative depending on the underlying circumstances. The anticipated tracking error of a Fund is not a guide to its future performance. The annualised tracking error envisaged is not anticipated to exceed 0.5% under normal market conditions.

4. **INFORMATION ON THE INDEX**

The Index is a modified market-capitalisation weighted index primarily comprised of publicly traded companies involved in the mining for gold and silver. The Index includes common stocks, ADRs and GDRs of selected companies that are involved in mining for gold and silver and that are listed for trading and electronically quoted on a major stock market that is accessible by foreign investors. Only companies with market capitalisations greater than \$750 million that have an average daily volume of at least 50,000 shares over the past three months and an average daily value traded of at least \$1 million over the past three months are eligible for inclusion in the Index. The weight of companies whose revenues are more significantly exposed to silver mining will not exceed 20% of the Index at rebalance.

The Index is rebalanced on a quarterly basis so that the Index components continue to represent the universe of companies involved in the gold mining industry. Changes to the Index compositions and/or the component share weights in the Index typically take effect after the close of trading on the third Friday of each calendar quarter month in connection with the quarterly index rebalance. Further details regarding the Index are available on the Index Provider's website: <https://nyse.nyx.com/indices/index-rules>.

5. **INDEX PROVIDER**

The Index is published by NYSE (the **Index Provider**). The Index Provider does not sponsor, endorse, or promote the Fund and bears no liability with respect to the Fund or any security.

6. **INVESTMENT RESTRICTIONS**

The general investment restrictions as set out in the Prospectus shall apply. The Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes

There may be instances where the weighting of any constituent security of the Index could cause the Fund to breach the investment restrictions set out in the Prospectus. If such an event occurs, it is intended that the Fund will purchase other assets, the effect of which will seek to maintain, so far as is possible, the same economic exposure to and the same weighting of the security of that issuer in the Index without breaching its investment restrictions.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders.

7. **BORROWING**

The Fund may borrow money in an amount up to 10% of the market value of its net assets at any time for the account of any Fund and the Custodian may charge the assets of the Fund as security for any such borrowing, provided that such borrowing is only for temporary purposes.

The Fund may acquire currency by means of a back-to-back loan agreement. Foreign currency obtained in this manner is not classified as borrowing for the purposes of the Regulations provided that the offsetting deposit is denominated in the Base Currency of the Fund and equals or exceeds the value of the foreign currency loan outstanding.

8. **RISK FACTORS**

The general risk factors as set out in the section entitled **Risk Factors** in the Prospectus apply.

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. Therefore, you should consider carefully the following risks before investing in the Fund.

The value of investments and the income from them, and therefore the value of and income from the Shares can go down as well as up and an investor may not get back the amount invested. The Fund's exposure is based on the performance of the Index securities which, in turn, is exposed to general market movements (negative as well as positive).

Certain additional risks may also be associated with the Fund, including, without limitation:

8.1. **Risk of Investing in Gold and Silver Mining Companies**

As the constituents of the Index are concentrated in the gold and silver mining industry, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of gold and silver ore mining companies. Competitive pressures may have a significant effect on the financial condition of gold and silver ore mining companies. Also, gold and silver mining companies are highly dependent on the price of gold and silver bullion, respectively, and may be adversely affected by a variety of worldwide economic, financial and political factors. These prices may fluctuate substantially over short periods of time so the Fund's Share price may be more volatile than other types of investments. In times of significant inflation or great economic uncertainty, gold, silver and other precious metals may outperform traditional investments such as bonds and stocks. However, in times of stable economic growth, traditional equity and debt investments could offer greater appreciation potential and the value of gold, silver and other precious metals may be adversely affected, which could in turn affect the Fund's returns. If a natural disaster or other event with a significant economic impact occurs in a region where the companies in which the Fund invests operate, such disaster or event could negatively affect the profitability of such companies and, in turn, the Fund's investment in them.

8.2. **Risk of Investing in the Basic Materials Sector**

Because the Index is concentrated in the basic materials sector (gold and silver mining companies), the Fund may be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the basic materials sector. Companies engaged in the production and distribution of basic materials may be adversely affected by changes in world events, political and economic conditions, energy conservation, environmental policies, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labour relations.

8.3. **Risk of Investing in Depositary Receipts**

Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Index, may negatively affect the Fund's ability to track the performance of the Index.

8.4. **Risk of Investing in Smaller Companies**

The securities of smaller companies may be more volatile and less liquid than the securities of large companies. As securities of smaller companies may experience more market price volatility than securities of larger companies, the net asset value of any fund which invests in smaller companies (such as the Fund) may reflect this volatility. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive

strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities. Investment in smaller companies may involve comparatively higher investment costs and accordingly investment in the Fund should be viewed as a long term investment. The Fund may however dispose of an investment made by it within a relatively short period of time, for example, to meet requests for redemption of Shares.

8.5. Equity Securities Risk

The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

8.6. Market Risk

The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

8.7. Replication Management Risk

An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not "actively" managed, unless a specific security is removed from the Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

8.8. Premium/Discount Risk

Disruptions to subscriptions and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to the Net Asset Value. If a Shareholder purchases Shares at a time when the market price is at a premium to the Net Asset Value or sells Shares at a time when the market price is at a discount to the Net Asset Value, the Shareholder may sustain losses.

8.9. Concentration Risk

The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Index concentrates in a particular sector or sectors or industry or group of industries. Accordingly, the Fund may be subject to the risk that economic, political or other conditions that have a negative effect on a particular industry and sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

In addition, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer in accordance with the requirements of the UCITS investment restrictions and the requirements of the Central Bank. As a result, the gains and losses on a single investment may have a greater impact on the Fund's Net Asset Value and may make the Fund more volatile than more diversified funds.

8.10. **Absence of Prior Active Market**

The Company is new and thus has no operating history. While Shares are expected to be listed on the Irish Stock Exchange plc and London Stock Exchange, there can be no assurance that active trading markets for the Shares will develop or be maintained. In addition, there can be no guarantee that once Shares are listed on any stock exchange that they will remain listed.

9. **DIVIDEND POLICY**

It is not proposed that the Directors will declare a dividend in respect of the Fund. Full details of any change to a Fund's dividend policy will be provided in an updated Supplement and all Shareholders will be notified in advance.

10. **KEY INFORMATION FOR PURCHASING AND SELLING**

11. CHARGES AND EXPENSES

The following fees will be incurred on each Share by Shareholders (and will not be incurred by the Company on behalf the Fund, and accordingly will not affect the Net Asset Value of the relevant Class of Share of the Fund).

Share Class	A
Preliminary Charge	Up to 5%
Exchange Charge	Up to 3%
Redemption Charge	Up to 3%

The Preliminary Charge is deducted from the investment amount received from an investor for subscription for Shares. Such Preliminary Charge is payable to the Manager.

The following fees and expenses will be incurred by the Company on behalf of the Fund and will affect the Net Asset Value of the relevant Class of Share of the Fund:

Share Class	A
Total Fee	Up to 0.55 % per annum or such lower amount as may be advised to Shareholders from time to time.

The Total Fee, a percentage of the Net Asset Value of the relevant Class of Shares (plus VAT, if any), is payable by the Company out of the Fund Assets to the Manager. The Total Fee will accrue on each day and will be calculated on each Dealing Day and paid monthly in arrears. The Total Fee will cover all of the ordinary fees, operating costs and expenses payable by each Fund including fees and expenses paid to the Manager, all ordinary costs and expenses connected with the management and operating activities of the Fund, including investment management and advisory fees, Director's fees, registration, transfer agency, administration and custody fees, registrar fees, regulators and auditors and certain legal expenses of the Company. The Total Fee does not include extraordinary costs and expenses (including but not limited to transaction charges, stamp duty or other taxes on the investments of the Company including duty charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Company's investments, interest on any non-overdraft credit facility and charges incurred in negotiating, effecting or varying the terms of such facility, any commissions charged by intermediaries in relation to an investment in the Fund and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Company all of which will be paid separately out of the assets of the Fund).

This section entitled **Charges and Expenses** should be read in conjunction with the sections entitled **General Charges and Expenses** and **Management Charges and Expenses** in the Prospectus.

12. **REGISTRATION FOR PUBLIC DISTRIBUTION AND LISTING**

Application is expected to be made to register the Fund for public distribution in various countries.

Application has been made to list the Shares on the Irish Stock Exchange plc. Through the operation of such a secondary market, persons who are not Authorised Participants or not able or willing to subscribe for and redeem Creation Units will be able to buy Shares from or sell Shares to other retail investors or market makers, broker/dealers, or other Authorised Participants at prices which should approximate, after currency conversion, the Net Asset Value of the Shares.

13. **HOW TO BUY AND SELL SHARES**

Investors can buy and sell Shares on the secondary market as described above in accordance with the procedures set out in the section entitled **Secondary Market** in the Prospectus.

Investors can otherwise subscribe for or redeem Creation Shares in accordance with the procedures set out in the Prospectus.

14. **OTHER INFORMATION**

New Funds may be created from time to time by the Directors with the prior approval of the Central Bank in which case further Supplements incorporating provisions relating to those Funds will be issued by the Company.

The Company has the following Funds established as at the date of this Supplement, namely:

1. Market Vectors® Gold Miners UCITS ETF; and
2. Market Vectors® Junior Gold Miners UCITS ETF
