## Reference Index key features

The DAX ESG Screened Index aims to reflect the performance of the following market:

- German large capitalisation companies listed in EUR on the Frankfurt Stock Exchange

- weighted by free-float adjusted market capitalisation
- Securities issued by entities failing to meet the following ESG standards, amongst others, are excluded: (i) are assigned an ISS ESG Rating of D- or below, (ii) are identified as 'Red' by ISS ESG in their Norms Based Screening, (iii) have any involvement in controversial weapons, (iv) breach certain revenue thresholds in business activities, including, but not limited to, tobacco, thermal coal mining, oil sands, nuclear power, civilian firearms, and military equipment, and (v) have missing ESG data
- Quarterly index review, largest component is capped at 10%

Additional information on the index, selection and weighting methodology is available at [www.dax-indices.com](http://www.dax-indices.com)

## Key Risks

- **The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.**
- The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.
- The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets.
- The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefiting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.
