

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MFM Global Convertible Bonds (the "Sub-Fund") is a sub-fund of MFM Funds (Lux) (the "Fund")

Class R EUR (the "Class") - ISIN: LU1105776642

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The objective of the MFM Global Convertible Bonds Sub-Fund is to increase value in the medium or long term.

The Sub-Fund is actively managed. The Sub-Fund has no benchmark index and is not managed in reference to a benchmark index.

The Investment Manager's focuses on the equity component of the convertible bonds, giving priority to selected issuers or companies with a high value added on the basis of their creditworthiness and their development potential (value of the companies). The investments can benefit from bond yields and take profits from share price rises. There is investment diversification at both the geographical and sectorial levels. The Sub-Fund aims to invest in a worldwide portfolio of convertible securities of any type including but not limited to convertible bonds, convertible notes, convertible preference shares, bonds or certificates or any security with conversion rights or options issued by corporate or public issuers (such as, but not limited to governments, local authorities or supranational entities).

To achieve its objective, the Sub-Fund will have an exposure net of cash of at least 70% directly in the above mentioned securities or indirectly through UCITS and/or UCI or through derivatives. The Investment Manager does not intend to invest into contingent convertible securities nor in convertible bonds which are rated defaulted securities or equivalent by a recognized rating agency at the time of their purchase or which qualify as distressed convertible bonds (as more detailed in prospectus).

Within the limits provided by the 2010 Law, the Investment Manager may also, after deduction of cash, invest up to 30% of the Sub-Fund's assets in debt instruments from any type of issuer, equity and equity related securities, financial derivatives. Total investments in UCITS and/or UCI are limited to a maximum 10% of the Sub-Fund's assets (including money market funds).

For hedging and for any other purposes, the Sub-Fund may use financial

derivative instruments within the limits and descriptions set out in the prospectus. The use of derivative instrument may increase leverage, imply additional costs and risks.

If the Investment Manager considers this is in the best interest of the Shareholders, the Sub-Fund may hold up to a maximum of 100% of its net assets in liquidities, such as deposits, money marketfunds and money market instruments.

Dealing Frequency

The net asset value for the Class is calculated on each bank business day in Luxembourg (the "Calculation Day"), on the basis of the prices as of the preceding business day (the "Valuation Day"). The cut-off time to submit subscriptions/redemptions orders is 12 noon Luxembourg time on the bank business day preceding the Valuation Day.

Distribution Policy

The Class may distribute a dividend.

Currency

The currency of the Class is EUR.

This is a currency hedged class. It aims to reduce the impact on your investment of movements in the exchange rate between the Sub-Fund currency and the Class currency.

Investment Horizon

The Fund may be suitable for investors who are more concerned with maximizing medium to long term returns than minimizing possible short term losses, hence it requires an investment horizon of 5 years.

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

- The risk category shown is not guaranteed and may shift over time.

- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The portfolio of this Sub-Fund consists essentially of mainly in convertible bonds and similar securities of private or public issuers worldwide, which presents a risk/reward profile corresponding to the medium level on the SRRI scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

- **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Credit risks:** The Sub-Fund invests a significant portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the sub-fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
