2024	4.56%	3.48%			

Cumulative performance

Monthly Comment

A solid earnings delivery with material buyback announcements, combined with continued optimism on the impact of the AI driven capex boom helped push the European market higher in February. Macro developments in Europe were better than expected, confirming the view that economic momentum is slowly improving. ELEVA European Selection was up 3.43% vs an index up 1.98%, an outperformance of 145 bps.

Sector allocation had a positive impact, thanks to the underweight in consumer staples, the overweight in consumer discretionary, and the overweight in information technology. Conversely, materials, utilities, and financials allocations had a negative impact on performance. Our cyclical bias generally had a positive impact on performance. Stock picking was positive, particularly in health care, materials, and information technology.

Adyen had a very positive move after delivering positive surprises on payments volumes and solid profitability. Cyclical were in favour by investors. **CRH** had record results thanks to a very strong positive pricing composition in the US. **Stellantis** reassured on their outlook and announced a new share buyback. **Unicredit** announced record-breaking levels of cash returns along with resilient net interest income expectations for 2024.

BNP Paribas disappointed investors in Q4 2023 and toned down their medium-term return ambitions. **Dassault Systèmes** warned of a material slowdown in their healthcare vertical, which is likely to affect their near-term growth rates. **Edenred** reacted negatively to an Italian investigation on their bidding practices.

Economic growth was uneven in 2023, with low growth in Europe and in China balanced by an acceleration in the US and good developments elsewhere. Falling inflation expectations reduce the risks of a Central Bank mistake. European macro surprises are now improving in our view, leading the way to a synchronized upturn. In that environment we believe that corporates will be able to grow at a moderate pace. Value and cyclicals were up to 50.8% and 73.5% of the fund respectively.

Since inception, ELEVA European Selection is up 99.78% vs an index up 68.89%, an outperformance of 3,089 bps.
