

Mirabaud - Sustainable Global Focus A cap. USD

29 February 2024

Investment Overview

A concentrated, best-ideas global equity strategy that seeks out companies offering sustainable growth. We believe that strong management and an ability to focus on sustainability allows companies to capitalise on their opportunity set. Themes are an important driver for success and can support a company's potential in a low-growth cycle. By following a multi-thematic approach, we can adapt to a changing environment and increase diversification. Managing risk is a priority and we target lower volatility than the average fund in the Global Equity sector.

Approach to Sustainability

We seek out sustainable leaders through deep exploration of the ESG universe - considering financial materiality, company reports, third party research and press coverage. As investors, we build relationships that enable us to challenge companies to do better on, for example, climate change, business ethics and human capital. We follow a three-step process: 1. Exclusion of companies operating in controversial sectors, and companies involved in recent major controversies; 2. Positive screening - aiming to minimise downside risk of the portfolio by only including companies with the top 80% ESG scores; 3. In-depth analysis of material ESG issues for all companies, along with ongoing engagement.

Risk Information

Investments in equities are subject to market and currency risks that won't be hedged. The fund may invest in emerging markets that may be more volatile and expose to higher operational risk than equity markets of well established economies. The fund may invest in equities through structured instruments that would lose their value if their issuer was to default and be unable to meet its contractual obligations. The fund may invest in securities that are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily or because they hold a large portion of their shares. The fund may invest beyond its primary universe which may result in additional risks. Investments in China A Shares in Mainland China are performed through the Shanghai-Hong Kong Stock Connect which may entail additional quota limitation, clearing and settlement, regulatory, operational and counterparty risks. Financial derivative instruments may be used as part of the investment process, which may increase the fund volatility and expose the fund to the risk of default of its counterparties. Investments in share-classes that are not denominated in the fund base currency are exposed to losses and gains caused by currency fluctuations. Cash placed in time deposits or money market funds are exposed to their issuer default risk.

IMPORTANT INFORMATION

This marketing material contains or may incorporate by reference information concerning certain collective investment schemes ("funds") which are only available for distribution in the registered countries. It is for your exclusive use only and it is not intended for any person who is a citizen or resident of any jurisdiction where the publication, distribution or use of the information contained herein would be subject to any restrictions.
