For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The investment strategy of this Fund is currently capacity constrained which means that the Fund is closed to new subscriptions. The Fund aims to provide long term capital growth (including income) on your investment through the use of an extension strategy. Use of an extension strategy means that in addition to having up to 100% of the Fund's assets exposed to equity securities (e.g. shares) via long positions and/or synthetic long positions, the intention is to enter into synthetic short positions, to achieve additional investment exposure. The investment adviser (IA) will use the proceeds from these to buy additional synthetic long positions (broadly in the same proportion as the short positions it holds). Through a long position the Fund aims to profit by choosing assets that will rise in value. A short position is the sale of an asset which the Fund does not physically own with the aim of buying it later at a lower price to secure a profit.

RATINGS

Key Risks Continued: Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed. The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. The fund invests in fixed interest securities such as corporate or government bonds which pay a fixed or variable rate of interest (also known as the 'coupon') and behave similarly to a loan. These securities are therefore exposed to changes in interest rates which will affect the value of any securities held. The fund invests in high yielding bonds. Companies who issue higher yield bonds typically have an increased risk of defaulting on repayments. In the event of default, the value of your investment may reduce. Economic conditions and interest rate levels may also impact significantly the values of high yield bonds. The fund investments may be subject to liquidity constraints, which means that shares may trade less frequently and in small volumes, for instance smaller companies. The fund invests in fixed interest securities issued by companies which, compared to bonds issued or guaranteed by governments, are exposed to greater risk of default in the repayment of the capital provided to the company or interest payments due to the fund. The fund(s) may invest in structured credit products such as asset backed securities ('ABS') which pool together mortgages and other debts into single or multiple series credit products which are then passed on to investors, normally in return for interest payments based on the cash flows from the underlying assets. The stability of returns from ABS are not only dependent on changes in interest-rates but also changes in the repayments of the underlying loans as a result of changes in economic conditions or the circumstances of the holder of the loan. These securities can therefore be more sensitive to economic events, may be subject to severe price movements and can be more difficult and/or more expensive to sell in difficult markets. The strategies utilised by the Fund involve the use of derivatives to facilitate certain investment management techniques including the establishment of both 'long' and 'synthetic short' positions and creation of market leverage for the purposes of increasing the economic exposure of a Fund beyond the value of its net assets. The use of derivatives in this manner may have the effect of increasing the overall risk profile of the Funds. Investors in this fund should understand that the Fund is not guaranteed to produce a positive return and as an absolute return product, performance may not move in line with general stock market trends as both positive and negative share movements affect the overall value of the fund. The Manager employs a risk management process to oversee and manage derivative exposure within the Fund.

SECTOR BREAKDOWN (%)			
	Fund	Benchmark	Active
Industrials	40.43	16.19	24.24
Health Care	28.66	14.05	14.61

Utilities	-0.90	3.95	-4.86
Real Estate	-1.43	2.49	-3.92

Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change.
