## SUMMARY OF INVESTMENT OBJECTIVE

The Wellington Emerging Local Debt Fund seeks long-term total returns. The Investment Manager will actively manage the Fund against the JP Morgan Government Bond Index Emerging Markets Global Diversified, seeking to achieve the objective by investing primarily in a diversified portfolio of emerging markets local currency-denominated debt securities. Derivatives may be used, directly or indirectly, to implement investment strategy.

## FUND PERFORMANCE (%)

Past performance does not predict future returns.

Past results are not necessarily indicative of future results and an investment can lose value.

The inception date of the EUR S Acc share class is 5 August 2015. | Periods greater than one year are annualised. | If an investor's own currency is different from the currency in which the fund is denominated, the investment return may increase or decrease as a result of currency fluctuations. | Fund returns shown are net of EUR S Acc share class fees and expenses. Fund returns shown are net of actual (but not necessarily maximum) withholding and capital gains tax but are not otherwise adjusted for the effects of taxation and assume reinvestment of dividends and capital gains. The index returns, where applicable, are shown net of maximum withholding tax and assume reinvestment of dividends. | Please note the fund has a swing pricing mechanism in place. | If the last business day of the month is not a business day for the Fund, performance is calculated using the last available NAV. This may result in a performance differential between the fund and the index. | Source: Fund - Wellington Management. Index - JP Morgan.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. The Overall Morningstar Rating for a fund is derived from a weighted average of the three, five, and ten year (if applicable) ratings, based on risk-adjusted returns. Past performance is no guarantee of future results. © 2022 Morningstar. All Rights Reserved. | Manager ratings provided by Citywire © for rolling 3-year risk-adjusted performance. Citywire's ratings are provided after month-end, therefore please review Citywire's website for current ratings. | Risk and Reward Profile: based on share class volatility. Historical data may not be a reliable indication for the future. Risk category shown is not guaranteed and may shift over time. The lowest category does not mean 'risk free'. Please refer to page 2 for more details about risks.

WHAT ARE THE RISKS?

**BELOW INVESTMENT GRADE:** Lower rated or unrated securities may have a significantly greater risk of default than investment grade securities, can be more volatile, less liquid, and involve higher transaction costs.

**CAPITAL:** Investment markets are subject to economic, regulatory, market sentiment and political risks. All investors should consider the risks that may impact their capital, before investing. The value of your investment may become worth more or less than at the time of the original investment. The Fund may experience a high volatility from time to time.

**CREDIT:** The value of a bond may decline, or the issuer/guarantor may fail to meet payment obligations. Typically lower-rated bonds carry a greater degree of credit risk than higher-rated bonds.

**CURRENCY:** The value of the Fund may be affected by changes in currency exchange rates. Unhedged currency risk may subject the Fund to significant volatility.

**DERIVATIVES:** Derivatives may provide more market exposure than the money paid or deposited when the transaction is entered into (sometimes referred to as Leverage). Market movements can therefore result in a loss exceeding the original amount invested. Derivatives may be difficult to value. Derivatives may also be used for efficient risk and portfolio management, but there may be some mismatch in exposure when derivatives are used as hedges.

**EMERGING MARKETS:** Emerging markets may be subject to custodial and political risks, and volatility. Investment in foreign currency entails exchange risks.

**HEDGING:** Any hedging strategy using derivatives may not achieve a perfect hedge.

**INTEREST RATES:** The value of bonds tends to decline as interest rates rise. The change in value is greater for longer term than shorter term bonds.

**LEVERAGE:** The use of leverage can provide more market exposure than the money paid or deposited when the transaction is entered into. Losses may therefore exceed the original amount invested.

**MANAGER:** Investment performance depends on the investment management team and their investment strategies. If the strategies do not perform as expected, if opportunities to implement them do not arise, or if the team does not implement its investment strategies successfully, then a fund may underperform or experience losses.

**SUSTAINABILITY RISK:** A Sustainability Risk can be defined as an environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment.

Before subscribing, please refer to the Fund offering documents/prospectus for further risk factors and pre-investment disclosures. For the latest NAV, please visit [www.fundinfo.com](http://www.fundinfo.com).
