Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to provide a return on your investment through a combination of capital growth and income commensurate with a relatively high level of risk and in a manner consistent with the principles of environmental, social and governance (ESG) investing. The Fund will seek to achieve its investment objective by obtaining indirect exposure to equity securities (e.g. shares), equity-related (ER) securities, fixed income (FI) securities (such as bonds), FI-related securities, alternative assets (such as property and 'hard' commodities, but excluding 'soft' commodities), cash and deposits. FI securities include money market instruments (MMIs) (i.e. debt securities with short term maturities). ER securities and FI-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). 'Hard' commodities are commodities which are natural resources that are mined or extracted (e.g. gold, aluminium, copper, oil and natural gas) and 'soft' commodities are commodities which are agricultural products or livestock (e.g. corn, wheat, coffee, sugar, soybeans and pork). It is intended that the Fund's exposure (direct and indirect) to equity securities will not exceed 90% of its net asset value, however, this exposure may vary over time.

GROWTH OF HYPOTHETICAL 10,000 EUR SINCE INCEPTION

Share Class and Benchmark performance displayed in EUR. Source: BlackRock. Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested. **Past performance is not a guide to future performance.**

% CALENDAR YEAR RETURNS

Share Class performance is calculated on a Net Asset Value (NAV) basis, net of fees in the dealing currency specified and do not include sales charge or taxes. Returns assume reinvestment of any distributions. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.

KEY RISKS: Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.

BLACKROCK®

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	A	MSCI ESG Quality Score (0-10)	7.08
MSCI ESG Quality Score - Peer Percentile	47.27%	MSCI ESG % Coverage	99.58%
Fund Lipper Global Classification	Mixed Asset EUR Agg - Global	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	93.50
Funds in Peer Group	421		

All data is from MSCI ESG Fund Ratings as of **21-Jun-2023**, based on holdings as of **31-Jan-2023**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage (or 50% for bond funds and money market funds).

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.

The Morningstar Analyst Rating is not a credit or risk rating. It is a subjective evaluation performed by the manager research analysts of Morningstar. Morningstar evaluates funds based on five key pillars, which are process, performance, people, parent, and price. Analysts use this five pillar evaluation to determine how they believe funds are likely to perform over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weighting of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflect an Analyst's conviction in a fund's prospects for outperformance. Analyst Ratings are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to <http://corporate.morningstar.com/us/documents/MethodologyDocuments/AnalystRatingforFundsMethodology.pdf>. The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings are based on Morningstar's current expectations about future events; therefore, in no way does Morningstar represent ratings as a guarantee nor should they be viewed by an investor as such. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk and accounting for all sales charges) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods--three-, five-, and 10 years--and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations. Morningstar Rating metrics. Morningstar, Inc.® 2023.
